

ISSUES:

Based on the limited contents of the Tariff Proposal, following issues have been framed:

- i. **What is the expected duration of import of power?**
- ii. **What is the demand that is going to be met through the proposed Import of Power?**
- iii. **Whether CPPA-G has any reservations regarding the Tariff Proposal?**
- iv. **Whether the rate being proposed is reasonable and prudent and whether the “identical tariff mechanism” proposed by the seller whereby tariff will be revised as per the bulk sale tariff for AJK is justified?**
