

Issues for Public Hearing

in the Matter of RFP Submitted by K-Electric for Development of 200 MW Site Neutral Hybrid Power Project

1	What is the rationale for selection of hybrid project? Whether K-Electric has carried out any studies/analysis in this regard and/or whether the basis for selection of 75%:25% criteria for Wind: Solar hybrid solution is justified?
2	What are the synergies as a result of hybrid solution that could lead to lower cost?
3	4Whether the proposal of K-Electric to hold up to 49% equity share in the SPV is prudent/acceptable under the prevailing applicable laws?
4	Whether it is justified to evaluate the bids based on combined generation and transmission tariff?
5	Whether the prequalification of the bidder has been followed by K-Electric as per the provisions of NCBTR-2017?
6	Whether it is justified to develop the project under BOO regime?
7	What would be mechanism for acquisition and pricing of land?
8	What would be the indexation mechanism in the tariff?
9	Whether the criteria for technical and financial evaluation is acceptable?
10	Whether the proposed Bid Evaluation Committee is in compliance with NCBTR-2017?
11	Any other issues after the approval of the Authority.
