No. SSPPL/18/NEPRA
December, 2016

Subject: INSTALLATION OF BI-DIRECTIONAL METER AT POF SANJWAL FEEDER FOR NET METERING - 5MW SOLAR POWER PLANT

Pakistan Ordnance Factory has recently installed a Solar Power Plant at POF Sanjwal and 1MW Power is surplus specially on Saturday and Sunday.

2. According to the NEPRA Alternative & Renewable Energy Policy, Net metering is allowed up to 1MW at 11KV or 400V Connection only on Domestic, commercial or Industrial tariff. POF Sanjwal tariff is B-4 (Industrial on 132 KV)

3. It is therefore requested to accord necessary approval for installation of Bi-directional Meter for Net-metering facility on POF Sanjwal feeder at 132KV instead of 11KV as a special case being a defense organization.

Regards

Registered
Projects

Yours Sincerely
Mmm
