Zephyr Power (Pvt) Limited

November 12, 2014

The Registrar National Electric Power Regulatory Authority (NEPRA) NEPRA Tower Attaturk Avenue (East), Sector G-5/1, Islamabad-Pakistan.

Subject: <u>Revised Tariff Petition for 50 MW Wind Power Project at Gharo of Zephyr Power</u> (Pvt.) Limited

DR-I/SAR

copy to:

SATI

- m=

The company, Zephyr Power (Pvt.) Limited by virtue of Board of Resolution dated October 24, 2014, is pleased to submit Revised Tariff Petition of 50 MW Wind Power Project at Gharo, Sindh. The tariff is submitted in pursuant to the relevant provision of the NEPRA (Tariff Standards and Procedure Rule, 1998), read with the Provision of the Regulation for Generation Transmission and Distribution of Electric Power Act (XL of 1997) and the Rules and Regulations made there under; And in accordance with the RE Policy 2006; and the Guidelines for Determination of Tariff for Wind Power Generation 2006.

We had obtained Tariff Determination and Generation License on May 24th, 2012 and July 27th, 2012 respectively based on Sinovel SL 82 1,5 MW turbines.

This Tariff Application has been revised given M/s Sinovel Wind Co. Ltd ("Sinovel"), our original Engineering, Procurement and Construction ("EPC") vendor, is unable to perform on the executed agreement. The Sinovel EPC expired in 12 months i.e. September 2012 and we received Letter of Support ("LOS") in January 2013. Unfortunately due to financial crisis faced by Sinovel, they are unable to renew their EPC to Zephyr Power and are not in business in Pakistan.

Now we have received a complete turnkey offer i.e. Engineering, Procurement and Construction ("EPC") and Operation & Maintenance ("O&M") contracts from M/s Vestas Wind Systems A/S ("Vestas") based on a more modern turbine i.e. Vestas V100 2.0 MW wind turbines.

We have revised Feasibility Study and submitted to AEDB based on Vestas V100 2.0 MW turbines.

Similarly we revised the Grid Interconnection Study based on Vestas V100 2.0 MW turbines and submitted to National Transmission Despatch Company ("NTDC")

Now we are awaiting the following approval

- a) Approval of Feasibility Study from AEDB
- b) Approval of Grid Interconnection Study from NTDC

has doywin Some dup

68-B, Sindhi Muslim Housing Society, Karachi-74400, Pakistan. Tel: 021-4315646, Fax: 021-4315647-48, E-mail: director@zephyrpowerltd.com

Zephyr Power (Pvt) Limited

The Revised Tariff petition (including its Annexure) is submitted in triplicate; with the requisite tariff fee of **PKR 551,808/-** in the form of pay order in the name of National Electric Power regulatory Authority. The original pay order and affidavit are attached herewith and the copies of the same are annexed to the petition.

Please note we are submitting the Revised Tariff Application including costs to be incurred under the Sind Sales Tax ("SST") (as of July 01, 2014) Taxable Services as per Second Schedule of the Services Act, 2011. As per this Act the Project Company is obliged to pay SST to Sind Government on Contracting, Consultancy, Advisory and all forms of Services. We have incorporated the cost of SST even though the Renewable Policy 2006 states that taxes are not leviable on renewable projects. We understand that the Renewable Policy applies to Federal taxes whilst the SST is a Provincial Government tax.

We request NEPRA to clarify the status of SST. Would SST be treated as a Pass Through item for purposes of our Tariff Award?

All the costs of SST relating to EPC and O&M Contracts and all Service Contracts have been consolidated and shown under one heading. The total amount of SST is USD 17.880 million. This naturally has huge impact on Project Cost and Levelized Tariff.

The cost of operating and maintaining turbines of higher outputs is certainly higher than those of lower outputs. This is common knowledge in all types of operating equipment i.e. low speed vs. high speed operations.

The award of tariff for O&M costs should not be less than the cents/kwh awarded to Zephyr Power in its first tariff award based on Sinovel turbines. Please note the energy output was 158 GWH with Sinovel turbines and it is now 174.3 GWH with Vestas turbines.

We look forward to responding positively for early determination of conclusion in order to achieve the project completion with timelines in the national interest of Pakistan and to develop the renewable energy based power generation capacity in the country.

Thanking you

For and on behalf of Zephyr Power (Pvt.) Limited

Zephyr Power (Pvt) Limited

EXTRACTS OF THE MINUTES OF THE BOARD OF DIRECTORS MEETING OF ZEPHYR POWER PRIVATE LIMITED HELD ON OCTOBER 24, 2014 AT ZEPHYR POWER OFFICE KARACHI, PAKISTAN

RESOLUTION

"RESOLVED THAT Zephyr Power Private Limited ("Company") be and is hereby authorized to file a Revised Tariff Petition for submission to National Electric Power Regulatory Authority for determination of the reference generation tariff in respect of the Project and in relation thereto, enter into and execute all required documents, make all filings and pay all applicable fees, in each case, of any nature whatsoever."

"FURTHER RESOLVED THAT in respect of filing a Revised Tariff Petition for submission to National Electric Power Regulatory Authority, Mr. Zia Khaleeli being Chief Executive of the company be and are hereby authorized and empowered for and on behalf of the Company to:

(i) Review, execute, submit, and deliver the Revised Tariff Petition and any related documentation required by National Electric Power Regulatory Authority for the determination of the reference generation tariff, including any contracts, documents, powers of attorney, affidavits, statements, letters, forms, applications, deeds, guarantees, undertakings, approvals, memorandum, amendments, letters, communications, notices, certificates, request statements and any other instruments of any nature whatsoever;

(ii) Represent the Company in all negotiations, representations, presentations, hearings, conferences and/or meetings of any nature whatsoever with any entity (including, but in no manner limited to National Electric Power Regulatory Authority any private parties, companies, partnerships, individuals, governmental and/or semi-governmental authorities and agencies, ministries, boards, departments, regulatory authorities and/or any other entity of any nature whatsoever);

(iii) Sign and execute the necessary documentation, pay the necessary fees, appear before the National Electric Power Regulatory Authority as needed, and do all acts necessary for completion and processing of the tariff petition and procuring National Electric Power Regulatory Authority's tariff determination;

(iv) Appoint or nominate any one or more officers of the Company or any other person or persons, singly or jointly, in their discretion to make communicate with, make presentations to and attend the National Electric Power Regulatory Authority hearings;

(v) Do all such acts, matters and things as may be necessary for carrying out the purposes aforesaid and giving full effect to the above resolutions/ resolution'

4.1.3 BASIS OF PETITION

U,

Under the "Regulation of Generation, Transmission and Distribution of Electric Power Act (XL of) 1997, hereinafter referred to as the NEPRA Act, National Electric Power Regulatory Authority("NEPRA") is responsible, inter alia, for determining tariffs and other terms and conditions for the supply of electricity by the generation, transmission and distribution companies and to recommend these to the Federal Government, subject to the need to comply with guidelines, not inconsistent with the provisions of the NEPRA Act, laid down by the Federal Government. NEPRA is also responsible for determining the process and procedures for reviewing tariff and recommending tariff adjustments.

Zephyr Power (Pvt.) Limited ("ZPL", "the Company") is a private limited company registered under the Companies Ordinance 1984. ZPL has been setup as a Special Purpose Company to setup and operate power projects.

The Company is seeking to develop, own and operate a 50 MW wind farm Independent Power Producer ("IPP") Project ("the Project") in the province of Sindh.

The Alternative Energy Development Board ("AEDB") issued us a Letter of Intent ("LOI") in February 2005.

In May 24, 2012, ZPL was awarded by NEPRA the Negotiated Tariff ("NT") based on Sinovel SL 82 1.5 MW wind turbines. In July 2012 ZPL had received the Generation License for the aforementioned technology.

Sinovel due to its own financial crisis was unable to deliver the project to ZPL.

Hence ZPL is required to submit its Revised Tariff Petition based on a different technology and price quote.

This Revised Tariff Petition is based on the Vestas Wind Systems ("Vestas") V 100, 2.0 MW Turbine. Vestas also undertaking the Engineering, Procurement & Construction ("EPC") and long-term Operations & Maintenance ("O&M") Contract.

This is the first such single point of responsibility contract to be signed for a wind power project in Pakistan.

This development approach is consistent with the guidelines in the Renewable Policy for the Government of Pakistan ("GoP", "Government").

The Policy is under the purview of the AEDB. The AEDB Policy for Power Generation through Renewable Energy ("RE") has taken into account the relevant provisions of the RE Power Policy 2006.

4.1.4 COMPLIANCE WITH TARIFF STANDARDS AND PROCEDURES

:

1

In accordance with the requirements of the NEPRA Act and Rules and Regulations made there under, ZPL hereby submits this petition, in accordance with the NEPRA Tariff Standards and Procedures Rules 1998 for tariff determination for its facility located at Gharo, District Thatta.

This petition is being filed under Rule 6 of NEPRA Generation Licensing Rules, 2000. Tariffs have been prepared on the basis of the Guidelines presented in the Ministry of Water and Power / AEDB's "Guidelines for Determination of Tariff for Wind Power Generation 2006".

4.2 FACTS AND GROUNDS OF PETITION

4.2.1 RATIONALE FOR WIND POWER

Pakistan has increased its reliance on the electricity generated through thermal sources (fuel oil and natural gas) over the years. This, coupled with fluctuating oil prices, has adversely affected Pakistan's oil import bill. This is not only an economic threat as any shortfall in fuel supply but can further deteriorate power crisis presently prevalent in Pakistan.

The solution is to generate energy through renewable sources such as water, wind, and sunlight. Renewable sources of energy are currently unevenly and insufficiently exploited in Pakistan.

Hydropower is economical but hydropower projects take a very long period to develop. Large hydro power projects not only require huge outlays but also are not environment friendly and are being discouraged worldwide. Most of the hydro resources are located in the areas where access is very difficult and distance to grid is very long. Therefore despite strong efforts from the government, it is difficult to attract private investors to take-up these projects.

Photovoltaic (or more popularly solar) energy is at its initial stages of evolution in Pakistan, is more land intensive, and not does not benefit from the economies of scale as in Wind Power.

The only recourse in the short term is wind power generation. Although it is new technology in Pakistan, it has been around for long enough internationally to become commercially viable.

The GoP has initiated an aggressive program to encourage the induction of renewable energy as a mainstream source for power generation.

The AEDB has identified significant sources of renewable energy in geographic areas which have a sustainable potential for high year round electricity generation. As an initial thrust, the Gharo - Jhimpir corridors in district Thatta have been identified as a very viable location for Wind Farms supplying the Utility Companies.

The development of wind generation projects supports the environmental objectives of the GoP by reducing dependence on fuels for thermal power generation, increasing diversity in Pakistan's electricity generation mix, and reducing greenhouse gas (GHG) emissions through the avoidance of thermal power generation and help reduce the exorbitant deficit of foreign exchange.

14

4.2.2 PROJECT BRIEF

Zephyr Power (Pvt.) Limited ("ZPL") is a locally incorporated company which is currently in the process of setting up a 50 MW Wind Power Farm. The electricity generated will be sold to the Central Power Purchasing Agent ("CPPA") namely the National Transmission and Distribution Company ("NTDC").

The Project will be located at Gharo (Bhambore) region in District Thatta. The Government of Sindh through AEDB has allocated Land for the project.

The Project is being developed based on the Vestas V100 2.0 MW wind turbine generators as per General Specification. These will be installed at a hub height of 80 meters.

Vestas is the largest wind turbine manufacturer of the world.

4.2.3 PROJECT SUMMARY

Project Description			
Project Name	Zephyr Power (Pvt.) Limited		
Installed Capacity	50 MW		
Turbine Supplier	Vestas		
Wind Turbine Specification	V100 2.0 MW		
Total Wind Turbines	25		
EPC Contractor	Vestas		
O&M Contractor	Vestas		
Estimated Generation by RISOE	174.3GWh		
Project Costs	USD 150.672 million		
O&M Costs			
Years 1-2	USD 1.914 million /year		
Years 3-10	USD 3.437 million /year		
Years 6-10	USD 3.725 million /year		
Years 11-20	USD 3.725million /year		
Financing of Debt	Dollars / Rupees (50% Foreign and 50% Local)		
Loan Term	10 years		
Grace Period	24 Months		
Repayment Schedule	Quarterly		
Interest Rate	KIBOR + 3.0% for Rupees		
	LIBOR + 5.2% for Dollar		
Levelized Tariff	14.74 cents/kwh		
ROE	17%		

 \mathcal{N}

4.2.4 CARBON CREDITS

The Project is able to benefit from receiving carbon credits under the Clean Development Mechanism ("CDM"), one of the three mechanisms established by the Kyoto Protocol to meet an objective of stabilizing greenhouse gas concentrations in the atmosphere.

While it appears possible to realize monetary gains from CDM, the actual timing, amount and other details of the outcome are quite uncertain at this point and may remain uncertain until after the plant becomes operational.

Thus proposed that the tariff for the Project be approved independent of the outcome of the Carbon credits and any incremental income from carbon credits will be allocated to ZPL.

4.3 PROPOSED REFERENCE GENERATION TARIFF

4.3.1 TARIFF CONTROL PERIOD

J

The proposed tariff is for the life of the Project which is 20 years from the COD. The tariff is divided into four (04) bands i.e. year 1-2, Year 3-5, year 6-10 and year 11-20 to cover the variations due to debt repayment period, varying O&M and administrative costs during the Warranty Period and Post Warranty Period.

W

17

4.3.2 PROPOSED REFERENCE GENERATION TARIFF

The Reference Generation Tariff for the Project over the 20 years concession term is given below. The reference Generation Tariff Table has been made on the Net Annual Energy Output of 174.3GWh.

See Annexure 13.8.2.

RD-Hill Training

4.4 TARIFF STRUCTURE

4.4.1 INTRODUCTION

The two necessary components to determine the negotiated tariff have been outlined below –

1) Wind Resource Production Estimates

The wind assessment analysis report has been conducted by Vestas and for application for tariff purposes, by RISOE.

2) Project Installation and Operational Costs

The tariff has been structured to cater for the project costs covering:

- Project Installation Costs
 - Engineering Procurement and Construction ("EPC")
 - Project Development
 - Financial Charges
 - Pre COD Insurance
 - o Interest During Construction
 - o Duties and Taxes
 - Sind Sales Tax
 - o L/C Charges
- Project Operational Costs
 - o Administration and Management
 - Operational and Maintenance ("O&M")
 - Debt Service
 - Capital Repayment
 - Interest Payment
 - o Insurance
 - Return on Equity ("ROE")
 - Return on Equity During Construction ("ROEDC")

Additionally, in order to properly match the actual expected expenditure, the proposed tariff should include the appropriate escalable components and actual cost structures of the Project based on source of charges, so that the tariff is properly adjusted to account for any change in the Project's revenue requirements with regards to inflation, foreign exchange, interest rates, etc.

The present working is based on Rs 103.00 = US 1.00 and US 1.27 = Euro 1.00 at October 24, 2014.

4.4.2 WIND RESOURCE PRODUCTION ESTIMATES

Ĵ

This section presents the preliminary Production Estimates for the ZPL's wind farm. The production estimate has been calculated using data from 50m ZPL mast located proximate to the project site.

The production estimate has been calculated based on one turbine type; The Vestas V100, hub height 80 meters, rotor diameter 100 meters, rated power of 2000 kW.

Power curves corrected to an air density of 1.179 kg/m^3 have been used in the production calculations. The production estimates include array losses due to shadowing effects (wake effects) from one turbine to another within the wind farm.

AEDB has verified the energy output generation at 174.3 GWH (P50) calculated by RISOE National Laboratory, Denmark

Based on the RISOE report, the following main results have been derived:

Wind turbines	V100 2.0 MW
Hub height (m)	80
No. of turbines	25
Total installed capacity (MW)	50
Gross Energy Estimate (P50) (GWh/year)	193.7
Net Energy Estimate (P50) (GWh/year)	174.3
Net Capacity factor	39.79%

Detail working and description of the energy estimate is available in Feasibility Study which is submitted to AEDB.

The technical details of the Vestas V100 are enclosed in Employer Requirements Annexure.

4.4.3 PROJECT INSTALLATION COSTS

1

U

4.4.3.1 BREAKDOWN OF THE TOTAL PROJECT COST

Following reflects a breakdown of the total Project cost of USD 150.672 million.

Total Project Cost	Million USD	
EPC Cost		
Off Shore Costs	77.978	
On Shore Costs	32.982	
Total EPC Costs	110.960	
Non EPC Costs		
Project Development	6.058	
Financial Charges	4.044	
Pre COD Insurance	1.498	
Interest During Construction	8.369	
Duties and Taxes	0.663	٩.
Sind Sales Tax	17.880	
L/C Charges	1.200	
Total Non EPC Costs	39.715	
Total Project Cost	150.672	

4.4.3.2 CHOICE OF TECHNOLOGY

The first Tariff Application was submitted based on the Sinovel SL 1.5 MW Turbine. Due to financial problem faced by Sinovel, they are no more interested in Pakistan and the contractual EPC and O&M documents have since lapsed.

ZPL thereafter approached four technology vendors, in order to secure a new Feasibility Study and apply for new Negotiated Tariff. All four are actively participating in Pakistan

- 1) Vestas (Denmark),
- 2) Goldwind (China),
- 3) Nordex (Germany) and
- 4) GE Wind (U.S.A).

Only Vestas and Goldwind responded to the Request for Proposal ("RFP").

Vestas had originally offered their V90, 2.0 MW. Since these turbines will be discontinued as of 2015, Vestas revised their proposal and offered the V100, 2.0 MW Turbine.

We have now submitted our revised Feasibility Study and undertaken the Grid Interconnection Study on the basis of Vestas V100 2.0 MW turbines.

With Vestas it has been possible for ZPL to arrange debt financing locally and abroad.

The Project Company selected Vestas as our single- source vendor (turbine technology, and Engineering, Procurement and Construction ("EPC") and Operations and Maintenance ("O&M") Contractor) to develop the 50 MW Wind IPP.

Please note the Vestas V100, 2.0 MW is a newer technology and is operating worldwide.

Furthermore this is Vestas' entry into Pakistan as the first single source vendor and service provider. Vestas will supply the technology, and will also undertake the complete EPC and the O&M on the Project. This one window for installation and operation is attractive to both Investors and Lenders.

4.4.3.2.1 EPC COST

Following reflects a breakdown of the EPC cost of USD 110.960 million, which has been negotiated is aligned with what has been allowed for the comparable projects located in Gharo (i.e. Zephyr (Sinovel), Tenaga (GE), and Fauji I and II (Nordex) that have received Determination of NTDC in the Matter of Tariff Petition.

EPC Cost	Million USD	
Off Shore Costs	77.978	
On Shore Costs	32.982	
Total EPC Costs	110.960	

Off Shore Cost and On Shore Cost cover all EPC costs.

EPC Contractor is responsible for managing and coordinating all site activities as per in a standard EPC contract.

The EPC Contract has a scheduled commercial operation date of 16 months from Notice to Commence.

Given the location of the Project on inter-tidal lands, this necessitates the use of deep piles for both the turbines and building foundations. Similarly construction of roads and WTG hardstands is not a simple process in these conditions. There is a huge cost to be incurred for pile foundations, roads and WTG hardstands constructed on inter tidal lands.

The Project Company has given allowed an additional 1 month to the EPC Contractor to complete the Project. In return the Project Company negotiated that the EPC Contractor will to exclude the erection and installation risk factor during high wind periods.

4.4.3.3.1.6 TRAVEL EXPENDITURES

The Project Company shall incur traveling costs of both domestic and international routes, on its Executives, Consultants, Advisors and other personnel related to the Project.

4.4.3.3.1.7 LEGAL AND FINANCIAL ADVISORY / CONSULTANCY

The Legal and Financial Advisory / Consultancy Charges relate to the technical and legal consultants costs relating to negotiation of EPC and O&M Contracts with Vestas, are included. Financial Advisory charges for raising debt and equity are included under this head.

4.4.3.3.1.8 BANK CHARGES

....

This is composed of bank guarantee charges for obtaining Performance Guarantee charges for issuance of LOS

4.4.3.3.2 FINANCIAL CHARGES

J

Financial charges include the costs related to the debt financing of the Project. Such costs include the Lead Arranger's up-front fee, facility management fee and commitment fee.

Upfront fee and facility management fee are payable to the Lead Arranger. The commitment fee shall be applied every year on the un-drawn amount of the debts (not expected to be prolonged). Financial charges have been estimated in line with the prevailing market conditions and NEPRA's previously approved determinations; These do not include L/C charges applied on the contract with Vestas.

Description	Value in USD Million
Total Project Value	150.672
Interest During Construction	8.369
Financial Charges	4.044
Total Project Cost (ex IDC & Fin Charges)	138.259
Total Debt Value(adjusted based on Cap Structure)	103.649
Total Charges (% Adjusted Debt)	
Arrangement Fees	2.115 (2.04%)
Lenders Advisor Fees	1.358 (1.31%)
Commitment Fees	0.290 (0.28%)
Agency, Monitoring and Security Trustee Fees	0.083 (0.08%)
L / C Commissioning	0.197 (0.19%)
Total Financial Charges (% Adjusted Debt)	4.044 (3.90%)

ZPL structured the debt component of the capital structure at 50% foreign / 50% local. However it requests that NEPRA allow adjustments in the debt mix and cost of funds based on actual at the time of achievement of FC as has been permitted to other wind farm projects in their Tariff Determination by National Electric Power Regulatory Authority.

The debt is provided with a Grace Period of up to 2 years and a repayment period of ten (10) years. This is consistent with the Renewable Energy Policy, 2006, which total of 12 years.

The Project Company has asked for the maximum ceiling of Grace Period of 24 months.

The Project has an Expression of Interest ("EOI") letter from United Bank Limited ("UBL"). Copy of EOI is attached.

The Project Company has contacted EKF ("Denmark Export Credit Agency"), the Danish development financing institution ("DFI"), to secure the foreign debt component of the capital structure. EKF is a Government of Denmark entity. Well over 50% credit and risk guarantees and debt finance worldwide is allocated by EKF for sale of Danish wind turbines.

Recently a EKF, IFU and Vestas delegation visited Pakistan and confirmed interest in providing credit and risk guarantees and debt finance to Vestas projects in Pakistan. ZPL has the first of Vestas EPC and O&M contracts in Pakistan. Given that this is EKF's first wind IPP investment in Pakistan, the Project Company has yet to finalize terms and related charges.

EKF and Pakistani Banks await our submission of Tariff Application before engaging in formal dialogue for a Term Sheet.

]

0

4.4.3.3.3 PRE COD INSURANCE

Insurance during Construction cost covers the insurance cost of Project company's assets during construction as well as the cost incurred prior to COD. These cost estimators have been developed based on offer received from one of the leading international insurance company. The insurance company has experts readily available to provide insurance premium estimates for the wind power Projects.

The Project Company, in view of the practices set by the other IPPs in Pakistan and in accordance with the requirements set out by the Lenders funding the Project, intends to procure the following insurances during the construction phase of the Project:

(a) Marine Cargo

- (b) Marine Delay in Start Up ("MDSU")
- (c) Construction, Erection All Risk Insurance (CEAR) including Third Party Liability
- (d) Advance Loss of Profits / Delay in Startup ("ALOP" or "DSU")

The insurance cost also covers administrative surcharge, Federal Excise Duty and Federal insurance fee, in each case relating to Insurance during Construction.

The cost of Insurance during Construction is US\$ 1.498 million.

4.4.3.3.4 INTEREST DURING CONSTRUCTION ("IDC")

IDC shall be applied for 24 months i.e. the Grace Period indicated in the Term Sheet.

The Interest during Construction is as follows:

Description	Value in USD Million	
Total Debt	113.004	
KIBOR (24 th October, 2014)	10.19%	
Spread	300 basis points	
Interest Rate (KIBOR)	13.19%	
LIBOR (24 th October, 2014)	0.32%	
Spread	520 basis points	
Interest Rate (LIBOR)	5.52%	
Grace Period	24 months	
Total Interest During Construction	8.369	

Actual IDC shall be subject to change depending on the fluctuation in base rate (6 month KIBOR and 6 month LIBOR) and changes in Project cost including changes due to taxes and duties.

IDC shall be calculated for the period starting from first drawdown of loans after Financial Close based on accrued interest for the outstanding debt on semi-annual basis. The Grace Period shall start from the date the banks release first payment of loans.

Therefore the IDC is estimated figure which is adjustable at COD based on actual timing and amount of loans drawdown during the Project Construction Period after the Financial Close.

The total cost of IDC is US\$ 8.369 million.

4.4.3.3.5 DUTIES AND TAXES

4.4.3.3.5.1 CUSTOMS DUTY

The source rules regarding customs duty are driven under the RE Policy 2006 (the Policy), Guidelines for Determination of Tariff for Wind Power Generation 2006 (the Guidelines) and the Government of Pakistan.

4.4.3.3.5.2 SPECIAL EXCISE DUTY

Special Excise Duty is assumed at 0% as the same is correlated with the rate of customs duty (assumed 0%). In case the Project has to pay 5% customs duty (in the event the customs authorities bring the import under Para 11 of the SRO) then the Special Excise Duty at 1% is leviable. Accordingly, the Petitioner prays NEPRA to allow adjustment of capital cost of the Project and the tariff, in each case, for actual customs duty paid, at COD.

4.4.3.3.5.3 SALES TAX

No Sales Tax is assumed on import and local supply of the imported plant, equipment, and machinery etc., based upon the SRO and recent Notification SRO 369 (1)/2011 dated May 07, 2011 issued by the Government of Pakistan, Federal Board of Revenue

4.4.3.3.5.4 INCOME TAX

No income tax is assumed at import stage in view of the SRO 947(1)/2008 dated September 05, 2008 and SRO 263(1)/2011 dated March 19,2011.

4.4.3.3.5.5 SINDH INFRASTRUCTURE DEVELOPMENT SURCHARGE ("SIDS")

0.85% of the imports for the Project have been assumed as SIDS. The chargeability of Sindh Infrastructure Development Surcharge (the SIDS) is based on the weight of the imported equipment / items and the distance of the Site from the port. Since the imported equipment is expected to be of haulage load and has to travel considerable distance from the port, maximum rate of SIDS has been assumed in the Project Cost.

In case any taxes (customs duty / sales tax / income tax etc) are levied, contrary to above, the same should be reimbursed to the Project Company on the basis of actual levy at the time of COD.

4.4.3.3.6 SINDH SALES TAX ("SST")

The Sindh Sales Tax (as of July 01, 2014) Taxable Services as per Second Schedule of the Services Act, 2011 to be levied on EPC Contract, O&M Contract and all Services agreements with Zephyr Power.

We have assumed 15% Sales Tax is payable on all the above heads of expenditure.

4.4.3.3.7 L/C CHARGES

.....

1

IJ

L/C Charges have been stated at \$1.2 million. Given that the Project Company has selected a vendor who is working for the first time directly in Pakistan we ask that NEPRA allow for the maximum L/C Charges.

30

4.4.4 PROJECT OPERATIONAL AND MAINTENANCE COSTS

9

O&M expenses are one the major unknowns for the wind developers in Pakistan. The sponsors of this Project have a lot of experience involving wind project. It is important to note the O&M costs are not as low in wind projects as perceived by many in Pakistan. Today's modern wind turbines are built from over 8,000 different components. Furthermore, unexpected components failure, especially electronic controls, generators, rotor blades etc have driven up operations and maintenance costs. This is even more critical in Pakistan where the temperature in the windy months is also very high and machines have to work in almost full capacity in extreme weather. Despite these factors the maintenance costs are lesser as compared to mainframe cum fuel costs of thermal generators.

O&M costs for the Project is US cent 2.008 per year over the 20 years life of the Project. These O&M Costs of the project are in line with these of other wind farm projects in Pakistan.

WTG supplier of the Project Vestas is providing the O&M services for the first 10 years of operations under separate O&M Contract covered under manufacturer's warranty.

This fact of increasing O&M costs for wind turbines is also supported by finding recently released by the European Wind Energy Association (EWEA) in its report, The Economics of Wind Energy. In the last 05 years large wind turbines are being developed with reduced cut-in speed to increase the power production and to drive down the cost of electricity. This trend in wind turbine size escalation also comes with increased uncertainty regarding O&M activities.

Vestas rather than outsource the O&M Contract has provided the Project Company with their global AOM 4000 for period of 10 years.

The AOM 4000 is a comprehensive service package including supply for ten years of all necessary main components and material to maximise uptime and performance.

The service contract covers periods up to 10 years, suitable for customers who want the traditional time-based availability guarantee of up to 95%.

In view of the above, the O&M costs suggested by the Project Company in the Petition are well within the range of international benchmarks and experience in Pakistan. This is the humble request of the petitioner that the O&M cost presented below may be allowed to run the project efficiently for sustainable development of wind industry in Pakistan.

31

The O&M cost includes the following:

Cost Head	Year 01-02	Year 03-05	Year 06-10	Year 11-20
Foreign O&M	1,050,000	2,375,000	2,625,000	2,6325,000
Sind Sales Tax @15%	157,500	356,250	393,750	393,750
Sub Total Foreign O&M	1,207,500	2,731,250	3,018,750	3,018,750
Local O&M				
Annual Administrative Cost	37,000	37,000	37,000	37,000
Payroll / Allied Expenditures	455,000	455,000	455,000	455,000
Fixed Assets	20,000	20,000	20,000	20,000
Vehicles fuel and maintenance	35,000	35,000	35,000	35,000
Travel Expenditures	95,000	95,000	95,000	95,000
Miscellaneous	64,200	64,200	64,200	64,200
Sub Total of Local O&M	706,200	706,200	706,200	706,200
Total O&M Cost	1,913,700	3,437,450	3,724,950	3,724,950

4.4.4.1 FOREIGN TECHNICAL SUPPORT AND O&M

Vestas is obligated to carry out the O&M service in the first 10 years of the Operation Period

However, in the years 11-20 the Project Company has to carry out the O&M itself. It will certainly require the technical support from the WTGs manufacturer and other equipment manufacturer, as well as a Technical Consultant from outsource may also be required.

During this period costs will remain high as the plant ages and breakdowns are more likely and frequent.

The Sindh Sales Tax (as of July 01, 2014) Taxable Services as per Second Schedule of the Services Act, 2011 to be levied on EPC Contract, O&M Contract and all Services agreements with Zephyr Power.

We have assumed 15% Sales Tax is payable on all the above heads of expenditure.

4.4.4.2 LOCAL O&M

4.4.4.2.1 ANNUAL ADMINISTRATIVE COST

This portion of the O&M Cost includes office building rents, telephones and utilities

4.4.4.2.2 PAYROLL / ALLIED EXPENDITURES

The payroll costs includes salaries, wages & benefits of all staff as follows

- a) Management Executives
- b) Technical and Operations department
- c) Wind Farm O&M Team
- d) Commercial & Legal Affairs department
- e) Finance department

- f) Training and Human Resource Department
- g) Supply & Logistic Department

These staff members shall be employed by the Project Company at the Project site and in Karachi Office.

4.4.4.2.3 FIXED ASSETS

This includes cost of vehicles, office equipment, furniture, electrical appliances and tools required at site for inspection of WTG equipment.

4.4.4.2.4 VEHICLE FUEL AND MAINTENANCE

This component includes the costs associated with the running and maintenance of vehicles at the Site offices of the Project Company. This includes the vehicles required by the security personnel for securing the site; vehicles required for supervision and coordination of O&M activities, vehicles for administration needs.

The vehicles purchased during the Construction Period shall be used for first 10 years of the O&M period. At the start of the 11th year, the old vehicles shall be retired off and replacement vehicles shall be procured by the Project Company in each year as the depreciated and worn off vehicles are laid off. The level of fuel and maintenance costs shall be maintained for the remainder of the Project Terms.

4.4.4.2.5 TRAVEL EXPENDITURES

This portion of the O&M Cost includes associated domestic and international travels.

4.4.4.2.6 MISCELLANEOUS

This portion of the O&M Cost includes miscellaneous expenditure during operation period.

Ц.

4.4.5 INSURANCE DURING O&M

The insurance Cost consists of the insurances required under the implementation Agreement and those customarily required for project financing transactions, including all-risk insurance / reinsurance, business interruption insurance, and machinery breakdown, natural calamities, sabotage and terrorism. As these risks are an impediment to the smooth and efficient running of the day-to-day affairs of the Project, it is critical that all the risks associated with the Project are adequately addressed and all the insurable events are catered for in a fool proof manner. Keeping in view the generally adopted global trends and the magnitude of the Project, a comprehensive operational insurance and reinsurance arrangement is a fundamental task of the Project.

The operational phase of the Project Company will be insured by the one of the leading brokers in the insurance world.

Moreover, Lenders financing the Project will require insurance of the Project's assets on replacement cost basis, which will be inevitably in foreign currency as the EPC Contracts are also denominated in US Dollars. It is expected that any replacement costs consequent to the insurable event will also be incurred in US Dollars.

The Project company, in view of the practices set by the other IPP's in Pakistan and in accordance with the requirements set out by the Lenders, proposes to the procure the following insurance during the operational phase of the Project:

- a) "All Risks" and Machinery Breakdown Insurance including Third Party Liability
- b) Business Interruption

The insurance cost shall be charged by the Project Company at actual up to 1.35% of EPC Cost, and will be recoverable as the insurance cost component. The insurance cost also covers administrative surcharge, Federal Excise Duty and Federal Insurance Fee, in each case relating to Operational Phase insurance.

The total cost of insurance during O&M is USD 1.498 million on basis of 1.35% of the EPC cost be charged at actual.

4.4.6 RETURN ON EQUITY

4.4.6.1 RETURN ON EQUITY DURING CONSTRUCTION ("ROE DC")

The ROE DC will be accrued and shall be determined as actual at the time of COD according to the actual disbursement of equity drawdown. The ROE DC has been estimated separately in this petition and shall form part of Reference Tariff true-up calculations at COD on the basis of actual equity draw down.

4.4.6.2 RETURN ON EQUITY ("ROE")

ZPL has proposed 17% ROE (IRR based), net of 7.5% withholding tax on dividends, in line with the standard for Wind IPP's under the negotiated tariff ("NT") in Pakistan.

4.5 INDEXATION, ESCALATIONS AND COST ADJUSTMENT

 \Box

The purpose of indexation is to remove any exposure of an investor to cost escalations, over the life of the Project, over which they have, no direct control. With that principle in mind, the following sections discuss the proposed indexation for various components of the tariff.

Indexation formulae have been prepared taking into account the guidelines presented in the Ministry of Water and Power / Alternate Energy Development Board's, "Guidelines for Determination of Tariff for Wind Power Generation 2006".

Based on approved Determination in Matter of Tariff Petition we have replicated and noted below the indexation applicable to O&M and

4.5.1 ADJUSTMENT TO OPERATIONS & MAINTENANCE

F O&M (LREV) = F O&M (FREV) = /1.0 \$)	O&M (LREF) * WPI (REV) O&M (FREF) * US CPI (REV)/238.031 • ER (REV) /ER (Rs.103
Where:	
F O&M (LREV)	The revised applicable fixed O&M local component of tariff
F O&M (FREV)	The revised applicable fixed O&M foreign component of tariff indexed with US CPI and exchange rate variation
O&M (LREF)	The reference fixed O&M local component of tariff for the relevant period
O&M (FREE)	The reference fixed O&M foreign component of tariff for the relevant period
WPI (REV)	The revised wholesale price index (manufactures) / alternative index determined by the Authority

WPI (REF) wholesale price index (manufactures) notified by the Federal Bureau of Statistics / alternative index determined by the Authority (refer to proceeding note).

US CPI (REV) The revised US CPI (all urban consumers)

US CPI (REF) 238.031 US CPI (all urban consumers) for the month of October 2014 as notified by the US Bureau of Labor Statistics

ER (REV)

The revised TT & OD selling rate of US dollar as notified by the National Bank of Pakistan

Based on our understanding the Authority is in process of establishing an alternative index for WPI (manufacturers) which has been discontinued by the Federal Bureau of Statistics since August 2011. Upon determination of alternative index by the Authority, we are to understand that the reference indexation value shall be revised with the alternative index value.

4.5.2 ADJUSTMENT TO INSURANCE COMPONENT

Per guidance from NEPRA, we ask that insurance denominated in US \$, insurance cost component of tariff will be adjusted on account of US\$/PKR exchange rate variation on annual basis.

Further, per guidance from NEPRA we ask that insurance component of the reference tariff will be adjusted as per actually incurred prudent costs, subject to maximum of 1.35% of the approved EPC cost, on annual basis upon production of authentic documentary evidence by the petitioner.

4.5.3 ADJUSTMENT TO RETURN ON EQUITY

Consistent with the aforementioned Indexations, we ask that NEPRA adjust the return on equity component of the tariff on the basis of the TT & OD selling rate of the US Dollar as Notified by the National Bank of Pakistan according to the stated formula:

ROE(REV)=ROE(REF) X ER(REV) / ER(REF)

Where:

- ROE (REV) Revised return on equity component of tariff expressed in Rs/kWh
- ROE (REF) Reference return on equity component of tariff expressed in Rs/kWh.
- ER(REV) The revised TT & OD selling rate of US dollar as notified by the National Bank of Pakistan
- ER(REF) The reference TT & OD selling rate of US dollar

4.5.4 ADJUSTMENT TO RETURN ON EQUITY DURING CONSTRUCTION

We ask that NEPRA remain consistent with the Project and that the return on equity during construction component of tariff will be adjusted on the basis of revised TT & OD selling rate of US Dollar as notified by the National Bank of Pakistan according to the following formula:

ROEDC(Rev) = Where:	ROEDC(REF) x ER(REV) / ER(ReF)
ROEDC (REV)	Revised return on equity during construction component of tariff expressed in Rs/kWh.
ROEDC (REF)	Reference return on equity during construction component of tariff expressed in Rs/kWh.
ER(REV)	The revised TT & OD selling rate of US dollar as notified by the National Bank of Pakistan

ER(REF) The reference TT & OD selling rate of US dollar

4.5.5 ADJUSTMENT TO INTEREST RATES

We ask that the adjustment of interest rate due to variation in 6 months LIBOR/KIBOR, be allowed while the fixed component spread of 5.20% on 6 months LIBOR and 3.00% on 6 months KIBOR remaining the same, according to the following formula:

For foreign financing

A I = P(REV) * (LIBOR (REV) - 0.32%) / 2

Where:

1

the variation in interest charges applicable corresponding to variation in 6 months LIBOR. A I can be positive or negative depending upon whether 6 months LIBOR (Rev) per annum > or < 0.32%. The interest payment obligation will be enhanced or reduced to the extent of A I for each half year under adjustment.

P(REV) is the outstanding principal (as indicated in the attached debt service schedule to this order at Annex-II) on a biannual basis at the relevant six monthly calculations date.

We understand that foreign debt and its interest will also be adjusted on bi-annual basis on account of actual variation in PKR/US \$ over the applicable reference exchange rate.

For local financing

A I = $P(REV) \cdot (KIBOR (REV) 10.19\%) / 2$

Where:

A I the variation in interest charges applicable corresponding to variation in 6 months KIBOR. I can be positive or negative depending upon whether 6

ΑI

months KIBOR (Rev) per annum > or < 10.19%. The interest payment obligation will be enhanced or reduced to the extent of I for each half year under adjustment.

P(REV) is the outstanding principal on a biannual basis at the relevant six monthly calculations date.

4.5.6 TRUE-UP AT COMMERCIAL OPERATION DATE

NEPRA should allow the ZPL to adjust the Project cost at COD, which shall in turn affect the other relevant tariff components. The reference Tariff Table shall be revised at COD, while taking into account the said adjustments. The adjustments are requested for the following

- a) US\$ / PKR exchange rate variations during the Construction Period;
- b) All such Project cost heads, which are subject to be adjusted, as per actual;
- c) IDC for increase in Project Cost, change in interest base rate (KIBOR) and variation in actual debt drawdown;
- d) ROE DC on actual equity drawdown;
- e) All local duties and taxes

) |) f) All financial charges by the Lenders of the Project.

40

4.6 ENERGY PURCHASE AGREEMENT ("EPA") CONSIDERATIONS

4.6.1 MONTHLY ENERGY PAYMENTS

As per the policy, the wind risk is guaranteed by the Government of Pakistan and the tariff is based on the monthly benchmark energy table based on the monthly benchmark wind speeds. Therefore, monthly payments shall be made for the benchmark energy produced by the Project.

Further, the bonus payments are also applied on any energy produced over and above the benchmark energy. The standard EPA approved by the GOP provides for payment of bonus energy on monthly basis. There is no differentiation in the RE Policy between the timing for payments for monthly benchmark energy and bonus payments. NTDC has in recent negotiations shifted the bonus payments towards the end of the year on the argument that "NEPRA's determination was silent on this issue". It is most unfair for a Project to be penalized for the shortfall energy (shortfall from the monthly benchmark energy) on a monthly basis, but not allowing the quid pro quo of the 10% bonus payment also on monthly basis.

The petitioner therefore asks NEPRA state explicitly in the tariff determination that bonus energy payments should also be made on monthly basis. If this is not agreed, then any shortfall energy payments should also be referred for payment at the end of year. It is proposed to allow payments of bonus energy on a monthly basis in the same manner as the payment of benchmark energy is made are made by the Power Purchaser under the EPA. For each month, the benchmark energy and the bonus energy (if produced) shall be determined and paid by the purchaser.

4.6.2 INCORPORATION OF INDEXATION, ESCALATIONS AND COST ADJUSTMENTS

It is understood by the Project Company that the reference Tariff is approved along with the aforementioned indexations, escalations and cost adjustments.

Therefore, for the approval purposes, NEPRA shall determine the Reference Tariff and shall side by side approve / allow the indexation, escalations and cost adjustments. At any given time, the payable tariff shall be after incorporation of indexations, escalations and cost adjustments in the Reference Tariff as applicable at that time.

41

4.7 TARIFF ASSUMPTIONS

The following have been assumed while calculating the Reference Generation Tariff and Changes in any of these assumptions will result in changes in the Reference Generation tariff.

- I. Debt: Equity ratio is assumed to be 75:25.
- II. 50% Local 50% Foreign of Debt has been assumed to be financed through banks and financial institutions.
- III. Interest rate for debt is assumed in local currency at 6-Month KIBOR plus 3.0% Spread), to be indexed semi-annually.
- IV. A constant ROE of 17% (IRR based) is assumed (net of 7.5% withholding tax on dividends) over 20 years. The ROE DC shall be accrued at time of COD according to the actual schedule of equity disbursement.
- V. Exchange Rate (PKR /USD) is taken @ PKR 103.00 per USD at October 24th, 2014.
- VI. All Taxes (Federal, Provincial, Local or district), stamp duties and levies etc which are not factored in the tariff calculation shall be treated as pass through items, in term of EPA.

VII. No customs duties and income tax have been considered for imports. Any changes in the customs duties or any other duty or tax on import of equipment and material will be treated as "pass through" to the Power Purchaser. Similarly, customs duties on spare parts after COD will be "pass through" to the Power Purchaser.

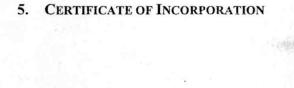

- VIII. No withholding tax has been considered in the Off-Shore Contract with Vestas. Any additional tax, if levied, will be "pass through" to the Power Purchaser.
 - IX. 7.5% withholding tax on dividend is assumed. Any changes in the aforesaid withholding tax regime will be "pass through" to the Power Purchaser. General Sales Tax and all other taxes will also be treated as a "pass through"
 - X. Usually, the Zakat deduction on dividends (Currently @ 2.5%), as required to be deducted under Zakat Ordinance, is considered as "pass through". However, for a foreign investors, the deduction of Zakat will be exempted in this Project.
 - XI. Sindh Infrastructure Development Surcharge @0.85% of the imports for the Project has been assumed.
- XII. Sindh Sales Tax @15% on EPC Contract, O&M Contract and all Services agreements has been assumed.
- XIII. The return on Equity or the construction and commissioning period shall be adjusted on IRR basis at the time of COD according to the actual Equity disbursement during such period
- XIV. The Power Purchaser / NTDC shall be exclusively responsible for the financing of construction, operation and maintenance of the interconnection and Transmission lines as per the prevailing policy at the time of tariff determination.
- XV. Main Energy meter and electronic recorder for continuous recording of readings will be provided by NTCD at its own cost.
- XVI. Financing Terms are as yet based on the initial discussion with the financial institutions and hence are subject to final negotiations once tariff has been determined by NEPRA and the EPA / IA are signed. This will include mainly the debt-equity ratio, Grace period and loan repayment terms, benchmark index (KIBOR) and the

spread margin of the financial institution. Any changes from the assumptions in our Financial Model may be subsequently reflected at Commercial Operation Date in the True Up of Tariff.

- XVII. Insurance during Construction costs are considered based on the proposal received. Premium rate for the insurance arrangements will be finalized at the time of financial closure.
- XVIII. No hedging cost is assumed for exchange rate fluctuation during construction and all cost overruns resulting from variations in the exchange rate during construction shall be included in the Project Cost.

- XIX. Project contingency and maintenance reserves are not included in Reference Generation Tariff Calculations. If required by Lenders, these will be adjusted accordingly in the Reference Generation Tariff.
- XX. The payments to Workers Welfare Fund and Workers Profits Participation fund have not been accounted for in the Project budget and have been assumed to be reimbursed at actual by the Power Purchaser.
- XXI. Any incentives given to any other Wind IPP shall also be given to the Project Company.
- XXII. The power purchaser be directed to purchase and pay all bonus energy (as defined in be Policy 2006)on a monthly basis; and
- XXIII. Term financing could subsequently be raised in USD or in Euro. If our efforts are successful then the financial costs would come down substantially. We request NEPRA to note that at the appropriate time we may be permitted to request for a revision in tariff rates.
- XXIV. We request NEPRA to note that to cover political risk in Pakistan the international bankers need to take out an insurance cover from insurance company. The cost of this insurance may be reflected in the revision of the tariff at the appropriate time.

Zephyr Power (Pvt) Limited 68-B, Sindhi Muslim Housing Society Karachi-74400 Pakistan.

Attention: Mr. Zia Khaleeli

Commercial Proposal for Zephyr Power (Pvt) Limited

Dear Mr. Khaleeli,

Vestas Australian Wind Technology Pty Ltd (Vestas) is pleased to submit this commercial proposal (the Proposal) to Zephyr Power (Pvt) Limited (Zephyr) in relation to the 50MW wind farm project located in Gharo, District Thatta, Province Sindh, Pakistan (the Project). The Proposal sets out Vestas' technical solution and the key commercial parameters associated with the supply, erection, commissioning and on-going maintenance of the Project. In developing the Proposal, Vestas has taken into account the critical requirements for the project, the unique attributes of the site, and our commitment to deliver upon our value proposition of:

- Low cost of energy achieving a low cost of energy by combining high production output with cost competitive project construction and operation & maintenance costs.
- Business case certainty proven turbine technology combined with a track record of successful project delivery and lifetime maintenance support from Denmark's leading wind farm service provider.
- Sustainability putting safety above all else, meeting quality standards, and taking responsibility for our environmental footprint.
- Partnership working with you in the spirit of trust and shared success, because we believe that superior results and value are achieved this way.

Vestas will deliver the Project under an EPC contracting structure. This structure allows Vestas to effectively manage the project delivery whilst providing a single point of communication and accountability to Zephyr. Transport, Crane, Civil & Electrical works sub-contractors will be carefully selected and managed by Vestas to ensure smooth integration into the works and that quality and safety standards are maintained. By choosing Vestas, Zephyr can be certain that this project will be delivered on-time, on-budget and to the expected levels of performance by our highly professional and highly skilled personnel.

Vestas Australia

Wind. It means the world to us."

Vestas.

In developing the Proposal, Vestas has undertaken an initial assessment of the site data provided by Zephyr and can confirm that the V100-2MW turbines are the best suited solution for the Project. As part of the Proposal, we have included a service proposal based upon our full-scope (2+8) 10 Year AOM4000 service package, with an additional 10 year extension option open for negotiation.

1. Vestas EPC Project Scope

At a summary level, the Vestas EPC Proposal includes the following scope:

- 25 x V100-2 MW wind turbines generators (WTGs);
- 80m, three section tubular steel towers and anchor cages (imported);
- Vestas Online[®] Business SCADA system (SCADA);
- Transportation of towers, blades, hubs, nacelles and balance of plant components from production facilities to site;
- Installation and commissioning of the WTGs, SCADA and wind farm substation equipment including labour and cranes;
- 2-year Defects Liability Period on WTGs and SCADA equipment;
- Civil and Electrical Balance of Plant.

2. Vestas Operations and Maintenance Scope - AOM4000

Vestas is able to offer a modern wind turbine service agreement based on carefree inventory control of WTG parts over the life time of the agreement. We have included in our offer a full-scope (2+8) 10 Year service package with 95% time-based annual availability guarantee on WTGs, hence ensuring your wind capture percentage. This proposal reflects our confidence in the technology and our ability to support it throughout its life.

At a summary level, the AOM 4000 Package includes:

- Warranty Period Operations and Maintenance Agreement (Years 1 and 2);
- Operations and Maintenance Agreement (Years 3 to 10);
- 95% WTG time-based availability guarantee;
- Scheduled and Unscheduled Maintenance of WTGs;
- Scheduled BOP Maintenance;
- Remote monitoring and reset service of WTGs;
- Vestas Condition Monitoring System (CMS);
- Remote surveillance with Vestas Turbine Watch™;
- Connection to the Vestas Melbourne Operations Centre;
- Monthly reporting;
- O&M manual updates;

Vestas Australia

Vestas Australian Wind Technology Pty Ltd Level 4, 312 St Kilda Road, Southbank, Victoria 3004, Australia Tel: +61 3 8698 7300, vestas-australia@vestas.com, www.vestas.com Company Reg. No.: ABN 80089653878

Page 2 of 5

- Access and utilisation of specialist tools;
- Site Administration and management of Health, Safety and Environment; and
- Provision of consumables.

3. Vestas Pricing Proposal

3.1. EPC Project Pricing

Vestas is pleased to provide an EPC price to Zephyr. This is based upon and should be interpreted in conjunction with the relevant terms, conditions and specifications, which for the purpose of the Proposal are:

- The EPC Agreement initialled by Vestas on 31 October 2014 (the EPC Agreement);
- The Service Agreements initialled by Vestas on 31 October 2014 (the Service Agreements);
- The Owner's Requirements [insert date] (the Owner's Requirements); and
- The Construction Schedule dated [insert date] (the Construction Schedule).

The EPC Price is the sum of the two nominated currencies listed in the following table:

EPC Project Scope	USD	PKR	*Total USD
25 x V100-2.0 MW on 80m tower	77,978013	3,400,210,000	110,960,050

*The total value for project delivery will be the sum of the PKR & USD currencies provided.

*Total in USD is an estimate only based on the current exchange rates PKR/USD on 31.10.2014.

The milestones comprising the EPC Pricing are set out in the Payment Schedule attached at Annexure 1.

Please note that the specific payment dates are not referenced in the Payment Schedule given the uncertainty of timing of specific activities within the Project at this stage.

Wind. It means the world to us."

Vestas.

3.2. Preliminary Works

In order to achieve the Time for Completion of 16 months, preliminary works will be performed during the two month period prior to Notice to Commence (as defined by the EPC Agreement) and in accordance with Annexure 14 of the Owner's Requirements as follows:

- detailed geotechnical investigations;
- preparation of a hydrological study for the site;
- preparation of a topographical survey of the site,

The cost of the Preliminary Works will not exceed USD300, 000 as set out in the EPC Agreement.

3.3. Vestas Operations and Maintenance pricing

The pricing in this section of the Proposal relates to the Operations and Maintenance scope and is as follows:

Years	O&M price/Year			
1-2	USD 1.050 million			
3-5	USD 2.375 million			
6-10	USD 2.625 million			

4. Vestas Price Validity

The Vestas pricing offer contained herein is valid for acceptance through to 30 June 2015 and is further conditional on the final contractual terms and conditions negotiated and agreed between the parties in the EPC Agreement and Service Agreements.

5. Exclusions

The items outside of the Vestas EPC Project Scope and Vestas Operations and Maintenance Scope include, but are not limited to the following:

- LC Confirmation charges;
- L/C establishment and maintenance charges;
- Escrow account establishment and maintenance charges;
- Owner Imported Equipment Charges
- Site Security during O&M period
- Civil works maintenance during O&M period

Further exclusions are set out in the EPC Agreement and Service Agreements.

Vestas.

6. Conditions

The Proposal is non-binding, indicative and is subject to the following conditions:

- This offer is non-transferrable to any third party;
- Final agreement on the contractual terms of the EPC Agreement and Service Agreements initialled on 31 October 2014;
- WTG Supply subject to turbine availability;
- Final prices are to be settled in multi-currency, with final currencies and split subject to final cost structure;
- PKR/USD values presented are based on currency rate of 1PKR= 0.0097USD. Vestas
 reserves the right to adjustments during the validity of this Proposal;
- All items not included in Vestas' scope of works have to be provided or performed by Zephyr in a timely fashion in accordance with Vestas' minimum requirements.
- AOM Prices are subject to yearly CPI indexation;
- Pricing excludes any items outside the Scope;
- Proposal validity up to 30 June 2015.

Please note that this Proposal including the pricing above is Confidential and may not be transmitted or otherwise disclosed to any third party without the express written authorisation of Vestas.

We trust that Vestas will come up to your expectations and we look forward to further engagement and ultimately working with you to deliver a safe and successful project.

Yours sincerely,

Imran Shafiq Director of Sales, South Asia Vestas Asia Pacific & China

Gerard Carew

Head of Sales Pan-Asia, Sales PAN-ASIA Vestas Asia Pacific & China

8. DEBT FINANCING LETTER OF INTENT ("LOI")

8.1 UNITED BANK LIMITED

1

 \Box

UNITED BANK

August 15, 2014

Mr. Zia Khaleeli Chief Executive Zephyr Power (Pvt.) Limited Karachi.

Dear Sir,

Expression of Interest – Setting up of a 50 MW Wind based Power Project ('Project') at Gharo, Sindh by Zephyr Power (Pvt.) Limited ('ZPL' or the 'Project Company')

This is with reference to our various meetings and discussions with you on the above. We understand that Zephyr Power (Pvt.) Limited is planning to setup a 50 MW (Gross) Wind Power Project at Gharo, Sindh. We further understand that the capital cost of the Project is currently estimated at USD 125 Million which is expected to be funded through a debt to equity ratio of 75:25. The Project debt is expected to be arranged either through a combination of foreign and local currency financing or entirely through local currency financing.

In this connection, we are pleased to express United Bank Limited's ('UBL') in-principle interest in providing Structuring along with Debt Arrangement services for the Project debt, including but not limited to participation in the said Project debt, subject to internal approvals.

Please note that our interest in assisting the Project Company for debt arrangement and participation in Project debt is based on our best assessment of the Project, given the currently available limited information and may not be construed as a commitment on part of UBL or any of its subsidiaries or affiliates to arrange the required financing, or any part thereof, at this point in time. Our final decision to arrange the Project debt, will amongst other things, be subject to: a) satisfactory due-diligence of the Project Company, key stakeholders and the Project, including but not limited to financial, technical, insurance, and legal considerations, b) evidence of the satisfactory contractual arrangements being in place *inter-alia* concessionary framework (as applicable) and those with respect to supply of equipment and the works, c) completion and presentation of bankable feasibility of the Project, d) formal internal credit approvals of all participating institutions, including UBL, and f) the execution of definitive agreement(s) between UBL (along with other participants, if applicable) and Project Company pertaining to the provision of Debt Arrangement services.

For and on behalf of United Bank Limited

Mr. Zia Khalili Chief Executive 68-B, Sindhi Muslim Housing Society, Karachi-74400 Ph. 021-4315646

Subject:

VERIFICATION OF POWER PRODUCTION ESTIMATES FOR 50MW ZEPHYR POWER PVT LTD WIND POWER PROJECT AT BHANBHORE-GHARO

Reference is the AEDB standard practice for verification of power production estimates at IPP wind farm site for the approval of project feasibility study.

2. Alternative Energy Development Board (AEDB) has received the revised project feasibility study from Zephyr Power Pvt Ltd for the development of 50MW wind power project in Bhabhore, district Thatta Sindh. As per the standard practice for the approval of project feasibility study, AEDB verifies the power production estimates calculated by the IPP through internationally renowned laboratory DTU/ Risoe National Laboratory, Denmark. After internal review of project feasibility study at AEDB, the technical information, as per the submitted feasibility study by company, for calculating the production numbers at the project site was sent to DTU/ Risoe for verification.

3. AEDB has received the verification report from DTU/Risoe. The production estimates are verified against the AEDB established benchmark wind speeds for Gharo region. The annual benchmark energy production at the Zephyr Power wind farm site verified by DTU/Risoe is 174.3 GWh (p50) using 25 x Vestas V100/2MW WTGs. These production estimates are verified at, annual benchmark wind speed for Gharo region i.e. 7.3 m/s at 80m height above ground. The results of the calculations at different probability/confidence level calculated by DTU/Risoe are shown in the table below (Summary of the report is attached as Annex 'A'):

Annual and the Annual and Annual Annua

Annex-A

Summary of the Report

The report is a verification of the energy yield for the benchmark wind speed values developed for Gharo region. Due to the unavailability of bankable wind data and for the fast track development of Wind Energy in the country the Government of Pakistan has introduced an innovative idea of establishing the benchmark wind speed values and has taken the risk of variability of wind speed values in different regions (Gharo & Jhimpir), so that the independent power producers may not feel the risk of unavailability of reliable wind data. Keeping it in consideration the power production estimates are verified against the Benchmark wind speed values.

Using data from the Gharo meteorological mast for the period 2003-2007, GPPL mast wind data of 2006-2010 and Zephyr Power site wind data 2006-2009 resulted in an estimate of the annual energy yield from the 25 Vestas V100/2MW wind turbines in the Zephyr Power Pvt Ltd wind farm shown in the table below. The net Annual Energy Production (AEP) without technical losses includes losses to wake effects between the turbines in the Zephyr Power wind park as well as from the neighboring wind turbines. The net AEP with technical losses accounts for the availability of the wind turbines with 95%, cut-out losses due to high temperature 1.5% electrical losses with 3% and auxiliary The total reduction due to technical losses IC. consumption 1%. 0.95x0.985x0.97x0.99=0.90 or 10%. The calculations are carried out with hub heights 80 meters. The calculations by DTU/Risoe are performed for an air density of 1.171 kgm⁻³ i.e wind farm site air density.

Subject: EXTENSION IN THE VALIDITY PERIOD OF LOS ISSUED TO M/S ZEPHYR POWER (PVT.) LIMITED (ZPPL) FOR THE DEVELOPMENT OF 50 MW WIND POWER PROJECT IN GHARO, DISTRICT THATTA, SINDH

This is with reference to M/s Zephyr Power (Pvt.) Ltd. letter No. nil dated 13th November 2013 regarding the extension in the validity period of LOS issued to M/s ZPPL for the development of 50MW wind power project.

2. AEDB hereby grants an extension up to 31st December, 2014 in the Required Financial Closing Date (RFCD) as stipulated in the Letter of Support (LOS) issued to M/s ZPPL on 17th January, 2013.

3. M/s ZPPL is now required to achieve Financial Closing for its 50 MW wind power project by 31st December, 2014, the "Extended Required Financial Closing Date". All other terms and conditions of the LOS shall remain the same. Further to it, M/s ZPPL is required to submit the milestones with timelines for achievement of Financial Close of its 50 MW wind power project.
