**Impact on Tariff, Quality of Service**

The proposed change in location will have no impact on tariff, quality of service and performance of the Shakarganj Energy Limited and its obligation under the licence. Because on both locations, the distribution company will be the same i.e FESCO. The type of agreement is same for all bagasse based cogeneration plants at all locations within FESCO boundaries. The terms and conditions in agreement with FESCO are the same at new location, because we are only shifting the same power house from Dargai Shah to Bhone.

There is no capacity addition or subtraction in power plant with change in location and no technological change is being made. So it is kindly requested that this change in location may be made without fee.

We request an early action, as it will be to mutual benefit if this power plant could start functioning properly by end of this year.

With Best Regards,

>
