Subject: COVER LETTER FOR MULTI YEAR TARIFF PETITION FOR THE  
FY 2020-21 TO 2024-25 HYDERABAD ELECTRIC SUPPLY COMPANY  
LIMITED (LICENSE # 05/DL/2002) DISTRIBUTION BUSINESS

Dear Sir,

Please find the attached Petition of Multi Year Tariff for the FY 2020-21 to 2024-25 on behalf of Hyderabad Electric Supply Company Limited (HESCO) along with the following documents;

- (i) Form No. 1, 2, 3, 4, 5, 7, 8, 12, 13, 16, 17, 18, 19, 20, 21, 22, 23 and 25;
- (ii) An original Demand Draft No. 02765184 dated 01<sup>st</sup> September, 2021 amounting to Rs. 1,121,664/- on account of Petition fee;
- (iii) Affidavit;
- (iv) Board Resolution;
- (v) Vakalatnama.

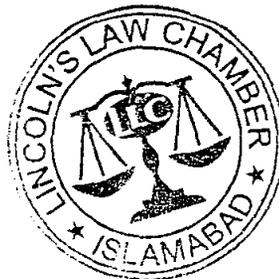

Rs. 1,121,664/-  
cheque.

Through...

# 1. PETITION SUMMARY

## 1.1. Details of the Petitioner

### 1.1.1 Name and address

Hyderabad Electric Supply Company Limited ("HESCO" or the "Company"), WAPDA offices Complex, Hussainabad, Hyderabad.

### 1.1.2 License details

1.1.2.1 HESCO is a licensee of National Electric Power Regulatory Authority ("NEPRA") and holds the Distribution License bearing No. 05/DL/2002

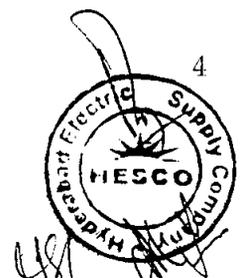

### 1.1.3 Key representatives

1.1.3.1 The petition is being filed through Mr. Rehan Hamid, the Chief Executive Officer of the Company who has been duly authorized by the Board of Directors vide Resolution passed in its 197<sup>th</sup> meeting held on 30<sup>th</sup> August, 2021 to sign and file the Multi Year Tariff ("MYT") Petition for the fiscal years 2020-21 to 2024-25 ("Tariff Period") and also to file a review for leave for motion (if necessary). Grounds for petition

1.1.3.2 Under the "Regulation of Generation, Transmission & Distribution of Electric Power Act, 1997 (hereinafter called as 'NEPRA Act'), the regulator (National Electric Power Regulatory Authority or NEPRA) is empowered to determine tariffs and other terms and conditions for the supply of electricity by the generation, transmission and distribution companies.

1.1.3.3 The Company is licensed public limited company distributing and supplying electricity to the distribution area within its jurisdiction, as set out in the Company's license. In accordance with the requirements of the license, the Company is hereby submitting a petition which sets out a methodology for setting and reviewing tariffs throughout the period of the Company's license, subject to a rebase once every five years.

1.1.3.4 The petition is being filed in accordance with Rule 3(1) (2) of "NEPRA (Tariff Standard and Procedure) Rules, 1998 (hereinafter called as 'Tariff Rules')", NEPRA guidelines for determination of consumer end tariff issued vide SRO 34 (1)/2015, dated 16th January, 2015 and in compliance with the directions of NEPRA to file Multi Year Tariff Petition for the determination of consumer end tariff.

**1.2. Key Aims and Features of the Petition**

**1.2.1 Key aims of the petition**

1.2.1.1 The aim of this petition is to submit the Company’s MYT for the period FY 2020-21 to 2024-25 and to obtain requisite approvals for the immediate implementation of cost reflective tariffs to yield the Company’s required revenues.

1.2.1.2 The key objectives of tariff petition include:

- Ensure its financial viability through timely recovery of its prudently incurred expenditures;
- Ensure that a reasonable return is earned on investments;
- Comply with regulatory standards and future investment for supply of services;
- Provide the utility with a tariff that supports fiscal independence while encouraging future investments in the service area.
- To provide financial sustainability to the Company for the ultimate benefit of end consumers.

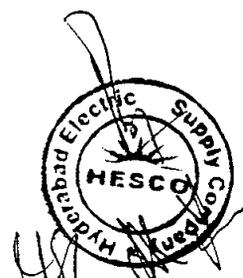

**1.2.2 Summary of key proposals**

1.2.2.1 The petition includes the following key parameters:

No.	Feature	Details
1	Tariff Period	Five year multi-year tariff for the period FY 2020-21 to FY 2024-25
2	Distribution Margin	The existing Distribution Margin (DM) has been modified to consider impact of internal and external factors, including inflationary impacts, increase in regulatory asset base, expansion of service area, increase in salaries, retirement benefits, repair & maintenance and depreciation etc.
3	Indexation of O&M	The O&M cost is being proposed to be indexed to Consumer Price Index (CPI) during the tariff period. For the year 2020-21 the CPI has been taken as average of July 2020 to March 2021 i.e 8.34% and for FY 2021-22 is 8%, for FY 2022-23, 2023-24 & 2024-25 is 6%.
6	Allowance for Additional Hiring	Given the Company’s current constraints relating to human resources and future requirements, a total of 2,721 additional personnel are being proposed to be added to the workforce under different cadres ranging from BS 1 to 20.
7	Creation of New Divisions/ Sub-Divisions	Based on future expansions and related organization requirements the petitioner also proposes the creation of one new circle, 8 new divisions and 24 new sub-divisions during the tariff period.

8	<b>Repairs &amp; Maintenance Costs</b>	The company maintains their operational and other assets on regular basis in order to run the operation smoothly. The repair & maintenance costs has been determined at 2% of net fixed assets at year end.
9	<b>Return on Rate Base</b>	It is proposed that the Company receives 10.95% Weighted Average Cost of Capital (WACC) from NEPRA in its determinations for FY 2019-20, hence the same rate has been projected for the tariff period.
16	<b>Incentive for Loss Reduction</b>	Considering the significance of T&D loss reduction as a primary driver for improved efficiency and hence, customer service, it is proposed that an added incentive be provided to the Company for achieving a T&D loss level target.
20	<b>Prior year adjustments (PYA)</b>	Prior-year adjustments comprises of unrecovered or excess recovery of distribution margin, unrecovered PYA for prior years.
21	<b>Annual Adjustments in Return on Rate Base Computation</b>	It is requested that at the end of every year, the NEPRA when adjusting RORB for variance between actual and budgeted capex, also recalculate the WACC for changes in various input parameters.
23	<b>Retirement Benefit Payments</b>	The company has created a separate fund for the retirement benefits for all employees of supply as well as for distribution business, which needs to bi-furcate in detail through an actuarial. For this petition purpose the retirement liabilities has been bi-furcated proportionately on the basis of Basic pay. And projected on the basis of CPI.
24	<b>Network Rehabilitation</b>	<p>1) Rehabilitation/ replacement is required on those equipment/material at various grid stations and transmission lines which have completed their useful life, have become deteriorated due to excess wear and tear with passage of time. Due to these reasons, they cause frequent faults. Resultantly, many breakdowns occur due to which not only public is suffered but HESCO also sustain heavy financial loss.</p> <p>The objective of the Distribution Rehabilitation Project is to reduce system technical losses, resulting from power losses in the distribution conductors and equipment including losses due to additional current flowing in the system on account of poor power factor of customer loads.</p>
25	<b>Network Expansion</b>	<p>1) The load flow studies identified additional equipment needed, i.e. 132 kV transmission lines, 132/11 kV substations, re-conductoring, additional 2nd circuit, power transformer, capacitor banks and related control equipment etc.</p>

## 2. TARIFF METHODOLOGY

- 2.1.1 NEPRA (Tariff Standard and Procedure) Rules, 1998 which provides details on the tariff setting process and broad parameters of tariff setting contain provision for a formula-based tariff. Additionally, the Rules also provide for a multi-year tariff from 3-5 years for a distribution company.
- 2.1.2 In accordance with the provisions in the said NEPRA Rules, it is submitted in this petition that the Company's tariff be changed to a five-year tariff with indexation every year and rebasing at the end of the five-year control period.
- 2.1.3 The formula-based method of computing the Company's tariff reduces ambiguity for the utility and ultimately benefits the consumers as it reduces yearly volatility in the end-user tariff.
- 2.1.4 The proposed tariff regime seeks to compute yearly revenue requirements of the DISCO based on a five-year investment plan and expected demand for electricity going forward. The tariff broadly comprises:
- a) Pass-through costs: Power Purchase Price (PPP), including impact of T&D losses
  - b) Distribution margin
  - c) Prior-year adjustment
- 2.1.5 The company in view of amended Act has to file tariff petition separately for its supply business and distribution business. This petition is for distribution business hence, the component of power purchase price has been incorporated in the tariff petition of supply business. Therefore, here only distribution margin and prior year adjustment will be requested.

### 2.2. Distribution Margin

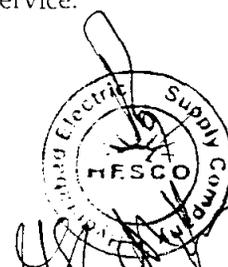

Distribution margin seeks to enable the utility to cover prudently incurred operating costs as well cover costs for securing both debt and equity capital.

#### 2.2.1 Operations and Maintenance Costs

- 2.2.1.1 It is being submitted that the O&M cost is bifurcated into Salaries and other benefits (including post-retirement benefits), repair & maintenance expenses, travelling expenses, vehicle running expenses and other expenses. The O& M cost should be indexed every year as per CPI.

#### 2.2.2 Return on Rate Base

- 2.2.2.1 According to Rule 17(3)(iii) of the NEPRA Tariff Standards and Procedure Rules 1998, tariff should allow the licensee a rate of return, which promotes continued reasonable investment in equipment and facilities for improved and efficient service.

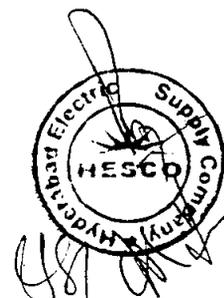

- 2.2.2.2 It is important that returns provided to the DISCO commensurate with the risks associated with the sector. The rate of return should provide for a return which is commensurate with the prevailing cost of funds available in the market and with the risk involved in delivering the utility services.
- 2.2.2.3 The return on rate base to the Company is based on application a Weighted Average Cost of Capital (WACC) to its regulatory asset base. The WACC is in turn based on return on equity and cost of debt weighted proportionately according to the debt and equity on the DISCO's balance sheet.

$$RORB = Rate\ base \times WACC$$

Where,

*Rate base = Average net fixed assets + Closing work-in-progress - Deferred credit - Surplus on revaluation of fixed assets*

### 3. TARIFF ANALYSIS

#### 3.1. Average tariff

3.1.1.1 The following table details the projected components of the Company's tariff for the tariff period.

Detail	2020-21	2021-22	2022-23	2023-24	2024-25
Total Units Purchase (GWh)	5,574.64	5,878.41	6,198.73	6,536.50	6,892.68
Total Units Sale (GWh)	4,013.74	4,283.01	4,588.92	4,916.76	5,268.77
T&D Losses (%)	28.00%	27.14%	25.97%	24.78%	23.56%
<b>Distribution Margin:</b>					
O&M costs	3.01	3.38	3.38	3.37	3.35
Depreciation	0.33	0.35	0.35	0.36	0.35
Return on rate base	0.74	0.86	1.07	1.24	1.40
Other Income	-0.36	-0.34	-0.31	-0.30	-0.28
<b>Total distribution margin</b>	<b>3.72</b>	<b>4.24</b>	<b>4.49</b>	<b>4.67</b>	<b>4.84</b>
Income tax	0.04	0.04	0.04	0.04	0.04
<b>Revenue Requirement</b>	<b>3.75</b>	<b>4.28</b>	<b>4.52</b>	<b>4.71</b>	<b>4.88</b>
Prior year/PPP adjustments	-	-	-	-	-
<b>Total Revenue Requirement</b>	<b>3.75</b>	<b>4.28</b>	<b>4.52</b>	<b>4.71</b>	<b>4.88</b>

#### 3.2. Summary of tariff assumptions

1. *Inflation:* The CPI to be used in indexing the tariff yearly shall be the one notified by the Pakistan Bureau of Statistics. For the purposes of this tariff petition, forecasted inflation rates are 8.34% for the FY 2020-21, 8% for the FY 2021-22 and 6% for the FYs 2022-23 to 2024-25.
2. *Efficiency Factor:* The X factor has been set a 0% for the tariff period.
3. *Target T&D Losses:* The T&D losses target has been set at 27.85% for the first year which gradually reduces to 23.71% by the end of the tariff period.
4. *O&M:* The O&M is set at PKR 3.54/kWh for the first year of the tariff that is subject to the CPI.
5. *Opening Gross Fixed Assets:* The value of the Opening GFA used in the base year of the tariff period has been determined on the basis of the latest available financial statements of the Company as of 30<sup>th</sup> June 2020.
6. *Regulatory Asset Base:* It is calculated as the sum of Opening GFA and capital additions less depreciation, plus capital work-in-progress and less deferred credit.
7. *Rate of Return:* The rate of return of 10.95% has been taken as set by NEPRA in its tariff determination of HESCO for the FY 2019-20.

8. *Return on Rate Base*: RORB is calculated as the Rate of Return on the Regulatory Asset Base of the Company.
9. *Distribution Margin*: The distribution margin of the Company is calculated as the sum of O&M, Depreciation and RORB.

### 3.3. Analysis of key components

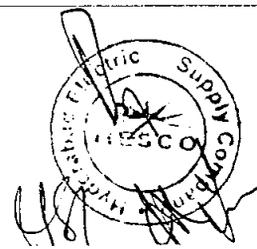

#### 3.3.1 Transmission and Distribution Losses

- 3.3.1.1 To achieve the reduction in target T&D losses, the Company has prepared a Transmission & Distribution Plan, which includes formation of new grids, conversion of existing grids, revamping of secondary transmission (66, 132 KV) lines, augmentation of HT & LT lines, provision of T&P items, induction of low loss transformers, theft detection by enforcement agencies and replacement of sluggish meters, with static meters and upgrade to Automated Meter Reading and Advanced Metering Infrastructure.
- 3.3.1.2 NEPRA has to determine the difference between the units procured and units sold within the distribution service territory that includes the Technical as well as Administrative Losses. In the determination for FY 2019-20, NEPRA had set a T&D Loss target at 19.47% against the projected losses of 27.50% for FY 2019-20, computed on the basis of the market trend and previous year actual losses of 29.5%. The proposed losses were disallowed by NEPRA and allowed T&D losses target of 19.47%.
- 3.3.1.3 A review of the five year historical T&D loss trend indicates that the Company has maintained its T&D losses despite notable impacts of load growth, addition in the distribution network and number of consumers.

Fiscal Year	T&D losses
2013-14	26.51%
2014-15	27.11%
2015-16	26.46%
2016-17	30.74%
2017-18	29.88%
2018-19	29.52%
2019-20	28.90%

- 3.3.1.4 Proposed Transmission and Distribution Losses for FY 2020-21 to 2024-25 are given below:

	FY21	FY22	FY23	FY24	FY25
Transmission Losses 132 kV	2.60%	2.82%	2.79%	2.76%	2.73%
11 kV + Transformer + Cable Metering Loss	10.90%	10.83%	10.74%	10.64%	10.52%
LT Losses	5.03%	4.86%	4.69%	4.50%	4.30%
Distribution Loss	15.93%	15.69%	15.43%	15.14%	14.82%
Total Technical Losses	18.53%	18.51%	18.22%	17.90%	17.55%

Admin. Losses	9.47%	8.63%	7.75%	6.88%	6.01%
<b>Total T&amp;D losses</b>	<b>28.00%</b>	<b>27.14%</b>	<b>25.97%</b>	<b>24.78%</b>	<b>23.56%</b>

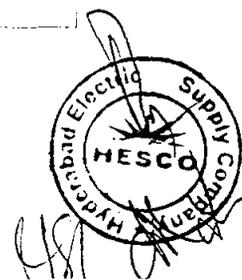

The reasons of high losses are as under:

- i. The worst Law & Order situation does not permit frequent movement to HESCO staff in their jurisdiction. Attacks on employees / offices are common.
- ii. Massive theft of electricity & non-payment culture are the main problems of HESCO. Law Enforcing Agencies are not extending cooperation for providing security to staff and lodging FIRs against stealers of electricity. Out of 3,386 referred cases of electricity theft only 120 No. FIRs has so far been lodged from July-2012 to June-2016.
- iii. Majority of villages/town/colonies are HESCO defaulters, and in case of disconnection, the defaulters blocks the highways/ roads to create hurdles.
- iv. Out of total 3,458.46 KM transmission line 687.12 KM is of 66kV i.e. 19.86%. The transmission system is old and deteriorated, which causes high loss.
- v. Out of 555 feeders, 310 feeders (56%) supplying electricity to rural areas.
- vi. Due to worst Law & Order situation customers stealing electricity through Kunda / Hooking in negated LT lines.
- vii. Even ABC (Aerial Bundled Conductor) installed in Hyderabad City has been damaged by stealers for direct hooking/Kunda.
- viii. Due to above reasons a theft culture has been established in HESCO jurisdiction, but HESCO management is trying best to curtail it, which will take a considerable time.

The matter of fact is that HESCO has taken strong efforts in order to curtail the administrative losses, which includes as follows:

- a) HESCO teams at ground level have taken steps for putting the electricity stealers behind the bars for which FIRs are being lodged.
- b) HESCO teams started the Chowkidara / Night checking through S&I, M&T, special task force and operation circles/Division/Sub-Divisions teams. During last two years 22.025 MKWH units were detected.
- c) HESCO teams started securing of Plazas / Multi Story Buildings in urban areas the detail is as under:

Division	No. of Plazas	No. of Connections
Garikhata	148	5,192
Qasimabad	406	9,632
Latifabad	145	4,108
Phuleli	46	928
<b>Total</b>	<b>745</b>	<b>19,860</b>

d) HESCO teams has replaced the sluggish / defective meters.

Year	No. of Meters
2018-19	95,356
2019-20	74,911
2020-21 upto Mar.21	38,808
<b>Total</b>	<b>209,075</b>

### 3.3.2 Operating and Maintenance Costs

3.3.2.1 A summary of the forecasted O&M Expenses for 2020-21 to 2024-25 is as under:

**Table 3.4: Operating and Maintenance Cost Breakup (PKR million)**

	2020-21	2021-22	2022-23	2023-24	2024-25
Pay and allowances	5,070	6,053	6,933	7,559	8,183
Post-retirement benefits	5,080	5,487	5,816	6,165	6,535
Pay and allow: new hiring	-	372	150	87	39
Repair and maintenance	1,059	1,408	1,291	1,380	1,471
Travelling allowance	225	243	258	273	290
Vehicle maintenance	151	225	370	412	447
Other expenses	190	215	228	242	256
PM assistance package	288	455	449	446	443
<b>Total</b>	<b>12,063</b>	<b>14,458</b>	<b>15,495</b>	<b>16,563</b>	<b>17,664</b>

### Plan for Additional Hiring

3.3.2.2 The Company is a staff deficient company and planning to hire the employees for its smooth operation and achieve efficiency.

3.3.2.3 The following is the year wise plan of hiring along with costs:

**Table 3.5: Summary of new Hiring**

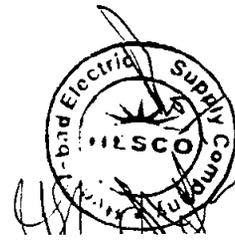

Detail	2021-22	2021-22	2022-23	2023-24	2024-25
	Tentative	Tentative	Tentative	Tentative	Tentative
<b>Number of Employees (A+B)</b>	<b>0</b>	<b>1840</b>	<b>473</b>	<b>279</b>	<b>129</b>
<b>A- Qualified Professionals</b>	<b>0</b>	<b>81</b>	<b>13</b>	<b>6</b>	<b>1</b>
Engineers	0	43	12	6	1
Others	0	38	1	0	0
<b>B- Staff</b>	<b>0</b>	<b>1759</b>	<b>460</b>	<b>273</b>	<b>128</b>
Technical	0	818	224	119	34

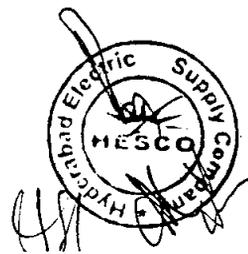

Clerical	0	215	73	43	6
Non Technical	0	726	163	111	88

3.3.2.4 The recruitment will take place in following cadres:

S/No.	Nomenclature of Posts	BPS	FY 2020-21	FY 2021-22	FY 2022-23	FY 2023-24	FY 2024-25

### Basic pay, allowances and employee benefits

3.3.2.5 The pay & allowances for FY 2020-21 have been estimated based on the Company's present strength. Pay & allowances and employee benefits including retirement benefits constitute a major portion of the Company's O&M expenses.

### Retirement benefits

- 3.3.2.6 The company has created a separate fund for the retirement benefits for all employees of supply as well as for distribution business, which needs to bi-furcate in detail through an actuarial. For this petition purpose the retirement liabilities has been bi-furcated proportionately on the basis of Basic pay. And projected on the basis of CPI.

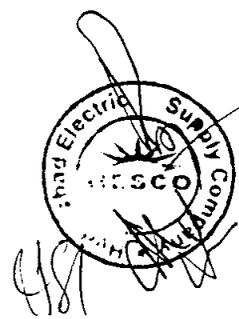

**Table 3.7: Post-retirement Benefits break-up in PKR million**

Head of Account	FY21	FY22	FY23	FY24	FY25
Pension	4,310.20	4,655.01	4,934.32	5,230.37	5,544.20
Free electricity (retired)	157.54	170.14	180.35	191.17	202.64
Medical	426.42	460.54	488.17	517.46	548.51
Leave Encashment	185.99	200.87	212.93	225.70	239.24
<b>Total</b>	<b>4,310.20</b>	<b>4,655.01</b>	<b>4,934.32</b>	<b>5,230.37</b>	<b>5,544.20</b>

NEPRA is requested to allow the above gross amount of retirement benefits in tariff for the tariff period.

#### Repairs and maintenance

- 3.3.2.7 In Tariff Petition for FY 2019-20, the Company requested an amount of PKR 893 million as costs for repair & maintenance. During the hearing, the Company elaborated that such amount shall enable the company to ensure smooth and efficient functioning of the transmission and distribution system in operation. Moreover, it shall contribute to the benefit of the consumers at large by reducing power outages and system breakdowns and also help in reduction of the T&D Losses. However, NEPRA allowed only PKR 490 million and declined the remaining amount of PKR 403 million.
- 3.3.2.8 The Company is of the view, however, that the amount of repair and maintenance allowed by NEPRA in the past has been insufficient to cover the expenditure required to maintain the distribution infrastructure. Past trend of actual expenditure is thus not reflective of the actual requirements of the DISCO. This is because underutilization is partially caused by delays in determination of tariff which is often approved after a significant portion of the fiscal year has already elapsed. This coupled with the subsequent delays caused in procurement mean that the Company is unable to book an expense in its financial statement in the year the repairs were approved.
- 3.3.2.9 It is submitted that, in the Company's view, the repair and maintenance cost requested by the Company was as per its requirement for FY 2019-20, and as such, the cost would be classified as operating expense. Repair and maintenance has never been a part of ELR and DOP. DOP and ELR are the Company's capital projects which are being evaluated as per capital budgeting techniques wherein each and every item is treated as capital expenditure. The repair and maintenance is mainly for standalone items necessary for keeping the system in operation with no additional benefits.

3.3.2.10 The adherence to service standards and improvement of customer services is only possible through continuous repair and maintenance of distribution network etc. Timely repair and maintenance is vital to continuous and reliable supply of electricity. Delays in scheduled repairs ultimately result in system breakdowns which in turn not only has an impact on the end-consumer, including adversely affecting industrial and agricultural production, but also damages the distribution network which then requires further investments. Furthermore, not undertaking routine repairs results in accumulation of faults, with the utility requiring significant investments few years down the line - for an issue that could have been dealt earlier at a significantly lower cost. Repairs are thus an important aspect in controlling the increase in end-user tariff and necessary if distribution loss targets are to be achieved.

3.3.2.11 The R&M expenses have been calculated at 2.5% of net fixed assets at the end of the year. In light of the above NEPRA is requested to allow the Company the following repairs and maintenance expense for the period FY2020-21 to FY2024-25.

Financial Year	2020-21	2021-22	2022-23	2023-24	2024-25
R&M expenses (Rs. in Million)	1,058.77	1,407.76	1,290.70	1,379.71	1,470.92

#### Vehicle running Expenses

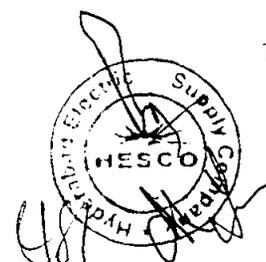

3.3.2.12 The Vehicle running expenses have been calculated on base year and indexed as per CPI. NEPRA is requested to allow the Company the vehicle expense for the period FY2020-21 to FY2024-25 as requested.

#### Travelling and Other operating expenses

3.3.2.13 Travelling expenses are paid to employees in lieu of discharge of duty out of head quarter. These expenses are necessary and company is liable to pay as per travelling rules of the company. Other expenses of the company are almost fixed in nature like building rent, collection expenses, stationary and supplies, legal fees, software license fees, NEPRA license fees, tariff petition fees, photo state expenses, audit fees etc. while collection expense and software license fee are linked to growth in the Company's customers. NEPRA license fee is computed on the basis of the mechanism prescribed by NEPRA and projected annual demand of electricity. All other expenses are increased by CPI during the entire tariff period.

#### Adjustment mechanism for O&M costs

3.3.2.14 Efficiency factor (X) is submitted to be kept 0% during the tariff period to allow the company sufficient time to make investment and to bring in efficiencies in the utility's operations. Further improvements in operational and governance structures at the Company are also expected to increase costs in the first few years and therefore sufficient time should be allowed to the Company to recover these costs.

### Z factor for force majeure events

- 3.3.2.15 There was no provision for costs incurred as a result of force majeure events such as earthquakes, flooding, acts of terrorism, etc. Immense flooding in 2010 for instance caused significant damage to the Company's network. In the absence of a provision for such events and adjustments restricted strictly to the CPI factor, the Company was unable to recoup the costs required to undertake the necessary repairs.
- 3.3.2.16 In this respect it is submitted that an additional Z factor should be included in the MYT to cover costs for such events. These costs shall be computed after the occurrence of such an event at which point the Company shall estimate the financial impact of such an event and request NEPRA's approval for inclusion in the subsequent year. As replacement of any equipment as result of such damage shall be covered through proposed investments to be approved by NEPRA, it is anticipated that major costs falling under Z factor will comprise repair & maintenance costs. In the event that insurance coverage is available at a reasonable cost, recoveries made under such an arrangement will not be incorporated in the tariff for the subsequent period.

### 3.3.3 Return on Rate Base

**Table 3.8: Return on Rate amount in PKR million**

Detail	2019-20	2020-21	2021-22	2022-23	2023-24	2024-25
Fixed assets O/B	49,751	54,055	58,948	64,458	70,012	75,080

WACC	10.95%	10.95%	10.95%	10.95%	10.95%	10.95%
RORB	2,824	2,959	3,664	4,890	6,106	7,395

- 3.3.3.1 The Company's weighted average cost of capital is taken as 10.95%.
- 3.3.3.2 Regulatory asset base for 2020-21 to 2024-25 is shown in required forms.
- 3.3.3.3 The Regulatory Asset Base (RAB) is the gross fixed asset that is used in the distribution activities of the Company. The return on rate base is calculated by applying the WACC on the RAB.
- 3.3.3.4 The details of investments proposed annually are detailed below:

**Table 3.8: Investment in PKR million**

		2020-21	2021-22	2022-23	2023-24	2024-25

<b>Total Investment</b>		<b>2,124</b>	<b>13,480</b>	<b>11,896</b>	<b>13,648</b>	<b>13,437</b>

3.3.3.5 It is also requested that the current investment plan incorporated in this petition be approved.

3.3.3.6 The stated investment plan will result in improvements in its T&D losses and enables the Company enhance its customer base by increasing connections.

3.3.3.7 Proposed impact of investments on T&D losses reduction is detailed below:

Financial Year	2020-21	2021-22	2022-23	2023-24	2024-25
T&D Losses	28.00%	27.14%	25.97%	24.78%	23.56%

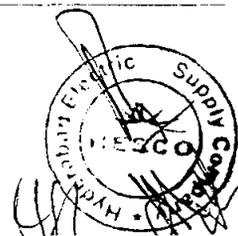

3.3.3.8 As is evident the Company would be able to decrease losses by a cumulative 3.99% over the tariff period.

3.3.3.9 Capital investments shall have a major impact on the operational efficiency and quality of service delivery by HESCO.

3.3.3.10 The company is proposing to create new sub-divisions, divisions and circle on the basis of increase in number of customers and length of lines.

3.3.3.11 The company's plan of new creation of offices is as under:

**Table 3.9: Summary of creation of new Circle, Division and Sub-Divisions**

### 3.3.4 Depreciation

3.3.4.1 Depreciation is charged on written down value (WDV) method. As per Company's policy, building and civil works are depreciated @ 2%, feeders and grids & equipment's @ 3.5%, other plant/equipment and vehicles @ 10%.

### 3.3.5 Other income

3.3.5.1 Other Income includes mark-up on bank deposits, amortization of deferred credit and income from other sources. As there is no clear trend found during the past, hence, other income has been increased by considering moving average of last three financial years.

3.3.5.2 The Late Payment Surcharge has been excluded from the Total Other Income as per decision of NEPRA in the Tariff determination of FY 2014-15.

3.3.5.3 The detail of other income is as under.

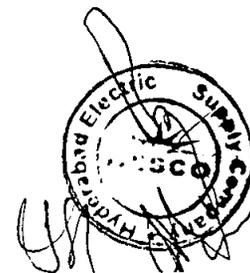

Table 3.13: Other income breakup in PKR million

	FY21	FY22	FY23	FY24	FY25
Non-utility operations	171.45	175.20	166.85	171.16	171.07

3.3.6 Prior year's adjustment

3.3.6.1 Working on PYA is in process.

3.3.7 Other issues

## 4. REVIEW OF ADJUSTMENTS

### 4.1. Annual adjustment

4.1.1.1 Investments made by the Company are added to the regulatory assets base which is used to determine the return on rate base. The difference between the budgeted and actual investment will result in variations in RAB and return on rate base. It is therefore requested that investments should be trued up every year. As a 5 year multi-year tariff has been requested, investment trued up at the end of each year will ensure that appropriate return is allowed on the regulatory assets base for the next year. Further, it will enable NEPRA to monitor performance of the DISCO in terms of timely completion of proposed projects and ensuring prudence in costs so no undue burden is placed on the end-user.

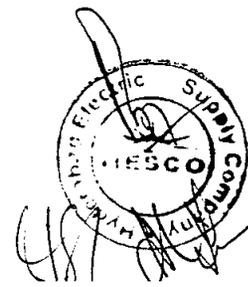

### 4.2. Future Prior Year Adjustments

4.2.1.1 It is proposed to continue Prior Year Adjustments in future periods to address the issues included, but not limited to the following

- Variation in forecasted & actual Distribution Margin, other income and Prior Period Adjustments; and
- Any other adjustment in addition to above.

### 4.3. Rebasing

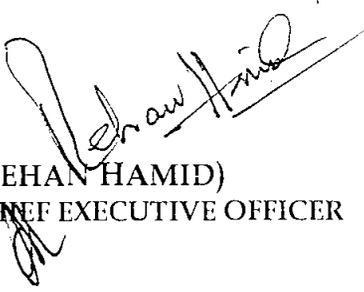

4.3.1.1 NEPRA will rebase tariffs every five years within the period of the Company's license. The rebasing will involve revising the forecast parameters to be used in setting tariffs for the next five years of the license period. This will involve NEPRA approving forecasts of operating costs, investment program, customer numbers and demand growth used in the average distribution margin formula. The average margin formula itself will not be reviewed. NEPRA would be expected to allow the Company a prudent level of operating costs and investment program consistent with forecasts of customer numbers, demand and service network expansion. NEPRA would also be expected to review the efficiency gains achieved by the Company during the previous 5-year period of control with the view to setting appropriate operating efficiency and loss reduction targets for the forthcoming 5-year period.

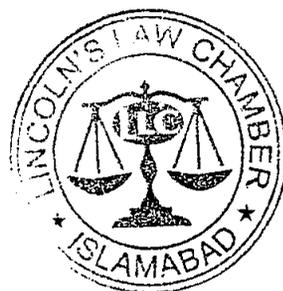

## 5. CONCLUSION AND PRAY

5.1.1.1 On the basis of above it is, inter alia, submitted that while admitting and allowing this petition, the Tariff of the Company for FY 2020-21 to 2024-25 whereby:

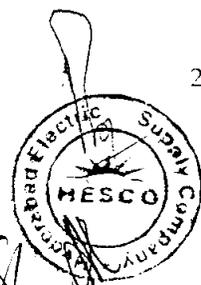

- I. The Company may be benefited by the timely determination and immediate application of the proposed tariff to ensure its financial viability and reliable system of supply of electricity to its consumers;
- II. NEPRA allow the tariff framework proposed herein designed with a view towards providing financial autonomy to the Company.
- III. NEPRA may determine with reasons and allow the Company, on basis of anticipated sale during FY 2020-21 to FY 2024-25, to recover the Revenue Requirement as mentioned in the petition above including Investment Plan of PKR 25,766 million;
- IV. The other periodical adjustments as per determinations of NEPRA may please be allowed to be continued;
- V. The Company may be allowed to create one new circle, 8 new Divisions and 24 new sub-Divisions during the tariff period.
- VI. Annual WACC indexation for RORB calculation for the tariff period.
- VII. Any other relief, order or direction which NEPRA deems fit.
