# COMPLIANCE TO NEPRA DIRECTIONS

扁

	100 have been the and 12 District of Constheme
achievement of performance standards as laid down in NEPRA Performance Standards (Distribution) Rules, 2005	(M) consumers base spreading over 13 Districts of Southern Punjab and distribution system is expanding sharply due to village electrification, installation of tube well, industrial & other general connections & 8% load is being extended every year and extra burden increases day by day on the existing distribution system. One pertinent point to highlight is that MEPCO is providing continuity of electricity with acute shortage of human resource to run the complex Power System in such a large area of Punjab. Detail of Guaranteed/overall Standards of NEPRA are as under: - <b>Guaranteed Standard 1 Urban (GS1U)</b> Restoration of Supply as per NEPRA Standard GS1U = 10 hrs
	Guaranteed Standard 1 Rural (GS1R) Restoration of Supply as per NEPRA Standard GS1R = 16 hrs
	Guaranteed Standard 2. Minimization of No. of unplanned long duration power supply interruptions.
	Guaranteed Standard 3. Minimization of Duration of unplanned long duration power supply interruptions. Guaranteed Standard 4. Minimization of No. of planned long duration power supply interruptions. Guaranteed Standard 5. Minimization of Duration of planned long duration power supply interruptions.
	Guaranteed Standard 6. Minimization of No. of unplanned short duration power supply interruptions.
	Overall Standard 1. Minimization of System average interruptions. Frequency index (SAIFI).
	<b>Overall Standard 2.</b> Minimization of System average interruption duration index (SAIDI).
	<b>Overall Standard 4.</b> Maintaining the Nominal voltage level of power system.
	<b>Overall Standard 5.</b> Maintaining the Frequency of power system.
	The following remedial measures have been taken by MEPCO for the achievement of above Performance Standards on regular basis which is as under: -
	<ul> <li>Construction of new grid stations.</li> <li>Construction of new transmission lines.</li> <li>Up-gradation / conversion of 33 KV to 66 KV to 132KV grid stations.</li> <li>Extension of grid stations.</li> </ul>
	<ul> <li>Extension of grid stations.</li> <li>Augmentation of power transformers.</li> <li>HT proposals of overloaded, under constraints and</li> </ul>

and also provide breakup of the said postretirement benefits indicating the provision amount pertaining to the prior period and the current portion by June 30, 2021.

actual payments for the FY 2015-16 till FY 2019-20. The year wise gap is given below: Provisions & Allowed Gap

		PKR Mill	ion
Year	Actual Provisions	Allowed by NEPRA	Gap
2015-16	7,327	2,134	5,193
2016-17	4,930	2,461	2,469
2017-18	6,550	2,707	3,843
2018-19	8,679	4,232	4,447
2019-20	12,233	4,655	7,578
Total	39,720	16,189	23,531

The Authority discussed in Para-25.6 and 25.9 of the latest determination that provisions were allowed before FY 2012-13 which were not deposited in Pension Fund.

In this regard, it is submitted that the amount allowed at that time was also inadequate in relation to actual provision. The comparison between the amount allowed and actual provision during FY 2009-10 to 2011-12 is given below:

[]

MEPCO tariff determination conveyed vide NEPRA letter No. NEPRA/R/ADG(Trf) /TRF-492/MEPCO-2019/46484 dated 24/12/2020.

In pursuance of above references, the requisite information is as under please: -

	NEPRA Directions	Compliance
i.	File Multi Year Tariff Petition for a tariff control period of five year to avoid any delay in tariff determinations.	The Multi Year Tariff Petition for FY 2020-21 to FY 2024-25 will be submitted to Authority very soon.
ii.	To immediately stop the existing practice of deducting 20% of SAP funds for grid augmentation and carry out the augmentation of the grid after coordinating with the Ministry of Energy and report be shared with the Authority by December 31, 2020.	Direction disseminated to all relevant offices under MEPCO and implemented.
iii.	To immediately ensure that consumer's deposits are not utilized for any other purpose and the same is reflected in the Audited accounts for the FY 2020-21 & onward	Consumer deposits are used for the purpose for which these are received by MEPCO. These are reflected in the audited accounts of the company every year in line with IAS & Companies Act, 2017 (copy of Financial Statement attached).
iv.	To immediately restrain from unlawful utilization of receipts against deposit works and security deposits immediately, and the same is reflected in the Audited accounts for the FY 2020-21 & onward.	There is no unlawful utilization of receipts against Deposit Works and Security Deposits on the part of MEPCO. These receipts are being reflected in the audited accounts o the company every year in line with the applicable rules. Relevant page of audited financial statements of FY 2019-20 is attached.
v.	To give clear disclosures in its Financial Statements with respect to the consumer financed spares and stores, work in progress and cash & bank balance for the FY 2020-21 & onward.	MEPCO is already giving disclosures as required under the IAS applicable in Pakistan. However, the specific disclosures will be given in the audited accounts of FY 2020-21.

### 1. PETITION SUMMARY

#### 1.1. Details of the Petitioner

#### 1.1.1 Name and Address:

Multan Electric Power Company ("MEPCO" or the "Company") is a Public company limited by shares incorporated under section 32 of the repealed Companies ordinance, 1984, (Now Companies Act, 2017) with registered office at 414, WAPDA House, Lahore.

#### 1.1.2 License Details:

MEPCO is a licensed public utility responsible for distribution & Supply of electricity to the consumers. MEPCO holds Distribution license No. 06/DL/2002, issued by NEPRA (The Regulator). Under clause 23E (1) of NEPRA Act, 1997 (Amended Act of 2018), MEPCO is deemed to hold a license for supply of electric power for a period of 5 years after NEPRA amended act. MEPCO, in accordance with the requirements of its license, hereby submits its petition to determine the consumer end tariff for FY 2020-21 to FY 2024-25 in its licensed area under multiyear tariff regime for Distribution of Electric Power.

#### 1.1.3 Key Representatives:

The petition is being filed through Engr. Ikram-ul-Haq, the Chief Executive Officer of the Company who has been duly authorized by Board of Directors vide Resolution (see Annexure I) to sign and file the Multi Year Tariff ("MYT") Petition for the FY 2020-21 to FY 2024-25 ("Tariff Period"). MEPCO is represented by the following duly authorized officers:

- 1. Chief Executive Officer, MEPCO
- 2. Finance Director, MEPCO
- 3. GM (Customer Services), MEPCO
- 4. Chief Engineers, P&E
- 5. Chief Strategic Planner
- 6. DG, HR&Admn.

5

#### 1.1.4 Grounds for Petition:

1.1.4.1 Under section 7(2)(ac), (b), (i) & section 7(3)(a) of the "Regulation of Generation, Transmission & Distribution of Electric Power Act, 1997 (Amended Act 2018), (hereinafter called as 'NEPRA Act'), the regulator (National Electric Power Regulatory Authority or NEPRA) is empowered to determine tariffs and other terms and conditions for the supply of electricity by the generation, transmission and distribution companies and also to recommend the same to the Federal Government for notification. NEPRA is also responsible for determining the process and procedures for reviewing tariffs and recommending periodical tariff adjustments. NEPRA shall determine the tariff of the licensee on the guidelines given at section 31(3) of the NEPRA act.

1. 2. 2. 2

- 1.1.4.2 Under section 31 (2), The Authority, in the determination, modification or revision of rates, charges & terms & conditions for the provision of electric power services shall keep in view,
  - i) The protection of consumers against monopolistic and oligopolistic prices,
  - ii) The research, development and capital investment program costs of licensees,
  - iii) The encouragement of efficiency in licenses, operations and quality of service,
  - iv) The encouragement of economic efficiency in the electric power industry,
  - v) The economic and social policy objectives of the Federal Government and
  - vi) The elimination of exploitation and minimization of economic distortions.
- 1.1.4.3 There are three main sources of funding available with the petitioner;
  - i) Adequate revenue through tariff determined by NEPRA,
  - ii) Borrowings and
  - iii) Internal efficiency improvements, if any, which result into either increase in revenue or cost reduction.

- 1.1.4.4 For this purpose, MEPCO has to file Tariff Petitions, review motions and adjustment requests as per procedures laid down by NEPRA. Timely determination and notification of the tariff ensures internal financial viability of the utility which is the basis to embark upon and explore other resources of funds and can only be ensured through adequate consumer end tariff which could recover all prudently incurred costs and provide reasonable return on investment to support its future investment for improvement in internal efficiency and expansion of network.
- 1.1.4.5 In accordance with the requirements of the license, MEPCO is hereby submitting a petition which sets out a methodology for setting and reviewing tariffs.
- 1.1.4.6 The petition is being filed in accordance with Rule 3(1) (2) of "NEPRA (Tariff Standard and Procedure) Rules, 1998 (hereinafter called as 'Tariff Rules')", NEPRA guidelines for determination of consumer end tariff issued vide SRO 34 (1)/2015, dated 16th January, 2015 and direction to file a multiyear Tariff Petition for the determination of consumer end tariff of next 5 years imparted through para 44.1 (i) of previous determination of distribution tariff of MEPCO for FY 2018-19 & FY 2019-20 vide# NEPRA/R/ADG(Trf)/TRF-492/MEPCO-2019/46481-46483 dated December 24, 2020 & NEPRA Letter No. NEPRA/ADG(Trf) /TRF-100/ XWDISCOs /18743-50 dated 05/04/2021.

#### 1.2. Key Aims and Features of the Petition

#### 1.2.1 Key aims of the petition

1.2.1.1 The aim of this petition is to submit the Company's MYT petition for the FY 2020-21 to FY 2024-25 and to obtain requisite approvals for the immediate implementation of cost reflective tariffs to yield the Company's required revenues.

#### 1.2.1.2 The key objectives of tariff petition include:

- Instant recovery of all costs to protect the interest of existing & future consumers.
- To provide an effective framework for optimization of installation and investment in the Company's distribution network.
- To provide protection to the Company against uncontrollable risks.
- To provide financial sustainability to the Company for the ultimate benefit of end consumers.
- To recover costs on account of Prior Year Adjustments.
- To provide a structure for the determination of tariff to meet the Revenue Requirements explained hereinafter.

#### 1.2.2 Assumptions for Segregation of Costs into Distribution & Supply of Electric Power Businesses:

Pursuant to NEPRA Act (Amended upto 2018) and the Authority directions, MEPCO is filing separate Tariff Petitions for Power Distribution Tariff and Power Supply Tariff. Since MEPCO is not maintaining separate books of accounts for the two businesses i.e. Distribution business & Power Supply Business, therefore it is assumed that;

- i) The accounting information of historic actual results relate to both businesses.
- ii) Segregation of data for Distribution of Electric Power Business is not made in books of accounts so far and single set of books of accounts are being kept for recording information pertaining to both businesses.
- iii) The forecasted expenses relating to Distribution of Electric Power Business have been assessed on the basis of available data in separate A/c heads (where possible) in combination with the possible bifurcation of the costs between the two businesses.
- iv) The expenses relating to Revenue offices, Meter Reading Services, Bill Distribution Services, Collection charges, Commercial Department, MIS (Management Information System) and Market implementation and Regulatory affair department (MIRAD) belong to Power supply tariff. The creation of MIRAD has been recommended by the Ministry of Energy (MoE) and adopted by MEPCO to implement Competitive Trading Bilateral Contract Market (CTBCM) model duly approved/ determined by the Authority. MIRAD will deal with all matters and other regulatory affairs regarding CTBCM.
- v) All existing Fixed Assets go to Distribution Business.
- vi) CPPA-G issues Power Purchase Invoices directly to the Power Supply Business which is responsible for all the payments related to Power Purchase Cost.
- vii) Power Supply business will make payment of Revenue Requirement of the Distribution Business at the rate determined by the Regulator (NEPRA), the same rate will be charged for wheeling of energy by other generator, Bulk Power Consumers (BPCs) etc.
- viii) The recovery of outstanding balances of NTDCL, CPPA-G and the payments to NTDCL, CPPA-G and the Distribution tariff is the responsibility of the Power Supply Business.
- ix) Bad debts and provisions against bad debts relate to Power Supply Business.

- x) The costs occurring against standby arrangements of Supply business are a sunk cost for MEPCO which do not depend upon the quantum of the business.
- xi) MEPCO is a "Supplier of the last resort" or "Default Supplier" which means that MEPCO is to keep and maintain Power Supply Business setup to act as Power Supplier in any untoward situation.
- xii) The provision for employee's Post retirement benefits has been apportioned in the ratio of Salary, wages & Benefits assigned to the respective businesses since FY 2018-19 onwards.
- xiii) All equity, previous accumulated losses and Prior Year Adjustments (PYA) upto FY 2017-18 relates to Distribution tariff.
- xiv) All arrears of recovery from consumers for the previous periods belong to Distribution tariff but Power Supply Business is responsible for its recovery.
- xv) All previous long term loans and debt servicing is the responsibility of the Power Distribution Business.
- xvi) The Regulator has not provided any guidelines regarding the Power Supplier's Margin (PSM), therefore, it has been assumed as 1.5% of the Power Purchase Cost of Power Supply Business.
- xvii) All Transmission and Distribution (T&D)Losses relate to Distribution of Electric Power Business, however, MEPCO has some reservations on the issue especially losses due to pilferage of electricity after the Distribution of Electric Power Business which may lead the Business to certain exposures/risks.
- xviii) The claims and subsequent receipts of all types of Subsidies including Tariff Differential Subsidy (TDS), Industrial Support Package (ISP), Zero Rated Industrial Rebate (ZRIR) etc. is the responsibility of the Power Supply Business.
- xix) The receivable from associated companies on different accounts (e.g. free supply etc.) will be dealt by the Power Supply Business.
- xx) The whole wire business from 132 kV to the consumer Meter is owned and maintained by the Distribution of Electric Power Business. Therefore any investment for expansion, rehabilitation etc. of the system is also come in the purview of the said business.
- xxi) The Late Payment Surcharges form consumers and Supplemental Charges on account of delayed/Late payments to Power generators relate to Power Supply Business and these two will knock off each other as per decision /directions of NEPRA.
- xxii) Any other issue not mentioned above shall be dealt by that time in the order of their relevance and merit for both businesses.

8

#### 1.2.3 Summary of key parameters:

1.2.3.1 The petition includes the following key parameters:

MEPCO MYT For FY 2020-21 to 2024-25

	No.	Feature	Details
	1	Tariff Period	Five year multi-year tariff for the period FY2020-21 to FY 2024-25
	2	Distribution Margin	The existing Distribution Margin (DM) has been modified to consider impact of internal and external factors, including inflationary impacts, increase in regulatory asset base, expansion of network, increase in salaries, retirement benefits, repair & maintenance and depreciation etc.
	3	Bifurcation of O&M Cost	Distinction has been made between controllable and un- controllable costs, as detailed herein, with un-controllable costs directly passed through and controllable costs to be indexed with CPI.
•.	4	Indexation of O&M and Efficiency Factor	The controllable O&M cost is being proposed to be indexed to Consumer Price Index (CPI) during the tariff period. Further, the efficiency factor "X" is being proposed as zero '0' for the Tariff Control Period on the premise that implementation of CTBCM will further affect the cost effectiveness of the Company when most of the industrial and bulk power consumers will leaving MEPCO and the Company only serving to the domestic consumers.
	5	Extra Ordinary Events	Given the Company's wide business area and spreading net work linked with its vulnerability to the damages caused to its electric infrastructure in the past and expected in future as well by natural disasters like flooding & storms, a provision for such extraordinary events is being proposed as a "Z" factor, which will be included in the O&M cost indexation formula. All such costs will be classified as force majeure and shall be recoverable during the following year, subject to prior approval of NEPRA. Costs recoverable under insurance
			year after the impact of extra ordinary events taken and vice versa.
	6	Allowance for Additional Hiring	Given the Company's current human resources constraints and future requirements, a total of 6,566 personnel of BPS-1 to BPS-20 are being proposed to be added to the workforce under different cadres during the 05 years of the tariff control period. The induction is being proposed against MEPCO's existing approved yard stick i.e. replacement hiring.
	7	Creation of New Divisions/ Sub-Divisions	MEPCO has to create a new department "Market Implementation and Regulatory Affair Department (MIRAD)" to work under framework of Competitive Trading Bilateral Contract Market (CTBCM). Initially BoD MEPCO has approved 20 new key positions in phase-I which includes 09 positions through relocation/ internal transfer from existing yardstick & 11 new positions to be hired from the market. In phase-I, an estimated capital expenditure of Rs. 54.330 Million and O&M

Ę.

#\*) )

1

C71

52

MEPCO MYT For FY 2020-21 to 2024-25

expenses of Rs. 48.519 Million per annum has been projected. However, in 2nd phase 55 remaining posts (allied Staff) with an estimated annual financial impact of Rs. 39.124 Million will be hired for smooth running of MIRAD.

Further, it is proposed to create 01 new each Operation circle, RRE/Construction Division, M&T circle, Regional Store, Construction Sub-Division, MIRAD and 05 new Operation Divisions, 36 Operation new Sub Divisions and - 08 new/upgraded Grid Station offices.

For the above purpose creation and induction of 3,243 new posts have been proposed with an annual additional financial impact of Rs. 1,813 (Million) starting from the year of induction accordingly.

Repairs & Maintenance Costs With a view to allow the Company greater autonomy over its operations relating to network management, repair & maintenance costs has been assumed via "K" factor @ 1.5% of gross Value of Building and Distribution Plant Equipment, which is consistent with the actual requirements due to vast & old distribution system.

 Return on Rate Base
 It is proposed that the Company receives the Weighted Average Cost of Capital (WACC) on its Average Regulatory Assets Base (RAB) as the Return on Rate Base (RoRB).
 Capital Structure
 Capital NEPRA's MYT Guidelines 2015.

StructureNEPRA's MYI Guidelines 2015.11Return on<br/>Equity (ROE)The ROE calculated on the basis of the Capital Asset Pricing<br/>Model (CAPM).

Risk Free RateThe Risk Free Rate has been assumed as 8.3542% i.e. weighted<br/>average yield on 05 year Pakistan Investment Bond (PIB) as of<br/>June 25, 2020.

BetaBeta computations are proposed to be based on the average<br/>beta @ 1.1 as used by NEPRA in previous determinations.

14Cost of DebtThe cost of debt represents the actual cost to be incurred by<br/>the Company on debt financing.

15 Regulatory The Regulatory Asset Base (RAB) is based on a two year average of net operating fixed assets (OFA) of the Company.

Prior-year adjustments comprise of unrecovered power purchase cost (which includes PPP periodic adjustments), less determined staff retirement benefits, RORB and other petty adjustments as described in the relevant portion of this Tariff Petition.

Annual Adjustments in 17 Return on Rate Base Computation

加速時間の MEPCO MYT For FY 2020-21 to 2024-25

the risk free rate used for computing return on equity under the Capital Asset Pricing Model (CAPM) variations in cost of debt

Given the increased Staff Retirement Benefits Obligations of the Company coupled with financial constraints following proposals are given to make the Company's already created Post Retirement Benefit Fund a fully funded entity:

Retirement Benefit Payments

22

23

24

C

- Allow past years actual provisions charged on the basis of third party actuarial Reports in line with provisions of IAS-19 being requested as Prior Year Adjustment (PYA).
- For the Tariff Control Period, allow the projected provisions of staff retirement benefits subject to adjustment on actual basis.

 Rehabilitation/ replacement is required on those equipment/material at various grid stations and transmission lines which have completed their useful life, have become deteriorated due to excess wear and tear with passage of time or have become outdated and their spares are not available in local market. Due to these reasons, they cause frequent faults and loss of energy in the shape of leakages etc. Resultantly, many breakdowns occur due to which not only public is suffered but MEPCO also sustain heavy financial loss.

2) The objective of the Distribution Rehabilitation Project is to reduce system technical losses resulting from power losses in the distribution conductors and equipment including losses due to additional current flowing in the system on account of poor power factor of customer loads.

Network Expansion

Network

Rehabilitation

1) Proposed expansion of Distribution network will facilitate in providing on average 475,446 No. of new electricity connections annually to the prospective customers.

#### 1.2.4 Structure of the petition:

- 1.2.4.1 This Petition has been structured in the following manner:
  - i) The tariff methodology is explained along with key features and formulae to be used in determining the Company's pass-through costs, T&D losses and average distribution margin within each year of the proposed tariff period.

- ii) The tariff structure and components are then analyzed in detail along with supporting facts and basis.
- iii) An overview of key periodic adjustments.

 iv) Finally, key conclusions and summary of key recommendations are provided.

MEPCO MYT For FY 2020-21 to FY 2024-25

### 2. TARIFF METHODOLOGY

#### 2.1. Proposed Tariff Methodology

#### 2.1.1 NEPRA Guidelines

0

NEPRA Guidelines for determination of consumer end tariff (Methodology and process) issued vide SRO # 34 (1)/2015, dated 16th January, 2015, lay down the methodology & process for Determination / approval of consumer end tariff. The guidelines also provide for a multi-year tariff of a distribution company. Among XWDISCOs, currently, IESCO, LESCO & FESCO are operating under the multi-year tariff regime.

#### 2.1.2 Change from Single Year Tariff (SYT) to Multi Year Tariff (MYT)

In accordance with the direction given in the Tariff determination of MEPCO for the FY 2018-19 and 2019-20 dated 24th December, 2020, NEPRA Letter No. NEPRA /ADG(Trf)/TRF-100/XWDISCOs/8743-50 dated 05/04/2021 and provisions given in the above NEPRA guidelines, the Company is being filed a five-year tariff with indexation mechanism for every year and rebasing at the end of the five-year control period.

#### 2.1.3 A Consumer Price Index (CPI) minus Efficiency Factor (X) Mechanism

According to the MYT guidelines a CPI minus X Multi-Year Tariff is being proposed as it will allow the Company to automatically apply indexations for inflation.

#### 2.1.4 The Multi Year Tariff

The Multi Year Tariff seeks to compute yearly revenue requirements of the Company based on a five-year investment plan and expected demand for electricity going forward. The tariff broadly comprises:

#### 2.1.4.1 Pass-through costs:

Power Purchase Price (PPP) comprises Energy charges, Capacity charges, Use of System Charge (UoSC) and Market Operator Fee (MoF) of CPPA-G including impact of allowed T&D losses.

#### 2.1.4.2 Distribution Margin (DM) &

#### 2.1.4.3 Prior Year Adjustments (PYA).

#### 2.2. Pass-through components of the tariff

#### 2.2.1 **Pass-through costs:**

i ţ

]

Power Purchase Price (PPP) comprises Energy charges, Capacity charges, Use of System Charge (UoSC) and Market operator fee (MoF) of CPPA, including impact of T&D losses

#### 2.2.2 **Power purchase price**

2.2.2.1 The Company is paying to CPPA-G (or on behalf of CPPA-G) Power Purchase Price (PPP) for the electricity it procures, including a transmission charge for transporting electricity across the transmission network owned and operated by NTDCL along with the Market Operator Fee (MoF) of CPPA-G. The total cost of power comprises generation and transmission cost elements. The generation price consists of a Capacity Purchase Price (CPP) and Energy Purchase Price (EPP) and variable O&M. The CPP is being paid on the basis of the Company's share of monthly demand and EPP is computed on the basis of average energy purchase price of IPPs, Hydel, GENCOs and other sources of generation. The UOSC is being charged according to NTDCL tariff determined by NEPRA.

2.2.2.2 This PPP is transferred to MEPCO according to the Transfer Price Mechanism (TPM) subject to adjustments and passed on to the end consumers.

#### 2.2.2.3 The PPP is calculated as per the following formula:

$$PPP = PP(EC) * Q(p) + PP(CC) + TC$$

Where,

PPP	= Power Purchase Price
PP(EC)	= Energy charge part of PPP
Q (p)	= quantity purchased by the company
PP(CC)	= Capacity charge part of PPP
TC	= Transmission cost

2.2.2.4 The formula for the determination of the distribution margin is:

$$DM(D) = RB(D) * RORB(D) + D(D) + E(D) + t(D) + ORC(D)$$

Where,

DM(D) is the MEPCO Distribution Margin (DM).

RB(D) is the MEPCO Rate Base

RORB(D) is the MEPCO cost of capital.

D(D) is the MEPCO depreciation expenses

E(D) is the MEPCO's expenses including but not limited to operation, maintenance and human resources.

t(D) is the MEPCO's Federal and Provincial Taxes (allowed as pass through)

ORC(D) is MEPCO's other regulatory costs including Other Income.

PP(EC) is the Energy charge part of PPP

2.2.2.5 The formula for the determination of the revenue requirement for the distribution company is:

 $RR(D) = PPP(D) + DM(D) \pm PYA(D)$ 

#### Where,

RR(D) is the company's Revenue Requirement.

PPP(D) is the power purchase cost of the Company.

DM(D) is the Distribution Margin of the Company.

PYA(D) is the Prior Year Adjustment (PYA) of the Company.

#### 2.3. Distribution Margin

This Petition proposes an incentive-based formula to determine the Company's Distribution Margin. A formula provides a transparent and predictable way to determine the Company's revenues, and end-user tariffs. Distribution Margin seeks to enable the utility to cover prudently incurred operating costs.

#### 2.3.1 Operations and Maintenance Costs

2.3.1.1 It is submitted that the O&M cost be bifurcated into controllable and uncontrollable costs. The uncontrollable costs are requested to be trued-up at the end of every year and the controllable costs should be indexed every year to the following factor (CPI – X + Z).

#### $0\&M_t = [Controllable cost/unit \times \{1 + (CPI - X)\} \times units sold] + Uncontrollable costs + Z$

15

Where,

CPI = Consumer Price Index

X = Efficiency factor

Z = Costs relating to extraordinary events

#### 2.3.2 Return on Rate Base

- 2.3.2.1 According to Para 16(2) of the NEPRA Guidelines for determination of consumer end tariff (Methodology and process) issued vide SRO # 34 (1)/2015, dated 16th January, 2015, tariff should allow the licensee, a rate of return, which promotes continued reasonable investment in equipment and facilities for improved and efficient service.
- 2.3.2.2 It is important that returns provided to the Company commensurate with the risks associated with the sector. The rate of return should provide for a return which is proportionate with the prevailing cost of funds being incurred by the Company and with the risk involved in delivering the utility services.
- 2.3.2.3 The return on rate base to the Company is based on a Weighted Average Cost of Capital (WACC) to its regulatory asset base. The WACC is in turn based on return on equity and cost of debt weighted proportionately according to the debt and equity on the DISCO's balance sheet or the ceiling of 70:30 fixed by NEPRA. For the purpose of this tariff petition the bench mark of 70:30 has been used.

#### $RORB = Rate base \times WACC$

Where,

Rate base = Average net fixed assets + Closing work-in-progress - Deferred credit

The WACC is calculated as per the following formula:

WACC = 
$$K_e \times \left(\frac{E}{E+D}\right) + K_d \times \left(\frac{D}{E+D}\right)$$

Where,

Ke = Return on equity

Kd = Cost of debt

E = Total equity

D = Interest-bearing debt

As per NEPRA guidelines, the proportion of equity is capped at 30% and in cases where equity exceeds this threshold the remainder is considered as debt for the purposes of WACC computations. The return on equity is calculated with the use of the following CAPM formula:

 $K_e = R_f + (beta \times risk premium)$ 

Where,

#### MEPCO MYT For FY 2020-21 to FY 2024-25

Ke is Return on equity

Ē

 $\int$ 

VZ2

Rf is Risk-free rate

Beta is correlation to the market return

Risk premium is return expected on equity investments over and above the risk free rate:

## 3.2. Summary of Tariff Assumptions

Ē

+

- 3.2.1 Pay & Allowances and Retirement Benefits: The M&O Cost has been segregated into controllable and non-controllable components. The noncontrollable portion is the Salaries & Wages to the employees and Staff Retirement Benefits. As MEPCO is following the National Pay Scales and Staff Retirement benefits of the Federal Government presently and assumed the same for the Tariff Control Period as well, therefore any increase in Pay & Allowances of employees and pension shall automatically be passed through to the beneficiaries. Costs other than Pay & Allowances and Retirement benefits shall be indexed with CPI every year plus cost associated with the Z factor to be added as passed through, if any.
- 3.2.2 Provision for Staff Retirement Benefits: It is assumed that MEPCO will be allowing the gross provisions for the staff retirement benefits as per third party actuarial Reports in Tariff enabling the Company to transfer net amount after payment of actual liabilities of the retired pensioners into the Post Retirement Benefits Fund already established.
- 3.2.3 Inflation: The CPI to be used in indexing the tariff yearly shall be the one notified by the Pakistan Bureau of Statistics as of June, every year. For the purposes of this tariff petition, forecasted inflation rates @ 8.84%, 7.28%, 6.52%, 6.53%, 6.49% have been applied over the tariff control period which have been taken from the Global No. 1 Business Data Platform website "statista.com".
- 3.2.4 **Total Unit Sales:** Total unit sales start at 16,741 GWh and are increased by the annual demand growth, determined by the number of new consumers and the change in consumption per consumer. The Compounded Average Growth Rate (CAGR) in sales for 2020-21 to 2024-25 is about 2.95%.
- 3.2.5 **Target T&D Losses:** The T&D losses target has been set at 15.00% for the first year which gradually reduces to 14.40% by the end of the tariff control period.
- 3.2.6 **Power Purchase Price (PPP):** Total purchase starts at 19,695 GWh which is assumed to grow at a CAGR of 2.30% and reaches 21.964 GWh by FY 25. The PPP for the five year control period has been taken as projected by CPPA-G and intimated vide Letter No. CPPA-G/ 2021/ CFO/ 6161-62 dated 22/ 03/ 2021. The purchase cost is calculated as the number of units of energy purchased times the PPP rate.
- **3.2.7 O&M:** The base year O&M is set at PKR 1.30/kWh for the first year of the tariff that is subject to adjustment with actual results.

※ ※ MEPCO MYT For FY 2020-21 to FY 2024-25

- 3.2.8 Opening Gross Fixed Assets: The value of the Opening GFA used in the base year of the tariff period that been determined on the basis of the latest available financial statements of the Company as of 30th June 2020.
- 3.2.9 **Regulatory Asset Base:** It is calculated as the sum of Opening GFA and capital additions less depreciation, plus capital work-in-progress and less deferred credit.
- 3.2.10 **Rate of Return:** The rate of return or WACC of 11.72% has been calculated based on CAPM, 3 month's KIBOR+3% and a Debt--Equity Ratio of 70:30.
- 3.2.11 **Distribution Margin:** The Distribution Margin of the Company is calculated as the sum of O&M, Depreciation and RORB adjusted with other income excluding Late Payment Surcharge being knocked off with delayed payment Charges/Supplemental Charges in line with NEPRA existing determinations.
- 3.2.12 Other Income: The other Income will be adjusted as per mechanism prescribed in the NEPRA Tariff Guidelines for determination of consumer end tariff.

## 3.3. Analysis of key components

3.3.1 **Power Purchase Price (PPP)** 

- 3.3.1.1 PPP relates to Power Supply Business, However, the Fuel Cost Component (FCC), Capacity Transfer Charges (CTC) and Use of System Charges (UoSC) including Market Operator Fee (MoF) for 2020-21 to 2024-25 have been taken as projected by the Market Operator i.e. CPPA-G for the period from 2020-21 to 2024-25 intimated vide Letter No. CPPA-G/ 2021/ CFO/ 6161-62 dated 22/ 03/ 2021.
- 3.3.1.2 The component wise detail is given below:

Table 3.2: Power Purchase Price (PPP) Break-up (Rs. In Millions)										
	FY 21	FY 22	FY 23	FY 24	FY 25					
Energy Transfer Charge	93,917	86,461	79,819	94,155	97,110					
Capacity Transfer Charge	138,528	196,567	238,951	240,845	268,934					
NTDC Use of System Charge	8,407	15,871	17,723	16,911	17,039					
Market Operator Fee	71	74	78	82	86					
Power Purchase Price	240,923	298,973	336,572	351,993	383,169					

21 .

#### 3.3.2 Transmission & Distribution (T&D) Losses

]

СЩ

- 3.3.2.1 To achieve the reduction in target T&D losses, MEPCO has prepared a Distribution Company Integrated Investment Plan (DIIP), which includes formation of new grids, conversion of existing grids, revamping of secondary transmission (66, 132 KV) lines, augmentation of HT & LT lines, provision of T&P items, induction of low loss transformers, theft detection by enforcement agencies and replacement of meters, with static meters and upgrade to Automated Meter Reading (AMR) and Aavanced Metering Infrastructure (AMI).
- 3.3.2.2 Based on NEPRA's stated mechanism, the compensation for distribution losses would be automatically adjusted for any changes in the power purchase cost. The target of T&D losses, will, however, be maintained throughout the tariff period, regardless of the actual T&D losses incurred by the Company. Thus, if the Company was not able to meet the target loss reduction, it would be penalized by not being able to recover the cost of losses in excess of the target amount.
- 3.3.2.3 NEPRA has to determine the difference between the units procured and units sold that includes the Technical as well as Administrative Losses. In the determination for FY 2019-20, NEPRA determined a T&D Loss target of 14.90% against the actual losses of 15.24% of the Company. The Company filed a Review Petition against the determination of NEPRA. Hearing in the case was held on 2nd March, 2021 but the decision is awaited so far. The proposed losses were disallowed on the premise that investment will reduce 0.89% losses in FY 2019-20 as compare to the allowed losses of 15.79% for FY 2018-19. However, MEPCO achieved T&D losses @ 15.24% during FY 2019-20.
- 3.3.2.4 A review of the historical T&D loss trend indicates that MEPCO has successfully maintained its T&D losses despite notable impacts of load growth, addition in the distribution network and number of consumers. The detail is as under:

Table 3.3: Historical analysis of T&D losses						
Fiscal Year	T&D losses					
2013-14	17.48%					
2014-15	16.78%					
2015-16	16.45%					
2016-17	16.91%					
2017-18	16.59%					
2018-19	15.79%					
2019-20	15.24%					

3.3.2.5 The proposed Transmission and Distribution Losses for 2020-21 to 2024-25 are given below:

Table 3.4: T&D Losses break-up MEPCO									
	FY 21	FY 22	FY 23	FY 24	FY 25				
Transmission Losses 132 kV	1.37%	1.40%	1.34%	1.30%	1.30%				
11 kV+Transformer+Cable Metering+LT Loss	13.63%	13.35%	13.25%	13.20%	13.10%				
Total Technical Losses	15.00%	14.75%	14.60%	14.50%	14.40%				
Admin. Losses	0.0%	0.0%	0.0%	0.0%	0.0%				
Total T&D losses	15.00%	14.75%	14.60%	14.50%	14.40%				

#### 3.3.3 Operating and Maintenance (O&M) Costs

.

E

3.3.3.1 A summary of the forecasted O&M Expenses for 2020-21 to 2024-25 is as under:

Table 3.5: Operating and Maintenance Cost Breakup (Rs. in Millions)										
	FY 21	FY 22	FY 23	FY 24	FY 25					
Basic Pay and allowances	8,823	11,278	13,236	15,253	17,525					
Post Retirement Benefits	7,252	7,977	8.775	9,652	10,618					
Repair & Maintenance	2,551	2,859	3,201	3,552	3,910					
Travelling Expenses	839	972	1,093	1,211	1,344					
Transportation	507	594	697	826	1,001					
Supplemental Charges	-	-	-		-					
Other Operating Expenses	1,345	1,500	1,649	1,819	2,002					
PM Assistance Package	605	586	569	552	535					
Total	21,922	25,766	29,220	32,865	36,935					

Notes: Increase in Pay & Allowances is attributable to the annual increment, impact of promotions and up-gradations during the tariff control period.

#### 3.3.3.2 Plan for Replacement Hiring:

MEPCO has planned for induction of the following number of employees during tariff control period against existing yard stick.

Table 3.6: New induction against existing Yardstick.									
	FY 21	FY 22	FY 23	FY 24	FY 25				
No. of Employees	949	2,146	1,429	i,095	947				
Projected Annual Cost (Mil. Rs.)	310	882	592	478	438				
Proj.Cost-Wire Business (Mil. Rs.)	253	720	484	390	358				
Proj.Cost-Supply Business (Mil. Rs.)	57	162	108	88	80				

1

E

 $\left[ \right]$ 

Н

3.3.3.3 The Company is a staff deficient by 20.46% and at present working at working strength of 16,066 No. of employees against the sanctioned strength of 19,780 in different cadres. Therefore, the company has planned for induction of above stated number of employees during the tariff control period.

3.3.3.4 The following manpower statistics as of February 2021 highlights the shortage of staff in the company:

Tabl	e 3.7: Man power	statistics (	As of Fe	ebruary :	2021)			
ç		Sanct'd	4	Actual W	orking Stre	ngth	-	
s. No	Description		Reg	Cont	Daily wages	Total	Deficiency	%age
Offic	ers (BPS-17 and a	above)						. *
a.	Technical	419	360	-	-	360	59	14.08
b.	Non- Technical	138	111	-	-	]]]	27	19.57
	Sub-Totai	557	471	-	-	471	86	15.44
Offic	ials (BPS-01 to 16	)						1
a.	Technical	11,474	9,139	193	205	9,537	1,937	16.88
b.	Non- Technical	7,169	5,076	98	98	5,272	1,897	26.46
c.	Clerical	580	436	15	3	454	126	21.72
	Sub-Total	19,223	14,651	306	306	15,263	3,960	20.60
To	tal Manpower	19,780	15,122	306	306	16,734	4,046	20.46

- 3.3.3.5 As evident from the tables above, the Company has been requesting NEPRA for allowing cost of hiring staff at positions where it is under-staffed. The deficiency in staff is clearly great importance at the officer level as per approved yardstick which stands at 15.44%. The deficiency and the associated financial impact have successively increased over the years, as the Company's consumer base is continually expanding. The consumer base of the company is expected to be increased at average rate of 6.1% or 0.450 Million consumers per year.
- 3.3.3.6 In order to meet the technical and operational targets, it is proposed that 949 vacancies are to be filled by the Company during FY2020-21. This recruitment will increase the base year O&M by PKR 310 Million. The projected cost of Rs. 253 Million & Rs. 57 Million assigned to the Wire Business & Power Supply Business respectively. In the same manner Rs. 882 Million, 592 Million, 478 Million & Rs. 438 Million have been projected for recruitment against vacant posts under existing yardstick of MEPCO during FY 2021-22, 2022-23, 2023-24 & 2024-25 respectively.
- 3.3.3.7 MEPCO's Plan for creation of new offices along with additional hiring for newly created offices: MEPCO has planned for induction of the following number of employees during tariff control period against human resource requirement of newly created offices.

FY 21	FY 22	FY 23	FY 24	FY 25
423	537	611	685	987
148	307	416	422	642
121	251	340	345	524
27	56	. 76	77	118
	<b>FY 21</b> 423 148 121 27	FY 21         FY 22           423         537           148         307           121         251           27         56	FY 21FY 22FY 23423537611148307416121251340275676	FY 21FY 22FY 23FY 2442353761168514830741642212125134034527567677

#### Table 3.8: New induction against creation of new offices

3.3.3.8 Basic pay, Allowances and Employee benefits: The pay & allowances for FY 2020-21 have been estimated to be Rs. 10,811 Million, out of which Rs. 8,823 Million & Rs. 1,978 Million have been projected for Wire Business & Power Supply Business respectively. Pay & allowances and employee benefits including retirement benefits constitute a major portion of the Company's O&M expenses.

RT.

Table 3.9: Basic Pay, Allowance & Employee Benefits								
	FY 21	FY 22	FY 23	FY 24	FY 25			
Salaries, Wages & Benefits	10,801	13,806	16,202	18,672	21,453			
Proj.Cost-Wire Business (Mil. Rs.)	8,823	11,278	13,235	15,253	17,525			
Proj.Cost-Supply Business (Mil. Rs.)	1,978	2,528	2,967	3,419	3,928			

3.3.3.9 Staff Retirement Benefits: NEPRA in its determination for FY 2019-20 had allowed only the amount of actual payments made to pensioners rather than the total amount of provision against Post Retirement Benefits under IAS-19. MEPCO filed Motion for Leave to Review against the tariff determination for FY 2018-19 & FY 2019-20. In the said review motion, MEPCO requested to allow provisions for post retirement benefits amounting to Rs. 50,650 Million for FY 2015-16 to FY 2019-20 against Distribution tariff. It included RS. 21,303 Million in respect of less determined provisions for Post Retirement Benefits and Rs. 29,347 Million for the amount charged to Other comprehensive income in respect of Distribution of Electric Power Business. Hearing in the said Review Petition conducted on March 02, 2021 and the decision is awaited so far. The Company fully understands its legal obligation to record and pay these liabilities. Since the unbundling of WAPDA, the Company has been making timely payments to all its retired employees.

3.3.3.10 As per requirement of IAS-19 and the repealed Companies Ordinance 1984 (Now Companies Act, 2017) the Company recognizes the gross amount of retirement benefits including requisite provisions.

Table 3.10: Provision For Staff Refirer	neni bene	IIIS			
	FY 21	FY 22	FY 23	FY 24	FY 25
Provision for Retirement Benefits	8,877	9,765	10,742	11,816	12,998
Proj.Cost-Wire Business (Mil. Rs.)	7,252	7,977	8,775	9,652	10,618
Proj.Cost-Supply Business (Mil. Rs.)	1,625	1.788	1,967	2,163	2,380

Staff Retirement Benefit Obligation: The Company currently has pension obligations of PKR 80,583 Million and is unable to transfer this amount in a separate fund as the Company does not have sufficient cash; therefore, it is proposed that Provisions for retirement benefits may be allowed in actual in addition to the Prior Year Adjustment of less determined Provisions during FY 2015-16 to FY 2019-20.

1

ſЮ

Keeping in view the above, the gross Post Retirement Benefits have been projected for 2020-21 on the basis of last actuarial Valuation Report with estimated average 10% increase for FY 2021-22 till FY 2024-25 as under:

Table 3.11 Post-Retirement Benefits Break-up (PKR Millions)										
	FY 20	FY 21	FY 22	FY 23	FY 24	FY 25				
Pension	10,075	6,935	7,629	8,391-	9,231	10,154				
Leave encashment	309	360	396	435	479	526				
Medical	1,236	1,114	1,226	1,349	1,483	1,632				
Free Supply (Retired)	612	468	515	567	623	686				
Total	12,233	8,877	9,765	10,742	11,816	12,997				
% Change		-27.0%	10.0%	10.0%	10.0%	10.0%				

NEPRA is requested to allow the above gross amount of retirement benefits in tariff for the tariff control period subject to adjustment on actual basis.

- 3.3.3.11 Other Operating Expenses: All other expenses are increased by CPI-X during the entire tariff control period except Repair & Maintenance which is based on "K" factor.
- 3.3.3.12 Adjustment Mechanism for O&M Costs: The efficiency factor "X" is being proposed as zero '0' for the Tariff Control Period on the premise that the implementation of CTBCM will further affect the cost effectiveness of the Company when most of the industrial and bulk power consumers will be leaving MEPCO and the Company will only be serving the low category domestic consumers.
- 3.3.3.13 Segregation between "Controllable" and "Uncontrollable" cost: The segregation is proposed between controllable and un-controllable costs. The employee related costs (Salaries & Wages and Retirement Costs) are treated as uncontrollable to be passed through on actual basis in the Tariff.
- 3.3.3.14 All other Costs are considered to be controllable and subject to adjustment with CPI only except Repair & Maintenance which is based on "K" factor.
- 3.3.3.15 The segregation of controllable and uncontrollable factors and their treatment in MYT is of vital importance. Non-segregation of these costs may force the Company to absorb some "uncontrollable costs" beyond its control, which are not fully recovered from its tariff resulting in financial losses to the Company.
- 3.3.3.16 In light of the above, it is submitted that any increase in uncontrollable costs be adjusted on an annual basis in the MYT tariff.

шi

#### 3.3.3.17 Z factor for force majeure events

TES

**E** 

- 3.3.3.18 There shall be a provision for costs incurred as a result of force majeure events such as earthquakes, flooding, wind storms, thunder storms, acts of terrorism, etc. In the absence of a provision for such events and adjustments restricted strictly to the CPI-X factor, the Company will be unable to recoup the costs required to undertake the necessary repairs.
- 3.3.3.19 It is proposed that an additional Z factor should be included in the MYT to cover costs for such events. These costs shall be computed after the occurrence of such an event at which point the Company shall estimate the financial impact of such an event and request NEPRA's approval for inclusion in the subsequent year. As replacement of any equipment as result of such damage shall be covered through proposed investments to be approved by NEPRA, it is anticipated that major costs falling under Z factor will comprise repair & maintenance and incidental costs. In the event that insurance coverage is available at a reasonable cost, recoveries made under such an arrangement will not be incorporated in the tariff for the subsequent period.
- 3.3.3.20 **Repair & Maintenance:** In the Tariff determination, the Regulator allowed Rs. 1,384 Million against repair & maintenance for FY 2019-20 against actual expenditure of Rs. 1,729 Million although the company elaborated each item of Repair & Maintenance. It is reiterated that repair & maintenance cost shall enable the company to ensure smooth and efficient functioning of the transmission and distribution system in operation. Moreover, it shall contribute to the benefit of the consumers at large by reducing power outages, system breakdowns and better service quality in addition to contribution in reduction of the T&D Losses. Foregoing in view, NEPRA is requested to allow full amount of the repair & maintenance projected for tariff control period in this MYT. The repair and maintenance is mainly for standalone items necessary for keeping the system in operation with no additional benefits.

- 3.3.3.21 The adherence to service standards and improvement of customer services is only possible through continuous repair and maintenance of distribution network etc. Timely repair and maintenance is vital to continuous and reliable supply of electricity. Delays in scheduled repairs ultimately result in system breakdowns which in turn not only has an impact on the end-consumer, including adversely affecting industrial and agricultural production, but also damages the distribution network which then requires further investments. Furthermore, non undertaking of routine repairs results in accumulation of faults with the utility which requires significant investments, a few years down the line against an issue that could have been dealt earlier at a significantly lower cost. Repairs are thus an important aspect in controlling the increase in end-user tariff and necessary, if distribution loss targets are to be achieved.
- 3.3.3.22 Historically, variance between requested and allowed repair & maintenance costs has been over 20%. Such a situation, in view of the significant decrease in repair requirements of the Company's infrastructure shall have a drastic impact on the sustainability of the existing distribution system which will ultimately affect the well being of the consumers.
- 3.3.3.23 With a view to allow the Company greater autonomy over its operations relating to network management, repair & maintenance costs has been assumed as "K" factor @ 1.5% of gross Distribution Plant Equipment of gross fixed assets, which is consistent with the actual requirements due to vast & old distribution system.

#### 3.3.4 Return on Rate Base

]

5

- 3.3.4.1 Return on equity is calculated using CAPM model and requires the estimation of following components:
  - i) Risk free rate (Rf)
  - ii) Beta (B)
  - iii) Market premium (P)
- 3.3.4.2 Risk free rate is the rate of return that the investors expect to earn on investments that have virtually no risk of default. Risk is viewed in terms of the variance in actual returns around the expected return. For an investment to be risk free in this environment, then, the actual returns should always be equal to the expected return.

- 3.3.4.3 In view of the business horizon of a electricity distribution business, the Company's contractual obligations and operational risks which extend beyond a single year, it is proposed that weighted average yield on 05 year Pakistan Investment Bond (PIB) as of June 25, 2020 be considered as the risk free rate. This rate would be adjusted on an annual basis as per State Bank of Pakistan publications.
- 3.3.4.4 NEPRA has allowed Return on Equity (Market Risk Premium & Risk Free Rate) as 15% in previous Tariff Determination; therefore, the same has been used for calculating RORB.
- 3.3.4.5 Currently, NEPRA uses a standard beta for calculating the return on equity for all DISCOs. The same beta has been used for computing return on equity in all previous three determinations.

#### 3.3.5 Cost of Debt

Cost of debt is taken as 3 Months KIBOR+3% of 2<sup>nd</sup> July, 2020. However, any taxes paid by the company will be passed on directly to the end-consumers.

#### 3.3.6 WACC

- 3.3.6.1 Based on the above input parameters, the Company's weighted average cost of capital computes to 11.72%.
- 3.3.6.2 Regulatory asset base for 2020-21 to 2024-25 is shown in required forms
- 3.3.6.3 The Regulatory Asset Base (RAB) is the gross fixed asset that is used in the distribution activities of the Company. The return on rate base is calculated by applying the WACC on the RAB.
- 3.3.6.4 As per MYT guidelines the RORB assessment will be made in accordance with the following formula/mechanism:

RORB(Rev) = RORB(Ref) \*RAB(Rev) / RAB(Ref)

Where:

RORB(Rev) = Revised Return on Rate Base for the Current Year

RORB(Ref)=Reference Return on Rate Base for the Reference Year

RAB(Rev) = Revised Rate Base for the Current Year

RAB(Ref) = Reference Rate Base for the Reference Year.

#### 3.3.7 Distribution Company Integrated Investment Plan (DIIP)

3.3.7.1 Pakistan's power sector is currently afflicted by a number of challenges that have led to a crisis, specially:

- i) Highly expensive electricity generation due to an increased dependence on expensive thermal fuel sources.
- ii) Liquidity constraint due to high cost & Low recovery.

133

- iii) An inefficient power transmission and distribution system that currently records high percentage of losses due to poor infrastructure, mismanagement, and theft of electricity.
- 3.3.7.2 To achieve efficiency and ensure system reliability MEPCO has chalked out a 5 year Distribution Company Integrated Investment Plan (DIIP) for FY 2020-21 to FY 2024-25.
- 3.3.7.3 Further, in tariff determination for FY 2018-19 & 2019-20, NEPRA directed MEPCO to file 5 year integrated investment plan along with multiyear tariff petition for next 5 years i.e. FY 2020-21 to 2024-25.
- 3.3.7.4 The Distribution Plan of the Company, which is integrated with the 132 KV network studies, envisages expansion and rehabilitation of the Company network during the years 2020-21 to 2024-25. The Company intends to invest an amount of PKR 67,072 Million through MEPCO own sources and Rs. 47,054 million through consumer finance over the tariff control period keeping in view its system requirements under the projects i.e. Secondary Transmission and Grid Stations (STG), Distribution of Power (DOP), Energy Loss Reduction (ELR) and Power Distribution Enhancement Investment Program (PDEIP).

3.3.7.5 The details of investments proposed annually are detailed below:

#### MEPCO MYT For FY 2020-21 to FY 2024-25

Table 3.12: Investment plan breakup(PKR million)							
	2020-21	2021-22	2022-23	2023-24	2024-25	Total	
DOP	910	2,404	2,564	2,029	2,190	10,097	
ELR	2,130	3,647	3,853	4,684	4,938	19,252	
STG	3,600	4,372	4,106	4,453	4,529	21,060	
Vehicles	480	702	844	413	441	2,880

Finance	9,228	9,050	9,748	9,098	9,546	46,671	
Total Investment	18,140	23,714	25,412	24,305	24,780	116,351	

3.3.7.6 The above stated investment plan results in significant improvements in its T&D losses and enables the Company enhance its customer base by increasing connections. The plan is also intended to increase system reliability.

3.3.7.7 Proposed impact of investments on T&D reduction is detailed below. As is evident the Company would be able to decrease losses from 15.24% to 14.40% by a cumulative 0.60% over the tariff control period.

Table 3.13: T&D Loss Reduction						
	2020-21	2021-22	2022-23	2023-24	2024-25	Total
Projected T&D losses	15.00%	14.75%	14.60%	14.50%	14.40%	
Reduction in losses	0.24%	0.25%	0.15%	0.10%	0.10%	0.84%

3.3.7.8 Implementation of Technology Road Map (ERP/SAP) in MEPCO

The Company has already implemented following Modules of ERP/ SAP:

- Financial Information & Controlling (FICO)
- Material Management (MM)

122

03

đ

MEPCO MYT For FY 2020-21 to FY 2024-25

Human Capital Management (HCM)

MEPCO has proposed an amount of PKR 220 million for different Add-ons / New Projects under ERP during the tariff control period. A brief summary is given below:

Financial Year	Add-ons/ Module	PKR Millions
2020-21	SAP Pension System etc.	80
2021-22	SAP HCM Workflow	35
2022-23	SAP FICO Integration with oracle CIS	10
2023-24	SAP Plant Maintenance/ Project System	45

•	TOTAL	220

#### Table 3.14- SAP / ERP

#### Implementation of Centralized Pension Payment System:

Implementation of the whole Pension process to retired employees on SAP is underway as a part of FICO and HCM Modules already implemented in MEPCO. Activities included;

- Connecting the system with biometric machansim for authentication /varification of pensioners
- Centralized payment to all retired employees of MEPCO any where in the country
- Pensioners Master Data
- Pension Calculations for all types
- End user Training
- User Acceptance Testing

The Company will purchase the required user blocks with an approximate cost of Rs. 25 Million expecting by June 2021.

#### HCM Work Flows:

Different work flows pertaining to HCM Module are planned to be implemented. 52 No. Work Flows are identified for implementation at the existing HCM Module.

The activity is to be got done through outsourcing. For this purpose RFQ is under process with anlysis of the project.

It would be done during 2021-22 and the estimated cost of the project is 3.5 Millions.

#### FICO Integration:

......

663

MEPCO is to configure the existing billing system (CIS) with SAP. The Project will be outsourced and it will help to get online data from billing system. The estimated cost is Rs.10 Million

#### Plant Maintenance:

SAP Plant Maintenance (SAP PM) application component provides an organization with a tool for all maintenance activities to be performed. Following activities are performed under Plant Maintenance –

- Inspection
- Preventive Maintenance
- Repair

Following are the key modules in which integration is performed with Plant Maintenance

- Material Management
- Controlling
- Project Systems

#### Project Systems:

Project System is one of the key modules of SAP to perform project and portfolio management. It helps to manage the project life cycle starting from structuring to planning, execution, until the project completion.

Following are the key steps involved in Project process flow –

- Create Templates/WBS
- Create Project
- Project Planning
- Budgeting and Release
- Project Implementation
- Project Completion
- The estimated Cost of Plant Maintenance and Project System Implementation will be Rs.45 Million.

#### Dash Board:

In order to get maximum Reports from SAP for managerial decision making the existing SAP System will be configured to activate the dash board in SAP. This project is to be out sourced and expected to be completed by 2022-2023. The approximate cost for the project would be Rs.15 Millions.

#### Upgradation of the Installed SAP ECC 6.7

Currently SAP ECC 6.7 is installed at MEPCO. SAP ECC6 series is an old version of ERP System. MEPCO will required an upgrade of SAP System and Data Centre Hardware to SAP HANA being the latest available release in the Market. That need complete configurations and implementation of entire system. The job of upgradation will be outsourced to an SAP Implementation Partner

operating in Pakistan.

The estimated project cost would be around 30 Millions by Fiscal Year 2024-25

#### 3.3.8 Depreciation

<u>ra</u>

3.3.8.1 Depreciation is charged on the straight-line method so as to diminish the cost of an asset over its estimated useful life. As per Company's policy, building and civil works are depreciated @ 2%, feeders and grids & equipment's @ 3.5%, other plant/equipment and vehicles @ 10%. The depreciation for FY 2020-21 to FY 2024-25 has been estimated on the original cost of the assets.

Table 3.15: Depreciation Expense				
	FY 21 FY 22	FY 23	FY 24	FY 25
Depreciation Expense	5,695 6,388	7,155	7,945	8,749

3.3.8.2 As per MYT guidelines, Depreciation expense for future years will be assessed in accordance with the following formula/mechanism:

DEP(Rev) = DEP(Ref) \* GFAIO(Rev) / GFAIO(Ref)

Where:

DEP(Rev) = Revised Depreciation Expense for the Current Year

DEP(Ref) = Reference Depreciation Expense for the Reference Year

GFAIO(Rev) = Revised Gross Fixed Assets in Operation for the Current Year

GFAIO(Ref) = Reference Gross Fixed Assets in Operation for the Reference Year

#### 3.3.9 Other income

28

- 3.3.9.1 Other Income includes mark-up on bank deposits, amortization of deferred credit and income from other sources. As there is no clear trend found during the past, hence, other income have been assessed on the basis of last five year moving average except for the amortization of deferred credit which has been calculated @ 3.5% on the accumulated balance of contributions against connection installed/ deposit works i.e. consumer financed assets.
- 3.3.9.2 The Late Payment Surcharge has been excluded from the total Other Income as per decision of NEPRA in the Tariff determination of FY 2014-15 of MEPCO.
- 3.3.9.3 The detail of other income is as under:

	FY 21	FY 22	FY 23	FY 24	FY 25
Late payment surcharge	2,453	2,632	2,803	2,986	3,180
Profit on bank deposits	1,276	973	1,113	1,219	1,302
Meter / service rent	74	67		76	77
Reconnection fees	46	37	39	41	4]
Rental & Service income	80	75	83	83	83
Repair, testing and inspection fees	· · · ·	96	98	100	103
Credit balance written off	· 	54	55	56	58
Sale of Scrape	102	55	66	77	83

Otherincome	75	194	110	112	119
Amortization of deferred credit	3,212	3,507	3,838	4,155	4,478
Total Other income incl. LPS	7,701	<b>8,07</b> 0	8,680	9,296	9,923
Less: Late payment surcharge	.2,453	2,632	2,803	2,986	3,180
Other income Excl. LPS	5,248	5,438	5,877	6,310	6,743

3.3.10 **Prior Year's Adjustment (PYA)** 

- 3.3.10.1 Rule 53 of NEPRA Tariff Guidelines provides that under-recovery or overrecovery of the cost-of-service incurred during the previous year shall be accounted for going forward during the current year under the head of prior period adjustment
- 3.3.10.2 The Company's tariff for FY 2018-19 & 2019-20 was determined by NEPRA on 24<sup>th</sup> December, 2020 and notified by GoP w.e.f. 12<sup>th</sup> February, 2021. The prior year's adjustments pertaining to FY 2018-19, 2019-20 and any unrecovered/underrecovered cost prior to the said years are summarized below:

### Table 3.17- Prior Year Adjustment (PYA)

#### **PKR Million**

Description	Wire Business	Supply	TOTAL
Staff Retirement Benefit FY 2015-16 to 2019-20	50,651	2,227	52,878
Return on Rate Base (RORB)	5,400	-	5,400
PEPCO Management Fee	610	-	610
PM Assistance Package for families of Govt. employees who die in service	1,670	374	2,045
PPP Adjustments	-	14,106	14,106
TOTAL	58,332	16,707	75,039

#### 3.3.10.3 Provision for staff Retirement Benefits:

- i) MEPCO is a public limited company incorporated under the repealed companies ordinance, 1984 (Now Companies Act, 2017) and maintaining its Financial Statements under the SECP regulations and International Accounting Standards (IAS) adopted in Pakistan. Similarly Provisions for Post Retirement Benefits are recognized in line with the requirements of IAS-19 based on third party Actuarial Valuations/ Independent Actuaries. The Authority partially allowed Post Retirement Benefit up to the extent of actual payment of post retirement benefits despite the fact that in compliance of Authority directions in its decision vide Para 14.2.9 of MEPCO Tariff Determination for the FY 2011-12, the Company established a separate postretirement benefits Trust Fund and managed transfer of Rs. 2,854 Million till March 31, 2021 in the Bank Accounts of the Trust Fund out of the determined Distribution Margin included only the actual payments of post retirement benefits. On the other hand, the Authority not even allowed the funds actually deposited in post retirement fund by MEPCO from the already allowed inadequate Distribution Margin.
- ii) Further, the authority discussed in Para 25.6 and 25.9 of MEPCO Distribution Tariff Determination for FY 2018-19 & FY 2019-20, dated December 24, 2020 that provisions were allowed before FY 2012-13 which were not deposited into the pension fund.
- iii) In this regard, it is clarified that the amounts allowed at that time in the head of Pay & Allowance were inclusive of Post Retirement benefits. The same were also inadequate in relation to the actual provisions. The comparison of actual & determined Cost of Pay & Allowances including Retirement Benefits for the FY 2008-09 to FY 2011-12 is given as under:

E

DKD Millions

	Actual				Less Determined	
Year	Pay & Provision for Total De Allowance PRB		Determined			
2008-09	2,512	931	3,443	3,035	(408)	
2009-10	2,674	1,759	4,433	3,490	(943)	
2010-11	3,687	2,009	5,696	4,014	(1,682)	
2011-12	4,467	2,527	6,994	4,616	(2,378)	
TOTAL	13,340	7,226	20,566	15,155	(5,411)	

Table 3.18-PYA-Post Retirement Benefits (PRB) Actual & Allowed

iv) It is further submitted that the allowed provisions were even less than the actual payments made for FY 2008-09 to 2011-12 as summarized below:

 Table 3.19-PYA-Post Retirement Benefits (PRB) Less Determined
 PKR Million

	Actual					
Year	Pay & Allowance	Provision for PRB	Total	Determined	Determined	
2008-09	2,512	322	2,834	3,035	201	
2009-10	2,674	384	3,058	3,490	432	
2010-11	3,687	483	4,170	4,014	(156)	
2011-12	4,467	629	5,096	4,616	(480)	
TOTAL	13,340	1,818	15,158	15,155	(3)	

- v) The above table shows that during FY 2008-09 to FY 2011-12, the amount available for Post Retirement Benefits was so inadequate to honor even the actual payments of Post retirement Benefits. Rather the deficit of Rs. 3 Million was financed by MEPCO from its own kitty being a compulsory obligation of the company. The above situation give a brief incite to the unavailability of funds to create pension trust fund even before FY 2012-13.
- vi) MEPCO suffered a gap of Rs. 23,531/- Million in the actual provisions for postretirement benefits as per audited Financial Statements and the amount allowed by NEPRA based on the actual payments for the FY 2015-16 till FY 2019-20. The year wise gap is given below:

Table 3.20-PYA-(PR	PKR Million		
Year	Actual Provisions	Allowed by NEPRA	Gap
2015-16	7,327	2,134	5,193
2016-17	4,930	2,461	2,469
2017-18	6,550	2,707	3,843
2018-19	8,679	4,232	4,447
2019-20	12,233	4,655	7,578
Total	39,720	16,189	23,531

202

: [

- vii) It is also obvious that in absence of sufficient funds (provisions not allowed by NEPRA), MEPCO may not be able to deposit the requisite amounts in Post Retirement Benefit fund. This will further discourage the NEPRA objective that by creating Post Retirement Fund a time will come when the fund will be able to generate sufficient amount in line with the required provisions and due to this the Distribution Margin of the petitioner would eventually be reduced and ultimately the consumer end Tariff will reduce. However, in the present scenario of allowing only actual payments against post retirement benefits, the said phenomena do not seem practicable.
- viii) The Authority has already allowed Provisions for Post Retirement Benefits to 03 DISCOs namely IESCO, LESCO & FESCO operating under MYT regime.
- ix) Foregoing above, the Authority is requested to allow Rs. 50,651 Million against post retirement benefits charged during FY 2015-16 to 2019-20 which were less allowed by the Authority.

#### 3.3.10.4 RORB less allowed by the Regulator

The Authority less allowed RORB to the extent of Rs. 5,400 Million during FY 2015-16 to 2019-20 as per the following detail:

Table 3.21-PYA-Retur	RKR Million		
Year	Determined	Actual	Variance
2015-16	2,518	3,862	1,344
2016-17	3,489	4,279	790
2017-18	4,541	4,862	321
2018-19	4,122	5,446	1,324
2019-20	6,610	8,232	1,622
Total	21,280	26,680	5,400

T	able 3.22-PYA-Regu	latory Asset B	ase (RAB) &	RORB		RKR Million
	Description	2015-16	2017-18	2018-19	2019-20	
	Average RAB	32,644	36,168	41,096	49,752	54,822
	Rate of Return	11.83	11.83	11.83	10.95	15.02
	RORB	3,862	4,279	4.862	5,446	8,232

MEPCO has calculated RORB on the basis of actual audited financial statements for FY 2015-16 to FY 2019-20 on the RORB allowed for respective years. However, the complete working is attached as Annex-IV to this petition.

#### 3.3.10.5 PEPCO Management Fee

PEPCO issued debit notes of Rs. 610 Million against PEPCO management fee. The supporting documents of the same are attached.

## 3.3.10.6 Prime Minister Assistance Package

- (a) The Establishment Division's office memorandum No. 8/ 10 / 2013-E-(PT) dated 03.08.2016 regarding Assistance Package for Families of Employees Who Die in Service, was adopted by PEPCO Board of Directors. The same was forwarded to CEO MEPCO vide PEPCO letter No. GM(HR) /HRD /A-332 /4050-75 dated 04/11/2016.
- (b) BOD MEPCO in its 134<sup>th</sup> meeting held on 20/03/2018, has adopted the same Establishment Division's office memorandum dated 03.08.2016 regarding Assistance Package for Families of Employees Who Die in Service.
- (c) In this regard, MEPCO has projected estimated previous period (04/11/2016 to FY 2019-20) cost of Rs. 1,670 Million with average Rs. 569 Million annual projected impact in subsequent years FY 2020-21 to FY 2024-25. The Authority is requested to allow Rs. 1,670 Million as Prior year adjustment. However, it is submitted that it is difficult to project no. of employee who die during service on yearly basis, therefore, it requested to allow the actual amount rather than the projected amounts on this account.

#### 3.3.10.7 PPP Periodic Adjustments

NEPRA Guidelines for determination of consumer end tariff (Methodology and process) issued vide SRO # 34 (1)/2015, dated 16th January, 2015, the lay down procedure for periodic adjustments against Power Purchase Price. The detail of amount is as under:

#### Table 3.23 PYA-PPP Periodic Adjustments

Description	PKR Million
Less Determined Periodic Adjustment 4 <sup>th</sup> Q.FY 2019-20	437
Periodic Adjustments-1 <sup>st</sup> Quarter FY 2020-21	6,809
Periodic Adjustments-2 <sup>nd</sup> Quarter FY 2020-21	6,860
TOTAL	14,106

MEPCO was allowed Rs. 15,147 Million against PPP periodic adjustment for 4<sup>th</sup> Quarter of FY 2019-20 included negative impact of losses of Rs. 919 Million based on provisional FCA as requested by CPPA-G for the months of said quarter of FY 2019-20. However, on the basis of notified FCA rates for said quarter, the PPP periodic adjustment amounts to be Rs. 15,584 Million including negative impact of losses of Rs. 482 Million. Thus an amount of Rs. 437 Million (15,584-15,147) was less allowed to MEPCO. Foregoing above, it is requested to allow Rs. 437 Million against PPP adjustment for 4<sup>th</sup> quarter of FY 2019-20. MEPCO has submitted PPP Periodic Adjustments for 1<sup>st</sup> & 2<sup>nd</sup> quarter of FY 2020-21 amounting to Rs. 6,809 Million & Rs. 6,860 Million respectively, for

which, determination is yet awaited. The detailed workings of each above item of PPP adjustments are attached

#### 3.3.10.8 Other Issues

1

#### 3.3.10.9 Non Payment of Use of System Charges:

MEPCO operational area is in the vicinity where major thermal generation of country takes place and NTDC does not evacuate all power directly from these power plants. Resultantly, MEPCO's transmission assets/ network system are used for power evacuation/ transmission, and accordingly, to cater for this service and transmission losses, MEPCO has been allowed by NEPRA to claim use of system charges from the neighboring DISCOs & NTDC, but MEPCO's such claims / invoices amounting to Rs.17,083 million for the period from January 2006 to December 2015, have not been accepted by the respective Companies despite the fact that those entities are also the licensees of NEPRA. To materialize implementation of NEPRA's said decision, pursuant to para 24.5 of MEPCO Tariff determination made on 29th February 2016, the Regulator conducted a meeting with all DISCOs and NTDC. However, final outcome is still awaited. It is therefore again requested that MEPCO's said issue of UoSC and transmission losses, outstanding since long, may kindly be resolved.

#### 3.3.10.10 Delays in payment of Tariff Differential & Other Subsidies:

A major reason for cash constraints faced by the Company is the delays in release of Tariff Differential and Other Subsidies by the GoP. As evident from the table below, a major portion of the annual revenue attributed to tariff differential subsidy remained unpaid at each year end. The cumulative impact of TDS for the FY 2017 till 2020 was 23.3% remained unpaid.

Table 3.24: Tariff differential subsidy (TDS)		· · · · · · · · · · · · · · · · · · ·		
	FY 17	FY 18	FY 19	FY 20
Tariff differential subsidy (TDS)	22,903	30,954	64,840	79,588
Subsidy paid during the year	15,098	14,070	69,187	53,799
Unpaid subsidy at year end	7,806	16,884	(4,347)	25,789
Unpaid subsidy at year end (% of TDS)	34%	55%	(7)%	32%
Cumulative unpaid subsidy		23%		

Table 3.17: Other Subsidies			-	
	FY 17	FY 18	FY 19	FY 20
Subsidies Claimed (ISP, ZRIR, SME				
etc.)	2,127	3,957	9,890	21,753
Paid during the year	0	1,602	10,043	0
Unpaid at year end	2,127	2,355	(153)	21,753
Unpaid subsidy at year end (% of Claimed)	100%	59.5%	(1.6)	100%
Cumulative unpaid subsidy %		69.1%		

63

1

3.3.10.11 The imbalance created as a result of the above, severely affects the Company's ability to discharge its obligation towards power purchase cost and even leads to its inability to ensure reliable and consistent supply of electricity. This also leads to creation of circular debt and huge Supplemental Charges on delayed payments to IPPs which can easily be saved if the release of subsidies is to be made in time.

3.3.10.12 The Company is currently unable to pass-through the cost of financing this shortfall in cash through its tariff and thus has to finance it through its internal resources. In view of the above, it is thus requested, that NEPRA allow the Company to charge a cost of working capital in the range of KIBOR plus a spread of 3.0% of the average monthly revenue requirement of MEPCO. This shall allow the Company cost of working capital of Rs. 1,346 Million for tariff control period which will help to effectively manage MEPCO's cash flows and also to help in improving the strained liquidity conditions the Company is currently Arbitrary Calculation of Delayed Payment Charges by CPPA-G.

MEPCO MYT For FY 2020-21 to FY 2024-25

## 4. **REVIEW OF ADJUSTMENTS**

#### 4.1. Pass-through items

#### 4.1.1 Monthly Fuel Adjustments

4.1.1.1 The existing practice with respect to the adjustments on account of variation in fuel cost component of PPP on monthly basis may continue for the 2020-21 to 2024-25 period to be reflected in the consumers' monthly bill as Fuel Adjustment Charge as per following formula. However, it is proposed that the references may be set with due care to avoid imbalances in the actual and reference fuel costs.

#### Fuel Price Variation = Actual Fuel Cost Component - Reference Fuel Cost Component

Where:

Fuel Price variation is the difference between actual and reference fuel cost component

- 4.1.1.2 Actual fuel cost component is the fuel cost component in the pool price on which the DISCOs are being charged by CPPA in a particular month; and
- 4.1.1.3 Reference fuel cost component is the fuel cost component for the corresponding month projected for the purpose of tariff determination.

#### 4.1.2 Quarterly PPP Adjustments

- 4.1.2.1 The quarterly adjustments may also be done for the tariff period as per the following scope.
  - The adjustments pertaining to the capacity and transmission charges.
  - The impact of T&D losses on the components of PPP.
  - Adjustment of Variable O&M.

However, it is proposed that PPP adjustment should be allowed monthly on the analogy of Fuel Cost Adjustment (FCA) mechanism.

## 4.2. Annual true-up adjustment

(Cal

5

4.2.1 Investments made by the Company are added to the Regulatory Assets Base which is used to determine the Return on Rate Base. The difference between the budgeted and actual investment will result in variations in RAB and Return on Rate Base. It is therefore requested that investments should be trued up every year. As a 5 year multi-year tariff has been requested, investment trued up at the end of each year will ensure that appropriate return is allowed on the Regulatory Assets Base for the next year. Further, it will enable NEPRA to monitor performance of the DISCO in terms of timely completion of proposed projects and ensuring prudency in costs so no undue burden is placed on the end-user.

### 4.3. Future Prior Year Adjustments

- 4.3.1 It is proposed to continue Prior Year Adjustments in future periods to address the issues included, but not limited to the following
  - Any over/under-recovery of Power Purchase cost due to delayed determination/implementation of consumer end tariff to be trued up to the extent of actual figures;
  - Any under or over recovery of revenue due to variation in the forecasted and actual consumer mix;
  - Variation in forecasted & actual Distribution Margin, other income and Prior
     Period Adjustments; and
  - Any other adjustment in addition to above.

44

## 5. SUMMARY AND CONCLUSION

## 5.1. SUMMARY

22

65

On the basis of above it is, inter alia, submitted that while admitting and allowing this petition of the Company for FY 2021-21 to 2024-25 whereby:

- 5.1.1 The Company may be benefited by the timely determination and immediate application of the proposed tariff to ensure its financial viability and reliable system of supply of electricity to its 6.885 Million (by the end of FY 20) consumers;
- 5.1.2 NEPRA may determine with reasons and allow the Company, on basis of anticipated sale during FY2020-21 to FY 2024-25, to recover the Revenue Requirement as mentioned in the tariff petition formats including Investment Plan of PKR 69,681 million (It does not include the CAPEX related to consumer contribution which amounts to PKR 46,671 million
- 5.1.3 The other periodical adjustments as per determinations of NEPRA may please be allowed to be continued;
- 5.1.4 MEPCO may be allowed induction of 6,566 nos. of employees in tariff control period as per the proposed induction plan submitted with this tariff petition
- 5.1.5 The company may be allowed as requested above to create new office namely "Market Implementation & Regulatory affair Department (MIRAD)"to deal with the matter related with Competitive Trading Bilateral Contract Market (CTBCM) and other allied matters.
- 5.1.6 The Company may be allowed to create 36 new (op) Sub Divisions, 05 new (op) Divisions, 08 new/ upgrade grid station offices, 01 each new office of Operation circle, M&T circle, RRE construction division, Regional store. Construction sub division & MIRAD during tariff control period as requested in this tariff petition.
  - 5.1.7 The Company may be allowed Annual WACC indexation for RORB calculation for the tariff period.
  - 5.1.8 To allow the Company the proposed segregation of Controllable and Uncontrollable cost, Repair & Maintenance through "K" factor and a "Z" factor for unforeseen factors.
  - 5.1.9 Any other relief, order or direction which The Authority deems fit.

## 6. SUMMARY OF EVIDENCE

## 6.1. EVIDENCES

 $\square$ 

7.

The summary of evidence giving brief particulars of data, facts and evidence in support of this tariff petition forms an integral part thereof as mentioned below:

6.1.1	Copy of Resolution of Board of Directors MEPCO	(Annex-!)
6.1.2	Standard Petition Formats	(Annex-II)
6.1.3	Three years Financial Statements (2017-18 to 2019-20)	(Annex-III)
6.1.4	PYA- RORB Calculation	(Annex-IV)
6.1.5	PYA-Prime Minister Assistance Package Details	(Annex-V)
6.1.6	PYA-PPP Periodic Adjustment Working	(Annex-VI)

That in view of the grounds and facts mentioned above, it is respectfully prayed that while admitting and allowing this petition, MEPCO's Multiyear tariff for the next 05 years i.e. FY 2020-21 to FY 2024-25 may very graciously be determined as estimated hereinabove.

## COMPLIANCE OF DIRECTIONS

MEPCO has submitted Compliance status of Authority's directions given in Tariff Determination dated 24<sup>th</sup> December, 2020 for FY 2018-19 & 2019-20 vide this office letter No. FDM/ BS/ Tariff/ 29672 dated 03/05/2021.

DEBIT MEMO **REFERNECE:** IOT SECTION Jun-14 PPA-335/MEPCO-19 ISSUING OFFICE Manager Finance (Treasury) CPPA RECEIVING OFFICE: FINANCE DIRECTOR. Dated: Jun-14 JE PEO Mind Ext MEPCO. MULTAN 7.Sra We have Debited your account for the amount of Rs. 456,376,227.00 Four Hundred Fifty Six Million Three Hundred Seventy Six Thousand Two Hundred Twenty Seven **Rupees and Zero Paisa** Being the Debit raised on account of operation and mantentance expenses of PEPCO allied formations chargeable to your office as approved by CFO PEPCO (Copy enclosed) detail attached. ACCOUNT CODE DESCRIPTION DEBIT CREDIT 150103 TRADE DEBTORS 456,376,227.00 456.376.227.00 TOTAL EPAREN CHECKED B

## SUBJECT FINANCING TO PEPCO FORMATION BY M.E (TREASURY) CPPA, TO BE PRORATED TO DISCOS

It is apprised that Manager Finance (Treasury) CPPANTDCL is making payments to lower formations of EEPCO against O&M expense since July 2008. The said expenses is to be debited to DISCOS/SENCOs at different ratio as mantioned in the budget approved by the Director Budget PEPCO for the each Financial year and for each allied office. The formation wise detail of Financing by M.F(Treasury) is up to June 2014 as under:-

NO			
	FCRMATIONS	AMOUNT	<u>Desitable to</u>
	C.E (R.E)	85,347,238	All DISCOs at different ratio
	C.E (ADMN: ) FOWER	1,553,058,998	AN DISCOs at different ratio
	C.E (P.J)	100,562,335	All DiSCOc at different ratio
	G.H. (NAS)	331,209,823	All DISCOs at different ratio
	CHIEF AUDITOR	212,926,979	All DISCOs at different ratio
	( Pau)	252,508,498	A& DISCOs at different ratio
	M.F THERMAL	395,788,675	All GENCOs on equal basis
	g.m Pinance (Pepco)	132,110,875	All DISCOs at different ratio
	TOTAL	3.063.992.274	

To clear the receivables from allied offices in CPPA Books, as mentioned in budget approvals, said financing is to be charged to DiSCOs/GENCOs for which CFO.PEPCO may requested to approve the charging of expanse to the concerned entities at the ratio as mentioned in the Budget Allocation.

Moreover, it is also requested that DISCOs/GENCOs may also be advised to incorporate the said expense in their books in the current financial year.

Submitted please.

# ONE PAGE HISTORY AND AND DIE IN SERVICE

Conference of the

- DG (ER) PEPOO WAPDA House, Labore vide No. GM (HRVHRD/A-332 /4050-75 dated: 04.11.2016 issued office memorandum regarding Assistance Package for families of employees who die in service (Annex-A).
- MEPCO BOD in 134<sup>th</sup> meeting hald on 20.03.2018 notified by Company Secretary MEPCO HQs Multan vide letter No. 24390-414 dated: 02.04 2018 accorded approval for adoption of said package w.e.f 04.11.2016 subject to condition that the company will prepare a new amended MEPCO policy duly vetted by Director (Legal) MEPCO HQs Multan ensuring that there will be no duplication of benefits and employees will not be deprived of any benefit which they are already availing (Annex-B). Office order for adoption of said package was issued vide No. 89-I/46059-81 dated: 24.04.2018 (Annex-C).
- In compliance of directions of MEPCO BOD, a new amended MEPCO policy was prepared and sent to Director (Legal) MEPCO HQs Multan vide this office U.O No. 47206 dated: 26.04.2018 (Annex-D).
- Director (Legal) MEPCO HQs Multan vide isiter No. 27074-77 dated: 14.03.2019 forwarded the colloy duly vetted by Rao Muhammad Iqtial, Advocata Supreme Court / Senior Legal Advisor MEPCO (Annex-E).
- New amended MEPCO policy duly verted by Senior Legal Advisor MEPCO was put up to the then Chief Executive Officer MEPCO (Mr. Tahir Mehmood) for perusal, who directed to put up the same in BOD alongwith financial implication for final approval (Annex-F).
- The matter was referred to Finance Director MEPCO alognwith scale wise abstract of died employees w.e.f 04.11.2016 to 07.05.2019 for provision of financial implication vide this office letter No. 44453 dated: 07.05.2019 (Annex-G).
- Finance Director MEFCO vide his latter No. 4586 dated: 01.09.2020 provided the financial implication for adoption / implementation of new amended MEPCO (Annex-H), or the meanwhile matter remained under correspondence with Finance Director MEPCO and other different offices for fulfillment of pre-requisites.
- The matter was again put up for soliciting advice that whether new amanded MEPCO policy duly vetted by Sr. Legal Advisor MEPCO may be circulated / disseminated to all lower formations under MEPCO for its implementation in true letter & Spirit or an item note may be prepared and presented before MEPCO BODfor its approval as per remarks of the then CEO MEPCO (Mr. Tahir Mehmood). DG (HR&Admn) MEPCO given his remarks that "previous order in this regard was conditional subject to preparing amended policy to avoid any duplication of policy / benefits. Hence, it is appropriate to take up the case with BOD together financial implication given by FD. Also, keep in view direction of PEPCO regarding inclusion of cost in tariff petition and approval of NEPRA for the budget" (Annex-I).
- In the light of Directions of DG (HR&Admn) MEPCO, Assistant Director (Admn) MEPCO (Rana Muhammad Sarfraz) met with Finance Director MEPCO (Mr. Aftab Fazal) on said matter, who informed that cost / budget will be included in tariff petition and informed to NEPRA after approval of the said package from MEPCO BOD as NEPRA is not colley making / policy approving Authority for MEPCO, NEPRA will only determine the tariff of MEPCO according to expenses of Company.
- It is pertinent to mention here that from the date of issuance of DG (HR) PEPCO Office memorandum regarding Assistance Package for families of employees who die in service dated: 04.11.2016 todate PEPCO is pressing very hard time & again for adoption / implementation of said package in true letter & spirit. In addition, bereaved families of deceased employees are also requesting for payment of benefits as per said package and causing litigations at different forums.

Any mission of the facts and figures in the arching paper would make 

Amroval for author antice of Cloret Executive Officer 31E2000 for autoration during the daily wages labor in TRW Maline, Veharl & Bahawalp ir.

Approval for authorization to Chief Executive Officer MEECO Ltd Muttan to grant the continued retention of 354 Nos. daily wagers already ivorking on 89-days spell basis for village electrification, deposit works, HT Foeder & 1.T Proposals w.s.f 17-12-2017 to 15-03-2018 (89 days) and further (if required).

Decision

Constant of the second

134-BOD-R30 RESOLVED that approval and directions issued in Agenda Item No. 5 (i) be followed.

ly. Approval for assistance package for families of employees who die in service.

The agenda was presented by HR & Admin Director. The Board was intimated that the case was presented to the HR Committee in its meeting held on 20.03.2018. The Committee was apprised that DG(HR) PEPCO O/O General Manager (HR) PEPCO WAPDA House, Labore vide Office Memorandum No. GM(HR)/HRD/A-332/4050-75 dated: 04.11.2016 has conveyed approval of PEPCO BOD regarding adoption of Establishment Division's Office Memoranda No. 8/10/2013-E (Pt) dated 04.12.2015 and No. 1/39/2013-E-2 (Pt) dated 03/08.2016 with regard to revision of Assistance Package. The said package is applicable, mutatis jourandis, for facilities of employees, who die in service, as under-

### **INDEPENDENT AUDITOR'S REPORT**

### To the members of Multan Electric Power Company Limited

### Report on the Audit of the Financial Statements

### Opinion

We have audited the annexed financial statements of Multan Electric Power Company Limited (the Company), which comprise the statement of financial position as at 30 June 2020, and the statement of profit or loss, the statement of comprehensive income, the statement of changes in equity, the statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information, and we state that we have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of the audit.

In our opinion and to the best of our information and according to the explanations given to us, the statement of financial position, the statement of profit or loss, the statement of comprehensive income, the statement of changes in equity and the statement of cash flows together with the notes forming part thereof conform with the accounting and reporting standards as applicable in Pakistan and give the information required by the Companies Act, 2017 (XIX of 2017), in the manner so required and respectively give a true and fair view of the state of the Company's affairs as at 30 June 2020 and of the profit, other comprehensive income, the changes in equity and its cash flows for the year then ended.

### **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs) as applicable in Pakistan. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants* as adopted by the Institute of Chartered Accountants of Pakistan (the Code) and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### **Emphasis of Matter**

We draw attention to the following matters:

a) Note 12.1.1 to the financial statements, which states that the Company has not recognized the impact of debit notes issued by Central Power Purchasing Agency (Guarantee) Limited (CPPA) for supplementary charges, being the mark-up charged on CPPA by Independent Power Producers (IPPs) on account of delayed payments, aggregating to Rupees 16,357.33 million.

# Riaz Ahmad & Company

Chartered Accountants

- b) Note 12.1.2 to the financial statements, interest on workers' profit participation fund amounting to Rupees 1,837.72 million was not accounted for by the Company. Moreover, workers' profit participation fund along with related interest was not paid to the workers due to pending decision of Economic Coordination Committee to exempt the corporatized entities under the umbrella of WAPDA.
- c) Note 12.1.4 to the financial statements describes various matters regrading tax contingencies the ultimate outcome of which cannot be presently determined hence no provision for the same has been made in accompanying financial statements.

Our opinion is not modified in respect of these matters.

### Information Other than the Financial Statements and Auditor's Report Thereon

Management is responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

# Responsibilities of Management and Board of Directors for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the accounting and reporting standards as applicable in Pakistan and the requirements of Companies Act, 2017 (XIX of 2017) and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Board of directors are responsible for overseeing the Company's financial reporting process.

Chartered Accountants

### Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs as applicable in Pakistan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs as applicable in Pakistan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

# Riaz Ahmad & Company

Chartered Accountants

### **Report on Other Legal and Regulatory Requirements**

Based on our audit, we further report that in our opinion:

- a) proper books of account have been kept by the Company as required by the Companies Act, 2017 (XIX of 2017);
- b) the statement of financial position, the statement of profit or loss, the statement of comprehensive income, the statement of changes in equity and the statement of cash flows together with the notes thereon have been drawn up in conformity with the Companies Act, 2017 (XIX of 2017) and are in agreement with the books of account and returns;
- c) investments made, expenditure incurred and guarantees extended during the year were for the purpose of the Company's business; and
- d) no Zakat was deductible at source under the Zakat and Usher Ordinance, 1980 (XVIII of 1980)

The engagement partner on the audit resulting in this independent auditor's report is Liaqat Ali Panwar.

### MULTAN ELECTRIC POWER COMPANY LIMITED NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

### 1. THE COMPANY AND ITS ACTIVITIES

- 1.1 Multan Electric Power Company Limited (the Company) is a public limited company incorporated in Pakistan under the repealed Companies Ordinance, 1984 (now Companies Act, 2017). The Company was established to takeover all the properties, rights, assets, obligations and liabilities of Multan Area Electricity Board (MAEB) owned by Pakistan Water and Power Development Authority (WAPDA) and such other assets and liabilities as agreed. The Company was incorporated on 14 May 1998 and commenced operation on 09 June 1998. Its registered office is situated at Shahrah-e-Quaid-e-Azam, WAPDA House, Lahore. The principal place of business of the Company is located at Khanewal Road, Multan. While the Company have various 132-KV and 66-KV grid stations along with other offices located in 13 districts of South Punjab including Multan, Pakpattan, Sahiwal, Khanewal, Bahawalnagar, Bahawalpur, Rahim Yar Khan, Lodhran, Dera Ghazi Khan, Layyah, Muzaffargarh, Rajanpur and Vehari. The principal activity of the Company is distribution and supply of electricity to public within defined geographical boundaries.
- 1.2 Ministry of Energy, Government of Pakistan vide S.R.O. 667(I)/2019 dated 28 June 2019 has allowed an amount of Rupees 34,633 million as quarterly adjustment on account of Power Purchase Cost relating to first half of financial year 2018-19, which will be recovered in next fifteen months after year end. However, an amount of Rupees 26,367 million has been recovered during the year and remaining amount of Rupees 8,266 million has to be recovered in next 3 months after year end. Federal Government notified vide S.R.O.1170(I)/2019 the adjustment in the approved tariff, on account of annual indexation / adjustment of distribution margin and periodic adjustment for the 3rd and 4th Quarters of FY 2018-19 with immediate application of Rupees 4,791 million and 5,495 million respectively. However, an amount of Rupees 2,883 million in respect of Annual Indexation and amount of Rupees 3,306 million has been recovered during the year and remaining amounts of Rupees 1,908 million and 2,189 million respectively has to be recovered in the next 3 months after year end. Federal Government notified vide S.R.O.1474(I)2019 the adjustment in the approved tariff, on account of periodic adjustment for 1st Quarter of FY 2019-20 of Rupees 1,428 million. However an amount of Rupees 672 million has been recovered during the year and remaining amount of Rupees 756 million has to be recovered in the next 5 months after the year end. If these adjustments had been allowed in the respective years, the revenue for years ended 30 June 2019 and 30 June 2020 would have been increased by Rupees 44,919 million and Rupees 756 million respectively. Consequently, accumulated loss would have been reduced by Rupees 13,119 million.

### 1.3 Impact of COVID-19 on these financial statements

The pandemic of COVID-19 which rapidly spread all across the world has not only endangered human lives but has also adversely impacted the global economy. From 24 March 2020, Government of Punjab announced a temporary lockdown as a measure to reduce the spread of COVID-19. Lockdown impacted the purchasing power of general public so, the Government of Pakistan issued a Prime Minister's Relief Package for Small and Medium Enterprises (SMEs) and a package for domestic consumers. Under the package for SMEs, the Government of Pakistan will bear relief allowed to commercial and industrial consumers. In this regard, the Company has Rupees 3.988 billion receivable from Government of Pakistan at the reporting date. Under the relief package to domestic consumers the bills are collectible in three installments due to which the Company has deferred amount against the consumers of Rupees 13.417 billion. The total recoverability deferred under these packages amounted to Rupees 17.405 billion. Apart from these, according to management's assessment there is no other significant accounting impact of these effects of COVID-19 in these financial statements.

### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies applied in the preparation of these financial statements are set out below. These policies

### 2.1 Basis of preparation

### a) Statement of compliance

These financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan. The accounting and reporting standards applicable in Pakistan comprise of:

- International Financial Reporting Standards (IFRSs) issued by the International Accounting Standards Board (IASB) as notified under the Companies Act, 2017; and

- Provisions of and directives issued under the Companies Act, 2017.

Where provisions of and directives issued under the Companies Act, 2017 differ from the IFRSs, the provisions of and directives issued under the Companies Act, 2017 have been followed.

### b) Accounting convention

These financial statements have been prepared under the historical cost convention except as otherwise stated in the respective accounting policies.

### c) Critical accounting estimates and judgments

The preparation of financial statements in conformity with the approved accounting standards requires the use of certain critical accounting estimates. It also requires the management to exercise its judgment in the process of applying the Company's accounting policies. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The areas where various assumptions and estimates are significant to the Company's financial statements or where judgments were exercised in application of accounting policies are as follows:

### Useful lives, patterns of economic benefits and impairments

Estimates with respect to residual values and useful lives and pattern of flow of economic benefits are based on the analysis of the management of the Company. Further, the Company reviews the value of assets for possible impairment on annual basis. Any change in the estimates in the future might affect the carrying amount of respective item of property, plant and equipment, with a corresponding effect on the depreciation charge and impairment.

### Provision for obsolescence of stores and spare parts

The Company reviews the carrying amount of stores and spare parts on regular basis and provision for obsolescence is made if there is any change in usage pattern and physical form of stores and spare parts.

### Taxation

In making the estimates for income tax currently payable by the Company, the management takes into account the current income tax law and the decisions of appellate authorities on certain issues in the past. Instances where the Company's views differ from the views taken by the income tax department at the assessment stage and where the Company considers that its view on items of material nature is in accordance with law, the amounts are shown as contingent liabilities.

### Allowance for expected credit losses

The allowance for expected credit losses assessment requires a degree of estimation and judgement. It is based on the lifetime expected credit loss, based on the Company's experience of actual credit loss in past years.

### Revenue from contracts with customers involving sale of goods

When recognizing revenue in relation to the sale of goods to customers, the key performance obligation of the Company is considered to be the point of delivery of the goods to the customer, as this is deemed to be the time that the customer obtains control of the promised goods and therefore the benefits of unimpeded access.

### Staff retirement benefits

The Company operates funded pension scheme, unfunded free electricity scheme and unfunded free medical facility scheme for all its employees along with entitlement for accumulated compensated absences which are encashed at the time of retirement upto maximum limit of 365 days. The calculation of the benefits requires assumptions to be made of future outcomes, the principal ones being in respect of increase in salary and the discount rates used to convert future cash flows to current values. The assumptions used for the plans are determined by independent actuary on annual basis. The amount of the expected return on plan assets is calculated using the expected rate of return for the year. Calculations are sensitive to changes in the underlying assumptions. The figure of staff retirement benefit liabilities primarily represents the increase in actuarial present value of the obligations for benefits earned on employee service during the year and the interest on the obligations in respect of employee service in previous years, net of the respected return on plan assets.

# d) Interpretation and amendments to published approved accounting standards that are effective in current year and are relevant to the Company

Following interpretation and amendments to published approved accounting standards are mandatory for the Company's accounting periods beginning on or after 01 July 2019:

- Amendments to IFRS 09 'Financial Instruments'
- IFRIC 23 'Uncertainty over Income Tax Treatments'
- Amendments to IAS 19 'Employee Benefits' Plan Amendment, Curtailment or Settlement
- Annual Improvements to IFRSs: 2015 2017 Cycle

The amendments and interpretation listed above do not have any impact on the amounts recognized in prior periods and are not expected to significantly affect the current or future periods.

### e) Standards and amendments to published approved accounting standards that are effective in current year but not relevant to the Company

There are other standards and amendments to published approved accounting standards that are mandatory for accounting periods beginning on or after 01 July 2019 but are considered not to be relevant or do not have any significant impact on the Company's financial statements and are therefore not detailed in these financial statements.

# f) Amendments to published approved accounting standards that are not yet effective but relevant to the Company

Following amendments to existing standards have been published and are mandatory for the Company's accounting periods beginning on or after 01 July 2020 or later periods:

Interest Rate Benchmark Reform which amended IFRS 7 'Financial Instruments: Disclosures', IFRS 9 'Financial Instruments' and IAS 39 'Financial Instruments: Recognition and Measurement', is applicable for annual financial periods beginning on or after 01 January 2020. The G20 asked the Financial Stability Board (FSB) to undertake a fundamental review of major interest rate benchmarks. Following the review, the FSB published report setting out its recommended reforms of some major interest rate benchmarks such as Interbank Offer Rates (IBORs). Public authorities in many jurisdictions have since taken steps to implement those recommendations. This has in turn led to uncertainty about the long-term viability of some interest rate benchmarks. In these amendments, the term 'interest rates benchmark rate, such as that resulting from the FSB's recommendations set out in its July 2014 report 'Reforming Major Interest Rate Benchmarks' (the reform). The amendments made provide relief from the potential impacts of the uncertainty caused by the reform. A company shall apply these exceptions to all hedging relationships directly affected by interest rate benchmark reform. However, the amendments are not likely to affect the financial statements of the Company.

Amendments to IAS 1 'Presentation of Financial Statements' and IAS 8 'Accounting Policies, Changes in Accounting Estimates and Errors' (effective for annual periods beginning on or after 01 January 2020). The amendments are intended to make the definition of material in IAS 1 easier to understand and are not intended to alter the underlying concept of materiality in IFRSs. In addition, the IASB has also issued guidance on how to make materiality judgments when preparing their general purpose financial statements in accordance with IFRSs.

Amendments to IAS 1 'Presentation of Financial Statements' (effective for annual periods beginning on or after 01 January 2022). These amendments have been added to further clarify when a liability is classified as current. These amendments also amend the aspect of classification of liability as non-current by requiring the assessment of the entity's right at the end of the reporting period to defer the settlement of liability for at least twelve months after the reporting period. An entity shall apply these amendments retrospectively in accordance with IAS 8. The amendments are not likely to affect the financial statements of the Company.

Amendments to IAS 37 'Provisions, Contingent Liabilities and Contingent Assets' (effective for annual periods beginning on or after 01 January 2022). These amendments clarify what comprise the cost of fulfilling a contract. Cost of fulfilling a contract is relevant when determining whether a contact is onerous. An entity is required to apply the amendments to contracts for which it has not yet fulfilled all its obligations at the beginning of the annual reporting period in which it first applies the amendments (the date of initial application). Restatement of comparative information is not required, instead the amendments require an entity to recognize the cumulative effect of initially applying the amendments as an adjustment to opening balance of retained earnings or other component of equity, as appropriate, at the date of initial application. However, the amendments are not likely to affect the financial statements of the Company.

Amendments to IAS 16 'Property, Plant and Equipment' (effective for annual periods beginning on or after 01 January 2022). These amendments clarify that sales proceeds and cost of items produced while bringing an item of property, plant and equipment to the location and condition necessary for it to be capable of operating in the manner intended by management, are recognized in profit or loss in accordance with applicable standards. The entity measures the cost of those items applying the measurement requirements of IAS 2 'Inventories'. The standard also removes the requirement of deducting the net sales proceeds from cost of testing. An entity shall apply these amendments retrospectively, but only to items of property, plant and equipment which are brought to the location and condition necessary for them to be capable of operating in the manner intended by management on or after the beginning of the earliest period presented in the financial statements in which the entity first applies the amendments. The entity shall recognize the cumulative effect of initially applying the amendments as an adjustment to the opening balance of retained earnings (or other component of equity, as appropriate) at the beginning of that earliest period presented. However, the amendments are not likely to affect the financial statements of the Company.

On 14 May 2020, IASB issued Annual Improvements to IFRSs: 2018 - 2020 Cycle, incorporating amendments to three IFRSs more specifically in IFRS 9 'Financial Instruments', relevant to the Company. The amendments clarify that an entity includes only fees paid or received between the entity (the borrower) and the lender, including fees paid or received by either the entity or the lender on the other's behalf, when it applies the '10 percent' test in paragraph B3.3.6 of IFRS 9 in assessing whether to dè-recognize a financial liability. These amendments are effective for annual periods beginning on or after 01 January 2022 and are not likely to have an impact on Company's financial statements.

On 29 March 2018, the IASB has issued a revised Conceptual Framework. The new Framework: reintroduces the terms stewardship and prudence; introduces a new asset definition that focuses on rights and a new liability definition that is likely to be broader than the definition it replaces, but does not change the distinction between a liability and an equity instrument; removes from the asset and liability definitions references to the expected flow of economic benefits—this lowers the hurdle for identifying the existence of an asset or liability and puts more emphasis on reflecting uncertainty in measurement; discusses historical cost and current value measures, and provides some guidance on how the IASB would go about selecting a measurement basis for a particular asset or liability; states that the primary measure of financial performance is profit or loss, and that only in exceptional circumstances will the IASB use other comprehensive income and only for income or expenses that arise from a change in the current value of an asset or liability; and discusses uncertainty, de-recognition, unit of account, the reporting entity and combined financial statements. The Framework is not an IFRS and does not override any standard, so nothing will change in the short term. The revised Framework will be used in future standard-setting decisions, but no changes will be made to current IFRSs. Preparers might also use the Framework to assist them in developing accounting policies where an issue is not addressed by an IFRS. It is effective for annual periods beginning on or after 01 January 2020 for preparers that develop an accounting policy based on the Framework.

# g) Standards and amendments to published approved accounting standards that are not yet effective and not considered relevant to the Company

There are other standards and amendments to published approved accounting standards that are mandatory for accounting periods beginning on or after 01 July 2020 but are considered not to be relevant or do not have any significant impact on the Company's financial statements and are therefore not detailed in these financial statements.

### 2.2 Functional and presentation currency along with foreign currency transactions and translation

These financial statements have been presented in Pak Rupees, which is the Company's functional and presentation currency. All monetary assets and liabilities in foreign currencies are translated into Pak Rupees at exchange rates prevailing at the reporting date. Transactions in foreign currencies are initially recorded at exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are charged or credited to statement of profit or loss.

### 2.3 Staff retirement benefits

### 2.3.1 Defined benefit plans

The Company provides funded pension scheme, an unfunded free electricity scheme and an unfunded free medical facility scheme for all its employees. Further, the Company's employees are also entitled for accumulated compensated absences which are encashed at the time of retirement upto maximum limit of 365 days. The company's obligations under these schemes are determined annually by a qualified actuary using projected unit Credit Actuarial Cost Method. latest actuarial valuations have been carried on 30 June 2020. The company's net obligation in respect of defined benefits plans is calculated by estimating the amount of future benefits that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets. Past service cost is recognized immediately in the statement of profit or loss.

Remeasurement of the net defined benefit liability (except for compensated absences), which comprises actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognized immediately in other comprehensive income. The Company determines the net interest expense on the net defined benefit liability for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability, taking into account any changes in the net defined benefit liability during the period as a result of contributions and benefits payments. Net interest expense and other expenses related to defined benefit plan is recognized in profit or loss. Remeasurement related to the compensated absences is recognized in the year of eccurrence in the statement of profit or loss.

### 2.3.2 General / Employees' Provident Fund

For General / Employees' Provident Fund and WAPDA Welfare Fund, the Company makes deduction from salaries of the employees and remits these amounts to the funds established by WAPDA. The provident fund related disclosure required by the Companies Act, 2017 is not shown in these financial statements as General / Employees' Provident Fund established by WAPDA includes the employees of other power distribution and generation companies and the Company's share cannot be segregated from the whole General / Employees' Provident Fund.

### 2.4 Taxation

### Current

Provision for current tax is based on the taxable income for the year determined in accordance with the prevailing law for taxation of income. The charge for current tax is calculated using prevailing tax rates or tax rates expected to apply to the profit for the year, if enacted. The charge for current tax also includes adjustments, where considered necessary, to provision for tax made in previous years arising from assessments framed during the year for such years.

### Deferred

Deferred tax is accounted for using the liability method in respect of all temporary differences arising from differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of the taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets to the extent that it is probable that taxable profits will be available against which the deductible temporary differences, unused tax losses and tax credits can be utilized.

Deferred tax is calculated at the rates that are expected to apply to the period when the differences reverse based on tax rates that have been enacted or substantively enacted by the reporting date. Deferred tax is charged or credited in the statement of profit or loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly.

### 2.5 Property, plant, equipment and depreciation

### a) Cost

Operating fixed assets are stated at cost less accumulated depreciation and any identified impairment loss, except freehold land which is stated at cost less any identified impairment loss and leasehold land which is stated at cost less accumulated depreciation and any identified impairment loss. Capital work-in-progress is stated at cost less any recognized impairment loss. This includes all costs connected with specific assets (including borrowing cost) incurred during installation and construction period. These are transferred to specific assets as and when these assets are available for intended use. Cost of operating fixed assets consists of historical cost, borrowing cost pertaining to the erection / construction period of qualifying assets and directly attributable costs of bringing the assets to working condition for their intended use.

Major renewals and improvements to an item of property, plant and equipment are recognized in the carrying amount of the item if it is probable that the embodied future economic benefits will flow to the Company and the cost of renewals or improvements can be measured reliably. The cost of day-to-day servicing of property, plant and equipment is recognized in statement of profit or loss as incurred.

### b) Depreciation

Depreciation on operating fixed assets is calculated applying the straight line method so as to write off the cost / depreciable amount of the assets over their estimated useful lives at the rates given in Note 13.2. The Company charges the depreciation on additions from the month when the asset is available for use and on deletions up to the month when the asset is de-recognized. Depreciation on operating fixed assets is charged to the statement of profit or loss except for depreciation provided on construction equipment and vehicles during the period of construction of operating fixed assets that is capitalized as part of the cost of operating fixed assets. The assets' residual values and useful lives are reviewed and adjusted, if appropriate, at each reporting date.

### c) De-recognition

An item of property, plant and equipment is de-recognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset is included in the statement of profit or loss in the year the asset is de-recognized.

### 2.6 Stores and spare parts

Usable stores and spare parts are valued principally at cost using moving average cost formula less provision for slow moving, while items considered obsolete are carried at nil value. Items-in-transit are valued at cost comprising invoice value plus other charges paid thereon.

### 2.7 Cash and cash equivalents

Cash and cash equivalents comprise cash in hand, cash at banks on current, saving and deposit accounts and other short term highly liquid instruments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in values.

### 2.8 Revenue from contracts with customers

### i) Revenue recognition

### Sale of electricity

Revenue from the sale of electricity is recognized on supply of electricity to consumers at the rates determined by NEPRA and notified by the Government of Pakistan in official gazette from time to time. Late payment charges are recognized on accrual basis.

### Tariff differential subsidy

Tariff differential subsidy on electricity announced by the Government of Pakistan for consumers is recognized under revenue on accrual basis.

### Rental and service income

Meter rentals are recognized on time proportion basis.

### Rendering of services

Revenue from a contract to provide services is recognized over time as the services are rendered based on either a fixed price or an hourly rate.

### Interest

Interest income is recognized as it accrues using the effective interest method using the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of the financial asset.

### Other revenue

Other revenue is recognized when it is received or when the right to receive payment is established.

### ii) Contract assets

Contract assets arise when the Company performs its performance obligations by transferring goods to a customer before the customer pays its consideration or before payment is due. Contract assets are treated as financial assets for impairment purposes.

### iii) Contract liabilities

Contract liability is the obligation of the Company to transfer goods to a customer for which the Company has received consideration from the customer. If a customer pays consideration before the Company transfers goods, a contract liability is recognized when the payment is made. Contract liabilities are recognized as revenue when the Company performs its performance obligations under the contract.

### 2.9 Financial Instruments

### i) Recognition, classification and measurement of financial instruments

### a) Recognition

The Company initially recognizes financial assets on the date when they are originated. Financial liabilities are initially recognized on the trade date when the entity becomes a party to the contractual provisions of the instrument.

### b) Classification

The Company classifies its financial assets and financial liabilities at amortized cost. A financial asset is measured at amortized cost if both of following conditions are met:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows: and

- the contractual terms of the financial asset give rise on specified dates to cash flows that the solely payments of principal and interest on the principal amount outstanding.

### c) Measurement

### Financial assets

At initial recognition, the Company measures a financial asset at its fair value plus transaction costs that are directly attributable to the acquisition of the financial asset. Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. The Company classifies its debt instruments at amortized cost. Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost. Interest income from these financial assets is included in other income using the effective interest rate method. Any gain or loss arising on derecognition is recognized directly in profit or loss and presented in other income / (other expenses).

Financial assets measured at amortized cost comprise of trade debts, loans and advances, accrued interest, cash and bank balances, deposits and other receivables.

### Financial liabilities

Financial liabilities are classified and measured at amortized cost. These are subsequently measured at amortized cost using the effective interest method. Interest expense is recognized in statement of profit or loss. Any gain or loss on derecognition is also included in profit or loss. Financial liabilities measured at amortized cost comprise of long term financing, trade and other payables, long term security deposits and accrued mark-up.

### ii) Impairment of financial assets

The Company assesses on a forward looking basis the expected credit losses associated with its debt instruments carried at amortized cost. The impairment methodology applied depends on whether there has been a significant increase in credit risk. For trade debts and other receivables, the Company applies the simplified approach to recognize expected lifetime losses from initial recognition of the receivables.

### iii) De-recognition

### Financial assets

The Company de-recognizes a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred, or it neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control over the transferred asset. Any interest in such de-recognized financial assets that is created or retained by the Company is recognized as a separate asset or liability.

### Financial liabilities

The Company de-recognizes a financial liability when its contractual obligations are discharged or cancelled or expired. The Company also de-recognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value. On de-recognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognized in profit or loss.

### iv) Offsetting of financial instruments

Financial assets and financial liabilities are set off and the net amount is reported in the financial statements when there is a legal enforceable right to set off and the Company intends either to settle on a net basis or to realize the assets and to settle the liabilities simultaneously.

### 2.10 Trade receivables

Trade receivables are initially recognized at fair value and subsequently measured at amortized cost using the effective interest method, less any allowance for expected credit losses.

The Company has applied the simplified approach to measure expected credit losses, which uses a lifetime expected loss allowance. Actual credit loss experience over past years is used to base the calculation of expected credit loss.

Expected credit losses are recognized as follows:

- a) No expected credit loss on Government institutions balances;
- b) Expected credit loss of seventy five percent on permanently disconnected consumers; and
- c) Expected credit loss on arrears from private consumers and deferred arrears at the rates approved.

The percentage rates for creating allowance for expected credit losses on trade debts is as follows:

Permanently disconnected connections	75%
Deferred arrears	75%
Arrears:	
More than 3 months and up to 6 months	5%
More than 6 months and up to 1 year	10%
More than 1 year	100%

### 2.11 Deferred credit

Amounts received from consumers and Government as contributions towards the cost of extension of electricity distribution network and of providing service connections are deferred and amortized over the estimated useful lives of related assets except for separately identifiable services in which case revenue is recognized upfront upon establishing a connection network. Amortization of deferred credit for the year is recognized as income in the statement of profit or loss.

### 2.12 Borrowings

Financing and borrowings are initially recognized at fair value of the consideration received, net of transaction costs. These are subsequently measured at amortized cost using the effective interest method.

### 2.13 Borrowing cost

Interest, mark-up and other charges on long term finances directly attributable to the acquisition, construction and production of qualifying assets are capitalized up to the date of commissioning of respective qualifying assets. All other interest, mark-up and other charges are charged to the statement of profit or loss in the period in which these are incurred.

### 2.14 Loans, advances, deposits and receivables

These are recognized at cost less an estimate made for doubtful receivables based on a review of all outstanding amounts at the year end.

### 2.15 Share capital

Ordinary shares are classified as share capital. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax.

### 2.16 Trade and other payables

Trade and other payables are initially recognized at fair value plus directly attributable costs. These are subsequently measured at amortized cost.

### 2.17 Impairment of non-financial assets

Assets that have an indefinite useful life are not subject to depreciation and are tested annually for impairment. The carrying amount of the Company's other non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. The recoverable amount of an asset is the greater of its value in use and fair value less cost to sell. Impairment losses recognized in prior periods are assessed at each reporting date for any indication that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to that extent that the asset's carrying amount after the reversal does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment losses had been recognized. An impairment loss is recognized if the carrying amount of the asset exceeds its recoverable amount.

### 2.18 Provisions

Provisions are recognized when the Company has a present, legal or constructive obligation as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligations and a reliable estimate of the amount can be made. Provisions are reviewed at each reporting date and adjusted to reflect current best estimate.

### 2.19 Earnings / (loss) per share

The Company presents basic and diluted earnings / (loss) per share data for its ordinary shares. Basic earnings / (loss) per share is calculated by dividing the profit attributable to ordinary shareholders or loss for the year of the Company by the weighted average number of ordinary shares outstanding during the year. Diluted earnings / (loss) per share is determined by adjusting the profit attributable to ordinary shareholders or loss for the year and the weighted average number of ordinary shareholders or loss for the year and the weighted average number of ordinary shares outstanding or loss for the year.

### 2.20 Contingent assets

Contingent assets are disclosed when the Company has a possible asset that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Contingent assets are not recognized until their realization becomes certain.

### 2.21 Contingent liabilities

A contingent liability is disclosed when:

- there is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or;

- there is present obligation that arises from past events but it is not probable that an outflow of resources will be required to settle the obligation or the amount of the obligation cannot be measured with sufficient reliability.

### 2.22 Intangible asset

Intangible asset represents the cost of computer softwares and is stated at cost less accumulated amortization and any identified impairment loss. Intangible asset is amortized from the month, when the assets becomes available for use, using the straight line method, and upto the last month previous the month of disposal, whereby the cost of the intangible asset is amortized over its estimated useful life over which economic benefits are expected to flow to the Company. The useful life and amortization method is reviewed and adjusted, if appropriate, at each reporting date.

- 5.1 This represents re-lent portion of loan obtained by the GoP from International Bank for Reconstruction and Development (IBRD) for electricity distribution and transmission improvement project which is secured against the guarantee by GoP, pursuant to the re-lent agreement between GoP and the Company. This facility carries interest at the rate of 17% per annum which comprises of re-lending interest of 11% per annum and exchange risk cover of 6% per annum payable on half yearly basis. Repayment of principal has to be made on half yearly basis within maximum period of 15 years including grace period of 2 years starting from September 2011. The overdue amount of principal and mark-up aggregate to Rupees 2,566.656 million (2019: Rupees 2,246.061 million) and Rupees 3,722.036 million (2019: Rupees 3,458.130 million) respectively.
- 5.2 This represents re-lent portion of loan obtained by GoP from Asian Development Bank (ADB) for Distribution Enhancement Investment Program which is secured against the guarantee by GoP, pursuant to the re-lent agreement between GoP and the Company. This facility carries interest at the rate of 17% inclusive of relending interest of 11% per annum plus exchange risk cover fee of 6% per annum which shall be charged both on principal amount and interest amount separately. Repayment of principal has to be made on half yearly basis within maximum period of 15 years including grace period of 2 years starting from February 2011. The overdue amount of principal and mark-up aggregate to Rupees 905.799 million (2019: Rupees 1,017.485 million) and Rupees 925.569 million (2019: Rupees 832.868 million) respectively.

- 5.3 This represents re-lent portion of loan obtained by GoP from ADB for Distribution Enhancement Investment Program which is secured against the guarantee by GoP, pursuant to the re-lent agreement between GoP and the Company. Disbursements during the year of Rupees Nil (2019: Rupees 16.186 million) have been transferred to the Company. This facility carries interest at the rate of 15% inclusive of relending interest of 8.2% per annum plus exchange risk cover fee of 6.5% per annum which shall be charged both on principal amount and interest amount separately. Repayment of principal has to be made on half yearly basis within maximum period of 17 years excluding grace period of 3 years starting from June 2014. The overdue amount of principal and mark-up aggregate to Rupees 789.359 million (2019: Rupees 657.980 million) and Rupees 1,798.902 million (2019: Rupees 1,573.079 million) respectively.
- 5.4 This represents re-lent portion of loan obtained by GoP from ADB for Distribution Enhancement Investment Program which is secured against the guarantee by GoP, pursuant to the re-lent agreement between GoP and the Company. Disbursements during the year of Rupees Nil (2019: Rupees 192.484 million) have been transferred to the Company. This facility carries interest at the rate of 15% inclusive of relending interest of 8.2% per annum plus exchange risk cover fee of 6.8% per annum which shall be charged both on principal amount and interest amount separately. Repayment of principal has to be made on half yearly basis within maximum period of 25 years including grace period of 5 years starting from June 2018. The overdue amount of principal and mark-up aggregate to Rupees 383.848 million (2019: Rupees 227.578 million) and Rupees 1,826.320 million (2019: Rupees 1,390.581 million) respectively.
- 5.5 This represents re-lent portion of loan obtained by GoP from ADB for Distribution Enhancement Investment Program which is secured against the guarantee by GoP, pursuant to the re-lent agreement between GoP and the Company. Disbursements during the year of Rupees Nil (2019: Rupees 345.812 million) have been transferred to the Company. This facility carries interest at the rate of 15% inclusive of relending interest of 8.2% per annum plus exchange risk cover fee of 6.3% per annum which shall be charged both on principal amount and interest amount separately. Repayment of principal will be started from June 2019 and will be repaid on half yearly basis within maximum period of 25 years including grace period of 5 years. The overdue amount of principal and mark-up aggregate to Rupees 207.957 million (2019: Rupees 69.319 million) and Rupees 1,411.020 million (2019: Rupees 1,003.261 million) respectively.
- 5.6 This represents a loan obtained from the GoP under "Prime Minister's Southern Punjab Development Package" for construction of new grid stations and laying transmission lines. The limit of the loan facility is Rupees 1,228 million. As per instructions of the Finance Division of GoP for loan disbursements, the interest shall be chargeable at a prevailing rate of interest for respective year, which has been assessed as 12.59% for the year 2009-10, 13.61% for 2010-11 and 12.64% per annum for the year 2011-12 by the Company. Repayment of principal has to be made on yearly basis within maximum period of 25 years including grace period of 5 years starting from June 2015. The overdue amount of principal and mark-up aggregate to Rupees 239.115 million (2019: Rupees 199.263 million) and Rupees 842.782 million (2019: Rupees 762.184 million) respectively.
- 5.7 These include Rupees Nil (2019: Rupees 13.889 million) interest free loan from RYK Mills Limited under an agreement to meet expenses for grid interconnection. This loan has been completely repaid during the year. The overdue amount of principal aggregates to Rupees Nil (2019: Rupees 2.778 million).
- 5.8 These include two interest free loans of Rupees 3.617 million (2019: Rupees 11.573 million) and Rupees 9.444 million (2019: Rupees 15.555 million) from Hamza Sugar Mills Limited under an agreement to meet expenses for grid interconnection. Loan No. 1 is repayable in 36 equal monthly installments commencing after 18 months of commercial operation date of the project which is 01 March 2016. The overdue amount of principal aggregate to Rupees 1.447 million (2019: Rupees 0.723 million). Loan No. 2 is repayable in 36 equal monthly installments of commercial operation date of the project which is 10 March 2017. The overdue amount of principal aggregates to Rupees 0.555 million).
- 5.9 These include Rupees 55 million (2019: Rupees 55 million) interest free loan from The Thal Industries Corporation Limited under an agreement to meet expenses for grid interconnection. The loan is repayable in 36 equal monthly installments commencing after 18 months of commercial operation date of the project which has not yet been assessed.
- 5.10 These include Rupees 20.303 million (2019: Rupees 30.455 million) interest free loan from Harappa Solar (Private) Limited under an agreement to meet expenses for grid interconnection. The loan is repayable in 36 equal monthly installments commencing after 17 months of commercial operation date which is 14 October 2017. The overdue amount of principal aggregates to Rupees 2.538 million (2019: Rupees 2.538 million).
- 5.11 The fair value adjustment in accordance with the requirements of IFRS 9 'Financial Instruments' arising in respect of the loans given in Note 5.8, Note 5.9 to Note 5.10 is not considered material and hence not recognized.

Discount rate
Increase in assumption (Rupees)
Decrease in assumption (Rupees)

Medical exposure rate Increase in assumption (Rupees) Decrease in assumption (Rupees)

Medical inflation rate Increase in assumption (Rupees) Decrease in assumption (Rupees)

Withdrawal rates Increase in assumption (Rupees) Decrease in assumption (Rupees)

Future salary increase Increase in assumption (Rupees) Decrease in assumption (Rupees)

Indexation rate Increase in assumption (Rupees) Decrease in assumption (Rupees)

Mortality setback Increase in assumption (Rupees) Decrease in assumption (Rupees)

The sensitivity analysis is based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the staff retirement benefits to significant actuarial assumptions, the same method (present value of the staff retirement benefits calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the staff retirement benefits liabilities recognized within the statement of financial position.

The methods and types of assumptions used in preparing the sensitivity analysis were changed as compared to the previous year due to downward trend in discount rate structure and decrease in inflationary expectations.

6.8 As at 30 June 2020, the average duration of these benefits was 14 years.

### 6.9 Risks associated with staff retirement benefits

### Longevity risk

The risk arises when the actual lifetime of retirees is longer than expectation. This risk is measured at the plan level over the entire retiree

### Salary increase risk

The most common type of retirement benefit is one where the benefit is linked with final salary. The risk arises when the actual increases are higher than expectation and impacts the liability accordingly.

### Withdrawal risk

The risk of actual withdrawals varying with the actuarial assumptions can impose a risk to the benefit obligation. The movement of the liability can go either way.

### 7. LONG TERM SECURITY DEPOSITS

These represent security deposits received from consumers on account of electricity connections. These are refundable / adjustable on disconnection of electricity supply. Out of the total amount, an amount of Rupees 1,723.660 million (2019: Rupees 1,268.952 million) is kept in separate bank accounts maintained in respect of security deposits received.

		2020	2019
		RUPEES	RUPEES
8,	RECEIPT AGAINST DEPOSIT WORKS		
	Consumers demand notices awaiting connections (Note 8.1)	4,759,638,093	4,823,951,134
	Funds received against deposit works (Note 8.2)	21,043,387,259	15,899,024,883
		25,803,025,352	20,722,976,017

8.1 These represent amounts received from consumers through demand notices against which the related works / jobs have not been completed.

8.2 These represent amounts received directly by the Company for electrification of villages, colonies and other deposit works, mainly provided through Government funding against which the related works / jobs have not been completed.

	Faisalabad Electric Supply Company Limited (FESCO)	179,339,754	61,595,780
	National Transmission and Despatch Company Limited (NTDC)	4,865,395,938	3,604,849,050
	Sukkur Electric Power Company Limited (SEPCO)	5,177,406	8,163,253
	·	160,511,794,554	107,784,414,901

- 10.2 During financial year 2013-14, the Company had received Compact Fluorescent Lamps (CFLs) from Pakistan Electric Power Company (PEPCO) under the Clean Development Mechanism (CDM) Program of activities -"National CFL Project Pakistan". CFLs cost will have to be borne by the Company from its distribution margin.
- **10.3** The Company has not made payment of its contribution towards Workers' Profit Participation Fund (WPPF), being the Company's liability on account of provision of Companies Profit (Workers' Participation) Act, 1968 uptill 30 June 2015. This matter is pending for decision with Economic Coordination Committee (ECC) upon recommendation submitted by WAPDA to exempt the undertakings established under the umbrella of WAPDA from compliance with the requirements of Companies Profit (Workers' Participation) Act, 1968. Due to pending decision with the ECC, no provision for mark-up is made as required under Companies Profit (Workers' Participation) Act, 1968. However, the Company has shown the mark-up as contingent liability under Note 12.1.2 to the financial statements.

### 10.4 Workers' profit participation fund

	At the beginning of the year Provision for the year (Note 26)	1,692,118,856 86,942,068	1,692,118,856 -
	At the end of the year	1,779,060,924	1,692,118,856
11.	ACÇRUED MARK-UP	2020 RUPEES	2019 RUPEES Restated
	Foreign re-lent loans Cash development loan (Note 11.1) Overdue mark-up on foreign re-lent and cash development loans	175,152,313 86,858,135 10,526,628,716 10,788,639,164	204,553,143 63,309,832 9,020,104,005 9,292,966,980

**11.1** The figure of accrued mark-up has been restated based on the confirmation received from Finance Division, Government of Pakistan (GoP). Mark-up was charged by the Finance Division of GoP on each sanctioned amount individually while the Company charged the mark-up on cumulative amount as per the rate applied by Ministry of Finance Division on last sanctioned amount.

This prior period error has been corrected retrospectively in these financial statements in accordance with IAS 8. Consequently, for the financial year ended 30 June 2018, accrued mark-up and accumulated loss has been decreased by Rupees 32,443,169. For the financial year ended 30 June 2019, accrued mark-up and loss after taxation have been increased by Rupees 20,155,304. Basic loss per share has been increased by Rupees 0.02 per share while no significant effect has been made on diluted loss per share.

### 12. CONTINGENCIES AND COMMITMENTS

### 12.1 Contingencies

12.1.1 The Company has received various invoices from CPPA representing late payment charges (supplementary charges) being the share of the Company in the mark-up charged to CPPA by Independent Power Producers (IPPs) on account of delayed payments aggregating to Rupees 22,018.83 million (2019: Rupees 17,058.28 million).

As mentioned in Para 18 of tariff determination by NEPRA communicated through letter no. NEPRA/TRF-283/MEPCO-2014/4264-4266 dated 27 March 2015 and Para 8.10 and 20 of tariff determination by NEPRA communicated through letter no. NEPRA/TRF-332/MEPCO-2015/2697-2699 dated 29 February 2016, it was mutually agreed by the representatives of CPPA and distribution companies that, as per clause 9.3(d) of electricity supply agreement dated 29 June 1998 between DISCOs and NTDC, the DISCOs are obliged to pay late payment charges (supplementary charges) to CPPA on account of delay payments of invoices.

NEPRA has decided that the late payment charges (supplementary charges) recovered from consumers on utility bills shall be offset against the late payment charges (supplementary charges) invoices raised by CPPA and CPPA cannot account for late payment charges (supplementary charges) over and above what is calculated as per agreement. Therefore, no provision for late payment charges (supplementary charges) of Rupees 16,357.33 million have been recognized in these financial statements as the management is of the view that supplementary charges have not been allowed as expense by NEPRA in tariff determination.

- 12.1.2 The Companies Profit (Workers' Participation) Act, 1968 requires payment of the allocated amount to the workers' profit participation fund within nine months of the close of relevant financial year. However, due to pending decision of the Economic Coordination Committee to exempt the corporatized entities under the umbrella of WAPDA from requirements of the said Act, no provision of interest aggregating to Rupees 1,837.72 million (2019: Rupees 1,531.48 million) on unpaid amount has been recognized by the Company in these financial statements.
- 12.1.3 In addition to above-mentioned matters, large number of small cases have been filed against the Company, primarily by the Company's employees, customers and vendors, the quantum of which cannot be estimated reliably. However, the management is of the view that in the overall context of these financial statements, there would be no significant liability of the Company against such cases.

### 12.1.4 Income Tax

- (i) Additional Commissioner Inland Revenue amended the deemed assessments under section 120 of the Income Tax Ordinance, 2001 (the Ordinance) by passing an order under section 122(5A) of the Ordinance on the grounds that the minimum tax liability under section 113 was not discharged. He passed the orders vide DCR No. 10/07 dated 02 February 2015 and 19/18 dated 14 April 2015 for tax years 2010 and 2013 and created a demand of Rupees 5.63 million for the Tax Year 2010 and Rupees 109.82 million for the Tax Year 2013. Being aggrieved from the impugned orders, the Company filed appeals before the Commissioner Inland Revenue (Appeals) (CIR(A)) on 05 May 2015 and the same was upheld by the Learned CIR(A). Appeal against the orders of -CIR(A) has been filed with the Appellate Tribunal Inland Revenue on 19
   October 2015 which is pending for adjudication.
- (ii) Inland Revenue Audit Officer passed an order no. DCR 01/54 dated 12 November 2007 for the tax year 2007 under section 161 and 205 of the Ordinance creating a demand amounting to Rupees 10.22 million on grounds that withholding tax was not timely deducted by the Company on payments to certain parties. Being aggrieved an appeal was filed with Commissioner Inland Revenue (Appeals) (CIR(A)) and same was upheld by the Learned CIR (A). Against the orders of Learned CIR(A), second appeal was filed before Appellate Tribunal Inland Revenue. The matter is pending for adjudication.
- (iii) Additional Commissioner Inland Revenue (ACIR) passed the orders vide 92/10 dated 26 February 2009 under section 113 of the Ordinance and charged income tax on turnover for the tax year 2007 amounting to Rupees 153 million and for the tax year 2008 amounting to Rupees 72 million along with default surcharge of Rupees 9.9 million and Rupees 2 million respectively. Being aggrieved from the impugned orders, the Company filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) and the same was upheld by the Learned CIR(A). Subsequently appeal against the orders of CIR(A) was filed with the Appellate Tribunal Inland Revenue (ATIR) on 14 May 2009 who upheld the orders of CIR (A). Being aggrieved with both forums writ petition is filed before Honorable Lahore High Court, Lahore vide petition no. PTR 43/2011 and PTR 44/2011. The Honorable Lahore High Court, Lahore remanded back the case to the full bench of ATIR, which is pending for adjudication.
- (iv) Additional Commissioner Inland Revenue amended the deemed assessment under section 122(5A) of the Ordinance for the tax year 2014 vide bar code no.100000008089093 dated 12 November 2015 on ground that the minimum tax liability under section 113 was not discharged and thereby raised a demand of Rupees 1,736 million. Being aggrieved an appeal was filed with Commissioner Inland Revenue (Appeals) on 03 December 2015 who upheld the said order and subsequently another appeal has been filed with Appellate Tribunal Inland Revenue on 05 April 2016, which is pending for adjudication.

- (v) The Inland Revenue Audit Officer (IRAO) made an assessment under sections 124, 162(1) and 205 of the Ordinance vide no. 10/62 dated 24 June 2015 for Tax Year-2010, 2011 and 2012 wherein he raised demand amounting to Rupees 52.906 million treating service fee for the collection of Pakistan Television (PTV) license fees as commission rather than as service fee. In this regard, an appeal has been filed before the Learned Commissioner Inland Revenue (Appeals) (CIR(A)) on 11 August 2015 which is decided in favor of the Company vide orders dated 29 March 2016 and case was remanded back to the concerned IRAO / Assistant Commissioner Inland Revenue (ACIR) with direction to recalculate the service fee according to the agreement between WAPDA and PTV. Against the order of CIR(A), Regional Tax Office, Multan has filed appeal before Appellate Tribunal Inland Revenue. The said appeal is pending for adjudication.
- (vi) Additional Commissioner Inland Revenue passed the order for tax year 2015 that the Company was liable to pay Rupees 893 million being higher of minimum tax under section 113 and 113 (C) of the Ordinance. The assessment already finalized under section 120(1) of the Ordinance, therefore, being erroneous in so far as prejudicial to the interest of revenue, is amended under section 122 of the Ordinance. Being aggrieved from the impugned order, the Company filed appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) and same was upheld by the learned CIR(A). Appeals against the orders of CIR(A) has been filed with the Appellate Tribunal Inland Revenue on 17 January 2017, which are pending for adjudication.
- (vii) Assistant Commissioner Inland Revenue passed the order under section 122(1) of the Ordinance vide 14/39 dated 22 June 2017 for the tax year 2011 that the Company was liable to pay Rupees 226 million due to violation of certain provisions of Ordinance. Being aggrieved from the impugned order, the Company filed appeal before the Commissioner Inland Revenue (Appeals) on 07 July 2017 which is pending for adjudication.
- (viii) Assistant Commissioner Inland Revenue started proceedings for amendment of assessment under section 122 of the Ordinance on 17 January 2018. By ignoring all submissions, the ACIR issued an order vide bar code no. 100000032291023 dated 13 April 2018 raising a demand of Rupees 1,294 million. Being aggrieved, the Company filed appeal before Commissioner Inland Revenue (Appeals) (CIR (A)) on 11 May 2018. The matter is pending for adjudication before CIR (A).
- (ix) Assistant Commissioner Inland Revenue issued an order vide bar code no. 100000026203200 dated 09 November 2017 under section 161 of the Ordinance and raised a demand of Rupees 191 million along with default surcharge of Rupees 13 million on the grounds that the Company failed to deduct income tax while making payment to certain parties. Being aggrieved with the orders the Company has filed an appeal before Commissioner Inland Revenue (Appeals) on 13 December 2017, the proceeding of which is pending.
- (x) The Inland Ravenue Audit Officer (IRAO) started proceedings under sections 161 and 205 of the Ordinance regarding discharging of liability to deduct income tax on different heads of account. By ignoring all submissions the Learned IRAO issued an order vide no. 10/47 dated 21 October 2013 and raised a demand of Rupees 718 million along with default surcharge of Rupees 161 million. Being aggrieved, the Company filed appeal before Commissioner Inland Revenue (Appeals) (CIR (A)) on 19 November 2013. The Learned CIR (A) issued an order dated 24 February 2014 and confirmed the demand of Rupees 379 million. A second appeal was filed before Appellate Tribunal Inland Revenue on 11 June 2014 who upheld the orders of CIR (A). Being aggrieved with both forums a writ petition vide tax reference no. 27 of 2014 was filed before Honorable Lahore High Court, Lahore who decided the case on 02 July 2016 in favor of the Company and deleted the demand of Rupees 301 million. To give effect to the judgment to decision of Honorable Lahore High Court, Lahore the Assistant Commissioner Inland Revenue issued appeal effect order and raised a demand of Rupees 78 million along with default surcharge of Rupees 66 million. Being aggrieved, further appeal was filed before CIR (A) on 15 December 2017 which is pending for adjudication.
- (xi) Assistant Commissioner Inland Revenue issued an order under section 161 of the Ordinance vide bar code no. 100000028613889 dated 04 January 2018 on the grounds that income tax was not deducted by the Company while making payment to certain parties during the tax years 2012 to 2015 and raised a demand of default surcharge of Rupees 277 million. Being aggrieved by the orders, an appeal was filed before Commissioner Inland Revenue (Appeals) (CIR (A)) on 01 February 2018. The Learned CIR (A) decided the case vide orders dated 24 April 2018 in favor of the Company by accepting the two contentions out of four. A second appeal was filed before Appellate Tribunal Inland Revenue for two contentions rejected by the Learned CIR (A). The ATIR remanded the case back to learned ACIR for rehearing. The Learned ACIR reordered against Company on the two contentions not accepted, for which appeal has been filed before CIR-A dated 22 June 2020 which is pending adjudication.
- (xii) Assistant Commissioner Inland Revenue (ACIR) started proceedings through show cause notice no. 826798-1 date 17 May 2018 under section 161 regarding advance tax collection of the differential amount of sales tax for tax year 2011. Subsequently, ACIR issued order no. 2/30 date 28 August 2018 and raised demand of income tax amounting to Rupees 307 million and default surcharge amounting to Rupees 363.668 million. Being aggrieved by the order, an appeal was filed before Commissioner Inland Revenue (Appeals) (CIR (A)) on 26 August 2018 which is pending for adjudication.
- (xiii) Assistant Commissioner Inland Revenue (ACIR) initiated proceedings through show cause notice vide document no. 100000033710411 dated 13 June 2018 under section 161 regarding advance tax collection of the differential amount of sales tax for tax year 2017. Subsequently, ACIR issued order no. 1/30 dated 27 August 2018 and raised demand of income tax amounting to Rupees 293 million and default surcharge amounting to Rupees 40.687 million. Being aggrieved by the order, an appeal was filed before Commissioner Inland Revenue (Appeals) (CIR (A)) on 26 August 2018 and same was upheld by the learned CIR(A). A second appeal was filed before Appellate Tribunal Inland Revenue which is pending for adjudication.

(xiv) Assistant Commissioner Inland Revenue initiated proceedings through notice bearing bar code no. 100000034664302 dated 02 July 2018 under section 161 questioning the compliance of income tax withholding on payment to CPPA on account to use of system charges during tax year 2017. By disregarding the reply submitted, ACIR issued order no. 4/30 dated 09 September 2018 and raised demand of income tax amounting to Rupees 293 million and default surcharge amounting to Rupees 42.7 million. Being aggrieved by the order, an appeal was filed before learned Commissioner Inland Revenue (Appeals) (CIR (A)) on 26 August 2018 and same was upheld by the learned CIR(A). A second appeal was filed before Appellate Tribunal Inland Revenue and the proceedings are still pending.

Aggregate provision of Rupees 6,528.53 million regarding the cases stated in paragraph numbers 12.1.4(i) to 12.1.4(xiv) has not been accounted for in the books of account of the Company as in the opinion of tax advisor, the favorable outcome of these cases is expected.

### Sales Tax:

- (xv) The Deputy Commissioner Inland Revenue (DCIR) has passed an order against the Company dated 19 November 2012 by treating the "Subsidy" aggregating to Rupees 24,739.75 million during the period from July 2010 to June 2011 as taxable supplies under the Sales Tax Act, 1990 (the Act) and also taxed unexplained differences amounting to Rupees 925.29 million and raised a demand of Rupees 4,363.05 million. Being aggrieved by the order, the Company filed an appeal before the Commissioner Inland Revenue (Appeals) who upheld the order of DCIR, afterwards second appeal was filed before the Appellate Tribunal Inland Revenue (ATIR) and vide its order number STA 247/LB/2013 dated 19 December 2014 the point of unexplained income was remanded back to DCIR and matter of subsidy was upheld against which the Company filed a writ petition before Honorable Lahore High Court, Lahore on 25 May 2018 who remanded back the case to the full bench of ATIR to decide the case which is still pending for adjudication.
- (xvi) The Deputy Commissioner Inland Revenue (DCIR) passed the order vide no. 21/2016 dated 02 May 2016 thereby alleging that the Company has paid less amount of sales tax withheld of Rupees 691.82 million for tax periods July 2014, August 2014, January 2015 and April 2015 in violation of sections 3(1)(A) of the Act. Against the said order of DCIR, the Company has filed an appeal before the Commissioner Inland Revenue (Appeais) who upheld the orders of DCIR. Afterwards, second appeal was filed before the Appellate Tribunal Inland Revenue who remanded back the case to DCIR vide order dated 18 April 2018. Later Assistant Commissioner Inland Revenue issued an order on 05 May 2019 by ignoring the contentions and submissions of the Company. Being aggrieved by the order, an appeal has been filled with CIR (A) which is pending for adjudication.
- (xvii) The Deputy Commissioner Inland Revenue (DCIR) has passed the order vide no. 20/2016 dated 02 May 2016 alleging that the Company has not charged and paid sales tax on supplies to retailers amounting Rupees 22.27 million during the tax periods of July 2014 and August 2014 and has directed the Company to deposit the same along with default surcharge and penalty of Rupees 1.11 million. The Company has filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) who upheld the orders of DCIR on 27 March 2016. Being aggrieved, the Company has filed an appeal before Appellate Tribunal Inland Revenue who remanded back the case to DCIR vide order dated 18 April 2018. Later Assistant Commissioner Inland Revenue issued an order on 30 April 2019 by ignoring the contentions and submissions of the Company. Being aggrieved by the order, appeal has been filled before CIR (A), which is pending for adjudication.
- (xviii) The Deputy Commissioner Inland Revenue (DCIR) has passed the order vide no. 09/2016 dated 15 April 2016 alleging that the Company has not charged and paid sales tax amounting to Rupees 23 million from retailers during the month of October 2015 and has directed it to deposit the same along with default surcharge and penalty of Rupees 1.160 million. Against the orders of DCIR an appeal has been filed before the Commissioner Inland Revenue (Appeals) (CIR(A)) and CIR(A) has confirmed the orders of DCIR. Being aggrieved, the Company has filed an appeal before Appellate Tribunal Inland Revenue on 02 June 2018 which is pending for adjudication.
- (xix) The Deputy Commissioner Inland Revenue (DCIR) has passed an order against the Company dated 31 March 2014 on the grounds that the Company has less paid further tax amounting to Rupees 36.8 million and extra tax of Rupees 23.5 million for the tax period from July 2013 to October 2013. Being aggrieved the Company has filed an appeal before the Commissioner Inland Revenue (Appeals) who upheld the order of DCIR vide order dated 02 May 2015. Afterwards, a second appeal was filed before Appellate Tribunal Inland Revenue on 06 June 2015 for which decision is awaited.
- (xx) The Deputy Commissioner Inland Revenue (DCIR) has passed an order vide no. 19/2016 dated 05 February 2016 on the grounds that the Company has supplied electricity to unregistered persons during the period from July 2014 to June 2015 without payment of sales tax amounting to Rupees 476 million, leviable thereon. Being aggrieved the Company has filed an appeal on 11 November 2016 before the Commissioner Inland Revenue (Appeals) who upheld the order of DCIR. Afterwards, a second appeal was filed before Appellate Tribunal Inland Revenue (ATIR). ATIR decided the case in favor of the Company vide order dated 18 April 2018 and remanded back the proceedings to the Learned DCIR / Assistant Commissioner Inland Revenue (ACIR). In second round of proceedings, Assistant Commissioner Inland Revenue (ACIR) once again issued order on 30 April 2019 by ignoring the contentions and submissions of the Company. Being aggrieved with the order an appeal has been filed before the Commissioner Inland Revenue (Appeals) (CIR(A)) which is pending for adjudication.

- (xxi) The Deputy Commissioner Inland Revenue (DCIR) has passed an order against the Company dated 19 February 2016 and raised a demand amounting to Rupees 199 million on the grounds that the Company has made taxable supplies to three steel melters / rerollers but declared lesser quantity of electricity sold to buyers during the period from July 2011 to June 2015. Being aggrieved the Company has filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) who upheld the order of DCIR. Afterwards an appeal was filed before Appellate Tribunal Inland Revenue who remanded back the case to DCIR vide order dated 13 April 2013. In second round of proceedings Assistant Commissioner Inland Revenue (ACIR) once again issued orders on 02 April 2019 by ignoring the contentions and submissions of the Company. Being aggrieved with the order an appeal has been filed by the Company before the Commissioner Inland Revenue (Appeals) (CIR(A)) which is pending for adjudication.
- (xxii) The Deputy Commissioner Inland Revenue (DCIR) has passed the order vide no. Audit unit-01/Corporate Zone/TAMS-0763/2010-11/529 dated 14 December 2016 on the grounds that the Company is required to pay sales tax on various heads amounting to Rupees 10,054 million. Being aggrieved the Company has filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) on 16 January 2017 who upheld the orders of DCIR. A second appeal was filed before Appellate Tribunal Inland Revenue (ATIR) dated 18 September 2017 which has been decided in favour of the Company and remanded the case to DCIR. Additional Commissioner Inland Revenue (ACIR) has once again made demand of sale tax amounting to Rupees 6,095 million and penalty of amounting to Rupees 304.780 million vide order no. 38/2019-ST dated 23 June 2020. Being aggrieved with the decision, an appeal was filed in CIR-A dated 29 July 2020 which is pending for adjudication.
- (xxiii) The Deputy Commissioner Inland Revenue (DCIR) has passed the order No. 95/2017 dated 27 April 2017 on the grounds that the Company is required to pay sales tax on various heads amounting to Rupees 17,185.81 million. Being aggreved the Company has filed an appeal before the Commissioner Inland Revenue (Appeais) (CIR(A)) on 25 May 2017. CIR (A) has decided the case by issuing order on 23 July 2018 in favor of the Company by annulling the orders of DCIR and directed him to provide appropriate opportunity of being heard. Proceedings of the case are pending before DCIR for adjudication.
- (xxiv) The Assistant Commissioner Inland Revenue (ACIR) has passed the order vide no. 84 dated 07 April 2017 and raised a demand of sales tax amounting to Rupees 51.9 million on the grounds that the Company has failed to pay extra tax and further tax on supply of electricity to unregistered persons during the period from July 2015 to September 2016. Being aggrieved the Company has filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) on 05 May 2017. The Learned CIR(A) has issued an order dated 11 April 2018 in favor of the Company by annulling the case. Now the case is pending before ACIR.
- (XXV) The Assistant Commissioner Inland Revenue (ACIR) has passed the order on 28 August 2017 and raised a demand of sales tax amounting to Rupees 565 million on the grounds that the Company has failed to deduct the sales tax during the tax periods from July 2014 to June 2016. Being aggrieved the Company has filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) on 06 October 2017. CIR(A) has decided the case in favor of the Company vide its order dated 11 April 2018 by annulling the order of the Learned ACIR. Now the case is pending before ACIR.
- (xxvi) The Assistant Commissioner Inland Revenue (ACIR) vide its show cause notice no. 684 dated 04 December 2017 raised question of withholding of sales tax amounting to Rupees 64 million. On submissions made by the Company, the ACIR accepted the contentions of the Company to the extent of Rupees 65 million and rejected the submission of Rupees 19 million. The ACIR issued an order vide 174/2018 dated 28 February 2018 and raised demand of sales tax amounting to Rupees 19 million along with default surcharge amounting to Rupees 1.9 million. Being aggrieved, the Company has filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) on 30 March 2018. CIR(A) issued an order on 10 August 2018 in favor of the Company and annulled the order of ACIR. Now the case is pending before the Learned ACIR.
- (xxvii) The Additional Commissioner Punjab Revenue Authority has issued an order vide no. ENF-I, Unit-01, WH/112/2015-17 dated 28 November 2016 alleging that the Company has failed to withhold PRA sales tax amounting to Rupees 1,645 million from payments made on account of services acquired by the Company. Being aggrieved with the order, the Company has filed an appeal before the Commissioner (Appeals) Punjab Revenue Authority (C(A)PRA). The C(A)PRA has issued an order vide no. 27/2017 dated 14 November 2017 reducing the tax liability to Rupees 71 million along with penalty of Rupees 3.5 million. Afterwards, the Company has filed second appeal before the Appellate Tribunal Punjab Revenue Authority on 22 December 2017, the decision of which is awaited.
- (xxviii) The Assistant Commissioner Inland Revenue (ACIR) initiated proceedings through notice no. 99 dated 15 August 2018 aileging that the Company has claimed inadmissible input tax amounting to Rupees 2.8 million. By ignoring the reply and supporting documents ACIR issued order against the Company and raised demand of sales tax amounting to Rupees 2.8 million. Being aggrieved with the order of ACIR the Company filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)). CIR(A) set aside the order and remanded the case back to Learned ACIR, which is still pending for adjudication.
- (xxix) The Assistant Commissioner Inland Revenue (ACIR) initiated proceedings through notice no. 151 dated 04 June 2018 alleging that the Company has claimed inadmissible input tax amounting to Rupees 33 million on purchase of cement. The ACIR issued order dated 17 August 2018 against the Company. Being aggrieved with the order of the ACIR the Company filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) which is still pending for adjudication.

- (xxx) The Assistant Commissioner Inland Revenue (ACIR) issued notice on 22 November 2018 alleging that the Company has not charged sales tax on electricity supplied to employees for free of cost. The ACIR issued order on 22 March 2019 and raised demand of sales tax amounting to Rupees 1,056.59 million. Being aggrieved with the order of the ACIR the Company filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) which is pending for adjudication.
- (xxxi) The Assistant Commissioner Inland Revenue (ACIR) issued notice on 22 November 2018 alleging that the Company has not charged sales tax on reconnection fee recovered from consumers. The ACIR issued order dated 20 March 2019 and raised demand of sales tax amounting to Rupees 9.35 million. Being acgrieved, an appeal was filed before the Commissioner Inland Revenue (Appeals) (CIR(A)) which is still pending for adjudication.
- (xxxii) The Assistant Commissioner Inland Revenue (ACIR) issued notice on 22 November 2018 alleging that the Company has not charged sales tax on Tariff Differential Subsidy (TDS). The ACIR issued an order dated 18 March 2019 and raised a demand of sales tax amounting to Rupees 4,516.7 million. Being aggrieved, an appeal was filed before the Commissioner Inland Revenue (Appeals) (CIR(A)) which is still pending for adjudication.
- (xxxiii) The Assistant Commissioner Inland Revenue (ACIR) issued notice dated 02 April 2019 alleging that the Company has filed sales tax returns after due date as prescribed in the Act. Subsequently, after year end the ACIR issued order dated 23 July 2019 against the Company and raised the demand of penalty and default surcharge amounting to Rupees 0.019 million and 5.103 million respectively. Being aggrieved, an appeal against the order has been filed on 23 August 2019, before the Commissioner Inland Revenue (Appeals) (CIR(A)). CIR(A) decided the case in favor of the Company on 06 August 2020 by annulling the order of ACIR and remanded the case back to ACIR for review of facts. It is now pending for adjudication before ACIR.

Aggregate provision of Rupees 35,732.22 million relating to the above stated paragraph numbers 12.1.4(xv) to 12.1.4(xxxiii) has not been recorded in the books of account of the Company on the advice of tax advisor of the Company.

### 12.2 Commitments

Letters of credit for capital expenditure and other than capital expenditure are of Rupees 2,516.084 million (2019: Rupees 1,153.065 million). Keeping in view the nature of Company's business, segregation of capital expenditure and other than capital expenditure is not possible at this stage.

13.2.1 The property and rights in the above assets were transferred to the Company on 01 July 1998 by WAPDA in accordance with the terms and conditions of the Business Transfer Agreement (BTA) executed between WAPDA and the Company.

13.2.2 Furniture and fixture have been included in other plant and equipment and computers have been clubbed in office equipment.

13.2.3 Title of some of freehold land has not been transferred with the name of Company. Book value of such freehold land is not available separately.

13.2.4 On 01 March 2019, the Company entered into an Authorization and Interest agreement with Power Holding (Private) Limited (PHPL) and Meezan Bank Limited (MBL), in which Company authorized PHPL to carry out "Certain Actions" in relation to Relevant Transaction Assets representing freehold land at Bahawalpur, Khanpur, Dera Ghazi Khan, Jampur, Bahawalnagar, Multan, Tounsa Shareef, Arlfwala and Sahiwal having combined area of 1181 kanal and 14 marta amounting to Rupees 256,940,077. Certain Actions include selling the Relevant Transaction Assets to MBL and creating a security interest over the same for the purpose of enabling PHPL to raise financing through the Sukuk issue. In addition to this agreement, PHPL entered into an Asset Purchase Agreement with MBL for selling the Relevant Transaction Assets to MBL which include the land of the Company and of other distribution and generation companies for a total purchase price of Rupees 200,000 million against which Sukuk certificates will be issued by PHPL for a period of ten years.

## 15. LONG TERM LOANS AND ADVANCES

#### Considered good - secured:

House building / purchase of plots	90,045,510	92,255,426
Vehicles	24,478,291	26,017,795
	114,523,801	118,283,221
Less: Current portion shown under current assets (Note 19)	33,129,197	37,652,796
	<u></u>	80,630,425

**15.1** Loans for house building and purchase of plot are repayable in ten years, car and motor cycle loans in five years and bicycle loans in four years. As per Company's policy, interest is charged equal to the profit rate applied on 'General Provident Fund' which is 12 percent (2019: 14.35 percent) per annum. The principal amount is recoverable in equal monthly installments and interest is recoverable in lump sum at the time of final settlement of loans. These loans are secured by mortgage of immovable property and hypothecation of vehicles.

## 16. LONG TERM DEPOSITS

These represent security deposits with utility companies against connections.

#### 17. STORES AND SPARE PARTS

	Stores	5,93 <b>9</b> ,215,725	7,644,539,367

		2020 RUPEES	2019 RUPEES
18.	TRADE DEBTS		
	Partially secured:		
	Considered good	62,669,478,427	40,472,778,854
	Less: Allowance for expected credit losses (Note 18.2)	(11,467,624,501)	(10,983,587,907)
		51,201,853,926	29,489,190,947

18.1 Trade debts include the amount receivable from domestic consumers up to 300 units, in respect of Prime Minister's Relief Package for deferred payment of electricity bill due to COVID-19 pandemic. As per the directions by Government of Pakistan, the bills are collectable in the form of three installments. Trade debts include the deferred amount against the consumers, who have opt for the installments. The said amount accumulates to a total of Rupees 13,416.803 million. Late Payment Surcharge (LPS) will not be levied in case of non-payment by such consumers. In addition to this, no mark-up will be charged on the deferred amount.

18.2	Allowance for expected credit losses		
	Balance as at 01 July	10,983,587,907	4,073,166,345
	Add: Expected credit loss allowance for the year (Note 26)	583,580,214	6,955,204,725
		11,567,168,121	11,028,371,070
	Less:		
	Trade debts written off against allowance for expected credit losses	99,543,620	44,783,163
	Balance as at 30 June	11,467,624,501	10,983,587,907

18.3 Trade debts are partially secured to the extent of corresponding consumers' security deposits. Trade debts as at the reporting date are classified into domestic, commercial, agriculture, public lights, residential colonies and others.

18.4 As at 30 June, ageing analysis of these trade debts is as follows:

**22.1** Rate of profit on deposit accounts ranges from 3.25 percent to 6.50 percent (2019: 3.75 percent to 10.25 percent) per annum.

22.2 These represent term deposit receipts placed with different banks having maturity period of one to three (2019: one to three) months at profit rates ranging from 7.10 percent to 10.75 percent (2019: 10.00 percent to 12.50 percent) per annum.

#### 23. SALES OF ELECTRICITY

Less: Sales tax	33,888,338,111	28,109,096,311
	199,343,165,359	165,347,625,359

### 24. TARIFF DIFFERENTIAL SUBSIDY

This represents the tariff subsidy claimed from the Government of Pakistan as the difference between rates determined by NEPRA and rates charged to the consumers as notified by the Government of Pakistan from time to time.

#### 25. COST OF ELECTRICITY

The Company purchased electricity from CPPA and other private power producers. The electricity purchased during the year has been accounted for according to invoices issued by CPPA and adjusted in accordance with monthly fuel price adjustment determined and notified by NEPRA.

29.	TAXATION		
29.1	Current		
	For the year	1,275,956,097	

;

Provision for current taxation represents minimum tax under section 113 of the Income Tax Ordinance 2001 adjusted by brought forward tax credit for non-equity investment in plant and machinery under repealed section 65B of the Ordinance. However tariff differential subsidy from Government of Pakistan is excluded from turnover of the Company as it constitutes exempt income. Reconciliation of tax expenses and product of accounting profit multiplied by the applicable tax rate is not required in view of accumulated tax losses of the Company of Rupees 552,103.374 million (2019: Rupees 509,824.357 million).

		2020 RUPEES	2019 RUPEES
29.2	Deferred		
	Deferred income tax effect due to:		
	Accelerated tax depreciation	18,654,645,054	17,541,708,604
	Allowance for expected credit losses	(3,325,611,105)	(3,185,240,493)

Number of employees as on 30 June	. 16 174	17 108
Average number of employees during the year	16 235	17 036
FINANCIAL RISK MANAGEMENT		

#### 35.1 Financial risk factors

34.

35.

The Company's activities expose it to a variety of financial risks: market risk (including currency risk, other price risk and interest rate risk), credit risk and liquidity risk. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

Risk management is carried out by the Company's Board of Directors. The Board provides principles for overall risk management, as well as policies covering specific areas such as currency risk, other price risk, interest rate risk, credit risk, liquidity risk, investment of excess liquidity and use of non-derivative financial instruments.

#### (a) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices, which affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing returns.

#### (i) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Currency risk arises mainly from future commercial transactions or receivables and payables that exist due to transactions in foreign currencies.

The Company is exposed to currency risk arising from currency exposure, primarily with respect to the United States Dollar (USD). Currently, the Company's foreign exchange risk exposure is restricted to the amounts receivable from the foreign entities. The Company's exposure to currency risk was as follows: 2010 2020

	2020	2010
Trade and other payables - USD	47,545	47,646
Following significant exchange rates were applied during the year:		
Rupees per US Dollar Average rate Reporting date rate	164.50 168.75	140.92 160.25

- - - -

#### Sensitivity analysis

If the functional currency, at reporting date, had weakened / strengthened by 5% against the USD with all other variables held constant, the impact on profit / (loss) after taxation for the year would have been Rupees 0.382 million lower / higher (2019: Rupees 0.382 million higher / lower), mainly as a result of exchange losses / gains on translation of foreign exchange denominated financial instruments. Currency risk sensitivity to foreign exchange movements has been calculated on a symmetric basis. Since the amount exposed to currency risk is negligible, therefore any adverse / favorable movement in functional currency in respect of USD will not have any material impact on the operational results.

#### (ii) Other price risk

Other price risk represents the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market. The Company is not exposed to commodity price risk.

#### (iii) Interest rate risk

This represents the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company's interest rate risk arises from long term financing, long term advances, bank balances in saving accounts and term deposit receipts. Financial instruments at variable rates expose the Company to cash flow interest rate risk. Financial instruments at fixed rate expose the Company to fair value interest rate risk.

At the reporting date the interest rate profile of the Company's interest bearing financial instruments was:

	2020 RUPEES	2019 RUPEES
Fixed rate instruments		
Financial assets		
Long term advances	114,523,801	118,283,221
Term deposit receipts	12,001,000,000	8,627,629,754
Financial liabilities		
Long term financing	• 14,061,123,790	14,061,123,790
Floating rate instruments		
Financial assets		
Bank balances - deposit accounts	4,913, <del>9</del> 09,263	1,801,134,333
Fair value sensitivity analysis for fixed rate instruments		

The Company does not account for any fixed rate financial assets and liabilities at fair value through profit or loss. Therefore, a change in interest rate at the reporting date would not affect profit or loss of the Company.

#### Cash flow sensitivity analysis for variable rate instruments

If interest rates, at the year end date, fluctuates by 1% higher / lower with all other variables held constant, profit / (loss) after taxation for the year would have been Rupees 46.682 million higher / lower (2019: Rupees 18.011 million lower / higher), mainly as a result of higher / lower interest income on bank balances in deposit accounts. This analysis is prepared assuming amounts of financial instruments outstanding at reporting date were outstanding for the whole year.

#### (b) Credit risk

Credit risk represents the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was as follows:

	51,201,853,926	29,439,190,947
	114,523,801	118,283,221
	157,817,812	103,482,195
	49,185	49,185
•	24,391,352,252	17,104,202,164
	17,367,885,403	10,457,887,798
	93,233,482,379	57,273,095,510
	•	51,201,853,926 114,523,801 157,817,812 49,185 24,391,352,252 17,367,385,403 

The credit quality of financial assets that are neither past due nor impaired can be assessed by reference to external credit ratings (if available) or to historical information about counterparty default rate:

- \* VIS has suspended the credit rating of the Bank till availability of updated financial information, as no financial statements have been made available by the Bank after the period ended February 2019.
- \*\* PACRA has withdrawn the credit ratings of the Bank since 19 November 2012 on the request of the Bank's management as SECP has not renewed Bank's license to operate investment finance services.
- \*\*\* State Bank of Pakistan has exempted the Bank from credit rating requirements till the completion of its restructuring process.
- \*\*\*\* As Pakistan Post Office is not a bank, therefore no credit rating is available

The Company's exposure to credit risk and expected credit losses related to trade debts is disclosed in Note 18.

Due to the Company's long standing business relationships with these counterparties and after giving due consideration to their strong financial standing, management does not expect non-performance by these counterparties on their obligations to the Company. Accordingly the credit risk is minimal.

#### (c) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The cash management has not yet been delegated to the Company and WAPDA disburses funds to the Company as and when needed. Following are the contractual maturities of financial liabilities, including interest payments. The amounts disclosed in the table are undiscounted cash flows.

#### Following are the contractual maturities of financial liabilities as at 30 June 2020:

	Carrying amount	Contractual cash flows	6 months or less	6-12 months	1-3 years	More than 3 years
Non-derivative financial l	abilities:		(RU	PEES)		
Long term financing	14.149 488 141	34.583.031.608	5,785,993,888	485.855.286	1.839.359.909	26.471.822.525
Long term security deposits	10,179,383,631	10,179,383,631			1,000,000,000	10,179,383,631
Trade and other payables	165,788,356,738	165,788,356,737	165,788,356,737	-	-	-
Accrued mark-up	10,788,639,164	10,788,639,164	10,788,639,164	-	• -	
	200.905,867,674	221,339,411,140	182,362,989,789	485,855,286	1,839,359,909	36.651,206,153

Following are the contractual maturities of financial liabilities as at 30 June 2019:

	Carrying amount	Contractual cash flows	6 months or less	Less than 1 year	1-3 years	More than 3 years
	*********		(RUPEE	5)	******************	
Non-derivative financial l	iabilities:					
Long term financing	14,187,596,150	34,512,490,593	4,665,353,058	475,824,418	2,766,721,211	26,704,591,906
Long term security deposits	9,179,842,474	9,179,842,474		-	-	9,179,842,474
Trade and other payables	113.843.017.322	113,843,017,322	113,843,017,322	-	-	-
Accrued mark-up	9,292,966,980	9,292,956,980	9,292,966,980	-	•	
	146,503,422,926	166,928,317,369	127,801,337,360	475,824,418	2,766,721,211	35,884,434,380

The contractual cash flows relating to the above financial liabilities have been determined on the basis of mark-up rates effective as at 30 June. The rates of mark-up have been disclosed in Note 5 to these financial statements.

#### (d) Capital risk management

The objective of the Company when managing capital is to safeguard its ability to continue as a going concern. The Company is not exposed to any external capital requirement. As public interest entity, financial support is available to the Company from Federal Government and WAPDA in the form of delayed settlement of CPPA against electricity purchase, tariff revision and subsidy on ourchases.

#### 35.2 Financial instruments by categories

	2020 RUPEES	2019 RUPEES	
	At amortized cost		
As at 30 June			
Assets as per statement of financial position			
Irade debts	51,201,853,926	29,489,190,947	
Loans and advances	114,523,801	118,283,221	
Accrued interest	157,817,812	103,482,195	
Deposits	49,185	49,185	
Other receivables	24,391,352,252	17,104,202,164	
Cash and bank balances	17,367,926,676	10,457,887,798

Liabilities as per statement of financial position			
Long term financing	14,149,488,141	14,187,596,150	
Long term security deposits	10.179,383,631	9,179,842,474	
Trade and other payables	165,788,356,738	113,843,017,322	
Accrued mark-up	10,788,639,164	9,292,965,980	
<b>-</b> · · · · ·	200,905,867,674	146,503,422,926	

#### 35.3 Offsetting financial assets and financial liabilities

As on the reporting date, recognized financial instruments are not subject to offsetting as there are no enforceable master netting arrangements and similar agreements.

#### 36. **RECOGNIZED FAIR VALUE MEASUREMENTS**

#### Fair value hierarchy

Certain financial assets and financial liabilities are not measured at fair value if the carrying amounts are a reasonable approximation of fair value. Due to short term nature, carrying amounts of certain financial assets and financial liabilities are considered to be the same as their fair value. For the majority of the non-current receivables, the fair values are also not significantly different to their carrying amounts. Judgments and estimates are made in determining the fair values of the financial instruments that are recognized and measured at fair value in these financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Company classifies its financial instruments into following three levels. However, as at the reporting date, the Company has no such type of financial instruments which are required to be grouped into these levels. These levels are explained as under:

Level 1: The fair value of financial instruments traded in active markets (such as publicly traded derivatives, trading and equity securities) is based on guoted market prices at the end of the reporting period. The guoted market price used for financial assets held by the Company is the current bid price. These instruments are included in level 1.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities.

#### 37. DATE OF AUTHORIZATION

These financial statements were authorized for issue by the Board of Directors of the Company in their meeting held on -0.5 - 0.01 - 2020

#### 38. CORRESPONDING FIGURES

Corresponding figures have been re-arranged and re-classified for better presentation, wherever necessary, for the purpose of comparison. However, no significant re-arrangements have been made except following:

	RECLASSIFIC	DIIDEEC	
PARTICULARS	FROM	то	KUFELS
Advances from consumers	Trade debts	Trade and other payables	693,986,357

Moreover same reclassification was made in earliest period presented of 2018 in statement of financial position by Rupees 108,473,843.

#### 39. GENERAL

Figures have been mounded off to the nearest Rupee.

## **INDEPENDENT AUDITOR'S REPORT**

To the members of Multan Electric Power Company Limited

## Report on the Audit of the Financial Statements

## Opinion

We have audited the annexed financial statements of Multan Electric Power Company Limited (the Company), which comprise the statement of financial position as at 30 June 2019, and the statement of profit or loss, the statement of comprehensive income, the statement of changes in equity, the statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information, and we state that we have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of the audit.

In our opinion and to the best of our information and according to the explanations given to us, the statement of financial position, the statement of profit or loss, the statement of comprehensive income, the statement of changes in equity and the statement of cash flows together with the notes forming part thereof conform with the accounting and reporting standards as applicable in Pakistan and give the information required by the Companies Act, 2017 (XIX of 2017), in the manner so required and respectively give a true and fair view of the state of the Company's affairs as at 30 June 2019 and of the loss, other comprehensive loss, the changes in equity and its cash flows for the year then ended.

# **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs) as applicable in Pakistan. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants* as adopted by the Institute of Chartered Accountants of Pakistan (the Code) and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## **Emphasis of Matter**

We draw attention to the following matters:

a) Note 12.1.1 to the financial statements, which states that the Company has not recognized the impact of debit notes issued by Central Power Purchasing Agency (Guarantee) Limited (CPPA) for supplementary charges, being the mark-up charged on CPPA by Independent Power Producers (IPPs) on account of delayed payments, aggregating to Rupees 13,244.70 million.

# Riaz Ahmad & Company

Chartered Accountants

b) Note 12.1.2 to the financial statements, interest on workers' profit participation fund amounting to Rupees 1,531.48 million was not accounted for by the Company. Moreover, workers' profit participation fund of previous years along with related interest was not paid to the workers due to pending decision of Economic Coordination Committee to exempt the corporatized entities under the umbrella of WAPDA.

Our opinion is not modified in respect of these matters.

## Information Other than the Financial Statements and Auditor's Report Thereon

Management is responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

# **Responsibilities of Management and Board of Directors for the Financial Statements**

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the accounting and reporting standards as applicable in Pakistan and the requirements of Companies Act, 2017 (XIX of 2017) and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Board of directors are responsible for overseeing the Company's financial reporting process.

# Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs as Chartered Accountants

applicable in Pakistan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs as applicable in Pakistan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

# **Report on Other Legal and Regulatory Requirements**

Based on our audit, we further report that in our opinion:

a) proper books of account have been kept by the Company as required by the Companies Act, 2017 (XIX of 2017);

Riaz Ahmad & Company

Chartered Accountants

- b) the statement of financial position, the statement of profit or loss, the statement of comprehensive income, the statement of changes in equity and the statement of cash flows together with the notes thereon have been drawn up in conformity with the Companies Act, 2017 (XIX of 2017) and are in agreement with the books of account and returns;
- c) investments made, expenditure incurred and guarantees extended during the year were for the purpose of the Company's business; and
- d) no Zakat was deductible at source under the Zakat and Ushr Ordinance, 1980 (XVIII of 1980)

4

The engagement partner on the audit resulting in this independent auditor's report is Liaqat Ali Panwar.

1.

#### MULTAN ELECTRIC POWER COMPANY LIMITED NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2019

#### 1. THE COMPANY AND ITS ACTIVITIES

Ľ

- 1.1 Multan Electric Power Company Limited (the Company) is a public limited company incorporated in Pakistan under the repealed Companies Ordinance, 1984 (now Companies Act, 2017). The Company was established to takeover all the properties, rights, assets, obligations and liabilities of Multan Area Electricity Board (MAEB) owned by Pakistan Water and Power Development Authority (WAPDA) and such other assets and liabilities as agreed. The Company was incorporated on 14 May 1998 and commenced operation on 09 June 1998. Its registered office is situated at Shahrah-e-Quaid-e-Azam, WAPDA House, Lahore. The principal place of business of the Company is located at Khanewal Road, Multan. While the Company have various 132-KV and 66-KV grid stations along with other offices located in 13 districts of South Punjab including Multan, Pakpattan, Sahiwal, Khanewal, Bahawalnagar, Bahawalpur, Rahim Yar Khan, Lodhran, Dera Ghazi Khan, Layyah, Muzaffargarh, Rajanpur and Vehari. The principal activity of the Company is distribution and supply of electricity to public within defined geographical boundaries.
- 1.2 Ministry of Energy, Government of Pakistan vide S.R.O. 07(I)/2019 dated 01 January 2019 has allowed the Prior Year Adjustment (PYA) of Rupees 49.170 billion, which includes Rupees 19.733 billion relating to financial year 2016-17 and Rupees 29.437 billion relating to financial year 2017-18. However, an amount of Rupees 20.105 billion has been recovered during the year and remaining amount of Rupees 29.065 billion has to be recovered in next 6 months after year end. Further, Ministry of Energy, Government of Pakistan vide S.R.O. 667(I)/2019 dated 28 June 2019 has allowed an amount of Rupees 34.633 billion as quarterly adjustment on account of Power Purchase Cost relating to first half of financial year 2018-19, which will be recovered in next fifteen months after year end. If these adjustments had been allowed in the respective years, the revenue for years ended 30 June 2017, 30 June 2018 and 30 June 2019 would have been increased by Rupees 19.733 billion, Rupees 29.437 billion and Rupees 34.633 billion respectively. Consequently, accumulated loss would have been reduced by Rupees 63.698 billion.

#### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all years presented, unless otherwise stated:

#### 2.1 Basis of preparation

#### a) Statement of compliance

These financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan. The accounting and reporting standards applicable in Pakistan comprise of:

- International Financial Reporting Standards (IFRSs) issued by the International Accounting Standards Board (IASB) as notified under the Companies Act, 2017; and

- Provisions of and directives issued under the Companies Act, 2017.

Where provisions of and directives issued under the Companies Act, 2017 differ from the IFRSs, the provisions of and directives issued under the Companies Act, 2017 have been followed.

#### b) Accounting convention

These financial statements have been prepared under the historical cost convention, except for the staff retirement benefits which are measured at present value determined annually through actuarial valuation on each reporting date.

#### c) Critical accounting estimates and judgments

The preparation of financial statements in conformity with the approved accounting standards requires the use of certain critical accounting estimates. It also requires the management to exercise its judgment in the process of applying the Company's accounting policies. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The areas where various assumptions and estimates are significant to the Company's financial statements or where judgments were exercised in application of accounting policies are as follows:

#### Useful lives, patterns of economic benefits and impairments

Estimates with respect to residual values and useful lives and pattern of flow of economic benefits are based on the analysis of the management of the Company. Further, the Company reviews the value of assets for possible impairment on annual basis. Any change in the estimates in the future might affect the carrying amount of respective item of property, plant and equipment, with a corresponding effect on the depreciation charge and impairment.

## Provision for obsolescence of stores and spare parts

The Company reviews the carrying amount of stores and spare parts on regular basis and provision for obsolescence is made if there is any change in usage pattern and physical form of stores and spare parts.

#### Taxation

In making the estimates for income tax currently payable by the Company, the management takes into account the current income tax law and the decisions of appellate authorities on certain issues in the past.

#### Allowance for expected credit losses

The allowance for expected credit losses assessment requires a degree of estimation and judgement. It is based on the lifetime expected credit loss, based on the Company's experience of actual credit loss in past years.

#### Staff retirement benefits

Certain actuarial assumptions have been adopted for determination of present value of staff retirement benefits and fair value of plan assets. Any change in these assumptions in future years might affect the current and remeasurement gains and losses in those years.

#### d) Implication of revised IFRS 2 'Share-based Payment'

On 14 August 2009, the Government of Pakistan (GoP) launched Benazir Employees' Stock Option Scheme ("the Scheme") for employees of certain State Owned Enterprises (SOEs), including the Company and Non-State Owned Enterprises (Non-SOEs), where the GoP holds significant investments. The Scheme is applicable to permanent and contractual employees where in employment of these entities on the date of launch of the Scheme, subject to completion of five years vesting period by all contractual employees and by permanent employees in certain instances.

The Scheme provides for cash payment to employees on retirement or termination based on the price of shares of respective entities. To administer the Scheme, the Government shall transfer 12 percent of its investment in such SOEs and Non-SOEs to a Trust Fund, established under a trust deed, created for the purpose by each such entity. The eligible employees are entitled to be allotted units by each Trust Fund in proportion to their respective length of service and on retirement or termination, such employees would be entitled to receive such amounts from Trust Funds in exchange for the surrendered units, as would be determined based on market price for listed entities or break-up value of non-listed entities. The shares relating to the surrendered units would be transferred back to the GoP.

The Scheme also provides that 50 percent of dividend related to shares transferred to the respective Trust Fund would be distributed amongst the unit-holding employees. The balance 50 percent dividend would be transferred by the respective Trust Fund to the Central Revolving Fund, managed by the Privatization Commission of Pakistan for payment to employees against surrendered units. The deficit, if any, in Trust Funds to meet the re-purchase commitment would be met by the Government. The Scheme, developed in compliance with the stated GOP policy of empowerment of employees of SOEs, needs to be accounted for by the covered entities, including the Company, under the provisions of amended IFRS 2. However, keeping in view the difficulties that may be faced by the entities covered under the Scheme, the SECP, on receiving representations from some of entities covered under the scheme and after having consulted the Institute of Chartered Accountants of Pakistan, has granted exemption vide SRO 587(I)/2011 dated 07 June 2011 to such entities from the application of IFRS 2 to the Scheme.

#### e) Standards, interpretation and amendments to published approved accounting standards that are effective in current year and are relevant to the Company

Following standards, interpretation and amendments to published approved accounting standards are mandatory for the Company's accounting periods beginning on or after 01 July 2018:

- IFRS 9 'Financial Instruments'
- IFRS 15 'Revenue from Contracts with Customers'
- IFRS 15 (Amendments), 'Revenue from Contracts with Customers'
- IFRIC 22 'Foreign Currency Transactions and Advance Consideration'
- Annual Improvements to IFRSs: 2014 2016 Cycle

The Company had to change its accounting policies and make certain adjustments without restating prior year results following the adoption of IFRS 9. These are disclosed in Note 2.9. Most of the other amendments listed above except for IFRS 9 and IFRS 15 (as disclosed in Note 2.10) did not have any impact on the amounts recognized in prior periods and are not expected to significantly affect the current or future periods.

#### f) Amendments to published approved accounting standards that are effective in current year but not relevant to the Company

There are other amendments to published approved accounting standards that are mandatory for accounting periods beginning on or after 01 July 2018 but are considered not to be relevant or do not have any significant impact on the Company's financial statements and are therefore not detailed in these financial statements.

Standards, interpretation and amendments to published approved accounting standards that are not yet effective but relevant to the Company

2

g)

Following standards, interpretation and amendments to existing standards have been published and are mandatory for the Company's accounting periods beginning on or after 01 July 2019 or later periods:

IFRS 16 'Lease' (effective for annual periods beginning on or after 01 January 2019). IFRS 16 specifies how an entity will recognize, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16 approach to lessor accounting substantially unchanged from its predecessor, IAS 17 'Leases'. IFRS 16 replaces IAS 17, IFRIC 4 'Determining Whether an Arrangement Contains a Lease', SIC-15 'Operating Leases-Incentives' and SIC-27 'Evaluating the Substance of Transactions Involving the Legal Form of a Lease'. The management of the Company is in the process of evaluating the impacts of the aforesaid standard in the Company's financial statements.

Amendments to IFRS 9 (effective for annual periods beginning on or after 01 January 2019) clarify that for the purpose of assessing whether a prepayment feature meets the Solely Payments of Principal and Interest ('SPPI') condition, the party exercising the option may pay or receive reasonable compensation for the prepayment irrespective of the reason for prepayment. In other words, prepayment features with negative compensation do not automatically fail SPPI. The amendments are not likely to have significant impact on the Company's financial statements.

IFRIC 23 'Uncertainty over Income Tax Treatments' (effective for annual periods beginning on or after 01 January 2019). The interpretation addresses the determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates, when there is uncertainty over income tax treatments under IAS 12 'Income Taxes'. It specifically considers: whether tax treatments should be considered collectively; assumptions for taxation authorities' examinations; the determination of taxable profit (tax loss), tax bases, unused tax credits and tax rates; and the effect of changes in facts and circumstances. The interpretation is not expected to have a material impact on the Company's financial statements.

Amendments to IAS 1 'Presentation of Financial Statements' and IAS 8 'Accounting Policies, Changes in Accounting Estimates and Errors' (effective for annual periods beginning on or after 01 January 2020). The amendments are intended to make the definition of material in IAS 1 easier to understand and are not intended to alter the underlying concept of materiality in IFRS. In addition, the IASB has also issued guidance on how to make materiality judgements when preparing general purpose financial statements in accordance with IFRS.

Amendments to IAS 19, 'Employee Benefits' - Plan Amendment, Curtailment or Settlement (effective for annual periods beginning on or after 01 January 2019). The amendments clarify that on amendment, curtailment or settlement of a defined benefit plan, a company now uses updated actuarial assumptions to determine its current service cost and net interest for the period; and the effect of the asset ceiling is disregarded when calculating the gain or loss on any settlement of the plan and is dealt with separately in other comprehensive income. The application of amendments is not likely to have an impact on Company's financial statements.

On 12 December 2017, IASB issued Annual Improvements to IFRSs: 2015 – 2017 Cycle, incorporating amendments to four IFRSs more specifically in IAS 12 'Income Taxes' and IAS 23 'Borrowing Costs', relevant to the Company. The amendments are effective for annual periods beginning on or after 01 January 2019. The amendments have no significant impact on the Company's financial statements and have therefore not been analyzed in detail.

On 29 March 2018, the IASB has issued a revised Conceptual Framework. The new Framework: reintroduces the terms stewardship and prudence; introduces a new asset definition that focuses on rights and a new liability definition that is likely to be broader than the definition it replaces, but does not change the distinction between a liability and an equity instrument; removes from the asset and liability definitions references to the expected flow of economic benefits-this lowers the hurdle for identifying the existence of an asset or liability and puts more emphasis on reflecting uncertainty in measurement; discusses historical cost and current value measures, and provides some guidance on how the IASB would go about selecting a measurement basis for a particular asset or liability; states that the primary measure of financial performance is profit or loss, and that only in exceptional circumstances will the IASB use other comprehensive income and only for income or expenses that arise from a change in the current value of an asset or liability; and discusses uncertainty, de-recognition, unit of account, the reporting entity and combined financial statements. The Framework is not an IFRS and does not override any standard, so nothing will change in the short term. The revised Framework will be used in future standard-setting decisions, but no changes will be made to current IFRSs. Preparers might also use the Framework to assist them in developing accounting policies where an issue is not addressed by an IFRS. It is effective for annual periods beginning on or after 01 January 2020 for preparers that develop an accounting policy based on the Framework.

# h) Standards and amendments to published approved accounting standards that are not yet effective and not considered relevant to the Company

There are other standards and amendments to published approved accounting standards that are mandatory for accounting periods beginning on or after 01 July 2019 but are considered not to be relevant or do not have any significant impact on the Company's financial statements and are therefore not detailed in these financial statements.

## 2.2 Functional and presentation currency along with foreign currency transactions and translation

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the Company operates (the functional currency). The financial statements are presented in Pak Rupees, which is the Company's functional and presentation currency. All monetary assets and liabilities in foreign currencies are translated into Pak Rupees at exchange rates prevailing at the reporting date. Transactions in foreign currencies are translated into Pak Rupees at exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated into Pak Rupees at exchange rates prevailing at the date of transacted into Pak Rupees at exchange rates are charged or credited to statement of profit or loss. Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated into Pak Rupees at exchange rates prevailing at the date of transaction. Non-monetary assets and liabilities denominated in foreign currency that are stated at fair value are translated into Pak Rupees at exchange rates prevailing at the date when fair values are determined.

#### 2.3 Staff retirement benefits

The Company provides funded pension scheme, an unfunded free electricity scheme and an unfunded free medical facility scheme for all its employees. Further, the Company's employees are also entitled for accumulated compensated absences which are encashed at the time of retirement upto maximum limit of 365 days. The Company's obligations under these schemes are determined annually by a qualified actuary using Projected Unit Credit Actuarial Cost Method. Latest actuarial valuations have been carried on 30 June 2019. The Company's net obligation in respect of defined benefit plans is calculated by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets. Past service cost is recognized immediately in the statement of profit or loss.

Remeasurement of the net defined benefit liability (except for compensated absences), which comprises actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognized immediately in other comprehensive income. The Company determines the net interest expense on the net defined benefit liability for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability, taking into account any changes in the net defined benefit liability during the period as a result of contributions and benefits payments. Net interest expense and other expenses related to defined benefit plan is recognized in profit or loss. Remeasurement related to the compensated absences is recognized in the year of occurrence in the statement of profit or loss.

#### 2.3.1 General / Employees' Provident Fund

For General / Employees' Provident Fund and WAPDA Welfare Fund, the Company makes deduction from salaries of the employees and remits these amounts to the funds established by WAPDA. The provident fund related disclosure required by the Companies Act, 2017 is not shown in these financial statements as General / Employees' Provident Fund established by WAPDA includes the employees of other power distribution and generation companies and the figures related to the. Company cannot be segregated from the whole General / Employees' Provident Fund.

#### 2.4 Taxation

#### Current

Provision for current tax is based on the taxable income for the year determined in accordance with the prevailing law for taxation of income. The charge for current tax is calculated using prevailing tax rates or tax rates expected to apply to the profit for the year, if enacted. The charge for current tax also includes adjustments, where considered necessary, to provision for tax made in previous years arising from assessments framed during the year for such years.

#### Deferred

Deferred tax is accounted for using the liability method in respect of all temporary differences arising from differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of the taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets to the extent that it is probable that taxable profits will be available against which the deductible temporary differences, unused tax losses and tax credits can be utilized.

Deferred tax is calculated at the rates that are expected to apply to the period when the differences reverse based on tax rates that have been enacted or substantively enacted by the reporting date. Deferred tax is charged or credited in the statement of profit or loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly.

#### 2.5 Property, plant and equipment

#### 2.5.1 Operating fixed assets and depreciation

#### a) Cost

2

Operating fixed assets are stated at cost less accumulated depreciation and any identified impairment loss, except freehold land which is stated at cost less any identified impairment loss and leasehold land which is stated at cost less accumulated depreciation and any identified impairment loss. Cost of operating fixed assets consists of historical cost, borrowing cost pertaining to the erection / construction period of qualifying assets and directly attributable costs of bringing the assets to working condition for their intended use.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repair and maintenance costs are charged to the statement of profit or loss during the period in which they are incurred.

#### b) Depreciation

Depreciation on operating fixed assets is calculated applying the straight line method so as to write off the cost / depreciable amount of the assets over their estimated useful lives at the rates given in Note 13.2. The Company charges the depreciation on additions from the month when the asset is available for use and on deletions up to the month when the asset is de-recognized. Depreciation on operating fixed assets is charged to the statement of profit or loss except for depreciation provided on construction equipment and vehicles during the period of construction of operating fixed assets that is capitalized as part of the cost of operating fixed assets. The residual values and useful lives are reviewed by the management, at each financial year-end and adjusted if impact on depreciation is significant.

#### c) De-recognition

An item of property, plant and equipment is de-recognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset is included in the statement of profit or loss in the year the asset is de-recognized.

#### 2.5.2 Capital work-in-progress

Capital work-in-progress is stated at cost less any recognized impairment loss. This includes all costs connected with specific assets (including borrowing cost) incurred during installation and construction period. These are transferred to specific assets as and when these assets are available for intended use.

#### 2.6 Stores and spare parts

Usable stores and spare parts except for items in transit are valued principally at moving average cost, while items considered obsolete are carried at nil value. Items-in-transit are stated at invoice amount plus other charges paid thereon.

#### 2.7 Cash and cash equivalents

Cash and cash equivalents comprise cash in hand, cash at banks on current, saving and deposit accounts and other short term highly liquid instruments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in values.

#### 2.8 Revenue from contracts with customers

The Company has adopted IFRS 15 from 01 July 2018. The standard provides a single comprehensive model for revenue recognition. The core principle of the standard is that an entity shall recognize revenue to depict the transfer of promised goods or services to customers at an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The standard introduced a new contract-based revenue recognition model with a measurement approach that is based on an allocation of the transaction price. This is described further in the accounting policies below. Credit risk is presented separately as an expense rather than adjusted against revenue. Contracts with customers are presented as a contract liability, a contract asset, or a receivable, depending on the relationship between the Company's performance and the customer's payment. These are further elaborated hereunder:

#### Revenue recognition

i)

Revenue is recognized at an amount that reflects the consideration to which the Company is expected to be entitled in exchange for transferring goods or services to a customer. For each contract with a customer, the Company: identifies the contract with a customer; identifies the performance obligations in the contract; determines the transaction price which takes into account estimates of variable consideration and the time value of money; allocates the transaction price to the separate performance obligations on the basis of the relative stand-alone selling price of each distinct good or service to be delivered; and recognizes revenue when or as each performance obligation is satisfied in a manner that depicts the transfer to the customer of the goods or services promised.

#### Sale of electricity

Revenue from the sale of electricity is recognized on supply of electricity to consumers at the rates determined by NEPRA and notified by the Government of Pakistan in official gazette from time to time. Late payment charges are recognized on accrual basis.

#### Tariff differential subsidy

Tariff differential subsidy on electricity announced by the Government of Pakistan for consumers is recognized under revenue on an accrual basis.

#### Rental and service income

Meter rentals are recognized on time proportion basis.

#### **Rendering of services**

Revenue from a contract to provide services is recognized over time as the services are rendered based on either a fixed price or an hourly rate.

#### Interest

Interest income is recognized as interest accrues using the effective interest method. This is a method of calculating the amortized cost of a financial asset and allocating the interest income over the relevant period using the effective interest rate, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset.

#### Other revenue

Other revenue is recognized when it is received or when the right to receive payment is established.

#### ii) Contract assets

Contract assets arise when the Company performs its performance obligations by transferring goods to a customer before the customer pays its consideration or before payment is due. Contract assets are treated as financial assets for impairment purposes.

#### iii) Contract liabilities

Contract liability is the obligation of the Company to transfer goods to a customer for which the Company has received consideration from the customer. If a customer pays consideration before the Company transfers goods, a contract liability is recognized when the payment is made. Contract liabilities are recognized as revenue when the Company performs its performance obligations under the contract.

### iv) Impacts of adoption of IFRS 15 on these financial statements as on 01 July 2018

The Company has adopted IFRS 15 by applying the modified retrospective approach according to which the Company is not required to restate the prior year results. However, the application of IFRS 15 does not have any impact on the revenue recognition policy of the Company and therefore, the cumulative effect of initially applying this standard as an adjustment to the opening balance of accumulated loss in the year of Initial application is Rupees Nil.

#### 2.9 IFRS 9 'Financial Instruments'

٢

i)

The Company has adopted IFRS 9 "Financial Instruments" from 01 July 2018. The standard introduced new classification and measurement models for financial assets. A financial asset shall be measured at amortized cost if it is held within a business model whose objective is to hold assets in order to collect contractual cash flows which arise on specified dates and that are solely principal and interest. A debt instrument shall be measured at fair value through other comprehensive income if it is held within a business model whose objective is to both hold assets in order to collect contractual cash flows which arise on specified dates that are solely principal and interest as well as selling the asset on the basis of its fair value. All other financial assets are classified and measured at fair value through profit or loss unless the Company makes an irrevocable election on initial recognition to present gains and losses on equity instruments in other comprehensive income. Despite these requirements, a financial asset may be irrevocably designated as measured at fair value through profit or loss to reduce the effect of, or eliminate, an accounting mismatch. For financial liabilities designated at fair value through profit or loss, the standard requires the portion of the change in fair value that relates to the Company's own credit risk to be presented in other comprehensive income (unless it would create an accounting mismatch). New simpler hedge accounting requirements are intended to more closely align the accounting treatment with the risk management activities of the Company. New impairment requirements use an 'Expected Credit Loss' ('ECL') model to recognize an allowance. Impairment is measured using a 12-month ECL method unless the credit risk on a financial instrument has increased significantly since initial recognition in which case the lifetime ECL method is adopted. For receivables, a simplified approach to measure expected credit losses using a lifetime expected loss allowance is available.

The Company has adopted IFRS 9 without restating the prior year results. Key changes in accounting policies resulting from application of IFRS 9 are as follows:

#### Recognition of financial instruments

The Company initially recognizes financial assets on the date when they are originated. Financial liabilities are initially recognized on the trade date when the entity becomes a party to the contractual provisions of the instrument.

### ii) Classification and measurement of financial instruments

IFRS 9 largely retains the existing requirements in IAS 39 "Financial Instruments: Recognition and Measurement" for the classification and measurement of financial liabilities. However, it replaces the previous IAS 39 categories for financial assets i.e. loans and receivables, Fair Value Through Profit or Loss (FVTPL), available for sale and held to maturity with the categories such as amortized cost, FVTPL and Fair Value Through Other Comprehensive Income (FVTOCI).

#### a) Classification

From 01 July 2018, the Company classifies its financial assets at amortized cost.

The classification depends on the Company's business model for managing the financial assets and the contractual terms of the cash flows.

#### b) Measurement

At initial recognition, the Company measures a financial asset at its fair value plus, transaction costs that are directly attributable to the acquisition of the financial asset. Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. The Company classifies its debt instruments at amortized cost. Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost. Interest income from these financial assets is included in other income using the effective interest rate method. Any gain or loss arising on derecognition is recognized directly in profit or loss and presented in other income / (other expenses) together with foreign exchange gains and losses.

#### Financial liabilities

#### **Classification and measurement**

The adoption of IFRS 9 did not have a significant effect on the Company's accounting policies related to financial liabilities, and therefore no change in the classification and measurement of financial liabilities.

#### iii) Impairment of financial assets

From 01 July 2018, the Company assesses on a forward looking basis the expected credit losses associated with its debt instruments carried at amortized cost. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

For trade debts and other receivables, the Company applies the simplified approach permitted by IFRS 9, which requires expected lifetime losses to be recognized from initial recognition of the receivables.

#### iv) De-recognition

#### **Financial assets**

The Company de-recognizes a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred, or it neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control over the transferred asset. Any interest in such de-recognized financial assets that is created or retained by the Company is recognized as a separate asset or liability.

#### **Financial liabilities**

The Company de-recognizes a financial liability (or a part of financial liability) from its statement of financial position when the obligation specified in the contract is discharged or cancelled or expired.

#### v) Offsetting of financial instruments

Financial assets and financial liabilities are set off and the net amount is reported in the financial statements when there is a legal enforceable right to set off and the Company intends either to settle on a net basis or to realize the assets and to settle the liabilities simultaneously.

### vi) Impacts of adoption of IFRS 9 on these financial statements as on 01 July 2018

On 01 July 2018, the Company's management has assessed which business models apply to the financial assets held by the Company at the date of initial application of IFRS 9 (01 July 2018) and has classified its financial instruments into appropriate IFRS 9 categories. The main effects resulting from this reclassification are as follows:

#### Financial assets (01 July 2018)

	Loans and receivables	Amortized cost
	RU	PEES
Opening balance (before reclassification)	62,890,499,682	-
Adjustment on adoption of IFRS 9 by reclassifying financial instruments designated as 'Loans and Receivables' to 'Amortized Cost'	(62,890,499,682)	62,890,499,682
Opening balance (after reclassification)		62,890,499,682

There was no change in categories of financial liabilities of the Company.

#### 2.10 Trade receivables

Trade receivables are initially recognized at fair value and subsequently measured at amortized cost using the effective interest method, less any allowance for expected credit losses.

The Company has applied the simplified approach to measure expected credit losses, which uses a lifetime expected loss allowance. Actual credit loss experience over past years is used to base the calculation of expected credit loss.

Expected credit losses are recognized as follows:

- a) No expected credit loss on Government institutions balances;
- , b) Expected credit loss of seventy five percent on permanently disconnected consumers; and
  - c) Expected credit loss on arrears from private consumers and deferred arrears at the rates approved.

The percentage rates for creating allowance for expected credit losses on trade debts is as follows:

Permanently disconnected connections	75%
Deferred arrears	75%
Arrears:	
More than 3 months and up to 6 months	5%
More than 6 months and up to 1 year	10%
More than 1 year	100%

#### 2.11 Deferred credit

Amounts received from consumers and Government as contributions towards the cost of extension of electricity distribution network and of providing service connections are deferred and amortized over the estimated useful lives of related assets except for separately identifiable services in which case revenue is recognized upfront upon establishing a connection network. Amortization of deferred credit for the year is recognized as income in the statement of profit or loss.

#### 2.12 Borrowings

:

Financing and borrowings are initially recognized at fair value of the consideration received, net of transaction costs. They are subsequently measured at amortized cost using the effective interest method.

#### 2.13 Borrowing cost

Interest, mark-up and other charges on long term finances are capitalized up to the date of commissioning of respective qualifying assets acquired out of the proceeds of such long term finances. All other interest, mark-up and other charges are recognized in the statement of profit or loss.

#### 2.14 Loans, advances, deposits and receivables

These are recognized at cost less an estimate made for doubtful receivables based on a review of all outstanding amounts at the year end.

### 2.15 Share capital

Ordinary shares are classified as share capital. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax.

#### 2.16 Trade and other payables

Trade and other payables are initially recognized at fair value plus directly attributable costs. These are subsequently measured at amortized cost.

#### 2.17 Impairment of non-financial assets

Assets that have an indefinite useful life are not subject to depreciation and are tested annually for impairment. Assets that are subject to depreciation are reviewed for impairment at each reporting date or whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount for which assets carrying amount exceeds its recoverable amount. Recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date. Reversals of the impairment losses are restricted to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if impairment losses had not been recognized. An impairment loss or reversal of impairment loss is recognized in the statement of profit or loss.

#### 2.18 Provisions

Provisions are recognized when the Company has a present, legal or constructive obligation as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligations and reliable estimate of the amount can be made. However provisions are reviewed at each reporting date and adjusted to reflect current best estimate.

### 2.19 Earnings / (loss) per share

The Company presents basic and diluted earnings / (loss) per share data for its ordinary shares. Basic earnings / (loss) per share is calculated by dividing the profit attributable to ordinary shareholders or loss for the year of the Company by the weighted average number of ordinary shares outstanding during the period. Diluted earnings / (loss) per share is determined by adjusting the profit attributable to ordinary shareholders or loss for the year and the weighted average number of ordinary shares outstanding during the period. Diluted earnings / (loss) per share is determined by adjusting the profit attributable to ordinary shareholders or loss for the year and the weighted average number of ordinary shares outstanding for the effect of all dilutive potential ordinary shares.

#### 2.20 Contingent assets

Contingent assets are disclosed when the Company has a possible asset that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Contingent assets are not recognized until their realization becomes certain.

#### 2.21 Contingent liabilities

Contingent liability is disclosed when the Company has a possible obligation as a result of past events whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Contingent liabilities are not recognized, only disclosed, unless the possibility of a future outflow of resources is considered remote. In the event that the outflow of resources associated with a contingent liability is assessed as probable, and if the size of the outflow can be reliably estimated, a provision is recognized in the financial statements.

#### 2.22 Intangible asset

Intangible asset represents the cost of computer software and is stated at cost less accumulated amortization and any identified impairment loss. Intangible asset is amortized from the month, when the assets becomes available for use, using the straight line method, whereby the cost of the intangible asset is amortized over its estimated useful life over which economic benefits are expected to flow to the Company. The useful life and amortization method is reviewed and adjusted, if appropriate, at each reporting date.

3. ISSUED, SUBSCRIBED AND PAID UP SHARE CAPITAL

2019 NUMBER	2018 R OF SHARES		2019 RUPEES	2018 RUPEES
1 000	1 000	Ordinary shares of Rupees 10 each fully paid in cash to Government of Pakistan (GoP) and its nominee directors	10,000	10,000
1 082 362 604	1 082 362 604	Ordinary shares of Rupees 10 each fully paid issued for consideration other than in cash to WAPDA	10,823,626,048	10,823,626,048
1 082 363 604	1 082 363 604		10,823,636,048	10,823,636,048

#### 4. DEPOSIT FOR SHARES

This represents credit of Rupees 31,337,632,169 (2018: Rupees 30,590,260,624) received by the Company in financial year 2014 from Central Power Purchase Agency (Guarantee) Limited (CPPA) in pursuance of letter No. F.1(5)-CF-1/2012-13/1017 dated 02 July 2013 from Ministry of Finance as GoP investment against circular debt of Rupees 341 billion. Hence this was treated as GoP equity investment in the Company. During the year on advice from CPPA, the Company booked the mark-up paid by the GoP in its books of account as financial charges and inserted it as equity amounting to Rupees 747,371,545.

5.1 This represents re-lent portion of loan obtained by the GoP from International Bank for Reconstruction and Development (IBRD) for electricity distribution and transmission improvement project which is secured against the guarantee by GoP, pursuant to the relent agreement between GoP and the Company. This facility carries interest at the rate of 17% per annum which comprises of relending interest of 11% per annum and exchange risk cover of 6% per annum payable on half yearly basis. Repayment of principal has to be made on half yearly basis within maximum period of 15 years including grace period of 2 years starting from September 2011. The overdue amount of principal and mark-up aggregate to Rupees 2,246.061 million (2018: Rupees 1,925.466 million) and Rupees 3,235.741 million (2018: Rupees 2,951.499 million) respectively.

5.2 This represents re-lent portion of loan obtained by GoP from Asian Development Bank (ADB) for Distribution Enhancement Investment Program which is secured against the guarantee by GoP, pursuant to the re-lent agreement between GoP and the Company. This facility carries interest at the rate of 17% inclusive of relending interest of 11% per annum plus exchange risk cover fee of 6% per annum which shall be charged both on principal amount and interest amount separately. Repayment of principal has to be made on half yearly basis within maximum period of 15 years including grace period of 2 years starting from February 2011. The overdue amount of principal and mark-up aggregate to Rupees 1,017.785 million (2018: Rupees 889.180 million) and Rupees 762.849 million (2018: Rupees 631.819 million) respectively.

- 5.3 This represents re-lent portion of loan obtained by GoP from ADB for Distribution Enhancement Investment Program which is secured against the guarantee by GoP, pursuant to the re-lent agreement between GoP and the Company. Disbursements during the year of Rupees 16.186 million (2018: Rupees 30.495 million) have been transferred to the Company. This facility carries interest at the rate of 15% inclusive of relending interest of 8.2% per annum plus exchange risk cover fee of 6.8% per annum which shall be charged both on principal amount and interest amount separately. Repayment of principal has to be made on half yearly basis within maximum period of 17 years excluding grace period of 3 years starting from June 2014. The overdue amount of principal and mark-up aggregate to Rupees 657.980 million (2018: Rupees 527.032 million) and Rupees 1,348.291 million (2018: Rupees 1,119.731 million) respectively.
- **5.4** This represents re-lent portion of loan obtained by GoP from ADB for Distribution Enhancement Investment Program which is secured against the guarantee by GoP, pursuant to the re-lent agreement between GoP and the Company. Disbursements during the year of Rupees 192.484 million (2018: Rupees 421.003 million) have been transferred to the Company. This facility carries interest at the rate of 15% inclusive of relending interest of 8.2% per annum plus exchange risk cover fee of 6.8% per annum which shall be charged both on principal amount and interest amount separately. Repayment of principal has to be made on half yearly basis within maximum period of 25 years including grace period of 5 years starting from June 2018. The overdue amount of principal and mark-up aggregate to Rupees 227.578 million (2018: Rupees 72.529 million) and Rupees 977.095 million (2018: Rupees 572.174 million) respectively.
- 5.5 This represents re-lent portion of loan obtained by GoP from ADB for Distribution Enhancement Investment Program which is secured against the guarantee by GoP, pursuant to the re-lent agreement between GoP and the Company. Disbursements during the year of Rupees 345.812 million (2018: 569.508 million) have been transferred to the Company. This facility carries interest at the rate of 15% inclusive of relending interest of 8.2% per annum plus exchange risk cover fee of 6.8% per annum which shall be charged both on principal amount and interest amount separately. Repayment of principal will be started from June 2019 and will be repaid on half yearly basis within maximum period of 25 years including grace period of 5 years. The overdue amount of principal and mark-up aggregate to Rupees 69.319 million (2018: Rupees Nil) and Rupees 635.419 million (2018: Rupees Nil) respectively.
- 5.6 This represents a loan obtained from the GoP under "Prime Minister's Southern Punjab Development Package" for construction of new grid stations and laying transmission lines. The limit of the loan facility is Rupees 1,228 million. As per instructions of the Finance Division of GoP for loan disbursements, the interest shall be chargeable at a prevailing rate of interest for respective year, which has been assessed as 17% per annum by the Company. Repayment of principal has to be made on yearly basis within maximum period of 20 years including grace period of 5 years starting from June 2015. The overdue amount of principal and mark-up aggregate to Rupees 199.263 million (2018: Rupees 159.410 million) and Rupees 762.184 million (2018: Rupees 660.560 million) respectively.
- 5.7 These include Rupees 13.889 million (2018: Rupees 61.11 million) interest free loan from RYK Mills Limited under an agreement to meet expenses for grid interconnection. The loan is repayable in 36 equal monthly installments commencing after 18 months of commercial operation date of the project which is 21 March 2015. The overdue amount of principal aggregates to Rupees 2.778 million (2018: Rupees 16.667 million).
- **5.8** These included Rupees Nil (2018: Rupees 9.47 million) interest free loan from JDW Sugar Mills Limited under an agreement to meet expenses for grid interconnection. This loan has been completely repaid during the year.
- 5.9 These include two interest free loans of Rupees 11.57 million (2018: Rupees 24.59 million) and Rupees 15.56 million (2018: Rupees 20 million) from Hamza Sugar Mills Limited under an agreement to meet expenses for grid interconnection. Loan No. 1 is repayable in 36 equal monthly installments commencing after 18 months of commercial operation date of the project which is 01 March 2016. The overdue amount of principal aggregate to Rupees 0.723 million (2018: Rupees 5.063 million). Loan No. 2 is repayable in 36 equal monthly installments commencing after 18 months of commercial operation date of the project which is 10 March 2017. The overdue amount of principal aggregates to Rupees 0.555 million (2018: Rupees Nil).
- **5.10** These include Rupees 55 million (2018: Rupees 55 million) interest free loan from The Thal Industries Corporation Limited under an agreement to meet expenses for grid interconnection. The loan is repayable in 36 equal monthly installments commencing after 18 months of commercial operation date of the project which has not yet been assessed.
- 5.11 These include Rupees 30.455 million (2018: Rupees 30.455 million) interest free loan from Harappa Solar (Private) Limited under an agreement to meet expenses for grid interconnection. The loan is repayable in 36 equal monthly installments commencing after 17 months of commercial operation date which is 14 October 2017. The overdue amount of principal aggregates to Rupees 2.538 million (2018: Rupees Nil).
- **5.12** The fair value adjustment in accordance with the requirements of IFRS 9 'Financial Instruments' arising in respect of the loans given in Notes 5.7, Note 5.9 to Note 5.11 is not considered material and hence not recognized.

The sensitivity analysis is based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the staff retirement benefits to significant actuarial assumptions, the same method (present value of the staff retirement benefits calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the gratuity liability recognized within the statement of financial position.

The methods and types of assumptions used in preparing the sensitivity analysis were changed as compared to the previous year due to upward trend in discount rate structure and increase in inflationary expectations.

#### 6.9 Risks associated with staff retirement benefits

#### Longevity risk

The risk arises when the actual lifetime of retirees is longer than expectation. This risk is measured at the plan level over the entire retiree population.

#### Salary increase risk

The most common type of retirement benefit is one where the benefit is linked with final salary. The risk arises when the actual increases are higher than expectation and impacts the liability accordingly.

#### Withdrawal risk

C

9.

The risk of actual withdrawals varying with the actuarial assumptions can impose a risk to the benefit obligation. The movement of the liability can go either way.

#### 7. LONG TERM SECURITY DEPOSITS

These represent security deposits received from consumers on account of electricity connections. These are refundable / adjustable on disconnection of electricity supply.

| 8. | RECEIPT AGAINST DEPOSIT WORKS                                                                               | 2019<br>RUPEES                  | 2018<br>RUPEES                  |
|----|-------------------------------------------------------------------------------------------------------------|---------------------------------|---------------------------------|
|    | Consumers demand notices awaiting connections (Note 8.1)<br>Funds received against deposit works (Note 8.2) | 4,823,951,134<br>15,899,024,883 | 3,137,958,562<br>17,310,976,416 |
|    |                                                                                                             | 20,722,976,017                  | 20,448,934,978                  |

8.1 These represent amounts received from consumers through demand notices against which the related works / jobs have not been completed.

8.2 These represent amounts received directly by the Company for electrification of villages, colonies and other deposit works, mainly provided through Government funding against which the related works / jobs have not been completed.

10.2 During financial year 2013-14, the Company had received Compact Fluorescent Lamps (CFLs) from Pakistan Electric Power Company (PEPCO) under the Clean Development Mechanism (CDM) Program of activities -"National CFL Project - Pakistan". CFLs cost will have to be borne by the Company from its distribution margin.

10.3 The Company has not made payment of its contribution towards Workers' Profit Participation Fund (WPPF), being the Company's liability on account of provision of Companies Profit (Workers' Participation) Act, 1968 uptill 30 June 2015. This matter is pending for decision with Economic Coordination Committee (ECC) upon recommendation submitted by WAPDA to exempt the undertakings established under the umbrella of WAPDA from compliance with the requirements of Companies Profit (Workers' Participation) Act, 1968. Due to pending decision with the ECC, no provision for mark-up is made as required under Companies Profit (Workers' Participation) Act, 1968. However, the Company has shown the mark-up as contingent liability under Note 12.1.2 to the financial statements.

# 11. ACCRUED MARK-UP

| Foreign re-lent loans Note (11.1)                             | 1,503,078,535 | 1,159,892,650 |
|---------------------------------------------------------------|---------------|---------------|
| Cash development loan                                         | 80,597,696    | 101,623,875   |
| Overdue mark-up on foreign re-lent and cash development loans | 7,721,578,614 | 5,935,784,352 |
|                                                               | 9,305,254,845 | 7,197,300,877 |

**11.1** These include accrued mark-up amounting to Rupees 626.688 million which were previously shown as deferred mark-up.

# 12. CONTINGENCIES AND COMMITMENTS

# 12.1 Contingencies

**12.1.1** The Company has received various invoices from CPPA representing late payment charges (supplementary charges) being the share of the Company in the mark-up charged to CPPA by Independent Power Producers (IPPs) on account of delayed payments aggregating to Rupees 17,058.28 million (2018: Rupees 14,089.28 million).

As mentioned in Para 18 of tariff determination by NEPRA communicated through letter no. NEPRA/TRF-283/MEPCO-2014/4264-4266 dated 27 March 2015 and Para 8.10 and 20 of tariff determination by NEPRA communicated through letter no. NEPRA/TRF-332/MEPCO-2015/2697-2699 dated 29 February 2016, it was mutually agreed by the representatives of CPPA and distribution companies that, as per clause 9.3(d) of electricity supply agreement dated 29 June 1998 between DISCOs and NTDC, the DISCOs are obliged to pay late payment charges (supplementary charges) to CPPA on account of delay payments of invoices.

NEPRA has decided that the late payment charges (supplementary charges) recovered from consumers on utility bills shall be offset against the late payment charges (supplementary charges) invoices raised by CPPA and CPPA cannot account for late payment charges (supplementary charges) over and above what is calculated as per agreement. Therefore, no provision for late payment charges (supplementary charges) of Rupees 13,244.70 million have been recognized in these financial statements as the management is of the view that supplementary charges have not been allowed as expense by NEPRA in tariff determination.

- 12.1.2 The Companies Profit (Workers' Participation) Act, 1968 requires payment of the allocated amount to the workers profit participation fund within nine months of the close of relevant financial year. However, due to pending decision of the Economic Coordination Committee to exempt the corporatized entities under the umbrella of WAPDA from requirements of the said Act, no provision for interest aggregating to Rupees 1,531.48 million (2018: Rupees 1,117.12 million) on unpaid amount has been recognized by the Company in these financial statements.
- 12.1.3 In addition to above-mentioned matters, large number of small cases have been filed against the Company, primarily by the Company's employees, customers and vendors, the quantum of which cannot be estimated reliably. However, the management is of the view that in the overall context of these financial statements, there would be no significant liability of the Company against such cases.

## 12.1.4 Income Tax

- (i) Additional Commissioner Inland Revenue amended the deemed assessments under section 120 of the Income Tax Ordinance, 2001 (the Ordinance) by passing an order under section 122(5A) of the Ordinance on the grounds that the minimum tax liability under section 113 was not discharged. He passed the orders vide DCR No. 10/07 dated 02 February 2015 and 19/18 dated 14 April 2015 for tax years 2010 and 2013 and created a demand of Rupees 5.63 million for the Tax Year 2010 and Rupees 109.82 million for the Tax Year 2013. Being aggrieved from the impugned orders, the Company filed appeals before the Commissioner Inland Revenue (Appeals) (CIR(A)) on 05 May 2015 and the same was upheld by the Learned CIR(A). Appeal against the orders of CIR(A) has been filed with the Appellate Tribunal Inland Revenue on 19 October 2015 which is pending for adjudication.
- (ii) Inland Revenue Audit Officer passed an order no. DCR 01/54 dated 12 November 2007 for the tax year 2007 under section 161 and 205 of the Ordinance creating a demand amounting to Rupees 10.22 million on grounds that withholding tax was not timely deducted by the Company on payments to certain parties. Being aggrieved an appeal was filed with Commissioner Inland Revenue (Appeals) (CIR(A)) and same was upheld by the Learned CIR (A). Against the orders of Learned CIR(A), second appeal was filed before Appellate Tribunal Inland Revenue. The matter is pending for adjudication.
- (iii) Additional Commissioner Inland Revenue (ACIR) passed the orders vide 92/10 dated 26 February 2009 under section 113 of the Ordinance and charged income tax on turnover for the tax year 2007 amounting to Rupees 153 million and for the tax year 2008 amounting to Rupees 72 million along with default surcharge of Rupees 9.9 million and Rupees 2 million respectively. Being aggrieved from the impugned orders, the Company filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) and the same was upheld by the Learned CIR(A). Subsequently appeal against the orders of CIR(A) was filed with the Appellate Tribunal Inland Revenue (ATIR) on 14 May 2009 who upheld the orders of CIR (A). Being aggrieved with both forums writ petition is filed before Honorable Lahore High Court, Lahore vide petition no. PTR 43/2011 and PTR 44/2011. The Honorable Lahore High Court, Lahore remanded back the case to the full bench of ATIR, which is pending for adjudication.
- (iv) Additional Commissioner Inland Revenue amended the deemed assessment under section 122(5A) of the Ordinance for the tax year 2014 vide bar code no.10000008089093 dated 12 November 2015 on ground that the minimum tax liability under section 113 was not discharged and thereby raised a demand of Rupees 1,736 million. Being aggrieved an appeal was filed with Commissioner Inland Revenue (Appeals) on 03 December 2015 who upheld the said order and subsequently another appeal has been filed with Appellate Tribunal Inland Revenue on 05 April 2016, which is pending for adjudication.
- (v) The Inland Revenue Audit Officer (IRAO) made an assessment under sections 124, 162(1) and 205 of the Ordinance vide no. 10/62 dated 24 June 2015 for Tax Year 2010, 2011 and 2012 wherein he raised demand amounting to Rupees 52.906 million treating service fee for the collection of Pakistan Television (PTV) license fees as commission rather than as service fee. In this regard, an appeal has been filed before the Learned Commissioner Inland Revenue (Appeals) (CIR(A)) on 11 August 2015 which is decided in favor of the Company vide orders dated 29 March 2016 and case was remanded back to the concerned IRAO / Assistant Commissioner Inland Revenue (ACIR) with direction to recalculate the service fee according to the agreement between WAPDA and PTV. Against the order of CIR(A), Regional Tax Office, Multan has filed appeal before Appellate Tribunal Inland Revenue. The said appeal is pending for adjudication.
- (vi) Additional Commissioner Inland Revenue passed the order for tax year 2015 that the Company was liable to pay Rupees 893 million being higher of minimum tax under section 113 and 113 (C) of the Ordinance. The assessment already finalized under section 120(1) of the Ordinance, therefore, being erroneous in so far as prejudicial to the interest of revenue, is amended under section 122 of the Ordinance. Being aggrieved from the impugned order, the Company filed appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) and same was upheld by the learned CIR(A). Appeals against the orders of CIR(A) has been filed with the Appellate Tribunal Inland Revenue on 17 January 2017, which are pending for adjudication.

- (vii) Assistant Commissioner Inland Revenue passed the order under section 122(1) of the Ordinance vide 14/39 dated 22 June 2017 for the tax year 2011 that the Company was liable to pay Rupees 226 million due to violation of certain provisions of Ordinance. Being aggrieved from the impugned order, the Company filed appeal before the Commissioner Inland Revenue (Appeals) on 07 July 2017 which is pending for adjudication.
- (viii) Assistant Commissioner Inland Revenue started proceedings for amendment of assessment under section 122 of the Ordinance on 17 January 2018. By ignoring all submissions, the ACIR issued an order vide bar code no. 100000032291023 dated 13 April 2018 raising a demand of Rupees 1,294 million. Being aggrieved, the Company filed appeal before Commissioner Inland Revenue (Appeals) (CIR (A)) on 11 May 2018. The matter is pending for adjudication before CIR (A).
- (ix) Assistant Commissioner Inland Revenue issued an order vide bar code no. 100000026203200 dated 09 November 2017 under section 161 of the Ordinance and raised a demand of Rupees 191 million along with default surcharge of Rupees 13 million on the grounds that the Company failed to deduct income tax while making payment to certain parties. Being aggrieved with the orders the Company has filed an appeal before Commissioner Inland Revenue (Appeals) on 13 December 2017, the proceeding of which is pending.
- (x) The Inland Revenue Audit Officer (IRAO) started proceedings under sections 161 and 205 of the Ordinance regarding discharging of liability to deduct income tax on different heads of account. By ignoring all submissions the Learned IRAO issued an order vide no. 10/47 dated 21 October 2013 and raised a demand of Rupees 718 million along with default surcharge of Rupees 161 million. Being aggrieved, the Company filed appeal before Commissioner Inland Revenue (Appeals) (CIR (A)) on 19 November 2013. The Learned CIR (A) issued an order dated 24 February 2014 and confirmed the demand of Rupees 379 million. A second appeal was filed before Appellate Tribunal Inland Revenue on 11 June 2014 who upheld the orders of CIR (A). Being aggrieved with both forums a writ petition vide tax reference no. 27 of 2014 was filed before Honorable Lahore High Court, Lahore who decided the case on 02 July 2016 in favor of the Company and deleted the demand of Rupees 301 million. To give effect to the judgment to decision of Honorable Lahore High Court, Lahore the Assistant Commissioner Inland Revenue issued appeal effect order and raised a demand of Rupees 78 million along with default surcharge of Rupees 66 million. Being aggrieved, further appeal was filed before CIR (A) on 15 December 2017 which is pending for adjudication.
- (xi) Assistant Commissioner Inland Revenue issued an order under section 161 of the Ordinance vide bar code no. 100000028613889 dated 04 January 2018 on the grounds that income tax was not deducted by the Company while making payment to certain parties during the tax years 2012 to 2015 and raised a demand of default surcharge of Rupees 277 million. Being aggrieved by the orders, an appeal was filed before Commissioner Inland Revenue (Appeals) (CIR (A)) on 01 February 2018. The Learned CIR (A) decided the case vide orders dated 24 April 2018 in favor of the Company by accepting the two contentions out of four. A second appeal was filed before Appealate Tribunal Inland Revenue for two contentions rejected by the Learned CIR (A), the proceedings of which are pending.
- (xii) Assistant Commissioner Inland Revenue (ACIR) started proceedings through show cause notice no. 826798-1 date 17 May 2018 under section 161 regarding advance tax collection of the differential amount of sales tax for tax year 2011. Subsequently, ACIR issued order no. 2/30 date 28 August 2018 and raised demand of income tax amounting to Rupees 307 million and default surcharge amounting to Rupees 363.668 million. Being aggrieved by the order, an appeal was filed before Commissioner Inland Revenue (Appeals) (CIR (A)) on 25 September 2018 which is pending for adjudication.
- (xiii) Assistant Commissioner Inland Revenue (ACIR) initiated proceedings through show cause notice vide document no. 100000033710411 dated 13 June 2018 under section 161 regarding advance tax collection of the differential amount of sales tax for tax year 2017. Subsequently, ACIR issued order no. 1/30 dated 27 August 2018 and raised demand of income tax amounting to Rupees 293 million and default surcharge amounting to Rupees 40.687 million. Being aggrieved by the order, an appeal was filed before Commissioner Inland Revenue (Appeals) (CIR (A)) on 26 August 2018 and same was upheld by the learned CIR(A). A second appeal was filed before Appellate Tribunal Inland Revenue which is pending for adjudication.
- (xiv) Assistant Commissioner Inland Revenue initiated proceedings through notice bearing bar code no. 100000034664302 dated 02 July 2018 under section 161 questioning the compliance of income tax withholding on payment to CPPA on account to use of system charges during tax year 2017. By disregarding the reply submitted, ACIR issued order no. 4/30 dated 09 September 2018 and raised demand of income tax amounting to Rupees 293 million and default surcharge amounting to Rupees 42.7 million. Being aggrieved by the order, an appeal was filed before learned Commissioner Inland Revenue (Appeals) (CIR (A)) on 26 August 2018 and same was upheld by the learned CIR(A). A second appeal was filed before Appellate Tribunal Inland Revenue and the proceedings are still pending.

Aggregate provision of Rupees 6,222.53 million regarding the cases stated in paragraph numbers 12.1.4(i) to 12.1.4(xiv) has not been accounted for in the books of account of the Company as in the opinion of tax advisor, the favorable outcome of these cases is expected.

### Sales Tax:

- (xv) The Deputy Commissioner Inland Revenue (DCIR) has passed an order against the Company dated 19 November 2012 by treating the "Subsidy" aggregating to Rupees 24,739.75 million during the period from July 2010 to June 2011 as taxable supplies under the Sales Tax Act, 1990 (the Act) and also taxed unexplained differences amounting to Rupees 925.29 million and raised a demand of Rupees 4,363.05 million. Being aggrieved by the order, the Company filed an appeal before the Commissioner Inland Revenue (Appeals) who upheld the order of DCIR, afterwards second appeal was filed before the Appellate Tribunal Inland Revenue (ATIR) and vide its order number STA 247/LB/2013 dated 19 December 2014 the point of unexplained income was remanded back to DCIR and matter of subsidy was upheld against which the Company filed a writ petition before Honorable Lahore High Court, Lahore on 25 May 2018 who remanded back the case to the full bench of ATIR to decide the case which is still pending for adjudication.
- (xvi) The Deputy Commissioner Inland Revenue (DCIR) passed the order vide no. 21/2016 dated 02 May 2016 thereby alleging that the Company has paid less amount of sales tax withheld of Rupees 691.82 million for tax periods July 2014, August 2014, January 2015 and April 2015 in violation of sections 3(1)(A) of the Act. Against the said order of DCIR, the Company has filed an appeal before the Commissioner Inland Revenue (Appeals) who upheld the orders of DCIR. Afterwards, second appeal was filed before the Appellate Tribunal Inland Revenue who remanded back the case to DCIR vide order dated 18 April 2018. Later Assistant Commissioner Inland Revenue issued an order on 05 May 2019 by ignoring the contentions and submissions of the Company. Being aggrieved by the order, an appeal has been filled with CIR (A) which is pending for adjudication.
- (xvii) The Deputy Commissioner Inland Revenue (DCIR) has passed the order vide no. 20/2016 dated 02 May 2016 alleging that the Company has not charged and paid sales tax on supplies to retailers amounting Rupees 22.27 million during the tax periods of July 2014 and August 2014 and has directed the Company to deposit the same along with default surcharge and penalty of Rupees 1.11 million. The Company has filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) who upheld the orders of DCIR on 27 March 2016. Being aggrieved, the Company has filed an appeal before Appellate Tribunal Inland Revenue who remanded back the case to DCIR vide order dated 18 April 2018. Later Assistant Commissioner Inland Revenue issued an order on 30 April 2019 by ignoring the the contentions and submissions of the Company. Being aggrieved by the order, appeal has been filled before CIR (A), which is pending for adjudication.
- (xviii) The Deputy Commissioner Inland Revenue (DCIR) has passed the order vide no. 09/2016 dated 15 April 2016 alleging that the Company has not charged and paid sales tax amounting to Rupees 23 million from retailers during the month of October 2015 and has directed it to deposit the same along with default surcharge and penalty of Rupees 1.160 million. Against the orders of DCIR an appeal has been filed before the Commissioner Inland Revenue (Appeals) (CIR(A)) and CIR(A) has confirmed the orders of DCIR. Being aggrieved, the Company has filed an appeal before Appellate Tribunal Inland Revenue on 02 June 2018 which is pending for adjudication.
- (xix) The Deputy Commissioner Inland Revenue (DCIR) has passed an order against the Company dated 31 March 2014 on the grounds that the Company has less paid further tax amounting to Rupees 36.8 million and extra tax of Rupees 23.5 million for the tax period from July 2013 to October 2013. Being aggrieved the Company has filed an appeal before the Commissioner Inland Revenue (Appeals) who upheld the order of DCIR vide order dated 02 May 2015. Afterwards, a second appeal was filed before Appellate Tribunal Inland Revenue on 06 June 2015 for which decision is awaited.
- (xx) The Deputy Commissioner Inland Revenue (DCIR) has passed an order vide no. 19/2016 dated 05 February 2016 on the grounds that the Company has supplied electricity to unregistered persons during the period final July 2014 to June 2015 without payment of sales tax amounting to Rupees 476 million, leviable thereon. Being aggrieved the Company has filed an appeal on 11 November 2016 before the Commissioner Inland Revenue (Appeals) who upheld the order of DCIR. Afterwards, a second appeal was filed before Appellate Tribunal Inland Revenue (ATIR). ATIR decided the case in favor of the Company vide order dated 18 April 2018 and remanded back the proceedings to the Learned DCIR / Assistant Commissioner Inland Revenue (ACIR). In second round of proceedings, Assistant Commissioner Inland Revenue (ACIR) once again issued order on 30 April 2019 by ignoring the contentions and submissions of the Company. Being aggrieved with the order an appeal has been filed before the Commissioner Inland Revenue (ACIRA) which is pending for adjudication.
- (xxi) The Deputy Commissioner Inland Revenue (DCIR) has passed an order against the Company dated 19 February 2016 on the grounds that the Company has made taxable supplies to three steel melters / rerollers but declared lesser quantity of electricity sold amounting to Rupees 199 million during the period from July 2011 to June 2015. Being aggrieved the Company has filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) who upheld the order of DCIR. Afterwards an appeal was filed before Appellate Tribunal Inland Revenue who remanded back the case to DCIR vide order dated 18 April 2018. In second round of proceedings Assistant Commissioner Inland Revenue (ACIR) once again issued orders on 02 April 2019 by ignoring the contentions and submissions of the Company. Being aggrieved with the order an appeal has been filed by the Company before the Commissioner Inland Revenue (Appeals) (CIR(A)) which is pending for adjudication.
- (xxii) The Deputy Commissioner Inland Revenue (DCIR) has passed the order vide no. Audit unit-01/Corporate Zone/TAMS-0763/2010-11/529 dated 14 December 2016 on the grounds that the Company is required to pay sales tax on various heads amounting to Rupees 10,054 million. Being aggrieved the Company has filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) on 16 January 2017 who upheld the orders of DCIR. A second appeal was filed before Appellate Tribunal Inland Revenue (ATIR) dated 18 September 2017 which has been decided in favour of the Company and remanded the case to DCIR, where it is pending for adjudication.

- (xxiii) The Deputy Commissioner Inland Revenue (DCIR) has passed the order No. 95/2017 dated 27 April 2017 on the grounds that the Company is required to pay sales tax on various heads amounting to Rupees 17,185.81 million. Being aggrieved the Company has filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) on 25 May 2017. CIR (A) has decided the case by issuing order on 23 July 2018 in favor of the Company by annulling the orders of DCIR and directed him to provide appropriate opportunity of being heard. Proceedings of the case are pending before DCIR for adjudication.
- (xxiv) The Assistant Commissioner Inland Revenue (ACIR) has passed the order vide no. 84 dated 07 April 2017 and raised a demand of sales tax amounting to Rupees 51.9 million on the grounds that the Company has failed to pay extra tax and further tax on supply of electricity to unregistered persons during the period from July 2015 to June 2016. Being aggrieved the Company has filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) on 05 May 2017. The Learned CIR(A) has issued an order dated 11 April 2018 in favor of the Company by annulling the case. Now the case is pending before ACIR.
- (XXV) The Assistant Commissioner Inland Revenue (ACIR) has passed the order on 28 August 2017 and raised a demand of sales tax amounting to Rupees 565 million on the grounds that the Company has failed to deduct the sales tax during the tax periods from July 2014 to June 2016. Being aggrieved the Company has filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) on 06 October 2017. CIR(A) has decided the case in favor of the Company vide its order dated 11 April 2018 by annulling the order of the Learned ACIR. Now the case is pending before ACIR.
- (XXVi) The Assistant Commissioner Inland Revenue (ACIR) vide its show cause notice no. 684 dated 04 December 2017 raised question of withholding of sales tax amounting to Rupees 84 million. On submissions made by the Company, the ACIR accepted the contentions of the Company to the extent of Rupees 65 million and rejected the submission of Rupees 19 million. The ACIR issued an order vide 174/2018 dated 28 February 2018 and raised demand of sales tax amounting to Rupees 19 million along with default surcharge amounting to Rupees 1.9 million. Being aggrieved, the Company has filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) on 30 March 2018. CIR(A) issued an order on 10 August 2018 in favor of the Company and annulled the order of ACIR. Now the case is pending before the Learned ACIR.
- (xxvii) The Additional Commissioner Punjab Revenue Authority has issued an order vide no. ENF-I, Unit-01, WH/112/2016-17 dated 28 November 2016 alleging that the Company has failed to withhold PRA sales tax amounting to Rupees 1,645 million from payments made on account of services acquired by the Company. Being aggrieved with the order, the Company has filed an appeal before the Commissioner (Appeals) Punjab Revenue Authority (C(A)PRA). The C(A)PRA has issued an order vide no. 27/2017 dated 14 November 2017 reducing the tax liability to Rupees 71 million along with penalty of Rupees 3.5 million. Afterwards, the Company has filed second appeal before the Appellate Tribunal Punjab Revenue Authority on 22 December 2017, the decision of which is awaited.
- (xxviii) The Assistant Commissioner Inland Revenue (ACIR) initiated proceedings through notice no. 99 dated 15 August 2018 alleging that the Company has claimed inadmissible input tax amounting to Rupees 2.8 million. By ignoring the reply and supporting documents ACIR issued order against the Company and raised demand of sales tax amounting to Rupees 2.8 million. Being aggrieved with the order of ACIR the Company filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) which is still pending.
- (xxix) The Assistant Commissioner Inland Revenue (ACIR) initiated proceedings through notice no. 151 dated 04 June 2018 alleging that the Company has claimed inadmissible input tax amounting to Rupees 33 million on purchase of cement. The ACIR issued order dated 17 August 2018 against the Company. Being aggrieved with the order of the ACIR the Company filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) which is still pending for adjudication.
- (xxx) The Assistant Commissioner Inland Revenue (ACIR) issued notice on 22 November 2018 alleging that the Company has not charged sales tax on electricity supplied to employees for free of cost. The ACIR issued order on 22 March 2019 and raised demand of sales tax amounting to Rupees 1,056.59 million. Being aggrieved with the order of the ACIR the Company filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) which is pending for adjudication.
- (xxxi) The Assistant Commissioner Inland Revenue (ACIR) issued notice on 22 November 2018 alleging that the Company has not charged sales tax on reconnection fee recovered from consumers. The ACIR issued order dated 20 March 2019 and raised demand of sales tax amounting to Rupees 9.35 million. Being aggrieved, an appeal was filed before the Commissioner Inland Revenue (Appeals) (CIR(A)) which is still pending for adjudication.
- (xxxii) The Assistant Commissioner Inland Revenue (ACIR) issued notice on 22 November 2018 alleging that the Company has not charged sales tax on Tariff Differential Subsidy (TDS). The ACIR issued an order dated 18 March 2019 and raised a demand of sales tax amounting to Rupees 4,516.7 million. Being aggrieved, an appeal was filed before the Commissioner Inland Revenue (Appeals) (CIR(A)) which is still pending for adjudication.
- (xxxiii) The Assistant Commissioner Inland Revenue (ACIR) issued notice dated 02 April 2019 alleging that the Company has filed sales tax returns after due date as prescribed in the Act. Subsequently, after year end the ACIR issued order dated 23 July 2019 against the Company and raised the demand of penalty and default surcharge amounting to Rupees 0.019 million and 5.103 million respectively. Being aggrieved, an appeal against the order has been filed on 23 August 2019, after reporting date before the Commissioner Inland Revenue (Appeals) (CIR(A)) which is still pending for adjudication.
  - Aggregate provision of Rupees 39,413.382 million relating to the above stated paragraph numbers 12.1.4(xv) to 12.1.4(xxiii) has not been recorded in the books of account of the Company on the advice of tax advisor of the Company.

# 12.2 Commitments

.

Letters of credit for capital expenditure and other than capital expenditure are of Rupees 1,153.065 million (2018: Rupees 1,809.499 million). Keeping in view the nature of Company's business, segregation of capital expenditure and other than capital expenditure is not possible at this stage.

13.2.1 The property and rights in the above assets were transferred to the Company on 01 July 1998 by WAPDA in accordance with the terms and conditions of the Business Transfer Agreement (BTA) executed between WAPDA and the Company.

13.2.2 Funiture and fixture have been included in other plant and equipment and computers have been clubbed in office equipment.

13.2.3 Title of some of freehold land has not been transferred with the name of Company. Book value of such freehold land is not available separately.

13.2.4 On 01 March 2019, the Company entered into an Authorization and Interest agreement with Power Holding (Private) Limited (PHPL) and Meezan Bank Limited (MBL), in which Company authorized PHPL to carry out "Certain Actions" in relation to Relevant Transaction Assets representing freehold land at Bahawalpur, Khanpur, Dera Ghazi Khan, Jampur, Bahawalnagar, Multan, Tounsa Shareef, Arifwala and Sahiwal having combined area of 1181 kanal and 14 marla amounting to Rupees 256,940,077. Certain Actions include selling the Relevant Transaction Assets to MBL and creating a security interest over the same for the purpose of enabling PHPL to raise financing through the Sukuk issue. In addition to this agreement, PHPL entered into an Asset Purchase Agreement with MBL for selling the Relevant Transaction Assets to MBL which include the land of the Company and of other distribution and generation companies for a total purchase price of Rupees 200,000 million against which Sukuk certificates will be issued by PHPL for a period of ten years.

**13.2.5** The cost and accumulated depreciation of office equipment, distribution equipment and vehicles have been restated along with intangible asset as given in Note 14, based on the capitalization of USAID grant received during the financial years from 2013 to 2016. This prior period error has been corrected retrospectively in these financial statements in accordance with IAS 8. Consequently as at 30 June 2017, book value of operating fixed assets, intangible asset and deferred credit have been increased by Rupees 1,123,185,541, Rupees 44,692,482 and Rupees 1,167,878,023 respectively. Moreover as at 30 June 2018, the book value of operating fixed assets, intangible asset and deferred credit have been increased by Rupees 1,055,474,127, Rupees 27,397,086 and Rupees 1,082,871,213 respectively. However there was no impact on the loss after taxation for the year ended 30 June 2018.

**20.16.1** These represent the amounts billed to the customers on behalf of the respective authorities and are receivable at year end which have been netted off against their respective payables.

# 21. TAX REFUNDS DUE FROM GOVERNMENT

| Income tax                        | 1,868,796,960  | 1,933,953,804  |
|-----------------------------------|----------------|----------------|
| Sales tax                         | 4,810,490,611  | 8,739,910,295  |
| BANK BALANCES                     | 6,679,287,571  | 10,673,864,099 |
| Current accounts                  | 29,123,711     | 162,143,395    |
| Deposit accounts (Note 22.1)      | 1,801,134,333  | 2,292,352,364  |
| Term deposit receipts (Note 22.2) | 8,627,629,754  | 7,766,242,811  |
|                                   | 10,457,887,798 | 10,220,738,570 |

22.1 Rate of profit on deposit accounts ranges from 3.75 percent to 10.25 percent (2018: 3.75 percent to 5.60 percent) per annum.

22.2 These represent term deposit receipts placed with different banks having maturity period of one to three (2018: one to three) months at profit rates ranging from 10.00 percent to 12.50 percent (2018: 4.00 percent to 6.75 percent) per annum.

# 23. SALES OF ELECTRICITY

22.

| Gross sales     | 193,456,721,670 | 163,767,589,878 |
|-----------------|-----------------|-----------------|
| Less: Sales tax | 28,109,096,311  | 23,795,290,837  |
|                 | 165,347,625,359 | 139,972,299,041 |

# 24. TARIFF DIFFERENTIAL SUBSIDY

This represents the tariff subsidy claimed from the Government of Pakistan as the difference between rates determined by NEPRA and rates charged to the consumers as notified by the Government of Pakistan from time to time.

# 25. COST OF ELECTRICITY

The Company purchased electricity from CPPA and other private power producers. The electricity purchased during the year has been accounted for according to invoices issued by CPPA and adjusted in accordance with monthly fuel price adjustment determined and notified by NEPRA.

# 29. TAXATION

# 29.1 Current

Provision for current taxation is not made due to available tax losses and brought forward tax credit for non-equity investment in plant and machinery under section 65B of Income Tax Ordinance, 2001. Reconciliation of tax expense and product of accounting profit multiplied by the applicable tax rate is not required in view of accumulated tax losses of the Company.

|     |                                             |        |        |

### 35. FINANCIAL RISK MANAGEMENT

#### 35.1 Financial risk factors

The Company's activities expose it to a variety of financial risks: market risk (including currency risk, other price risk and interest rate risk), credit risk and liquidity risk. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

Risk management is carried out by the Company's Board of Directors. The Board provides principles for overall risk management, as well as policies covering specific areas such as currency risk, other price risk, interest rate risk, credit risk, liquidity risk, investment of excess liquidity and use of non-derivative financial instruments.

#### (a) Market risk

#### (i) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Currency risk arises mainly from future commercial transactions or receivables and payables that exist due to transactions in foreign currencies.

The Company is exposed to currency risk arising from currency exposure, primarily with respect to the United States Dollar (USD). Currently, the Company's foreign exchange risk exposure is restricted to the amounts receivable from the foreign entities. The Company's exposure to currency risk was as follows:

|                                                                    | 2019     | 2018     |
|--------------------------------------------------------------------|----------|----------|
| Trade and other payables - USD                                     | (47,646) | (47,646) |
| Loans and advances - USD                                           | -        | 37,904   |
| Net exposure - USD                                                 | (47,646) | (9,742)  |
| Following significant exchange rates were applied during the year: |          |          |
| Rupees per US Dollar                                               |          |          |
| Average rate                                                       | 140.92   | 110.43   |
| Reporting date rate                                                | 160.25   | 121.60   |

#### Sensitivity analysis

If the functional currency, at reporting date, had weakened / strengthened by 5% against the USD with all other variables held constant, the impact on loss after taxation for the year would have been by Rupees 0.382 million (2018: Rupees 0.059 million) higher / lower, mainly as a result of exchange gains / losses on translation of foreign exchange denominated financial instruments. Currency risk sensitivity to foreign exchange movements has been calculated on a symmetric basis. In management's opinion, the sensitivity analysis is unrepresentative of inherent currency risk as the year end exposure does not reflect the exposure during the year.

#### (ii) Other price risk

Other price risk represents the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market. The Company is not exposed to commodity price risk.

#### (iii) Interest rate risk

This represents the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company's interest rate risk arises from long term financing, long term advances, bank balances in saving accounts and term deposit receipts. Financial instruments at variable rates expose the Company to cash flow interest rate risk. Financial instruments at fixed rate expose the Company to fair value interest rate risk.

At the reporting date the interest rate profile of the Company's interest bearing financial instruments was:

|                                  | 2019<br>RUPEES | 2018<br>RUPEES |
|----------------------------------|----------------|----------------|
| Fixed rate instruments           |                |                |
| Financial assets                 |                |                |
| Long term advances               | 118,283,221    | 115,859,422    |
| Financial liabilities            |                |                |
| Long term financing              | 14,061,123,790 | 13,506,642,449 |
| Floating rate instruments        |                |                |
| Financial assets                 |                |                |
| Bank balances - deposit accounts | 1,801,134,333  | 2,292,352,364  |
| Term deposit receipts            | 8,627,629,754  | 7,766,242,811  |

#### Fair value sensitivity analysis for fixed rate instruments

The Company does not account for any fixed rate financial assets and liabilities at fair value through profit or loss. Therefore, a change in interest rate at the reporting date would not affect profit or loss of the Company.

#### Cash flow sensitivity analysis for variable rate instruments

If interest rates, at the year end date, fluctuates by 1% higher / lower with all other variables held constant, loss after taxation for the year would have been Rupees 104.288 million (2018: Rupees 100.586 million) lower / higher, mainly as a result of higher / lower interest income on floating rate financial instruments. This analysis is prepared assuming amounts of financial instruments outstanding at reporting date were outstanding for the whole year.

#### (b) Credit risk

Credit risk represents the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was as follows:

| Trade debts        | 39,778,792,497 | 43,119,023,256 |
|--------------------|----------------|----------------|
| Loans and advances | 118,283,221    | 115,859,422    |
| Acrived interest   | 103,482,195    | 48,504,557     |
| Deposits           | 49,185         | 49,185         |
| Other receivables  | 17,104,202,164 | 13,459,491,037 |
| Bank balances      | 10,457,887,798 | 10,220,738,570 |
|                    | 67,562,697,060 | 66,963,666,027 |

The credit quality of financial assets that are neither past due nor impaired can be assessed by reference to external credit ratings (if available) or to historical information about counterparty default rate:

|                           | Rating     |                                       |       | 2019          | 2018          |

\* VIS has suspended the credit rating of the Bank till availability of updated financial information, as no financial statements have been made available by the Bank after the period ended March 2018.

\*\* PACRA has withdrawn the credit ratings of the Bank since 19 November 2012 on the request of the Bank's management as SECP has not renewed Bank's license to operate investment finance services.

\*\*\* State Bank of Pakistan has exempted the Bank from credit rating requirements till the completion of its restructuring process.

The Company's exposure to credit risk and expected credit losses related to trade debts is disclosed in Note 18.

Due to the Company's long standing business relationships with these counterparties and after giving due consideration to their strong financial standing, management does not expect non-performance by these counterparties on their obligations to the Company. Accordingly the credit risk is minimal.

#### (c) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The cash management has not yet been delegated to the Company and WAPDA disburses funds to the Company as and when needed. Following are the contractual maturities of financial liabilities, including interest payments. The amounts disclosed in the table are undiscounted cash flows.

#### Following are the contractual maturities of financial liabilities as at 30 June 2019:

|                               | Carrying amount | Contractual cash<br>flows | 6 months or less | 6-12 months | 1-3 years     | More than 3 years |
|-------------------------------|-----------------|---------------------------|------------------|-------------|---------------|-------------------|
|                               | *******         |                           | (RUI             | PEES)       |               |                   |

| Long term financing           | 13,707,273,169  | 33,405,263,917            | 4,038,587,197    | 446,647,665      | 2,517,163,124 | 26, <del>4</del> 02,765,931 |
| Long term security deposits   | 8,164,534,805   | 8,164,534,805             | -                | -                | •             | 8,164,534,805               |
| Trade and other payables      | 107,572,009,095 | 107,572,009,095           | 107,572,009,095  | -                | •             | •                           |
| Accrued mark-up               | 7,823,989,341   | 7,823,989,341             | 7,197,300,878    | -                | 626,688,463   | -                           |
|                               | 137,267,806,410 | 156,965,797,158           | 118,807,997,170  | 446,647,665      | 3,143,851,587 | 34,567,300,736              |

The contractual cash flows relating to the above financial liabilities have been determined on the basis of mark-up rates effective as at 30 June. The rates of mark-up have been disclosed in Note 5 to these financial statements.

#### (d) Capital risk management

The objective of the Company when managing capital is to safeguard its ability to continue as a going concern. The Company is not exposed to any external capital requirement. As public interest entity, financial support is available to the Company from Federal Government and WAPDA in the form of delayed settlement of CPPA against electricity purchase, tariff revision and subsidy on purchases.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                    | 146,515,710,791   | 137,267,806,410       |

# 35.3 Offsetting financial assets and financial liabilities

As on the reporting date, recognized financial instruments are not subject to offsetting as there are no enforceable master netting arrangements and similar agreements.

#### 36. RECOGNIZED FAIR VALUE MEASUREMENTS

#### Fair value hierarchy

Certain financial assets and financial liabilities are not measured at fair value if the carrying amounts are a reasonable approximation of fair value. Due to short term nature, carrying amounts of certain financial assets and financial liabilities are considered to be the same as their fair value. For the majority of the non-current receivables, the fair values are also not significantly different to their carrying amounts. Judgments and estimates are made in determining the fair values of the financial instruments that are recognized and measured at fair value in these financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Company classifies its financial instruments into following three levels. However, as at the reporting date, the Company has no such type of financial instruments which are required to be grouped into these levels. These levels are explained as under:

Level 1: The fair value of financial instruments traded in active markets (such as publicly traded derivatives, trading and equity securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the Company is the current bid price. These instruments are included in level 1.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities.

#### 37. DATE OF AUTHORIZATION

These financial statements were authorized for issue on **<u>0 5 OCT 2019</u>** by the Board of Directors of the Company.

#### 38. CORRESPONDING FIGURES

Corresponding figures have been re-arranged and re-classified for better presentation, wherever necessary, for the purpose of comparison. However, no significant re-arrangements have been made except following:

# INDEPENDENT AUDITORS' REPORT

To the members of Multan Electric Power Company Limited

Report on the Audit of the Financial Statements

# Opinion

We have audited the annexed financial statements of Multan Electric Power Company Limited ('the Company'), which comprise the statement of financial position as at 30 June 2018, and the statement of profit or loss, the statement of comprehensive income, the statement of changes in equity, the statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information, and we state that we have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of the audit.

In our opinion and to the best of our information and according to the explanations given to us, the statement of financial position, the statement of profit or loss, the statement of comprehensive income, the statement of changes in equity and the statement of cash flowstogether with the notes forming part thereof conform with the accounting and reporting standards as applicable in Pakistan and give the information required by the Companies Act, 2017 (XIX of 2017), in the manner so required and respectively give a true and fair view of the state of the Company's affairs as at 30 June 2018 and of the loss, other comprehensive loss, the changes in equity and its cash flows for the year then ended.

# **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs) as applicable in Pakistan. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants as adopted by the Institute of Chartered Accountants of Pakistan ('the Code') and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

# **Emphasis of Matter**

We draw attention to the following matters:

a) Note 12.1.2 to the financial statements, which states that the Company has not recognized the impact of debit notes issued by Central Power Purchasing Agency (Guarantee) Limited (CPPA) for supplementary charges, being the mark-up charged on

A member of Nexia International Chartered Accountants

CPPA by Independent Power Producers (IPPs) on account of delayed payments, aggregating to Rupees 12,446.89 million.

- b) Note 12.1.3 to the financial statements, interest on workers' profit participation fund amounting to Rupees 1,117.12 million was not accounted for by the Company. Moreover, workers' profit participation fund of previous years along with related interest was not paid to the workers due to pending decision of Economic Coordination Committee to exempt the corporatized entities under the umbrella of WAPDA.
- c) Note 36 to the financial statements, the Company received financial assistance from USAID under Power Distribution Improvement Program (the USAID Project) in form of tangible assets including distribution equipment, vehicles; and computing equipment; intangible assets including ERP and related software; and technical assistance in form of technical trainings and ERP technology implementation. The Company has not recognized these tangible and intangible assets.

Our opinion is not modified in respect of these matters.

# Responsibilities of Management and Board of Directors for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the accounting and reporting standards as applicable in Pakistan and the requirements of Companies Act, 2017 (XIX of 2017) and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disciosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Board of directors are responsible for overseeing the Company's financial reporting process.

# Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs as applicable in Pakistan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

74

As part of an audit in accordance with ISAs as applicable in Pakistan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

# Report on Other Legal and Regulatory Requirements

Based on our audit, we further report that in our opinion:

- a) proper books of account have been kept by the Company as required by the Companies Act, 2017 (XIX of 2017);
- b) the statement of financial position, the statement of profit or loss, the statement of comprehensive income, the statement of changes in equity and the statement of cash flows together with the notes thereon have been drawn up in conformity with

Riaz Ahmad & Company Chartered Accountants

the Companies Act, 2017 (XIX of 2017) and are in agreement with the books of account and returns;

- c) Investments made, expenditure incurred and guarantees extended during the year were for the purpose of the Company's business; and
- d) no Zakat was deductible at source under the Zakat and Ushr Ordinance, 1980 (XVIII of 1980)

# MULTAN ELECTRIC POWER COMPANY LIMITED NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2018

## 1. THE COMPANY AND ITS ACTIVITIES

Multan Electric Power Company Limited (the Company) is a public limited company incorporated in Pakistan under the repealed Companies Ordinance, 1964 (now Companies Act, 2017). The Company was established to takeover all the properties, rights, assets, obligations and liabilities of Multan Area Electricity Board ("MAEB") owned by Pakistan Water and Power Development Authority ("WAPDA") and such other assets and liabilities as agreed. The Company was incorporated on 14 May 1998 and commenced operation on 09 June 1998. Its registered office is situated at Shahrah-e-Quaid-e-Azam, WAPDA House, Lancre. The principal place of business of the Company is located at Khanewal Road, Multan, While the Company nave various 132-K7 and 66-KV grid stations along with other offices located in 13 districts of South Punjap Including Multan, Pakpattan, Sahiwal, Khanewai, Bahawalnagar, Bahawalpur, Rahim Yar Khan, Lodhran, Dera Ghazi Khan, Layyah, Muzaifargarh, Rajanpur and Venari. The principal activity of the Company is distribution and supply of electricity to public within defined approximation boundaries.

# 1.1 Summary of significant transactions and events affecting the Company's financial position and performance

Due to the applicability of Companies Act, 2017, certain disclosures of the financial statements have been presented in accordance with the fifth schedule notified by Securities and Exchange Commission of Pakistan (SECP).

1.2 National Electric Power Regulatory Authonity (NEPRA) decision determination issued vide its letter no. NEPRA/TRF-410/14412-14414 dated to September 2018, subsequent to the reporting date, has adjusted the tariff of the Company on account of Power Purchase Price (PPP), Prior Year Adjustment (PYA) and Distribution Margin (DM). According to the decision/determination of NEPRA, the adjustment of Rupees 49.170 billion will be billed to the consumers on notification by Government of Pakistan. This adjustment will enhance the sales of the Company by Rupees 49.170 billion in the next Changel year.

#### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all years presented, unless otherwise stated:

## 2.1 Basis of preparation

----

-

#### a) Statement of compliance

These financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan. The accounting and reporting standards applicable in Pakistan comprise of:

- International Financial Reporting Standards (IFRSs) issued by the International Accounting Standards Board (IASB) as notified under the Companies Act, 2017; and

- Provisions of and directives issued under the Companies Act, 2017.

Where previsions of and directives issued under the Companies Act, 2017 differ from the IFRSs, the provisions of and directives issued under the Companies Act, 2017 have been followed.

### b) Preparation of financial statements under the Companies Act, 2017

The fifth schedule to the Companies Act, 2017 became applicable to the Company for the first time for the preparation of these financial statements. The Companies Act, 2017 (including its fifth schedule) forms an integral part of the statutory financial reporting framework applicable to the Company and amongst others, prescribes the nature and content of disclosures in relation to various elements of the financial statements. Additional disclosures include but are not limited to change in threshold for identification of executives (Note 31), requirements for related parties transactions (Note 32) etc.

# c) Accounting convention

These financial statements have been prepared under the historical cost convention, except for the staff retirement benefits which are measured at present value determined annually through actuarial valuation on each reporting date.

## Critical accounting estimates and judgments

The preparation of financial statements in conformity with the approved accounting standards requires the use of certain critical accounting estimates. It also requires the management to exercise its judgment in the process of applying the Company's accounting policies. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The areas where various assumptions and estimates are significant to the Company's financial statements or where judgments were exercised in application of accounting policies are as follows:

# Useful lives, patterns of economic benefits and impairments

Estimates with respect to residual values and useful lives and pattern of flow of economic benefits are based on the analysis of the management of the Company. Further, the Company reviews the value of assets for possible impairment on annual basis. Any change in the estimates in the future might affect the carrying amount of respective item of property, plant and equipment, with a corresponding effect on the depreciation charge and impairment.

# Provision for obsolescence of stores and spare parts

The Company reviews the carrying amount of stores and spare parts on regular basis and provision for obsciesconce is made if there is any change in usage pattern and physical form of stores and spare parts.

#### Taxation

d)

P\* 4

. . .

-- **,** 

. . .

• •

In making the estimates for income tax currently payable by the Company, the management takes into account the current income tax law and the decisions of appellate authorities on certain issues in the past.

### Provision for doubtful debts

The Company reviews its receivable balances against any provision required for any doubtful balances on an ungoing basis. The provision is made while taking into consideration expected recoveries, if any.

#### Staff retirement benefits

Certain actuarial assumptions have been adopted as disclosed in Note 5 to the financial statements for determination of present value of staff retirement benefits. Any change in these assumptions in future years might affect the current and remeasurement gains and losses in those years.

# e) Implication of revised IFRS 2 'Share-based Payment'

On 14 August 2009, the Government of Pakistan (GoP) launched Benazir Employees' Stock Option Scheme ("the Scheme") for employees of certain State Owned Enterprises (SOEs), including the Company and Non-State Owned Enterprises (Non-SOEs), where the GoP holds significant investments. The Scheme is applicable to permanent and contractual employees who were in employment of these enticles on the date of launch of the Scheme, subject to completion of five years vesting period by all contractual employees and by permanent employees in certain instances.

The Scheme provides for cash payment to employees on retirement or termination based on the price of shares of respective entities. To administer the Scheme, the Government shall transfer 12 percent of its investment in such SOEs and Non-SOEs to a Trust Fund, established under a trust deed, created for the purpose by each such entity. The eligible employees are entitled to be allotted units by each Trust Fund in proportion to their respective length of service and on retirement or termination, such employees would be entitled to receive such amounts from Trust Funds in exchange for the surrendered units, as would be determined based on market price for listed entities or breakup value of non-listed entities. The shares relating to the surrendered units would be transferred back to the GoP.

The Scheme also provides that 50 percent of dividend related to shares transferred to the respective Trust Fund would be distributed amongst the unit-holding employees. The balance 50 percent dividend would be transferred by the respective Trust Fund to the Central Revolving Fund, managed by the Privatization Commission of Pakistan for payment to employees against surrendered units. The deficit, if any, in Trust Funds to meet the re-purchase commitment would be met by the Government. The Scheme, developed in compliance with the stated GoP policy of empowerment of employees of SOEs, needs to be accounted for by the covered entities, including the Company, under the provisions of amended IFRS 2. However, keeping in view the difficulties that may be faced by

the entities covered under the Scheme, the SECP, on receiving representations from some of entitles covered under the scheme and after having consulted the Institute of Chartered Accountants of Pakistan, has granted exemption vide SRO 587(I)/2011 dated 07 June 2011 to such entities from the application of IFRS 2 to the Scheme.

Amendments to published approved accounting standards that are effective in current year and are relevant to the Company

Following amendments to published approved accounting standards are mandatory for the Company's accounting periods beginning on or after 01 July 2017:

International Accounting Standard (IAS).7 (Amendments), 'Statement of Cash Flows' (effective for annual periods beginning on or after 01 January 2017). Amendments have been made to clarify that entities shall provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities. The aforesaid amendments have resulted in certain additional disclosures in the Company's financial statements.

IAS 12 (Amendments), 'Income Taxes' (effective for annual periods beginning on or after 01 January 2017). The amendments clarify that the existence of a deductible temporary difference depends solely on a comparison of the carrying amount of an asset and its tax base at the end of the reporting period, and is not affected by possible future changes in the carrying amount or expected manner of recovery of the asset. The amendments further clarify that when calculating deferred tax asset in respect of insufficient taxable temporary differences, the future taxable profit excludes tax deductions resulting from the reversal of those deductible temporary differences. The amendments have no significant impact on the Company's financial statements.

The application of the above amendments does not result in any impact on profit or loss, other comprehensive income and total comprehensive income.

# g) Amendments to published approved accounting standards that are effective in current year but not relevant to the Company

There are other amendments to published standards that are mandatory for accounting periods beginning on or after 01 July 2017 but are considered not to be relevant or do not have any significant impact on the Company's financial statements and are therefore not detailed in these financial statements.

# Standards, interpretations and amendments to published approved accounting standards that are not yet effective but relevant to the Company

Following standards, interpretations and amendments to existing standards have been published and are mandatory for the Company's accounting periods beginning on or after 01 July 2018 or later periods:

IFRS 9 'Financial Instruments' (effective for annual periods beginning on or after 01 July 2018). A finalized version of IFRS 9 which contains accounting requirements for financial instruments, replacing IAS 39 'Financial Instruments: Recognition and Measurement'. Financial assets are classified by reference to the business model within which they are held and their contractual cash flow characteristics. The 2014 version of IFRS 9 introduces a 'fair value through other comprehensive income' category for certain debt instruments. Financial liabilities are classified in a similar manner as under IAS 39, however there are differences in the requirements applying to the measurement of an entity's own credit risk. The 2014 version of IFRS 9 introduces an 'expected credit loss' model for the measurement of the impairment of financial assets, so it is no longer necessary for a credit event to have occurred before a credit loss is recognized. It introduces a new hedge accounting model that is designed to be more closely aligned with how entities undertake risk management activities when hedging financial and non-financial risk exposures. The requirements for the de-recognition of financial assets and liabilities are carried forward from IAS 39. The management of the Company is in the process of evaluating the impacts of the aforesaid standard on the Company's financial statements.

IFRS 15 'Revenue from Contracts with Customers' (effective for annual periods beginning on or after 01 July 2018). IFRS 15 provides a single, principles based five-step model to be applied to all contracts with customers. The five steps in the model are: identify the contract with the customer; identify the performance obligations in the contract; determine the transaction price; allocate the transaction price to the performance obligations. Guidance is provided on topics such as the point in which revenue is recognized, accounting for variable consideration, costs of fulfilling and obtaining a contract and various related matters. New disclosures about revenue are also introduced. The aforesaid standard is not expected to have a material impact on the Company's financial statements.

2

f)

Amendments to IFRS 9 (effective for annual periods beginning on or after 01 January 2019) clarify that for the purpose of assessing whether a payment feature meets the Solely Payments of Principal and Interest ('SPPI') condition, the party exercising the option may pay or receive reasonable compensation for the prepayment irrespective of the reason for prepayment. In other words, prepayment features with negative compensation do not automatically fail SPPI. The amendments are not likely to have significant impact on the Company's financial statements.

72

IFRS 15 (Amendments), 'Revenue from Contracts with Customers' (effective for annual periods beginning on or after 01 July 2018). Amendments clarify three aspects of the standard (identifying performance obligations, principal versus agent considerations and licensing) and to provide some transition relief for modified contracts and completed contracts. The aforesaid amendments are not expected to have a material impact on the Company's financial statements.

IAS 19 (Amendments), 'Employee Benefits' (effective for annual periods beginning on or after 01 January 2019). The amendments clarify that on amendment, curtailment or settlement of defined benefit plan, a Company now uses updated actuarial assumptions to determine its current service cost and net interest for the period; and the effect of the asset celling is disregarded when calculating the gain or less on any settlement of the plan and is dealt with separately in other comprehensive income. The application of amendments is not likely to have an impact on the Company's financial statements.

IFRIC 22 'Foreign Currency Transactions and Advance Consideration' (effective for annual periods beginning on or after 01 January 2018). IFRIC 22 clarifies which date should be used for translation when a foreign currency transaction involves payment or receipt in advance of the item it relates to. The related item is translated using the exchange rate on the date the advance foreign currency is received or paid and the prepayment or deferred income is recognized. The date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income (or part of it) would remain the date on which receipt of payment from advance consideration was recognized. If there are multiple payments or receipts in advance, the entity shall determine a date of the transaction for each payment or receipt of advance consideration. The interpretation is not expected to have a material impact on the Company's financial statements.

IFRIC 23 'Uncertainty over Income Tax Treatments' (effective for annual periods beginning on or after 01 January 2019). The interpretation addresses the determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates, when there is uncertainty over income tax treatments under IAS 12 'Income Taxes'. It specifically considers: whether tax treatments should be considered collectively; assumptions for taxation authorities' examinations; the determination of taxable profit (tax loss), tax bases, unused tax credits and tax rates; and the effect of changes in facts and circumstances. The interpretation is not expected to have a material impact on the Company's financial statements.

On 12 December 2017, IASB issued Annual Improvements to IFRS Standards: 2015-2017 Cycle, incorporating amendments to four IFRSs more specifically in IAS 12 'Income Taxes' and IAS 23 'Borrowing Costs', relevant to the Company. The amendments are effective for annual periods begging on or after 01 January 2019. The amendments have no significant impact on the Company's financial statements and have therefore not been analyzed in detail.

On 29 March 2018, the IASB issued a revised Conceptual Framework. The new Framework reintroduces the terms stewardship and prudence; Introduces a new asset definition that focuses on rights and new liability definition that is likely to be broader than the definition it replaces, but does not change the distinction between a liability and an equity instrument; removes from the asset and liability definitions references to the expected flow of economic benefits - this lowers the hurdle for identifying the existence of an asset or liability and puts more emphasis on reflecting uncertainty in measurement; discusses historical cost and current value measures, and provides some guidance on how the IASB would go about selecting a measurement basis for a particular asset or liability; states that the primary measure of financial performance is profit or loss, and that only in exceptional circumstances will the IASB use other comprehensive income and only for income or expenses that arise from a change in the current value of an asset or liability; and discusses uncertainty, denoccypticin, unit of dccuvit, unit effecting, so nothing will change in short term. The revised Framework is not an IFRS and does not override any standard, so nothing will change in short term. The revised Framework will be used in future standard-setting decisions, but no changes will be made to current IFRSs. Preparers might also use the Framework to asset them in developing accounting policies where an issue is not addressed by an IFRS. It is effective for annual periods beginning on or after 01 January 2020 for preparers that develop an accounting policy based on the Framework.

# Standards and amendments to published approved accounting standards that are not yet effective and not considered relevant to the Company

There are other standards and amendments to outlished approved accounting standards that are mandatory for accounting periods beginning on or after 01 July 2018 but are considered not to be relevant or do not have any significant impact on the Company's financial statements and are therefore not detailed in these financial statements.

#### 2.2 Foreign currencies

۰,

÷

....

.

These financial statements are presented in Pak Rupees, which is the Company's functional currency. All monetary assets and liabilities denominated in foreign currencies are translated into Pak Rupees at the rates of exchange prevailing at the reporting date, while the transactions in foreign currencies during the year are initially recorded in functional currency at the rates of exchange prevailing at the transaction date. All non-monetary items are translated into Pak Rupees at exchange rates prevailing on the date of transaction or on the date when fair values are determined. Exchange gains and icesses are recorded in the statement of profit of loss.

## 2.3 Staff retirement benefits

The Company provides funded pension scheme, an unfunded free electricity scheme and an unfunded free medical facility scheme for all its employees. Further, the Company's employees are also entitled for accumulated compensated absences which are encashed at the time of retirement upto maximum limit of 365 days. The Company's obligations under these schemes are determined annually by a qualified actuary using Projected Unit Credit Actuarial Cost Method. Latest actuarial valuations have been carried on 30 June 2018. The Company's net obligation in respect of defined benefit plans is calculated by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets. Past service cost is recognized immediately in the statement of profit or loss.

Remeasurement of the net defined benefit liability (except for compensated absences), which comprises actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset celling (if any, excluding interest), are recognised immediately in other comprehensive income. The Company determines the net interest expense on the net defined benefit liability for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability, taking into account any changes in the net defined benefit liability during the period as a result of contributions and benefits payments. Net interest expense and other expenses related to defined benefit plan is recognised in profit or loss. Remeasurement related to the compensated absences is recognized in the year or occurrence in the statement of profit or less.

# 2.3.1 General / Employees' Provident Fund

For General / Employees' Provident Fund and WAPDA Welfare Fund, the Company makes deduction from salaries of the employees and remits these amounts to the funds established by WAPDA. The provident fund related disclosure required by the Companies Act, 2017 is not shown in these financial statements as General / Employees' Provident Fund established by WAPDA includes the employees of other power distribution and generation companies and the figures related to the Company cannot be segregated from the whole General / Employees' Provident Fund.

## 2.4 Taxation

#### Current

Provision for current tax is based on the taxable income for the year determined in accordance with the prevailing law for taxation of income. The charge for current tax is calculated using prevailing tax rates or tax rates expected to apply to the profit for the year, if enacted. The charge for current tax also includes adjustments, where considered necessary, to provision for tax made in previous years arising from assessments framed during the year for such years.

## Deferred

Deferred tax is accounted for using the liability method in respect of all temporary differences arising from differences between the carrying amount of assets and ilabilities in the financial statements and the corresponding tax bases used in the computation of the taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets to the extent that it is probable that taxable profits will be available against which the deductible temporary differences, unused tax losses and tax credits can be utilized.

17 - K. 1951

Deferred tax is calculated at the rates that are expected to apply to the period when the differences reverse based on tax rates that have been enacted or substantively enacted by the reporting date. Deferred tax is charged or credited in the statement of profit or ioss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

## 2.5 Property, plant and equipment

## 2.5.1 Operating fixed assets and depreciation

## a) Cost

Operating fixed assets are stated at cost less accumulated depreciation and any identified impairment loss, except freehold land which is stated at cost less any identified impairment loss and leasehold land which is stated at cost less accumulated depreciation and any identified impairment loss. Cost of operating fixed assets consists of historical cost, borrowing cost pertaining to the erection / construction period of qualifying assets and directly attributable costs of bringing the assets to working condition for their intended use.

Subsequent costs are included in the assot's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repair and maintenance costs are charged to the statement of profit or loss during the period in which they are incurred.

# b) Depreciation

Depreciation on operating fixed assets is calculated applying the straight line method so as to write off the cost / depreciable amount of the assets over their estimated useful lives at the rates given in Note 13.2. The Company charges the depreciation on additions from the month when the asset is available for use and on deletions up to the month when the asset is de-recognized. Depreciation on operating fixed assets is charged to the statement of profit or loss except for depreciation provided on construction equipment and vehicles during the period of construction of operating fixed assets that is capitalized as part of the cost of operating fixed assets. The residual values and useful lives are reviewed by the management, at each financial year-end and adjusted if impact on depreciation is significant.

#### c) De-recognition

An item of property, plant and equipment is de-recognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset is included in the statement of profit or loss in the year the asset is de-recognized.

# 2.5.2 Capital work-in-progress

Capital work-in-progress is stated at cost less any recognized impairment loss. This includes all costs connected with specific assets incurred during installation and construction period. These are transferred to specific assets as and when these assets are available for use.

# 2.6 Stores and spare parts

Usable stores and spare parts except for items in transit are valued principally at moving average cost, while items considered obsolete are carried at nil value. Items-in-transit are stated at invoice amount plus other charges paid thereon.

# 2.7 Cash and cash equivalents

Cash and cash equivalents comprise cash in hand, cash at banks on current, saving and deposit accounts and other short term highly liquid instruments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in values.

## 2.8 Revenue recognition

Following specific recognition criteria must be met before revenue is recognized:

#### Sale of electricity

Revenue from the sale of electricity is recognized on supply of electricity to consumers at the rates determined by NEPRA and notified by the Government of Pakistan in official gazette from time to time. Late payment charges are recognized on accrual basis.

#### Tariff differential subsidy

Tariff differential subsidy on electricity announced by the Government of Pakistan for consumers is recognized under revenue on an accrual basis.

#### Rental and service income

Meter rentals are recognized on time proportion basis.

#### Interest income

Profit on bank deposits is recognized on time proportion basis taking into account the principal outstanding and rates of profits applicable thereon.

### Sale of scrap

Revenue from sale of scrap is recognized on dispatch of goods.

#### 2.9 Financial instruments

Financial instruments carried on the statement of financial position include deposits, trade debts, loans and advances, accrued interest, other receivables, cash and bank balances, long term financing, accrued mark-up and trade and other payables. Financial assets and liabilities are recognized when the Company becomes a party to the contractual provisions of instrument. Initial recognizion is made at fair value plus transaction costs direction attributable to acquisition, except for "financial instruments at fair value through profit or loss" which are initially measured at fair value.

Financial assets are de-recognized when the Company loses control of the contractual rights that comprise the financial asset. The Company loses such control if it realizes the rights to benefits specified in contract, the rights expire or the Company surrenders these rights. Financial liabilities are de-recognized when the obligation specified in the contract is discharged, cancelled or expired. Any gain or loss on subsequent measurement and derecognizion is charged to the profit or loss currently. The particular measurement methods adopted are disclosed in the individual policy statements associated with each item.

# 2.10 Deferred credit

Amounts received from consumers and Government as contributions towards the cost of extension of electricity distribution network and of providing service connections are deferred and amortized over the estimated useful lives of related assets except for accountely identifiable services in which case revenue is recognized upfront upon establishing a connection network. Amortization of deferred credit for the year is recognized as income in the statement of profit or loss.

# 2.11 Borrowings

Borrowings are recognized initially at fair value and are subsequently stated at amortized cost. Any difference between the proceeds and the recemption value is recognized in the statement of profit or loss over the period of the borrowings using the effective interest method.

#### 2.12 Borrowing cost

Interest, mark-up and other charges on long term finances are capitalized up to the date of commissioning of respective qualifying assets acquired out of the proceeds of such long term finances. All other interest, mark-up and other charges are recognized in the statement of profit or loss.

# 2.13 Trade debts

\*\*

Trade debts are carried at original billed value less an estimate of provision for doubtful debts.

Provision for doubtful debts is made as follows:

- a) No provision on Government arrears and Agency balances;
- b) Fifty percent provision on permanently disconnected consumers; and
- c) Provision on arrears from private consumers and deferred arrears at the rates approved,
The percentage rates for creating provision against doubtful debts is as follows:

| Permanently Disconnected Connections  | 50% |
|---------------------------------------|-----|
| Deferred arrears:                     |     |
| More than 1 years and up to 2 years   | 20% |
| More than 2 years and up to 3 years   | 30% |
| More than 3 years and up to 4 years   | 35% |
| More than 4 years and up to 5 years   | 40% |
| More than 5 years                     | 50% |
| Arrears:                              |     |
| More than 3 months and up to 6 months | 5%  |
| More than 6 months and up to 1 year   | 10% |
| More than 1 year and up to 2 years    | 25% |
| More than 2 years and up to 3 years   | 35% |
| More than 3 years and up to 4 years   | 50% |
| More than 4 years and up to 5 years   | 75% |

### 2.14 Loans, advances, deposits and receivables

These are recognized at cost less an estimate made for doubtful receivables based on a review of all outstanding amounts at the year end.

## 2.15 Share Capital

**5**-1

Ordinary shares are classified as share capital. Incremental costs directly attributable to the issue of new shares are shown in equity as of deduction, net of tax.

# 2.16 Trade and other payables

Liabilities for trade and other amounts payable are initially recognized at fair value, which is normally the transaction cost.

### 2.17 Impairment

### a) Financial assets

A financial asset is considered to be impaired if objective evidence indicates that one or more events had a negative effect on the estimated future cash flow of that asset.

An impairment loss in respect of a financial asset measured at amortized cost is calculated as a difference between its carrying amount and the present value of estimated future cash flows discounted at the original effective interest rate.

Individually significant financial assets are tested for impairment on an individual basis. The remaining financial assets are assessed collectively in groups that share similar credit risk characteristics.

# b) Non-financial assets

The carrying amounts of the Company's non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If such indication exists, the recoverable amount of such asset is estimated. An impairment loss is recognized wherever the carrying amount of the asset exceeds its recoverable amount. Impairment losses are recognized in the statement of profit or loss. A previously recognized impairment loss is recoverable amount is incertable amount if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of profit or loss.

### 2.18 Provisions

Provisions are recognized when the Company has a present, legal or constructive obligation as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligations and reliable estimate of the amount can be made. However provisions are reviewed at each reporting date and adjusted to reflect current best estimate.

### 2.19 Offsetting

 Financial assets and financial itabilities are set off and the net amount is reported in the financial statements when there is legal enforceable right to set off and the Company intends either to settle on a net basis or to realize the assets and to settle the liabilities simultaneously.

### 2.20 Earnings / (loss) per share

The Company presents basic and ciluted earnings / (loss) per share data for its ordinary shares. Basic earnings / (loss) per share is calculated by dividing the profit attributable to ordinary shareholders or loss for the year of the Company by the weighted average number of ordinary shares outstanding during the period. Diluted earnings / (loss) per share is determined by adjusting the profit attributable to ordinary shareholders or loss for the year and the weighted average number of ordinary shares outstanding for the effect of all dilutive potential ordinary shares.

٠.,

- 5.3 This represents re-lent portion of loan obtained by GoP from ADB for Distribution Enhancement Investment Program which is secured against the guarantee by GoP, pursuant to the re-lent agreement between GoP and the Company. Disbursements during the year of Rupees 30.495 million (2017: Rupees 41.044 million) have been transferred to the Company. This facility carries interest at the rate of 15% inclusive of reiending interest of 8.2% per annum plus exchange risk cover fee of 6.8% per annum which shall be charged both on principal amount and interest amount separately. Repayment of principal has to be made on half yearly basis within maximum period of 17 years excluding grace period of 3 years starting from June 2014. The overdue amount of principal and mark-up aggregate to Rupees 527.032 million (2017: Rupees 398.56 million) and Rupees 1,119.731 million (2017: Rupees 1,098.03 million) respectively.
- 5.4 This represents re-lent portion of loan obtained by GoP from ADB for Distribution Enhancement Investment Program which is secured against the guarantee by GoF, pursuant to the re-lent agreement between GoP and the Company. Disbursements during the year of Rupees 421.003 million (2017: Rupees 617.409 million) have been transferred to the Company. This facility carries interest at the rate of 15% inclusive of relending interest of 8.2% per annum plus exchange risk cover fee of 6.8% per annum which shall be charged both on principal amount and interest amount separately. Repayment of principal has to be made on half yearly basis within maximum period of 25 years including grace period of 5 years starting from June 2018. The overdue amount of principal and mark-up aggregate to Rupees 72.529 million (2017: Rupees Nil) and Rupees 572.174 million (2017: Rupees 541.808 million) respectively.
- 5.5 This represents re-ient portion of ican obtained by GoP from ADB for Distribution Enhancement Investment Program which is secured against the guarantee by GoP, pursuant to the re-lent agreement between GoP and the Company. Disbursements during the year of Rupees 569.508 million (2017: 1,271.303 million) have been transferred to the Company. This facility carries interest at the rate of 15% inclusive of relending interest of 8.2% per annum plus exchange risk cover fee of 6.8% per annum which shall be charged both on principal amount and Interest amount separately. Repayment of principal will be started from June 2019 and will be repaid on half yearly basis within maximum period of 25 years including grace period of 5 years.
- 5.6 This represents a loan obtained from the GoP under "Prime Minister's Southern Punjab Development Package" for construction of new grid stations and laying transmission lines. The limit of the loan facility is Rupees 1,228 million. As per instructions of the Finance Division of GoP for loan disbursements, the interest shall be chargaable at a prevailing rate of interest for respective year, which has been assessed as 17% per annum by the Company. Repayment of principal has to be made on yearly basis within maximum period of 20 years including grace period of 5 years starting from June 2015. The eventue amount of principal and mark up aggregate to Rupees 159.410 million (2017: Rupees 159.41 million) and Rupees 660.560 million (2017: Rupees 691.45 million) respectively.
- 5.7 These include Rupees 61.11 million (2017: Rupees 80.56 million) interest free loan from RYK Mills Limited under an agreement to meet expenses for grid interconnection and framework for Power Co-Generation 2013 (Bagasse/Biomass). The loan is repayable in 36 equal monthly installments commencing after 16 months of commercial operation date of the project which is 21 March 2015. The overdue amount of principal aggregate to Rupees 16.667 million (2017: Rupees Nil).
- 5.8 These include Rupees 9.47 million (2017: Rupees 17.22 million) interest free loan from JDW Sugar Mills Limited under an egreement to meet expenses for grid interconnection and framework for Power Co-Generation 2013 (Bagasse/Biomass). The loan is repayable in 36 equal monthly installments commencing after 18 months of commercial operation date of the project which is 12 June 2014. The overdue amount of principal aggregation Rupees 4.306 million (2017: Rupees 1.72 million).
- 5.9 These include two interest free loans of Runees 24.59 million (2017: Rupees 26.039 million) and Rupees 20 million (2017: Rupees 20 million) from Hamza Sugar Mills Limited under an agreement to most expension for grid interconnection and tramework for Power Co-Generation 2013 (Bagasse/Biomass). Loan No. 1 is repayable in 36 equal monthly installments commencing after 18 months of commercial operation date of the project which is 01 March 2016. The overdue amount of principal aggregate to Rupees 5.063 million (2017: Rupees Nil). Loan No. 2 is repayable in 36 equal monthly installments commencing after 36 months of commercial operation date of the project which has not yet been assessed.
- 5.10 These include Rupees 55 million (2017: Rupees 55 million) interest free loan from The That Industries Corporation Limited under an agreement to meet expenses for grid interconnection and framework for Power Co-Generation 2013 (Bagasse/Biomass). The loan is repayable in 36 equal monthly installments commencing after 18 months of commercial operation date of the project which has not yet been assessed.
- 5.11 The fair value adjustment in accordance with the requirements of IAS 39 'Financial Instruments: Recognition and Measurement' arising in respect of the loans given in Notos 5.7 to Note 5.10 is not considered material and hence not recognized.

The sensitivity analysis is based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the staff retirement benefits to significant actuarial assumptions, the same method (present value of the staff retirement benefits calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the gratuity liability recognized within the statement of financial position.

The methods and types of assumptions used in preparing the sensitivity analysis were changed as compared to the previous year due to downward trend in interest rate structure and increase in initialionary expectations.

### 6.9 Risks associated with staff retirement benefits

### Longevity risks

The risk arises when the actual lifetime of retirees is longer than expectation. This risk is measured at the plan level over the entire retiree population.

#### Salary increase risk

The most common type of retirement benefit is one where the benefit is linked with final salary. The risk arises when the actual increases are higher than expectation and impacts the liability accordingly.

### Withdrawal risk

The risk of actual withdrawals varying with the actuarial assumptions can impose a risk to the benefit obligation. The movement of the liability can go either way.

### 7. LONG TERM SECURITY DEPOSITS

These represent security deposits received from consumers on account of electricity connections. These are refundable / adjustable on disconnection of electricity supply.

| RECEIPT AGAINST DEPOSIT WORKS                            | 2018<br>RUPEES | 2017<br>RUPEES |
|----------------------------------------------------------|----------------|----------------|
| Consumers demand notices awaiting connections (Note 8.1) | 3,137,958,562  | 1,683,910,520  |
| Funds received against deposit works (Note 8.2)          | 17,341,431,416 | 15,709,951,889 |
|                                                          | 20,479,389,978 | 17,393,862,409 |

These represent amounts received from consumers through demand notices against which the related works / jobs have not been completed.

These represent amounts received directly by the Company for electrification of villages, colonies and other deposit works, mainly provided through Government funding against which the related works / jobs have not been completed.

- 10.1.1 In the financial year 2015-16, the cost of electricity was erroneously charged which was rectified by CPPA on account of credit note numbers CPPAG/CEO/2017/Taxation/1703 dated 25 March 2017 and CPPAG/CEO/2017/Taxation/26684 dated 29 June 2017, of amount aggregating to Rupees 5,511.719 million as a result of revision of sales tax returns by CPPA for periods from July 2015 to November 2015 and from December 2015 to June 2016 respectively. This prior period error has been corrected retrospectively in these financial statements in accordance with IAS 8 'Accounting Policies, Changes in Accounting Estimates and Errors'. Consequently, accumulated loss and trade and other payables have been increased by Rupees 5,511.719 million.
- 10.2 During financial year 2013-14, the Company had received Compact Fluorescent Lamps (CFLs) from Pakistan Electric. Power Company (PEPCO) under the Clean Development Mechanism (CDM) Program of activities -"National CFL Project -Pakistan". CFLs cost will have to be borne by the Company from its distribution margin.
- 10.3 The Company has not made payment of its contribution towards Workers' Profit Participation Fund (WPPF), being the Company's liability on account of provision of Companies Profit (Workers' Participation) Act, 1968 uptill 30 June 2015. This matter is pending for decision with Economic Coordination Committee (ECC) upon recommendation submitted by WAPDA to exempt the undertakings established under the umbrella of WAPDA from compliance with the requirements of Companies Profit (Workers' Participation) Act, 1968. Due to pending decision with the ECC, no provision for mark-up is made as required under Companies Profit (Workers' Participation) Act, 1968. However, the Company has shown the mark-up as contingent liability under Note 12.1.3 to the financial statements.

| 12. | CONTINGENCIES AND COMMITMENTS                                 |               | ······································ |

# 12.1 Contingencies

12.1.1 Claims amounting to Rupees 19.64 million (2017: Rupees 46.15 million) relating to disconnections, detection bills and overbillings against the Company not acknowledged as debt.

12.1.2 The Company has received various invoices from CPPA representing late payment charges (supplementary charges) being the share of the Company in the mark-up charged to CPPA by Independent Power Producers (IPPs) on account of delayed payments aggregating to Rupees 14,089.28 million (2017: Rupees 12,446.89 million).

As mentioned in Para 18 of tariff determination by NEPRA communicated through letter no. NEPRA/TRF-283/MEPCO-2014/4264-4266 dated 27 March 2015 and Para 8.10 and 20 of tariff determination by NEPRA communicated through letter no. NEPRA/TRF-332/MEPCO-2015/2697-2699 dated 29 February 2016, it was mutually agreed by the representatives of CPPA and distribution companies that, as per clause 9.3(d) of electricity supply agreement dated 29 June 1998 between DISCOs and NTDC, the DISCOs are obliged to pay late payment charges (supplementary charges) to CPPA on account of delay payments of invoices.

NEPRA has decided that the late payment charges (supplementary charges) recovered from consumers on utility bills shall be offset against the late payment charges (supplementary charges) invoices raised by CPPA and CPPA cannot account for late payment charges (supplementary charges) over and above what is calculated as per agreement. Therefore, no provision for late payment charges (supplementary charges) of Rupees 12,446.89 million have been recognized in these financial statements as the management is of the view that supplementary charges have not been allowed as expense by NEPRA in tariff determination.

12.1.3 The Companies Profit (Workers' Participation) Act, 1963 requires payment of the allocated amount to the workers profit participation fund within nine months of the close of relevant financial year. However, due to pending decision of the Economic Coordination Committee to exempt the corporatized entities under the umbrella of WAPDA from requirement of the said Act, no provision for interest aggregating to Rupees 1,117.12 million (2017: Rupees 885.16 million) or unpaid amount has been recognized by the Company in these financial statements.

## 12.1.4 Income Tax

- (i) Additional Commissioner Inland Revenue amended the deemed assessments under section 120 of the Income Tax Ordinance, 2001 (the Ordinance) by passing an order under section 122(5A) of the Ordinance on the grounds that the minimum tax liability under section 113 was not discharged. He passed the orders vide DCR No. 10/07 dated 02 February 2015 and 19/18 dated 14 April 2015 for tax years 2010 and 2013 and created a demand of Rupees 5.63 million for the Tax Year 2010 and Rupees 109.82 million for the Tax Year 2013. Being aggrieved from the impugned orders, the Company filed appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) on 05 May 2015 and the same was upheld by the Learned CIR(A). Appeal against the orders of CIR(A) has been filed with the Appellate Tribunal Inland Revenue on 19 October 2015 which is pending for adjudication.
- (ii) Inland Revenue Audit Officer issued an order on 28 April 2014 under section 161 and 205 of the Ordinance raising a demand aggregating to Rupees 307 million for tax year 2013, on grounds that the Company has made a tax deduction under section 235 of the Ordinance on sales of electricity without including sales tax. Being aggrieved, an appeal was files before Commissioner Inland Revenue (Appeals) (CIR(A)) and same was upheld by the Learned CIR (A). Second appeal was filed before Appellate Tribunal Inland Revenue who upheld the orders of CIR(A). Being aggrieved with both forums the Company filed a writ petition with the Honorable Lahore High Court, Lahore on 12 April 2018 against the said orders. Now the proceeding is pending before Honorable Lahore High Court, Lahore.
- (iii) Inland Revenue Audit Officer passed an order no. DCR 01/54 dated 12 November 2007 for the tax year 2007 under Section 161 and 205 of the Ordinance creating a demand amounting to Rupees 10.22 million as default surcharges on grounds that withholding tax was not timely deducted by the Company on payments to certain parties. Being aggrieved an appeal was filed with Commissioner Inland Revenue (Appeals) (CIR(A)) and same was upheld by the Learned CIR (A). Against the orders of Learned CIR(A), second appeal was filed before Appellate Tribunal Inland Revenue. The matter is pending for adjudication.
- (iv) Additional Commissioner Inland Revenue (ACIR) passed the orders vide 92/10 dated 26 February 2009 under Section 113 of the Ordinance and charged income tax on turnover for the tax year 2007 amounting to Rupees 153 million and for the tax year 2008 Rupees 72 million along with default surcharge of Rupees 9.9 million and Rupees 2 million respectively. Being aggrieved from the impugned orders, the Company filed an appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) and the same was upheld by the Learned CIR(A). Subsequently appeal against the orders of CIR(A) was filed with the Appellate Tribunal Inland Revenue (ATIR) or 14 May 2009 who upheld the orders of CIR (A). Being aggrieved with both forums writ petition is filed before Honorable Lahore High Court, Lahore vide petition no. PTR 43/2011 and PTR 44/2011. The Honorable Lahore High Court, Lahore remanded back the case to the full bench of ATIR, which is pending for adjudication.
- (v) Additional Commissioner Inland Revenue amended the deemed assessment under section 122(5A) of the OrdInance for the tax year 2014 vide bar code no.10000008089093 dated 12 November 2015 on ground that the minimum tax liability under section 113 was not discharged and thereby raised a demand of Rupees 1,736 million. Being aggrieved an appeal was filed with Commissioner Inland Revenue (Appeals) on 03 December 2015 who upheld the said order and subsequently another appeal has been filed with Appellate Tribunal Inland Revenue on 05 April 2016, which is pending for adjudication.

gen and the state

٦

13.63

- (vi) The Inland Revenue Audit Officer made an assessment under sections 124, 162(1) and 205 of the Ordinance vide no. 10/62 dated 24 June 2015 for Tax Year 2010, 2011 and 2012 wherein he raised demand amounting to Rupees 52.906 million treating service fee for the collection of Pakistan Television (PTV) license fees as commission rather than as service fee. In this regard, an appeal has been filed before the Learned Commissioner Inland Revenue (Appeals) on 11 August 2015 which is decided in favor of the Company vide orders dated 29 March 2016 and case was remanded back to the concerned IRAO / Assistant Commissioner Inland Revenue (ACIR) with direction to recalculate the service fee according to the agreement between WAPDA and PTV. The said appeal is pending for adjudication before the Learned ACIR.
- (vii) Additional Commissioner Inland Revenue passed the order for tax year 2015 that the Company was liable to pay Rupees 893 million being higher of minimum tax under section 113 and 113 (C) of the Ordinance. The assessment already finalized under section 120(1) of the Ordinance, therefore, being erroneous in so far as prejudicial to the interest of revenue, is amended under section 120(1) of the Ordinance. Being aggrieved from the impugned order, the Company filed appeal before the Commissioner Inland Revenue (Appeals) (CIR(A)) and same was upheld by the learned CIR(A). 14.1 Loans for house building and purchase of plot are repayable in ten years, car and motor cycle loans in five years and blcycle loans in four years. As per Company's policy, interest is charged equal to the profit rate applied on 'General Provident Fund' which is 11.70 percent (2017: 11.30 percent) per annum. The principal amount is recoverable in equal monthly installments and interest is recoverable in lump sum at the time of final settlement of loans. These loans are secured by mortgage of immovable property and hypothecation of vehicles.

#### 28. TAXATION

#### 28.1 Current

Provision for current taxation is not made due to available tax losses and brought forward tax credit for non-equity investment in plant and machinery under section 65B of Income Tax Ordinance, 2001. Reconciliation of tax expense and product of accounting profit multiplied by the applicable tax rate is not required in view of accumulated tax losses of the Company.

| Net deferred income tax asset                                          | (124,444,841,811) | (111,877,168,937) |
| Unrecognized deferred income tax asset (Note 28.3)                     | 124,444,841,811   | 111,877,168,937   |
|                                                                        | <u> </u>          |                   |

28.3 Deferred income tax asset has not been recognized in these financial statements due to uncertainty in availability of sufficient future taxable profits as these temporary differences are not likely to reverse in the foreseeable future.

28.4 Due to available tax losses, brought forward tax credit for non-equity investment in plant and machinery under section 65B of Income Tax Ordinance, 2001 (the Ordinance) and other provisions of the Ordinance, no provision for taxation was created in the financial statements of last three years. Moreover, no tax was assessed as per the income tax returns filed by the Company for the last three years.

33.1 As the Company's core business is distribution of electricity. Therefore, no emloyee is considered as factory employee.

#### 34. FINANCIAL RISK MANAGEMENT

#### 34.1 Financial risk factors

The Company's activities expose it to a variety of financial risks: market risk (including currency risk, other price risk and interest rate risk), credit risk and liquidity risk. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

Risk management is carried out by the Company's Board of Directors. The Board provides principles for overall risk management, as well as policies covering specific areas such as currency risk, other price risk, interest rate risk, credit risk, liquidity risk, investment of excess liquidity and use of non-derivative financial instruments.

### (a) Market risk

### (i) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Currency risk arises mainly from future commercial transactions or receivables and payables that exist due to transactions in foreign currencies.

The Company is exposed to currency risk arising from various currency exposures, primarily with respect to the United States Dollar (USD) and Chinese Yuan (CNY). Currently, the Company's foreign exchange risk exposure is restricted to the amounts receivable / payable from / to the foreign entities. The Company's exposure to currency risk was as follows:

|                                                                    | 2018             | 2017                |
|--------------------------------------------------------------------|------------------|---------------------|
| Trade and other payables - USD                                     | (47,646)         | (1,253,089)         |
| Loans and advances - CNY<br>Loans and advances - USD               | 37,904           | 64,465<br>281,006   |
| Net exposure - USD<br>Net exposure - CNY                           | (9,742)          | (972.083)<br>64,465 |
| Following significant exchange rates were applied during the year: |                  |                     |
| Rupees per US Dollar                                               |                  |                     |
| Average rate<br>Reporting date rate                                | 110.43<br>121.60 | 104.90<br>105.00    |
| Rupees per Chinese Yuan                                            |                  | · .                 |
| Average rate Reporting date rate                                   | 17.20<br>18,76   | 15.74<br>15.70      |
|                                                                    |                  | 38                  |

### Sensitivity analysis

If the functional currency, at reporting date, had weakened / strengthened by 5% equilat UIC UDD and CNY WID an Other Variables Allo CONSTant, the impact on loss after taxation for the year would have been by Rupees 0.059 million (2017: Rupees 5.103 million) higher / lower and Rupees Nil (2017: Ruppes 0.051 million) lower / higher respectively, mainly as a result of exchange galos / losses on translation of foreign exchange denominated financial instruments. Currency risk sensitivity to foreign exchange movements has been calculated on a symmetric basis. In management's opinion, the sensitivity analysis is unrepresentative of inherent currency risk as the year end exposure does not reflect the exposure during the year.

### (ii) Other price risk

Other price risk represents the risk that the fair value or future cash flows of a financial Instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market. The Company is not exposed to commodity price risk.

### (iii) Interest rate risk

This represents the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company's interest rate risk arises from long term financing, long term advances, bank balances in saving accounts and term deposit receipts. Financial instruments at variable rates expose the Company to cash flow interest rate risk. Financial instruments at fixed rate expose the Company to fair value interest rate risk.

At the reporting date the interest rate profile of the Company's Interest bearing financial instruments was:

| ·                                | 2018<br>RUDEES | 2017<br>RUPEES |
|----------------------------------|----------------|----------------|
| Fixed rate instruments           |                |                |
| Financial assets                 |                |                |
| Long term advances               | 115,859,422    | 108,446,504    |
| Financial (iabilities            |                |                |
| Long term financing              | 13,506,542,449 | 12,485,635,958 |
| Floating rate instruments        |                |                |
| Financial assets                 |                |                |
| Bank balances - deposit accounts | 2,292,352,364  | 1,305,498,079  |
| Term deposit receipts            | 7,756,242,811  | 7,332,000,000  |

### Fair value sensitivity analysis for fixed rate instruments

The Company does not account for any fixed rate linancial assets and liabilities at fair value through profit or loss. Therefore, a change in interest rate at the reporting date would not affect profit or loss of the Company.

### Cash flow sensitivity analysis for variable rate instruments

If interest rates, at the year end date, fluctuates by 1% higher / lower with all other variables held constant, loss after taxation for the year would have been Rupees 100.586 million (2017: Rupees 86.374 million) lower / higher, mainly as a result of higher / lower interest income on floating rate financial instruments. This analysis is prepared assuming amounts of financial instruments outstanding at reporting date were outstanding for the whole year.

### (b) Credit risk

Credit risk represents the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The encyting answers of Grandal associa representation and the maximum exposure to credit risk at the reporting date was as follows:

| Trade debts        | 39.045.856.911 | 27,545.653.037 |
|--------------------|----------------|----------------|
| Loone and advanced | 115,859,422    | 108,446,504    |
| Accrued interest   | 48,504,557     | 40,060,925     |
| Deposits           | 49,185         | 49,185         |
| Other receivables  | 13,459,491,037 | 11,235,136,233 |
| Bank balances      | 10,220,738,570 | 8,862,110,547  |
|                    | 62,890,499.682 | 47,791,456,431 |

The credit quality of financial assets that are neither past due nor impaired can be assessed by reference to external credit ratings (if available) or to historical information about counterparty default rate:

\* PACRA has withdrawn the credit ratings of the Bank since 19 November 2012 on the request of the Bank's management as SECP has not renewed Bank's license to operate investment finance services.

\*\* State Bank of Pakistan has exempted the Bank from credit rating requirements till the completion of its restructuring process.

The Company's exposure to credit risk and impairment losses related to trade debts is disclosed in Note 17.

Due to the Company's long standing business relationships with these counterparties and after diving due consideration to their strong financial standing, management does not expect non-performance by these counterparties on their obligations to the Company. Accordingly the credit risk is minimal.

### (c) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The cash management has not yet been delegated to the Company and WAPDA disburses funds to the Company as and when needed. Following are the contractual maturities of financial liabilities, including interest payments. The amounts disclosed in the table are undiscounted cash flows.

Following are the contractual maturities of financial liabilities as at 30 June 2018:

The contractual cash flows relating to the above financial liabilities have been determined on the basis of mark-up rates effective as at 30 June. The rates of mark-up have been disclosed in Note 5 to these financial statements.

### (d) Capital risk management

The objective of the Company when managing capital is to safeguard its ability to continue as a going concern. The Company is not exposed to any external capital requirement. As public interest entity financial support is available to the Company from Federal Government and WAPDA in the form of delayed settlement of CPPA against electricity purchase, tariff revision and subsidy on purchases.

As on the reporting date, recognized financial instruments are not subject to offsetting as there are no enforceable master netting arrangements and similar agreements.

### 35. RECOGNIZED FAIR VALUE MEASUREMENTS

### Fair value hierarchy

Certain financial assets and financial ilabilities are not measured at fair value if the carrying amounts are a reasonable approximation of fair value. Due to short term nature, carrying amounts of certain financial assets and financial liabilities are considered to be the same as their fair value. For the majority of the non-current receivables, the fair values are also not significantly different to their carrying amounts. Judgments and estimates are made in determining the fair values of the financial instruments that are recognized and measured at fair value in these financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Company classifies its financial instruments into following three levels. However, as at the reporting date, the Company has no such type of financial instruments which are required to be grouped into these levels. These levels are explained as under:

Level 1: The fair value of financial instruments traded in active markets (such as publicly traded derivatives, and trading and available for sale securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the Company is the current bid price. These instruments are included in level 1.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one ensures of the againtment inputs to not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities.

## 36. USAID POWER DISTRIBUTION IMPROVEMENT PROGRAM

The Company has received technical and financial assistance from Power Distribution Improvement Program ("the USAID Project") of the United States Agency for International Development (USAID) and the USAID Program concluded in September 2015, Under the USAID Project the Company received financial assistance in the form of tangible assets including distribution equipment, vehicles, computing equipment, intengible assets including tritorprise Resource Planning (ERP) and related software; and technical assistance in the form of trainings and ERP technology implementation.

The USAID Project in completed during September 2015, however the USAID Project team have not shared details of the assets transferred to the Company including technical specifications and associated monotely values. Consequently, the related template during intangible assets transferred to the Company, under the USAID Project, have not been recognized in these financial statements. Management has taken up this matter with USAID Project team and various related suppliers to identify the cost of tangible and intangible assets. Management has conducted a comprehensive exercise to reconcile the quantities provided by USAID Project team and monetary values of these assets. Management is of the view that these assets shall be capitalized within the next financial year as substantial work has been done and process of verification is in process.

MEPCO ' Khanesval Road Multur,

Distribution Company Integrated Investment Plan (DIIP) / Business Plan - MEPCO Section -I Executive Summary

# i. Introduction

1

Multan Electric Power Company (MEPCO), incorporated as a Public Limited Company, is responsible for the delivery of electricity to its customers spanning 13 districts of southern Punjab as set out in MEPCO's Distribution License number 06/DL/2002, granted by NEPRA under the NEPRA Act. On May 14, 1998, as a result of the restructuring of WAPDA's Power Wing, MEPCO assumed its official operations and is since then being headed by a Chief Executive Officer (CEO) who is in turn supported by nine Executive Directors.

MEPCO pays a power purchase price (in Rs/kWh) for the electricity it procures from the Central Power Purchasing Agency (CPPA) or from other sources on behalf of the CPPA which would include the generation and transmission charges regulated by NEPRA. The major objectives of the company include ensuring uninterrupted and stable power supply to all its customers along with state of the art customer care as well as establishing and operating reliable electricity distribution networks.

Currently, MEPCO has 15989 active employees, employed in nine directorates and is responsible for distributing electricity to approximately 6.8 million consumers. The consumer mix comprises approximately 88.8% domestic consumers (6.0 million) including residential consumers in both urban and rural areas, 8.44% commercial consumers (0.58 million) including business consumers such as markets, plazas, and offices in both urban and rural areas, 1% industrial consumers (0.06 million) consisting of large and small industrial loads, 0.007% bulk consumers (457) consisting primarily of large societal consumers like housing societies, 1.37% agricultural consumers (0.094 million) including tube wells in rural areas, 0.55% General Service (0.037) consist of Govt. Offices, Semi & Govt Hospital and educational institutions and 0.03% other consumers (1,720). The sales mix consists of 57.8% domestic, 5.51% commercial, 15.32% industrial, 1.68% bulk, 17.80% agricultural, 1.73% General Service and 0.15% other consumers

### ii. Purpose and Goal of Investment Plan

The Integrated Investment Plan entails MEPCO's vision, mission, core values, stakeholders' needs, general indicators, sales and consumer forecasts, power supply issues with limitations, human resources and organizational development, financial projections, regulatory requirements including quality of service, subsidies and legal restrictions affecting timely collection of delinquent payments, performance indices with initiatives and risk assessment and will serve as a central reference document for integrated cross-functional planning that will help MEPCO make informed decisions based on priorities.

The goal of the Investment Plan/Business Plan is to create a document which will be used by the CEO and senior managers of MEPCO to focus its activities and energies for the next five years in making MEPCO a financially viable company by improving the regulation and governance of the entity, introducing new technologies including upgrade of existing

Distribution Company Integrated Investment Plan (DIIP) / Business Plan - MEPCO

# Section -I Executive Summary

# i. Introduction

Multan Electric Power Company (MEPCO), incorporated as a Public Limited Company, is responsible for the delivery of electricity to its customers spanning 13 districts of southern Punjab as set out in MEPCO's Distribution License number 06/DL/2002, granted by NEPRA under the NEPRA Act. On May 14, 1998, as a result of the restructuring of WAPDA's Power Wing, MEPCO assumed its official operations and is since then being headed by a Chief Executive Officer (CEO) who is in turn supported by nine Executive Directors.

MEPCO pays a power purchase price (in Rs/kWh) for the electricity it procures from the Central Power Purchasing Agency (CPPA) or from other sources on behalf of the CPPA which would include the generation and transmission charges regulated by NEPRA. The major objectives of the company include ensuring uninterrupted and stable power supply to all its customers along with state of the art customer care as well as establishing and operating reliable electricity distribution networks.

Currently, MEPCO has 15989 active employees, employed in nine directorates and is responsible for distributing electricity to approximately 6.8 million consumers. The consumer mix comprises approximately 88.8% domestic consumers (6.0 million) including residential consumers in both urban and rural areas, 8.44% commercial consumers (0.58 million) including business consumers such as markets, plazas, and offices in both urban and rural areas, 1% industrial consumers (0.06 million) consisting of large and small industrial loads, 0.007% bulk consumers (457) consisting primarily of large societal consumers like housing societies, 1.37% agricultural consumers (0.094 million) including tube wells in rural areas, 0.55% General Service (0.037) consist of Govt. Offices, Semi & Govt Hospital and educational institutions and 0.03% other consumers (1,720). The sales mix consists of 57.8% domestic, 5.51% commercial, 15.32% industrial, 1.68% bulk, 17.80% agricultural, 1.73% General Service and 0.15% other consumers

# ii. Purpose and Goal of Investment Plan

The Integrated Investment Plan entails MEPCO's vision, mission, core values, stakeholders' needs, general indicators, sales and consumer forecasts, power supply issues with limitations, human resources and organizational development, financial projections, regulatory requirements including quality of service, subsidies and legal restrictions affecting timely collection of delinquent payments, performance indices with initiatives and risk assessment and will serve as a central reference document for integrated cross-functional planning that will help MEPCO make informed decisions based on priorities.

The goal of the Investment Plan/Business Plan is to create a document which will be used by the CEO and senior managers of MEPCO to focus its activities and energies for the next five years in making MEPCO a financially viable company by improving the regulation and governance of the entity, introducing new technologies including upgrade of existing

# Distribution Company Integrated Investment Plan (DIIP) / Business Plan - MEPCO

technology and machinery and improving human resources in line with best practices worldwide. This plan will also be utilized by the Strategic Planning Committee to the Board for regular monitoring, to ensure that company achieves its stated objectives.

This Investment Plan covers a five-year period from FY 2020-21 to FY 2024-25, encompassing the following areas:

- Defining the activities and resources available to MEPCO through the incorporation agreements and laws relating to it.
- Identifying projections of power demand, power resources and population served expected in the time period from 2021-2025.
- Illustrating the strategic objectives for 2021-2025, aligned with optimally achievable scenario as defined by the regulator, which designated coordinators prepared to accomplish the strategic goals in the five year timeframe of the Investment Plan.
- The best and optimally achievable scenarios to demonstrate what is required and what can be achieved keeping in view the resources constraints and realities on ground.
- Projecting the financial impact on MEPCO's bottom-line of implementing the project plans.

# iii. Major Planning Situation

4

The following challenges faced by MEPCO require integrated cross functional planning:

- Technical challenges and technological advances that require MEPCO to upgrade the network, including metering to receive and measure continuous and reliable flow of power
- Operational challenges to maintain continuous flow of reliable power to the customers and meet their expectations in demand dominated, load-shedding driven regime
- Institutional challenges faced while developing the capacity of MEPCO
- Smooth power evacuation, especially related to variable renewables being integrated in the network
- Compliance with applicable laws and regulations
- Social responsibility to conserve energy and social up-lift

# iv. Company's Investment Plan

The five year Investment Plan (FY 2021-25) is intended to be used by MEPCO managers and the Strategic Planning Committee of the Board of Directors as a reference guide to the upgradation and operations of MEPCO, taking into consideration the activities projected to occur in the next five years. Although the Investment Plan is based on a five-year window, it will be a living document and will be updated to reflect changes in requirements.

As per regulatory requirement specified in DIIP formats, two scenarios have been worked out, Best Case Scenario (if implemented, the company will achieve NEPRA standards in five years, comes with a higher cost) and Optimally Achievable Scenario (based on what company can fund, procure
## 

Distribution Company Integrated Investment Plan (DIIP) / Business Plan - MEPCO

and implement realistically, comes with less cost, but compromise on the performance). The Multi Year Tariff (MYT) of MEPCO will be based on the Achievable Scenario, and the Best Case is prepared to demonstrate the overall needs of the DISCO to meet the benchmarks specified by NEPRA in five years.

Abstract of the business plan based on the two scenarios is presented hereunder:

Under this five-year plan MEPCO will expand and rehabilitate is Transmission and Distribution (T&D) systems. Moreover, plans have been prepared to improve the financial, commercial, human resource and communications functions, including IT that supports the main T&D business. From new grid stations to AMRs for commercial improvements, initiatives have been planned to improve the overall performance of the company in an integrated manner. For details on scope please refer Section-V of this plan.

### Costs Summary:

- Total Cost (Capex+Opex) Best Case: Rs. 113,123 Million.
- Total Cost (Capex+Opex) Optimally Achievable Case: Rs. 82,921 Million.

#### Benefits Summary:

- Optimally Achievable Case:Savings of **984.5MkWh** of energy through loss reduction and smooth dispersal of power from new generation.
- Best Case Savings of **1365.6MkWh** of energy through the best implementation for loss reduction and smooth dispersal of power from new generation.

#### Loss Reduction and Collections Targets:

MEPCO will reduce the losses from 15.2% in FY2019-20 to 13.5% by FY 2024-25 by reducing the 1.7% T&D Loss in five years by implementing the best case. However, as per the funding available MEPCO will implement the achievable case thus reducing company loss from 15.2% in FY 2019-20 to 14.3% by FY 2024-25 by reducing the T&D loss by 0.9%. Moreover, MEPCO has always attained the collection efficiency of 100% that will be maintained throughout the control period.

# Section -II The Company's– Baseline

### i. General Information

。

### History

Multan Electric Power Company Ltd., MEPCO, is a Public Limited Utility Company, responsible for the distribution of electric power to the population. MEPCO was incorporated in Pakistan under the Companies Ordinance 1984, on May 14, 1998, in line with Government policy of unbundling and corporatizing Pakistan's power sector, as a result of restructuring of WAPDA's Power Wing after the enforcement of NEPRA Regulation of Generation, Transmission and Distribution of Electric Power Act (XL of 1997). MEPCO's Distribution License No. 06/DL/2002 was issued by NEPRA on April 25, 2002 for the sale of power.

### Geographic Coverage

The network facilities of Multan Area Electricity Board (MAEB) of WAPDA were transferred to MEPCO after its incorporation. MEPCO's service area comprises of 13 administrative districts of southern Punjabile. Multan, Muzaffargarh, Layyah, D.G.Khan, Rajanpur, Lodhran, Bahawalpur, R.Y.Khan, Khanewal, Sahiwal, Pakpattan, Vehari and Bahawalnagar, spanning a total service area of 1,05,505 sq.km and 6,861,110 consumers.

# Company's Structure, Human Resources and Corporate Governance

The following organogram explains the management hierarchy of MEPCO.

**新教会会会** 4444

-

Its Board of Directors, consisting often members, is responsible for overall policy making, decision making and guiding the authority. The day-to-day affairs of the company are run by its nine Executive Directors who are responsible for their respective functions, under the overall control of the Chief Executive Officer.

 Statistical & Financial Information, including Purchases and Sales of Electricity, losses, and net profit / loss depicting the company's financial health is tabulated below:

| Description             | Units | 2015-16 | 2016-17 | 2017-18 | 2018-19 | 2019-20 |

General level of Investments: MEPCO has made the following investments in different projects:

• Relationship between staff and consumers: There are total 15989 employees working in MEPCO as of FY 2019-20. The relationship between staff and consumers for the last five years is as follows:

| Description                | 2014-15   | 2015-16   | 2016-17   | 2017-18   | 2018-19   | 2019-20   |
|----------------------------|-----------|-----------|-----------|-----------|-----------|-----------|
| Customers                  | 5,116,073 | 5,374,773 | 5,701,391 | 6,072,783 | 6,485,432 | 6,861,110 |
| Employees                  | 16387     | 17445     | 17364     | 17220     | 16869     | 15989     |
| Customer/Employee<br>Ratio | 312       | 308       | 328       | 353       | 384       | 429       |

# Existing Project Design and Implementation System of DISCO

The project design and implementation system of MEPCO is based on the resource allocation (the anticipated amount of material required and obtained for the execution of the project), resource leveling (the required amount of resources to be provided at a proper time e.g, at the start of a phase, more work force and less material may be required as compared to the growth or maturity stage) and resource scheduling/loading (the amount of resources required during the specified phase of the project.

MEPCO has the required capability, personnel and expertise to implement and execute a project. It has well established, functioning departments that are capable of handling projects of similar nature and magnitude. Some of these departments are as under:

- Engineering
- Material Management
- Finance
- Commercial
- Project Management Unit

Project implementation is summarized in the form of a flow chart as below:

### Existing Operation System of DISCO

The existing administrative layout of MEPCO operation system is given below:

Each Distribution division has one revenue /customer service office. The distribution circles, divisions, customer services offices and subdivisions deal with all types of customers of the company. The Grid System Operation (GSO) circle, divisions and subdivisions take care of and maintain the power supply through 132kV and 66kV systems comprising of the transmission lines and grid stations while the Grid System Construction (GSC) executes 66kV and 132kV grid station and transmission lines works. The Metering and Testing (M&T) section takes care of the installation, maintenance and testing of energy meters of all types. The Construction Section undertakes the implementation and execution of investment programs of 11kV and LT (0.4 kV), System Augmentation Program (ELR and DOP), deposit works and village electrification.

| Description              | Circles | Divisions | Subdivisions | R.O Office |
|--------------------------|---------|-----------|--------------|------------|
| Distribution             | 9       | 38        | 181          | 38         |
| Grid System Operation    | 2       | 6         | 34           |            |
| Metering & Testing       | 2       | 9         | -            | -          |
| Construction             | 1       | 9         | 17           | -          |
| Grid System Construction | 1       | 4         | 8            |            |
| Total                    | 15      | 66        | 240          | 38         |

### ii. Power Demand and Supply

#### Daily Load Demand

The daily Load Demand with the Amount of Load Shedding and the computed Demand is provided in the Table below for the month of June 2020.

Distribution Company Integrated Investment Plan (DIIP) / Business Plan - MEPCO

## 《新教育》(中有法律》

### Secondary Transmission and Distribution Network Condition:

MEPCO has a total of 137 grid stations including 05 Nos. 66 kV Grid Stations. The details by grid stations (includes loading) is placed at **Annexure-1**. MEPCO serves over Six million customers through over a thousand of distribution feeders approximately 1626 feeders with a total length over seventy four thousand & sixty one kilometers. The total number of distribution transformer in MEPCO is over 18,4623 with over 8,970 MVA.

The total T&D losses are provided at **Annexure-2**. However, the segregate of Technical and non-technical losses is not available. The evaluation of Transmission & Transformation (T&T) Losses by third party has been completed by M/s Power Planner International. The D loss study is in process with M/s Power Planner International and is in process and will be completed in 2022 using SynerGEE and GIS.

# iii. Financial Management:

Ħ,

The accounting systems and the corresponding back-office operations of MEPCO were legacy based which were not only unable to meet the growing needs of the company but also incapable of providing timely information required for senior management to tnake effective decisions or properly monitor and control utility operations. To cope with the said issues, three modules of ERP i.e. FICO, MM & HR have been implemented in MEPCO. Now, Financial, Human Resource and Material Management data is available through SAP module.

Now, the financial transactions are entered in SAP from all cost centers of MEPCO scattered in 13 district of Punjab Province. Many financial reports are available in ERP module for decision making at management level. However, automation of pension process in MEPCO is being planned in coming years to strengthen overall financial management and increasing the system reliability. The system of inventory / material management is operative in ERP/ SAP. All record of all stores is accessible to the users/ senior management for quick decision making. The ERP material management module is also helpful in financial discipline of stores and the processes.

The Human resource is considered the most important assets of an organization. The effective human resource management is the key to success of any organization. MEPCO has implemented HR module of SAP/ ERP. Now, most of the human resource processes are being run through ERP/ SAP.

However, the SAP/ ERP module are not integrated with the billing system of MEPCO which hampers the overall efficiency of the system. The consumer data available through billing system and other data is manually integrated to a certain level which limits benefits of SAP/ ERP implementation.

The MEPCO requirement for Operating and Maintenance expenses for the Financial Year 2019-20 was Rs. 28,623 million. The brief head-wise detail is provided in the table below:

| Sr.# | Expense Head           | O&M Expense Requirement<br>(Rs. Million) |
|------|------------------------|------------------------------------------|
| 1    | Salaries and Benefits  | 21,777                                   |
| 2    | Repair and Maintenance | 1,729                                    |
| 3    | Travelling Expenses    | 952                                      |
| 4    | Vehicle Expenses       | 399                                      |
| 5    | Other Expenses         | 3,766                                    |
|      | Total                  | 28,623                                   |

## iv. HR Management

The current strength of MEPCO for the year 2020-21 is 15989 employees against sanctioned post of 24647 that make occupancy rate 65 %. Among these 509 are in the management cadre i.e Grade-17 and above, while the remining 15480 are below Grade-17

Distribution Company Integrated Investment Plan (DIIP) / Business Plan - MEPCO

MEPCO regularly conducts training and capacity building of its employees largely through self-owned training facilities (CTCs and RTCs), WAPDA Engineering Academy and WAPDA Staff College. The trainings that are mandated by WAPDA for the Officers are conducted at the Engineering Academy and Staff College while the local training centers organize around fifteen to twenty regular training programs each year for MEPCO employees.

### v. IT Directorate

IT Directorate MEPCO has been playing a pivotal role of being a catalyst for making available enterprise-wide integrated business automated infrastructure for efficient and effective decision-making. This office is responsible for providing IT related technical & infrastructure support to all MEPCO which include consumer billing and its allied reports, MEPCO web site management, support to field formations for AMR & Mobile Meter Reading and management of IT hardware infrastructure at state of the art tier 3 Data Center in Multan.

The implementation of Integrated Billing System (IBS) in all MEPCO Operational Circles from 2018 has made the communication faster as information of any kind can be generated in few hours which were the task of days in conventional COBOL billing system.

Development of online MIS website is providing continuous support to field formations for checking the status of online payment, defaulter management from Sub Division to Circle and then at MEPCO level.

Implementation of Smart Meters (AMI) infrastructure has benefitted MEPCO a lot and MEPCO has made a tremendous success in carrying our operational activities in AMI monitoring which resulted in reduction in losses and improved payment collection.

The state of the art tier 3 data center is ready to cater the needs of MEPCO IT Infrastructure. This data center is well equipped with redundant infrastructure, central repository, co-location services up to 10 Giga Network connectivity, reduced operational cost and business continuity and assurance.

Distribution Company Integrated Investment Plan (DIIP) / Business Plan - MEPCO

### vi. Commercial Management

The commercial operations of MEPCO were legacy based and did not offer much in terms of transparency, data accuracy, system efficiency and services to consumers. Therefore, there was a dire need to improve commercial procedures and bring them at par with best practices adopted by utilities worldwide. With the vision to improve the overall commercial operations MEPCO implemented an optimal fusion of activities that would be in order to revolutionize the business practices adopted by MEPCO which took its commercial operations many steps further.

The old billing system of MEPCO was characterized by manual and cumbersome processes, inadequate controls, insufficient commercial focus, limited transparency and a lack of reliable information. Therefore, CIS, which is the critical backbone of customer care and commercial operations, was implemented at all over MEPCO.

As far as meter reading process is considered, the orthodox practice was recording the reading and calculating the consumption on customer records (Kalamzu card), transferring this data to the meter reading list, obtaining approval for the compiled readings by operating personnel and then entering the reading and the consumption into the computer which was a time consuming process leaving little or no time to verify suspect readings. Therefore, data manipulation and transcription errors were common causing the entire process to be highly inefficient with poor internal controls. In response to this, MEPCO implemented the IMR initiative under which the process of meter reading was re-engineered and the role of the MIS directorate was increased to maintain registers electronically, eliminate redundancies and ensure better monitoring methods. The HHUs were implemented in two Circles of MEPCO with help of USAID PDP.MEPCO Subsequently implemented meter reading through HHUs in all operation circles. MEPCO replaced HHUs with Mobile phones with better operational efficienciesi.e, 2037 Nos., larger mega pixels, cameras with zoom and retake facilities. MEPCO has achieved Accuracy %age upto 96% by the end of June 2020 and is committed to achieve 100% accuracy level.

The following table illustrates the trend of units purchased from CPPA and subsequent billing to the consumers by MEPCO:

(Units in GWh)

| Description               | 2015-16 | 2016-17 | 2017-18 | 2018-19 | 2019-20 |
|---------------------------|---------|---------|---------|---------|---------|
| Units Received from CPPA  | 14,763  | 15951   | 19006   | 19367   | 19327   |
| Units Billed to Customers | 12,341  | 13253   | 15853   | 16310   | 16382   |
| Units Lost                | 2,423   | 2698    | 3153    | 3057    | 2945    |
| Losses (%)                | 16.4    | 16.9    | 16.6    | 15.8    | 15.2    |

The Table below gives an illustration of the billing and collection pattern of MEPCO:

Moreover, net- metering has been established in MEPCO. NET-Metering Generates low cost electricity during daytime, when power demand maximizes and MEPCO is unable to provide peak demand load and is helping in relieving MEPCO distribution system overloading, as solar power through net-metering is consumed in homes and adjoining areas. Power generation through net-metering can be rapidly financed/implemented by home owners through own resources or bank loans. It enables conservation of hydel power during daytime to provide higher dispatch of hydel power at night and is offering potential to rapidly grow MEPCO distributed power through 'net-metering' resulting in saving on power transmission cost and losses. Currently Net Metering Cell in MEPCO has achieved the 300 Nos connections target.

MEPCO has established Net Metering Cell to facilitate the application process & to submit its progress to PEPCO. Moreover, the procurement of Bidirectional Meters is under process at Manager MM (Procurement).

### vii. Internal Control

¥.

### Investment Approval

The company has adopted WAPDA procedures and PEPCO approved book of Financial Powers for processing all types of expenditures. The above documents prescribe financial and administrative powers of various offices for different type of expenditures.

The investment program is categorized into three components: Development of Power, Rehabilitation / Energy Loss Reduction and Secondary Transmission Lines and Grid Stations and now been transformed into the Distribution Integrated Investment Plan (DIIP)/ Business Plan, which also covers other functional areas plans as well.

The Planning Department under supervision of CEO and Chief Engineer and in consultation with Operation, Finance and other Directorates prepared PC-1s for DOP, ELR & STG. The PC-1s were submitted to Planning Division of GOP after approval of BOD/Authority for final approval from ECNEC and subsequently they were approved. The approved PC-1s are the basis of annual investment. At present the Development Working Party (DWP) has been formed to approve the DOP,

ELR & STG plans based on MEPCO's own resources and they are under approval process. Now DIIP will be utilized for getting regulatory approval first and then taking the desired course of approval, based on funding sources.

#### Internal Audit

7

There are three types of audits conducted in MEPCO Internal Audit, Govt. Audit and Audit by a chartered company. Each has different scope and objectives. The internal audit processes of MEPCO are governed by the legacy systems which have missed the mark to adequately identify non-compliance with existing procedures such as:

- Units consumed but consumer not billed
- Damaged or slow meters
- Inaccurate meter reading
- Units billed to nonexistent consumers
- Failure to monitor accounts with payment arrangements

Under the co-sourcing arrangement, a co-sourcing partner was hired through PDP provided assistance to MEPCO to implement a risk based audit approach as defined in the new internal audit manual for a period of one year. After a year, the performance of the audit function was evaluated and it was revealed that the internal audit function has significantly improved as the desired controls were established with in the processes. The capacity and capability of the internal audit staff was also increased.

#### viii. Legal and Contractual Framework

The primary function of MEPCO is to distribute electrical power to the residents and industries within its service area.

The important legal and regulatory documents, principal contracts, and laws under which MEPCO must operate are:

- The Companies Ordinance 1984
- MEPCO Memorandum of Association
- MEPCO Articles of Association
- Distribution License 2002
- NEPRA Performance Standard 2005
- Income Tax Ordinance 2001

The Companies Ordinance of 1984 encompasses all the rules and regulations for businesses registered with Security Exchange Commission of Pakistan (SECP). The Ordinance provides legal protection to the businesses, with the SECP keeping a close check on financial and corporate entities to ensure the stakeholders' interest. According to the Ordinance, MEPCO has to follow the Memorandum of Association and Articles of Association.

#### 

# Distribution Company Integrated Investment Plan (DIIP) / Business Plan - MEPCO

According to its Memorandum of Association, in May 1998, MEPCO was incorporated as a Limited Liability Company with the right to acquire properties and grid stations of WAPDA with the sole purpose of carrying on and expanding the business and supplying electricity to the areas formerly supplied by the Multan Area Electricity Board (AEB). Similarly, the Companies Ordnance of 1984 provides a framework of rules and regulations to MEPCO, known as its Articles of Association, which cause MEPCO to be classified as a Public Limited business and therefore subject to the laws which apply to such corporations.

In April 2002, NEPRA granted a distribution license to MEPCO as per section 21 of the Regulation of Generation, Transmission and Distribution of Electric Power Act, 1997. According to it, MEPCO can engage in distribution services and make sales of power to consumers in the Service Territory and the Concession Territory subject to and in accordance with the terms and conditions of the license.

NEPRA also prescribes separate performance standards for generation, transmission and distribution of safe, efficient and reliable electric power to all the consumers.

Additionally, the taxation system is defined by the Income Tax Ordinance of 2001. Like all DISCOs, MEPCO has to comply with this Ordinance and file the following returns:

- Annual income tax return
- Monthly sales tax return
- Statement of deductions and calculations
- Monthly withholding tax
- Quarterly advance tax

The following deductions are made by MEPCO and are duly submitted to the Government of Pakistan:

• Sales tax

- int

- Withholding tax on sales tax
- Withholding tax on goods
- Withholding tax on sales

# Section -III Forecasts for Next Five Years

Through Power Market Survey (PMS), MEPCO prepares the forecast ten years. The actual Statistics for the Year 2019-20 are provided. The forecasts for the period of FY 2020-21 to FY 2024-25 are tabulated in this section. Additionally, the generation plan is prepared centrally by NTDC that is also attached.

| Category/<br>Year | Domestic | Commercial | Small<br>Industry | Industrial | Bulk | T/<br>Well | Public<br>Light | Others | Total   |
|-------------------|----------|------------|-------------------|------------|------|------------|-----------------|--------|---------|

| Growth %  | 4.6  | 2.4  | 5.8  | 5.3  | 5.2  |

### iii. Generation Forecast and Power Acquisition Program

Apart from aggressive generation additional plan out-side MEPCO's territory, widespread variable renewable generation (Solar Power) influx in is also planned in MEPCO's territory, along with coal based conventional power plants coming on bar in next five years. Quaid-e Azam Solar Park, Sahiwal Coal Power plant have been implemented in MEPCO's territory. Please see **Annexure-3** for generation plan recently finalized by NTDC.

### iv. Analysis

As depicted above, the power demand of the customers is growing rapidly, and extensive generation is being added. With overloaded transmission and distribution system, if proper plan like DIIP is not approved, implemented, monitored and closed in-time, then the customers will not get relieve and the whole generation investments can go down the drain.

# Section -IV Next Five Years Goals and Objectives

### i. Goals and Objectives Matrix

The goals are long term targets and objectives are medium term targets. The objectives defined by MEPCO are SMART i.e. Specific, Measurable, Attainable, Realistic and Timely. The target setting has been done keeping in view what can be <u>achieved optimally</u> in next five years. Table below (DIIP4) lists the goals and objectives for next five years for the company, are prepared by extensive discussions and coordination within MEPCO and the signed-off goals and objectives from initial exercise are placed at Annexure-4:

| Strategic                                | Strategic Objectives                                                               | Target                 | Measurement   | Five Year Objectives FY 2020-21 to 2024-25 |          |          |          |                                | uring<br>m       |

In the above table the goals for MEPCO are divided into five major categories (i) Improve operational efficiency (this includes technical (transmission and distribution systems operational efficiency<sup>1</sup>), financial, commercial, human resource, employee safety etc. (ii) Customers Services and Care, (iii) Improve DISCOs Infrastructure (with only top priority projects under the four heads defined that need highest of attention).

<sup>&</sup>lt;sup>1</sup> NEPRA Performance Standards (Distribution) Rules, 2005 and Distribution Codes were consulted while preparing these objectives.

# ii. Rationale for Setting Goals and Objectives and the Planning Criteria for Proposed Investments

The goals and objectives that have been narrated under DIIP-4 were prepared after extensive discussions and coordination efforts within MEPCO. These are the targets that MEPCO has set and the projects / initiatives have been identified to meet these set targets. The resources requirements for the best case were far more than the capacity of MEPCO to fund and execute. Initiatives have been identified and prioritized under the optimally achievable scenario keeping in view, the following factors:

- a. The reliable dispersal of power, especially the power that will be injected within MEPCO in next five years, including the variable renewables.
- b. MEPCO can arrange funding only up to Rs. 82,921 Millionas required under the achievable scenario and not Rs. 113,123 Millionas required under best case.
- c. Capacity to procure and execute is another constraint that has limited MEPCO's capability to implement the achievable scope, not the larger scope envisaged under best scenario developed.
- d. Meeting the technical parameters specified in the Grid Code, Distribution code performance standards and consumer service manual.
- e. Loss reduction from 15.2% in FY 2019-20to 14.3% in FY2024-25, the loss improvement potential saturates as the losses are further decreased and improving/maintaining collections.
- f. Improving internal controls, faster information availability and quality of data through backoffice automation.
- g. Improving the competencies of the employees and their morale, through training capacity building and incentives.
- h. Improving corporate brand image by improving internal and external communications.
- i. Safety of line-staff is a key part of DIIP, includes special focus on LM safety.
- j. Return on investment is also considered while planning and prioritizing the interventions.
- k. Other objectives (social uplift e.g. village electrification) are part of the plan as well.

# Section -V

# Projects and Programs – Scope

### A. Secondary Transmission System

Ì.

This section covers scope for the expansion and rehabilitation of secondary transmission network (132 kV and or 66 kV) of MEPCO.

MEPCO has prepared plan for five years from 2020-21 to 2024-25 that if implemented would have completely revamped the transmission network and enabled the DISCOs to achieve the NEPRA's specified Performance Standards of Distribution and provision of the Distribution Code, especially the Distribution Planning Code issued by NEPRA.

After reviewing the existing MEPCO system, the scope of work comprising of new 132kV grid stations & transmission lines, rehabilitation, augmentation / extension at existing grid stations and conversion of existing 66kV grid stations into 132kV voltage level has been finalized by considering the anticipated future load demand in the various areas of MEPCO.

The proposed sub Transmission Lines and Grid Stations works for DISCO also includes the scope for "Deposit Work" and these works are separately identified in the formats below:

### Load Flow Studies for Five Year Plan

This section covers the load low flow peak-cases for of the five years (FY 2020-21 to 2024-25). The assumptions and results of these studies are discussed under this section and detailed plots are referred in the Annexures. Special situation, for instance, integration with Solar Power (large induction) over a specified period in MEPCO has been paid special attention in the studies.

As per NEPRA's guidelines provided in the DIIP formats, MEPCO has prepared the case that if implemented will completely revamp the transmission network and enable the DISCOs to achieve the NEPRA's specified Performance Standards Distribution and provision of the Distribution Code, especially the Distribution Planning Code issued by NEPRA.

The other objectives of the studies are identification of any reinforcements required with the proposed sub-projects in terms of new lines, new substations, transformer addition/augmentation, reactive power compensation and switchgear addition/replacement at the substations, in addition to the already planned/under execution projects in MEPCO. The benefits of the proposed sub-projects to the network of MEPCO have also been determined through system studies and are discussed below.

Existing STG network of MEPCO is under great stress & its loading position is increasing day by day due to increase in power demand. The perpetuity of hidden load growth by the consumers is compelling the company to go for repeated progression in rehabilitating / upgradation of the existing STG system. For this, construction of new grid station and transmission system along-with rehabilitation & re-modeling of existing network is urgently required, to meet the transmission system efficiency and stability to evacuate power from SPP's and deliver adequately & quality power to various existing & upcoming customers.

## Methodology of Analysis - Load Flow Studies

The methodology of system studies/analysis for these cases is given as under:

i. Under this DIIP, MEPCO's network expansion plan including already planned/underexecution projects have been included.

Sec. 1

- ii. The proposed sub-projects to be implemented have been identified through load flow studies and identified separately.
- iii. The complete system model of the National Grid has been simulated, i.e., system network of not only the MEPCO but also of NTDC and the neighboring DISCOs have been simulated for the purpose of analysis.
- iv. The assumptions on which the system studies are based have been mentioned with necessary details below.
- v. Two type of analysis, i.e., load flow and short circuit, have been carried out and their results have been presented in the report.
- vi. Load flow analysis has been carried out for the steady state normal system operating condition in order to:
  - Assess adequacy of the network to feed the proposed sub- projects.
  - Determine any additional transmission reinforcement and/or reactive compensation requirement for the scope of work of sub-projects.
  - Justification of proposed projects.
  - Determine the benefits of the above proposed works at substations and transmission lines in terms of reduction in transmission losses, improvement in voltage profile, reduction in loading of transmission lines or transformers, spare capacity margin in the transmission system.
- vii. Conclusions and recommendations on the basis of technical analysis have been presented at the end.

#### Assumptions – Load Flow Studies

The load flow studies are based on the following assumptions:

- i. Latest PMS load forecast, attached as Annexure-5. The diversified values of the peak projected loads on substations, existing and new, have been modeled as per latest PMS load forecast. The loads have been adjusted as per the ratio between MEPCO Peak including load shedding and the algebraic sum of recorded individual peaks of the substations of MEPCO. This diversified peak is modeled in the load flow cases for FY 2020-21 to FY 2024-25 that helps in identifying scope for transmission lines.
- ii. The scope of substation is derived from their individual undiversified peaks separately in excel based models. This scope identified is then modeled in the load flow cases.

- iii. Generation expansion plan utilized in the load flow studies is attached with document. All the existing as well as the proposed power plants, both in public and private sectors have been assumed in operation in all the study scenarios as per their expected commissioning schedules
- iv. The transmission expansion plans of NTDC.
- v. Latest MEPCO's planned/on-going transmission expansion/re-enforcement projects, including substations (extension, augmentation, conversion, new), transmission lines have also been simulated in the studies as per their expected commissioning schedules
- vi. The existing and planned shunt capacitors at 11 kV and 132 kV have been modeled in the study scenarios. However, additional shunt capacitors have also been recommended to compensate the reactive power where net power factor at the substations have been found too low.

### Study Criteria- Load Flow Studies

The load flow studies have been carried out keeping in view the following criteria in the MEPCO's network:

- Voltage Limits: ±5% under normal operating conditions.
- Loading of transmission lines and transformers have been kept within 100% of their capacities under normal operating conditions.
- N-1 contingency analysis has been carried out and additional scope to meet that criteria is also simulated.

#### **Results of Load Flow Studies**

Load flow studies have been carried out with already planned/on-going projects; and with & without proposed subprojects in 5 year plan to study their impact on the system network. The system scenarios of peak load conditions of years 2021 to 2025 have been simulated.

The year wise Single line diagram of the system showing voltage profile and MW/MVAR flows are **Annexure-6** for five year (FY 2020-21 to FY 2024-25)

#### i. Year Wise Voltage Profile

It is evident from the study exhibits that voltage profile will improve and becomes within permissible limits. The detail of proposed rehabilitation and there effects is show in the single line diagram (Annexure-7).

ii. Year Wise Loading Position - For Grids refer to the Excel Sheet and for T/Lines refer to plots of Load Flow

Load flow studies have also been carried out for both Best and optimally achievable system scenario with the proposed rehabilitation in form of Conversions, 132 kV Capacitors and New transmission Lines and year wise Grid Stations and Transmission lines are attached (Annexure-8)

| T.      | MW   | Units (MKWh) |
|---------|------|--------------|
| Year    | Best | Best         |
| 2020-21 | 52.5 | 199          |
| 2021-22 | 30.2 | 114          |
| 2022-23 | 9.7  | 37           |
| 2023-24 | 7.5  | 28           |
| 2024-25 | 4.7  | 18           |

## iii. Reduction In Losses (Best Case)

Ś

# iv. Reduction In Losses (Achievable Case)

| Veet    | MW         | Units (MKWh) |
|---------|------------|--------------|
| Icar    | Achievable | Achievable   |
| 2020-21 | 30         | 113          |
| 2021-22 | 33.6       | 127          |
| 2022-23 | 20.0       | 76           |
| 2023-24 | 5.6        | 21           |
| 2024-25 | 9.4        | 36           |

## Expansion and Rehabilitation (Best Case) - Scope

The scope of Work for the Five Year Plan is tabulated here under:

# DIIP 4 - Transmission Lines: New Lines& Reconductoring

### B. Plan for Expansion and Rehabilitation Distribution System - Scope

Under this section, the Expansion and Rehabilitation (two scenarios Best and Optimally Achievable) are presented and the Status of Study Based Distribution System Planning Based on GIS Mapping and the Rollout Plans are also discussed.

This section covers the expansion and rehabilitation of distribution network (11kV and below) of the distribution company. Please refer to **Annexure-9** for list of overloaded 11-kv feeders to be rehabilitated in next five years.

MEPCO has prepared two Scenarios and the related scope. Scenario-1 (the Best Case), that if implemented will completely revamp the distribution network and enable the DISCOs to achieve the NEPRA's specified Performance Standards for Distribution and the provisions of the Distribution Code, especially the Distribution Planning Code issued by NEPRA.

MEPCO has also prepared a **Scenario-2** (the Optimally Achievable Case) based on its procurement and execution capacity and will make the MYT rate case based on this scenario.

he proposed distribution works for MEPO also includes the scope for "Deposit Works" and "Village Electrification Works" and these works are separately identified in the formats below.

The ABC Cable proposals have also been implemented in MEPCO for the past five years and more proposals will be executed in future.

Below is the overall synopsis - HT/LT ratios of distribution system and length per feeder of 11kV linescomparison:

### Existing HT/LT Ratios and length per feeder of 11 kV lines:

- Existing HT to LT Ratio = 1.56: 1
- Existing average length of 11-KV feeder = 49.65 Km

After completion of Best Case of the 5 year plan (DIIP), the above parameters will be as under:

| • | HT to LT Ratio | = | 1.65 : 1 |
|---|----------------|---|----------|
|   |                |   |          |

• Average length of 11-KV feeder = 38.82 Km

After completion of Optimally Achievable Case of the 5 year plan (DIIP), the above parameters will be as under:

| • | HT to LT Ratio                 | = | 1.60 : 1 |
|---|--------------------------------|---|----------|
| • | Average length of 11-KV feeder | = | 42.33 Km |

Due to increased HT/LT ratio and decrease in HT average length per feeder, the technical loss of the distribution system will be decreased. This will further result in reduction of system outages making it more efficient and reliable.

# Expansion and Rehabilitation (Best Case)

ß

The table DIIP 14 captures the complete scope under Best Case for distribution system:

### The narrative, assumptions and details is hereunder:

### Village Electrification:

- The estimation of scope of work in next five years is based on the historical data of the financial years 2015-16 to 2019-20
- The 25 KVA transformers are considered as 50 %, 50 KVA transformers are considered as 40 % and 100 KVA transformers are considered as 10 % of the total transformers
- HT conductor percentage is assumed as 30 % 'Dog' and 70 % 'Rabbit'
- LT conductor assumed to be 'Ant'

### Dedicated 11-kv Feeders:

- The estimation of scope of work in next five years is based on the historical data of the financial years 2015-16 to 2019-20
- HT conductor percentage is assumed as 50 % 'Osprey', 40 % 'Dog' and 10 % 'Rabbit'
- LT conductor percentage is assumed as 60 % 'Wasp' and 40 % 'Ant'
- 1000 KVA transformers are considered as 4 %, 750 KVA transformers are considered as 3%, 630 KVA transformers are considered as 7 %, 400 KVA transformers are considered as 6 %, 200 KVA transformers are considered as 34 % and 100 KVA transformers are considered as 46 % of the total Transformers.

710 Nos.

### 1.1 Methodology:

In best case program, rehabilitation of 710-No. 11-KV feeders has been proposed including connectivity proposals against new proposed Grid stations. Moreover, 4565-No. LT- Proposals have been identified for rehabilitation in next five years.

The rehabilitation material and equipment has been determined as follows:

#### New 11 KV Switchgear

Panels for express feeders to be built for Shifting/bifurcation of existing 710 Nos. feeders approximately 852 Nos. will be needed as in some proposals 02 Nos. feeders are being proposed to maintain the NEPRA limits.

### ACSR Conductors for new express line construction

It is estimated that 710 feeders will require construction of express lines for their bifurcation. On the basis on sample studies, 8.66 km of 3-phase HT line will be constructed per feeder. The overall share of different ACSR conductors in the total of 710 x 8.66 = 6149 km of lines is calculated as below:

| <u>KM Line</u> |            |               |         |               |
|----------------|------------|---------------|---------|---------------|
| Osprey         | 67.55%     | 6149 x 0.6755 | 4154 K  | Îm            |
| Dog            | 22.84%6149 | x 0.2284      | 1404 Km |               |
| Rabbit         | 09.61%     | 6149 x 0.0961 |         | <u>591 Km</u> |
|                |            |               | Total   | 6149 Km       |

### 11 kV Line Re-conductoring

Estimated re-conductoring per feeder based on sample studies = 5.60 km Estimated % share of different Conductors in re-conductoring,

| Osprey                               | 51.46% |  |  |  |  |
|--------------------------------------|--------|--|--|--|--|
| Dog                                  | 40.73% |  |  |  |  |
| Rabbit                               | 07.80% |  |  |  |  |
| Number of feeders for rehabilitation |        |  |  |  |  |

Therefore, total re-conductoring length (710 x 5.60) 3976 Km

The quantities of ACSR conductors required for re-conductoring are therefore:

KM Line

| Osprey | 51.42%39 | 76 x 0.5142   | 2044       | KM        |    |
|--------|----------|---------------|------------|-----------|----|
| Dog    | 40.70%   | 3976 x 0.4070 |            | 1618      | KM |
| Rabbit | 07.88%39 | 76 x 0.0788   | <u>314</u> | <u>KM</u> |    |
|        |          |               | Total      | 3976 ŀ    | (M |

### Capacitor Applications for Power Factor Improvement

The sample studies indicate that at an average, two or three capacitor banks of 450 kVAR are needed per feeder for improving the power factor to 95% from existing average power factor of 85% on the selected feeders. For 710 No. 11 kV feeders, requirement of capacitor banks of 450 kVAR each will, therefore, be 1775 Nos.

35543 Nos.

### Earthing

Estimation of quantities for replacement of earthing on existing transformers is worked out as follows: Total transformers up to June 2019-20 177,716 Nos.

Replacement of earthing is estimated on 20% of transformers,

Therefore total earthing required (177716 x 20%)

#### 11 KV Sectionalizers

In order to achieve isolation of faulty portions of feeders under fault conditions, sectionalization equipment is needed. A minimum of 3 sectionalizers per feeder are recommended for new locations as well as for replacement of damaged sectionalizers. The quantity is worked out as follows:

| 11 kV Sectionalizers required per feeder               | 3 Nos.       |
|--------------------------------------------------------|--------------|
| Total number of 11 kV sectionalizers required (3 x 710 | )) 2130 Nos. |
| Share                                                  |              |
| Sectionalizers 600 Amps 30 %                           | 639 Nos.     |
| Sectionalizers 200 Amps 70 % 1                         | 491 Nos.     |

### 11 KV Cables

11 KV cable is required for connecting the proposed new feeders as well as for adding/replacing the under-size/deteriorated cable. The quantity is worked out on the basis that an average length of 300 meters of 500 MCM cable is required for each feeder from the panel in the grid station to the first riser pole of the feeder. In case of Bifurcation there can be 2 proposed feeders in some of the cases and in the rest there would be one proposed feeder from the new one so it would be calculated as:

| Feeders involved after bifurcation and r | ehabi | litation |         | 852 Nos. |
|------------------------------------------|-------|----------|---------|----------|
| Average length of S/C cable per feeder   |       |          |         | 300 M    |
| Therefore length of cable required       |       | 0.3 2    | x 852 = | 256 KM   |

#### New LT Lines

Based on the estimation of the previously executed LT Proposals, it has been found out that New Ant Line of approximately 0.46 km is being utilized per proposal on an average. Based on this estimation, the LT line conductor for a total of 3406 LT Proposals is calculated as follows:

Total LT line required:  $0.46 \ge 4565 = 2100 \text{ Km}$ These LT Lines will be utilized on the New Transformer Substations being used in the LT Proposals

#### LT Line Reconductoring

The average LT line reconductoring per LT rehabilitation proposal is estimated as:

3-φ, Wasp conductor line per proposal 0.173 km

The same average has been applied to evaluate the LT conductor quantities which are as under: Total number of LT proposals for Reconductoring 4565 Nos.

LT line Reconductoring  $(3-\varphi, Wasp)$ 

4565 x 0.173

790 km

### ABC Cable

X

Proposed replacement of 699 KM bare conductor with ABC cable for high loss feeders especially in Kunda infested areas within the city as well as rural where higher rate of pilferage of electricity and it provide higher safety and reliability of the system.

| ABC Cable of 95 $mm^2 =$ | 477 Km |
|--------------------------|--------|
| ABC Cable of 50 $mm^2 =$ | 222 Km |

### New 11 KV Line

| Total number of LT proposals                           | 4565 N      | os.    |
|--------------------------------------------------------|-------------|--------|
| Average length of 11 kV line extension per LT proposal | 0.11        | KM     |
| Total length of new 11 kV line (Rabbit conductor)      | 4565 x 0.11 | 502 KM |

## D-fuse fittings (Drop-out Cut-outs)

Replacement of D-fuse fittings (drop-out cut-outs) is estimated as 14 % of the total number of transformers. The total quantity of D-fuse fittings is therefore worked out as follows:

| Total transformers up to June 2019-20 | 177,716 Nos. |
|---------------------------------------|--------------|
| Total D-fuse fittings required @ 14%  | 24,880 Nos.  |

### New Transformer Sub-Stations

These will be required for installation after extension of HT lines to minimize the high loss LT lines or to install under the existing HT line to take up additional loads. The quantity is estimated as 90% of the LT Proposals.

| Total LT Proposals        |                     |                    | 4565 N | OS.       |
|---------------------------|---------------------|--------------------|--------|-----------|
| New additional transforme | er sub-stations rec | quired: 4565 x 90% | =      | 4109 Nos. |

#### Share of Different Ratings of Transformers

| and the state of the |      |             |                 |
|----------------------|------|-------------|-----------------|
| 25 kVA               | 12 % | 4109 x 12 % | 502 Nos.        |
| 50 kVA               | 31 % | 4109 x 31 % | 1233 Nos.       |
| 100 kVA              | 45 % | 4109 x 45 % | 1872 Nos.       |
| 200 kVA              | 12 % | 4109 x 12 % | <u>502 Nos.</u> |
|                      |      | Total:      | 4109 Nos.       |

## **Energy Meters**

The requirement of energy meters for replacement against damaged/defective meters is estimated as follows:

સ્ટાહ અલેસ્થ

| 1-phase defective/damaged energy meters | upto 2019-20 = | 315825      | Nos. |
|-----------------------------------------|----------------|-------------|------|
| 3-phase defective/damaged energy meters | upto 2019-20 = | <u>8362</u> | Nos. |
|                                         | Total          | 324187      | Nos  |

Sector 1.

324187 Nos.

43 | Page

Therefore, requirement of total no. of energy meters for the further 5 years will be increased by 1% each year.

### P.G. Connectors

The requirement of P.G. Connectors has been estimated as follows:

| Total customers of MEPCO upto 2024-25              | 8347833Nos.    |                |
|----------------------------------------------------|----------------|----------------|
| Estimated customers requiring P.G. Connectors (50% | % Approx.)     | 4,173,916 Nos. |
| Share                                              |                |                |
| 1-phase services requiring connectors (80%)        | 3,339,1        | .32 Nos.       |
| 3-phase services requiring connectors (20%)        | 834784         | <u>I Nos.</u>  |
|                                                    | Total: 4,173,9 | 916 Nos.       |

## Profession of the state

Distribution Company Integrated Investment Plan (DIIP) / Business Plan - MEPCO

### 1.2 Methodology:

In Optimally achievable case program, rehabilitation of 422-No. 11-KV feeders has been proposed including connectivity proposals against new proposed Grid stations. Moreover, 3406-No. LT- Proposals have been identified for rehabilitation in next five years.

The rehabilitation material and equipment has been determined as follows:

### New 11 KV Switchgear

Panels for express feeders to be built for Shifting/bifurcation of existing 422 Nos. feeders approximately 506 Nos. will be needed as in some proposals 02 Nos. feeders are being proposed to maintain the NEPRA limits.

### ACSR Conductors for new express line construction

It is estimated that 422 feeders will require construction of express lines for their bifurcation. On the basis on sample studies, 8.66 km of 3-phase HT line will be constructed per feeder. The overall share of different ACSR conductors in the total of 422 x 8.66 = 3655 km of lines is calculated as below:

KM Line

| Osprey | 67.55% 3655 x 0.6755 | 2464 Km         |
|--------|----------------------|-----------------|
| Dog    | 22.84%3655 x 0.2284  | 831 Km          |
| Rabbit | 09.61% 3655 x 0.0961 | . <u>359 Km</u> |
|        |                      | Total 3655 Km   |

#### 11 kV Line Re-conductoring

Estimated re-conductoring per feeder based on sample studies = 5.60 km Estimated % share of different Conductors in re-conductoring,

| · ·     | Osprey             | 51.46%      |          |
|---------|--------------------|-------------|----------|
| · · · · | Dog                | 40.73%      | <b>1</b> |
|         | Rabbit             | 07.80%      |          |
| Number  | of feeders for reh | abilitation | 422 No   |

Therefore, total re-conductoring length (422 x 5.60) 2363 Km

KM

KM

KM

| <u>KM Line</u> |           |               |      |            |
|----------------|-----------|---------------|------|------------|
| Osprey         | 51.42%230 | 53 x 0.5142   | 1169 | KM         |
| Dog            | 40.70%    | 2363 x 0.4070 |      | 924        |
| Rabbit         | 07.88%    | 2363 x 0.0788 |      | <u>270</u> |
|                |           |               | Tota | al 2363    |

The quantities of ACSR conductors required for re-conductoring are therefore:

#### Capacitor Applications for Power Factor Improvement

The sample studies indicate that at an average, two or three capacitor banks of 450 kVAR are needed per feeder for improving the power factor to 95% from existing average power factor of 85% on the selected feeders. For 422 No. 11 kV feeders, requirement of capacitor banks of 450 kVAR each will, therefore, be 1055 Nos.

### Earthing

Estimation of quantities for replacement of earthing on existing transformers is worked out as follows:

Total transformers up to June 2019-20177,716 Nos.Replacement of earthing is estimated on 20% of transformers,35543 Nos.Therefore total earthing required(177716 x 20%)35543 Nos.

### 11 KV Sectionalizers

In order to achieve isolation of faulty portions of feeders under fault conditions, sectionalization equipment is needed. A minimum of 3 sectionalizers per feeder are recommended for new locations as well as for replacement of damaged sectionalizers. The quantity is worked out as follows:

11 kV Sectionalizers required per feeder

Total number of 11 kV sectionalizers required (3 x 422) 1266 Nos.

<u>Share</u>

| <br>Sectionalizers | 600 Amps | 30 % |  | 380 Nos. |
|--------------------|----------|------|--|----------|
| Sectionalizers     | 200 Amps | 70 % |  | 886 Nos. |

48 Page

3 Nos.

The she was shown by the

### 11 KV Cables

11 KV cable is required for connecting the proposed new feeders as well as for adding/replacing the under-size/deteriorated cable. The quantity is worked out on the basis that an average length of 300 meters of 500 MCM cable is required for each feeder from the panel in the grid station to the first riser pole of the feeder. In case of Bifurcation there can be 2 proposed feeders in some of the cases and in the rest there would be one proposed feeder from the new one so it would be calculated as:

| Feeders involved after bifurcation and rehabilitat | ion   |         | 506 | o Nos. |
|----------------------------------------------------|-------|---------|-----|--------|
| Average length of S/C cable per feeder             |       | ÷       | 300 | ) M    |
| Therefore length of cable required                 | 0.3 x | : 506 = | 1.  | 52 KM  |

### New LT Lines

Based on the estimation of the previously executed LT Proposals, it has been found out that New Ant Line of approximately 0.46 km is being utilized per proposal on an average. Based on this estimation, the LT line conductor for a total of 3406 LT Proposals is calculated as follows:

Total LT line required: 0.46 x 3406 = 1567 Km These LT Lines will be utilized on the New Transformer Substations being used in the LT Proposals

#### LT Line Reconductoring

The average LT line reconductoring per LT rehabilitation proposal is estimated as:

3-φ, Wasp conductor line per proposal
0.173 km
The same average has been applied to evaluate the LT conductor quantities which are as under:
Total number of LT proposals for Reconductoring
3406 Nos
LT line Reconductoring (3-φ, Wasp)
3406 x 0.173
589 km

### ABC Cable

Proposed replacement of 466 KM bare conductor with ABC cable for high loss feeders especially in Kunda infested areas within the city as well as rural where higher rate of pilferage of electricity and it provide higher safety and reliability of the system.

| ABC Cable of 95 $mm^2 =$ | 318 Km |
|--------------------------|--------|
| ABC Cable of 50 $mm^2 =$ | 148 Km |

### New 11 KV Line

| Total number of LT proposals                           | 340         | 6 Nos. |
|--------------------------------------------------------|-------------|--------|
| Average length of 11 kV line extension per LT proposal | 0.11        | KM     |
| Total length of new 11 kV line (Rabbit conductor)      | 3406 x 0.11 | 375 KM |

### D-fuse fittings (Drop-out Cut-outs)

Replacement of D-fuse fittings (drop-out cut-outs) is estimated as 14 % of the total number of transformers. The total quantity of D-fuse fittings is therefore worked out as follows:

| Total transformers up to June 2019-20 | 177,716 Nos. |
|---------------------------------------|--------------|
| Total D-fuse fittings required @ 14%  | 24,880 Nos.  |

### New Transformer Sub-Stations

These will be required for installation after extension of HT lines to minimize the high loss LT lines or to install under the existing HT line to take up additional loads. The quantity is estimated as 90% of the LT Proposals.

| Total LT Proposals                                           | =  | 3406 1 | Nos.      |
|--------------------------------------------------------------|----|--------|-----------|
| New additional transformer sub-stations required: 3406 x 90% | D. | =      | 3065 Nos. |

### Share of Different Ratings of Transformers

| 25 kVA  | 12 % | 3406 x 12 % | 375 Nos.        |
|---------|------|-------------|-----------------|
| 50 kVA  | 31 % | 3406 x 31 % | 920 Nos.        |
| 100 kVA | 45 % | 3406 x 45 % | 1396 Nos.       |
| 200 kVA | 12 % | 3406 x 12 % | <u>375 Nos.</u> |
|         |      | Total:      | 3065 Nos.       |

## **Energy Meters**

The requirement of energy meters for replacement against damaged/defective meters is estimated as follows:

1-phase defective/damaged energy meters upto 2019-20 = 315825 Nos.
3-phase defective/damaged energy meters upto 2019-20 = <u>8362</u> Nos. Total 324187 Nos.

Therefore, requirement of total no. of energy meters for the further 5 years will be increased by 1% each year.

### P.G. Connectors

The requirement of P.G. Connectors has been estimated as follows:

| Total customers of MEPCO upto 2024-25              | 8347833Nos.             |
|----------------------------------------------------|-------------------------|
| Estimated customers requiring P.G. Connectors (50% | Approx.) 4,173,916 Nos. |
| Share                                              |                         |
| 1-phase services requiring connectors (80%)        | 3,339,132 Nos.          |
| 3-phase services requiring connectors (20%)        | <u>834784 Nos.</u>      |

Total: 4,173,916 Nos.

## Status of Study Based Distribution System Planning Based on GIS Mapping and the Transition Plan

The status on the mapping of HT and LT network and studies based on GIS mapped network on modern planning analysis tool(s) is provided.

| Sr.   | r,<br>Noscrintion                                                                                                                                                                                           |      | Quantities |         |         |         |         |        |  |

**建成**有效的 网络金属金属

a chairthean an the state

Multan electric power company (MEPCO) is comprised of 1577 No. 11kv feeders having length of 78308 KM emanating from 128 No. 132 kV sub-stations.

MEPCO is pioneer among the Discos of Pakistan to start GIS activity of its distribution system and till June 2020, 1439 No. 11 KV feeders have been digitized. MEPCO has developed its resources at sub division level for carrying GIS field survey of its HT /Network and remaining feeders of MEPCO will be completed by MEPCO at its own resources.

Technical loss evaluation and GIS mapping / updation of HT network and 10% of LT network was completed by M/s Power planner Intl. GIS mapping /updation of HT network and remaining LT network GIS mapping will be carried out by MEPCO resources.

In order to carry out GIS field survey and its updating, tolls like GPS sets, computers, and printers will be required.

If GIS mapping /updation of remaining HT and LT network will out sourced then the cost of carrying out GIS based mapping of HT network is taken as Rs. 300/km whereas for out sourcing of LT network Rs.260/ km.

#### C. Other Functional Improvement Plans:

### i. Commercial Improvement Plan

This plan covers the commercial improvement activities including but not limited to metering (including AMRs, Mobile Units based meter reading, improvement in billing systems, anti-theft initiatives, consumers database update, customers services improvement initiatives etc. The scope that what will be done in each of the five year under this business plan is provided here. The narrative shall is supported by justification.

#### **DIIP7 - Commercial Improvement Plan**

The Integrated Commercial Improvement Plan (ICIP) broadly aims to demonstrate commercial loss reduction, improvement in revenues and improvement in customer services through process automation, transparency, accountability, and improved productivity in order to create a foundation for sustainable commercial operations. Additional goals and objectives include:

Please refer table DIIP-4 for complete mapping of ICIP with goals and objectives. Here are the highlights related to commercial interventions:

- Improving MEPCO's operational efficiency through:
  - o Reduced commercial losses by 1% progressively over the period of five years
  - Maintaining revenue recovery up to 100% in next five years

Improving customer care and services:

- o Reducing complaints related to billings to less than 0.01%
- O Minimizing new connections installation duration to comply with NEPRA's requirements
- Minimizing reconnection installation duration to comply with NEPRA's requirements
  - Maximizing the time between date of receipt of bill and due date (07 days)

Improving MEPCO's infrastructure:

o Expansion of AMI to reduce commercial losses at high-end customers, this contributes to reduction in commercial loss

Other related objectives:

#### State Constant State Constant

Distribution Company Integrated Investment Plan (DIIP) / Business Plan - MEPCO

#### 

- Streamlined procedure without compromising system of internal controls
- Re-direction of documents on an efficient path to reduce revenue cycle and process cycle time

stary and

- Faster complaint resolution and timely availability of accurate information for better decision making
- Increased accuracy of billing through reduction of human interface in commercial processes
- Increased efficiency, easy access and administration through an online complaint system

### Problem Statement (Baseline-Defined)

The current commercial operations of DISCOs were legacy based and did not offer much in terms of transparency, data accuracy, system efficiency and services to consumers. Therefore, there was a dire need to improve commercial procedures and bring them at par or close to best practices adopted by utilities worldwide. The commercial cycle started with meter readings (which was manual), billing (which was being done through a legacy billing system), collections and customers services, which needed considerable improvements.

#### Response

As a result of comprehensive planning exercise, MEPCO has identified some low cost and quick impact interventions that would transform the way MEPCO operate commercially and would bring a paradigm shift in its commercial operations. The ICIP is an optimal fusion of all the activities that would be implemented through the course of five years to revolutionize the business practices adopted by MEPCO and take its commercial operations further.

The ICIP offers a holistic approach as it not only targets the main goal of the organization i.e. increased revenues but also takes the customers' perspective into consideration through improved services. The ICIP starts with striking the heart of commercial operations i.e. the provision of correct consumer and billing data. Hence, the Improved Meter Reading (IMR) initiative was designed to correct the baseline so that if any consumer was under billed or over billed, it might be adjusted accordingly and also the consumer database is also correct with regards to its tariff and other important parameters. The IMR was a pre-requisite for the Mobile Devices Project. To further strengthen the meter reading process and make it more stringent against inaccurate readings, the support of latest technology is being utilized thus, MMR is being implemented across MEPCO. This will not only enhance the capability of meter readers to take accurate readings but will also build the confidence of consumers in the bills that they receive. MEPCO has already converted its meter reading on MMR and has achieved significant results in this regard.

Special attention will be paid to all three phase consumers of MEPCO with a load above 5kW whereasconsumers having load 20kW and above in all MEPCO and all tubewell consumers of Multan, Khanewal & Vehari circles were already covered by AMRs under USAID Power Distribution Program (PDP). All AMR meters of Whole Current meters are having remote connect-disconnect capability to help the DISCOs to remotely connect or disconnect the customers on non-payment. The AMR meters are enabling the DISCO to give special treatment to its high revenue consumers by getting accurate and timely readings. Another aspect of installing AMRs is the trigger that they send to the DISCO in case of any potential thert. It will add another level of monitoring to the existing mechanism of the DISCO while a separate cell will be established as well to counter the alarms triggered by the AMR meters.

Further, in order to curb potential theft and non-recovery, a surveillance unit will also be setup across the DISCOs that will be responsible to monitor incidents of theft and guard the revenues of the company. This cell will also enforce the nonpaying consumers to pay their outstanding dues. To achieve excellence in customer services, the Customer Service Centers (CSCs) will be upgraded in each subdivision. These centers will facilitate the consumers and improve the brand image of MEPCO in the eyes of the consumers. In conjunction, a Customers Management System (CMS) will be launched all across MEPCO, along with a toll free number where consumers can file their complaints.

All these integrated commercial efforts will create a synergized effect of improving the commercial performance of MEPCO and making it a more profitable entity. Therefore, based on the return on investment offered, these projects have been chosen.

Please refer table DIIP-18 above for summary scope by year and refer to **Annexure-10** for details on scope and cost.

### AMIs Extension

AMI technology has been designed to assist MEPCO in achieving significant improvement in commercial performance through integration of advanced metering processes. MEPCO has an outdated metering system based on electro-mechanical metering subject to inaccurate manual readings and field tampering, resulting in a significant loss of revenue and increased opportunities for theft. The project aims to scale-up the AMR system to help reduce distribution losses, enhance load control and load management, provide automated consumption (billing) data, improve revenue collection and customer services, reduce billing complaints, increase operational efficiency, reduce operating costs and modernize the electricity metering and billing operations while also responding to AMR meter alerts and events.

Thus, under this activity, MEPCO plans to carry out a large-scale meter replacement program across its territory, with AMR (GSM/GPRS) meters for high-end residential, agricultural, commercial and industrial customers. For these meters in-case of disconnection initiated by the backend system, the AMR meter will not reconnect until it receives a reconnection command. These will also have the capability to support two different load thresholds against different time slots (peak/off peak) which will be programmed to activate disconnection/reconnection automatically.

Furthermore, to effectively implement the AMR project and enable a smooth transition, an AMI Cell has been established with the help of USAID PDP within the existing DISCO IT department to undertake the responsibility of AMR system.

MEPCO under this DIIP will further Procure 212570 AMI meters for all remaining 3-Phase Connections.

Further MEPCO has already procured the 135,000 RF based Single Phase Meters for which the Sahiwal Circle was selected and these meters are functioning properly.

Please refer table DIIP-18 above for summary scope by year and refer to **Annexure-11** for details on scope and cost.

### Customers Information System (CIS) & Data Center

The operations of DISCOs are characterized by manual and cumbersome processes, inadequate controls, insufficient commercial focus, limited transparency and a lack of reliable information. As a result, operations are highly inefficient with substantial revenue leakages and poor customer orientation. Integrating and automating core commercial functions like meter reading and billing/collections will minimize the human element in commercial processes and lay the foundation for sustainable revenue cycle reforms.

NY MARKE

Integrating and automating core commercial functions like meter reading and billing/collections that will minimize the human element in commercial processes and lay the foundation for sustainable revenue cycle reforms is being planned. From customer care and metering to billing, payments, credit and collections, these applications enable the customer experience and support all aspects of billing and revenue collections. Augmented with Mobile Meter Reading devices, the CIS has generated more accurate consumer bills and a one-window customer services facility has provided improved customer experience. This will result in improved operational efficiency, increased accuracy of bills, and reduced process cycle time and more efficient customer services with a reduction in customer complaints.

CIS is a web based application system. The required servers and allied hardware has already been provided earlier by PDP. PDP-PITC developed the CIS application whereas Oracle license for database got purchased by MEPCO. The CIS rollout comprises of numerous elements including the application software, database engine, computer hardware and networks (LANs and WANs), network installation and testing, data conversion from legacy system to a new system, data cleansing, pre-installation and on-the-job training, and operational support for a limited time. Now CIS has already been installed in all 9 Circles but time to time modifications in the applications are still being carried out which will be implemented by PITC. However, it has been felt that there is a strong need to replace the old servers therefore; MEPCO will replace the servers in the coming years.

In future, MEPCO intends to transfer the CIS servers, installed at PITC to MEPCO data center.

### DIGITAL TRANSFORMATION IN MEPCO

Digital Transformation is the process of using digital technologies to create new — or modify existing — business processes, culture, and customer experiences to meet changing business requirements.

For this purpose IT Directorate has proposed a comprehensive roadmap plan which will change the overall face of MEPCO. MEPCO top management will get the information from digital control room and take the initiatives timely and proactively.

If MEPCO wants to prosper in true letter and spirit and take the benefits of technology then it is proposed that following technologies need to be adopted in future:

57 Page

### A. Enterprise Asset Management

Enterprise asset management (EAM) combines software, systems and services to help maintain, control and optimize the quality of operational assets throughout their lifecycles. Currently in MEPCO there is no any proper Asset Management System operational in MEPCO which is leading to undue cost leakage, asset health status, replace and repair priorities, risk identification,data analytics, etc.

Following are major features/benefits of Asset Management Software:

- Detect potential issues
- Return on Investment
- Real Time Asset tracking
- Data Analytics
- Saving inventory expenses
- Improves asset performance to reduce downtime
- Schedules Preventive Maintenance to prevent problems
- Improves processes such as warranty management

### **B.** Enterprise GIS

Though the DISCOs have learned how to function with bad quality and out-of-date data and in spite of poor operational performance they are still providing services. They connect new customers and distribute energy, but for long outages, damages from false start, unnecessary field work, they simply incorporate in them into energy prices. If power distribution utility has consistent and up-to-date data, then those expenses can be decreased to minimum.

An Enterprise GIS is a comprehensive geographic information system (GIS). It contains all the elements needed to solve utility challenges and includes tools to help you leverage digital maps. The implementation of GIS infrastructure, processes and tools are needed at a scale within the context of an organization, shaped by the prevailing information technology patterns of the day. The system maintains key information, analyzing and distributing it to everyone that needs business intelligence through a system of record, a system of engagement, and a system of insights.

Following are benefits of implementing Enterprise GIS:

- Better Service to customers
  - Ability to locate/inform impacted customers
  - Improvement in trouble call resolution through network analysis
  - Etc
- Improve Efficiency of operations
  - Ability to get accurate network asset information
  - Avoid duplication of effort.

58 Page

- Informed decisions making
- Etc
- Reduce Costs
  - Better network planning/design
  - Reduce manpower through automation
  - Contribute to reducing T&D losses
  - Etc
  - Overall improved reputation & safety of operations

#### C. Meter Data Management (MDM)

Currently nearly 41000 Smart Energy Meters have been installed and appx. 212,570 more three phase connections will be purchased in four years from 2020-21 to 2023-24.

We and the state of the

MDM is an Multi-vendor Enterprise-wide data management solution which receives energy data in many forms and from a growing diversity of network sources like RF, PLC, GPRS/3G/4G. It validates, edits, and formats the data for use by different applications & analysis.

### Following are features of MDM:

- Capacity to archive huge amount of data for years
- Simplify future integration of new AMI technologies
- Manage collection of meter readings and facilitate two-way requests from multiple technologies for the same meter
- Simplify integration of new meter reading and billing system technologies acquired through merger and acquisition
- Validate, edit and store commercial and industrial readings along with mass residential readings
- Smart meter deployment planning and management;
- Make efficient energy buying decisions based on the usage patterns,
- Detecting and reducing unbilled energy.

#### D. Distribution Network Management (DNM)

DNM is a system, capable of collecting, organizing, displaying and analyzing real-time or near realtime electric distribution system information. A DNM incorporates IVR and other mobile technologies, through which there is an improved outage communications for customer calls, provide customers with more accurate estimated restoration times and Improve service reliability by tracking all customers affected by an outage, determining electrical configurations of every device on every feeder, and compiling details about each restoration process.

Main features and benefits are:

- Provides clear and consistent real-time, forecasted, and historical views of the distribution network.
- Allows system operators, field crews, planning engineers and managers to work as a team accessing the same as-operated representation of network grid information.
- Network Connectivity Analysis
- Switching Schedule & Safety Management
- State Estimation
- Load Flow Applications
- Load Shedding Application
- Fault Management & System Restoration
- Load Balancing via Feeder Reconfiguration
- Distribution Load Forecasting

#### E. Outage Management System (OMS)

An OMS provides rapid real time information to predict outages, enabling to respond quickly when faced with extreme weather or excess demand. OMS identify outages and provide instant alerts. OMS systems usually work in tandem with GIS or geographical information systems, CIS or customer information systems and call handling systems such as IVR (interactive voice response).

### Major features usually found in an OMS are:

- Reduced outage durations due to faster restoration based upon outage location predictions.
- Reduced outage duration averages due to prioritizing
- Improved customer satisfaction due to increase awareness of outage restoration progress and providing estimated restoration times.
- Improved media relations by providing accurate outage and restoration information.
- Fewer complaints to regulators due to ability to prioritize restoration of emergency facilities and other critical customers.
- Reduced outage frequency due to use of outage statistics for making targeted reliability improvements.

#### F. Mobile Work Force Management (MWFM)

While remote work offers countless benefits, it can present new challenges as well. With employees working from various locations and less face-to-face interactions with managers and coworkers, the mobile workforce can be tricky to manage. However, with a robust workforce management system, managers can gain insight into what's going on with each employee through one convenient platform.

Mobile Workforce Management is used to manage employees working outside the company premises (field teams) by using mobile devices, mobile aps and PC software.

and the second second second second second second second second second second second second second second second

#### Main features are:

- It provides timestamps and captures locations.
- It offers flexible scheduling.
- It sends alerts in real time.
- It supports customization according to industry needs.
- It allows seamless reporting and third-party integrations.
- Less down time, fewer inefficiencies, and ultimately, better performance.

#### G. Transformer Monitoring System (TMS)

To achieve an appropriate level of safety and reliability in power grids, real time monitoring of the grid is considered as an essential requirement. In the existing distribution system of DISCOs there is no protection for a distribution transformer other than D-Fuse which is unfortunately, not properly implemented in the field. As per survey of an independent 3<sup>rd</sup> party, more than 80% of breakdown in field is being faced in 100 & 200 KVA transformers which indicate the necessity of an adequate protection. Real time monitoring of distribution transformer will enable the utility to monitor critical electrical parameters i.e. voltage, current, harmonics, active, reactive and apparent power, power factor, ambient temperature, etc.

Fundamental aspiration of any DISCO is to appease its customers by its performance and reliability. There are state of the art monitoring and control mechanisms installed in power grids which play vital role in keeping utility's power system up and running. Distribution transformer is another critical and valuable component in power system especially in distribution grids as it is the source of supply to consumer. Consequently, it is prone to different kind of faults and problems.

#### Main Features:

- It prevents circuitry from damage
- Avoid interruption in power supply
- Remove power blackout at pick hours
- Accident prevention
- Transformer safety

#### H. Enterprise Analytics

Companies need to know what data they should be analyzing to ensure that the right employees have the right access to the right data sources to present data visualizations that provide business leaders with the real-time insights they need.

A form of big data analytics where an organization can perform analytical processes on the data stored across the organization. It is used by data analysts, big data analysts and/or web analytics to extract meaningful data or relations from the raw data repositories it has.

62 | Page

Enterprise Analytics is a process by which businesses use statistical methods and technologies for analyzing historical data in order to gain new insight and improve strategic decision making.

### Following are main features of Enterprise Analytics:

- Decision Analytics: Supports human decision with visual analytics
- Descriptive Analytics: Gains insight from historical data
- Predictive Analytics: Employs predictive modeling using statistical and machine learning techniques
- Prescriptive Analytics: Recommends decisions using optimization, simulation, etc.

Please refer to Annexure-12 for details on scope and cost.

### Customers Service Center (CSC) Up-grade and Complaints Management System (CMS)

Efficiently Customer Services are a critical success factor for MEPCO who bear a significant responsibility to provide continuous and reliable services to their customers. Currently following services are being provided to Regional Customer Services Centre, MEPCO H/Q Multan.

#### Interactive Voice Recording System (IVR).

IVR is a technology that allows a computer to interact with customers through the use of voice input via keypad and has been introduces at MEPCO CSC to allow callers to lodge various complaints. Through Toll Free No. 0800-63726

#### Queue Management System.

Queue Management System is designed to help managers through enhanced customer service, improved efficiently and reduced costs. If comprises a token dispenser and counter display alert system with four counters at MEPCO's Customer Services Centre. Different complaints are entertained at respective counters and token are issued to walk-in customers to accurately detect the number and behavior of people in the queue.

#### Online Complaint Management System (OCMS).

OCMS is one of the latest productivity entertainment tools widely organizations where there is a need to book complaints via operators and analyze the complaint that are make or are pending. Through this, the concerned Customer Services Representative (CSR) register complaint and fills out the requisite information received through the complainant.

Thus, by optimizing the complaint handling process, speeding up the turnaround from complaint submission to resolution, and keeping the overall quality of online customer complaint system always reading for audits, this initiative aims to ensure transparently and efficiently of commercial procedures while bringing about a fundamental change in the work culture. While the current OCMS can only pick basic information of customers, when interfaced with CIS, we will be able to get comprehensive consumer information for efficient complaint resolution. This will further create a positive image of MEPCO for the customers, motivate employees to work the overall performance improvement of the Company and provide an environment for the sustainability of the new technology and improvement in OCMS.

Regional Complaint Centre, MEPCO is dealing complaints received from following formations.

- 1. Prime Minister's Delivery Unit, (PMDU) Islamabad Complaints.
- 2. Federal Complaint Cell (FCC), Ministry of Energy (Power Division) Islamabad Complaints.
- 3. MEPCO Online Complaints received through MEPCO Toll Free No. 0800-63726.
- 4. Walk-In Customer Complaints.

5. Complaints Marked by CEO MEPCO H/Q Multan.

6. Complaints' Received through DAK.

All above complaints received in CSC MEPCO H/Q Multan forwarded to concerned SDO/XEN/SE through Online Complaints Management System (OCMS) and also OCMS sends SMS of complaint details concerned SDO/XEN/SE for early resolved.

After redressal of complaints MEPCO CSC send detail report to concerned offices.

Available resources at CSC MEPCO H/Q Multan.

- 1. Interactive Voice Recording System (IVR)
- 2. Queue Management System.
- 3. Online Complaints Management System (OCMS)
- 4. 10 Nos. Computers.
- 5. 04 Nos. Lines for MEPCO toll free No. 0800-63726 for Online Complaints.
- 6. 04 Land Lines for follow up of all complaints.
- 7. 01 No. Cell Phone for follow up of complaints.
- 8. Fax machine.
- 9. Printers.
- 10. Photo Copier Machine.
- 11. Scanners.

These facilities are running at MEPCO H/Q and All Circles. Now MEPCO plans to establish the same in each Sub Division till ending 2023.

Please refer table DIIP-18 above for summary scope by year and refer to Annexure-13 for details on scope and cost.

#### Surveillance

T&D losses of DISCOs are one of the primary causes for Pakistan's circular debt in the energy sector. Power theft is a major contributor towards T&D losses and poor collections in the DISCOs. In MEPCO currently Monitoring & Surveillance (M&S) department is working at Head quarter level to carry out investigations on public / consumers complaints received from Ministry of Power Division, Prime Minister Delivery Unit, S&I PEPCO, Info reports, NAB, FIA, Chief Executive MEPCO, Roshan Pakistan and Open Katchery. Checking / raids of suspected consumers assessed in detecting theft of electricity and making strenuous efforts regarding eradication of the menace of pilferage of electricity.

Thus, with an overall objective of increasing collections and decreasing losses, MEPCO's M&S department is identifying discrepancies in metering equipment's during monthly random / routine checking and raising detection bills in consultation with respective DMOs / AMOs. The procedure for surveillance includes survey and inspection of theft cases through coordinated field teams, prosecutable evidence collection through standardized forms, photographs and defined procedure, FIR application and registration, penalty (detection bill preparation), legal action and case management.

64 Page

As part of this project, surveillance teams will be formed at Division Level to perform Surveillance / M&S to improve recovery and reduction in theft for which 38 Nos vehicles and other allied accessories are required. For prompt surveillance on the AMI alerts, M&S and M&T staffs have been working jointly to visit the sites and detect problems and discrepancies to avoid any revenue losses. Surveillance will be carried out on the discrepancies pointed out by the meter reader / follow up teams where IMR/ HHU are being implemented along with meters that have not been replaced yet. Random surveillance will also be carried out in high end commercial and residential areas and those with high loss feeders.

Please refer table DIIP-18 above for summary scope and refer to Annexure-14 for details on scope and cost.

### ii. Financial Management Improvement Plan

MEPCO has already implemented ERP with USAID PDP's assistance. The costs for ERP implementation have already been covered. Further USAID PDP has assisted MEPCO to improve the internal audit function and audit and accounting manuals. Provision for covering the bandwidth operational costs is also made under this DIIP for ERP. Further staffing required to scale ERP company-wide is part of the HR plan.

DIIP8 - Financial Management Improvement Plan

### Financial DIIP- MEPCO

# Description

FY 2020-21 FY 2021-22 FY 2022-23 FY 2023-24 FY 2024-25 5-Year Total

1 ERP

Financial Management, Materials Management & Human Resource Management Modules are already implemented and online.

We have started work on Pension and work flows, PM/PS will be kicked off during 2022 . SAP Upgrade will commence during 2024-25.

#### SAP Plant Maintenance

SAP Plant Maintenance (SAP PM) application component provides an organization with a tool for all maintenance activities to be performed. All the activities that are performed under maintenance are interconnected and hence this module is closely integrated with other modules - Production Planning, Material Management, and Sales and Distribution.

Plant Maintenance contains the following sub modules -

- Management of technical objects and equipment master record.
- Planning of maintenance task.
- Manage workflow notifications and work orders under maintenance order management.

Following activities are performed under Plant Maintenance -

- Inspection
- Preventive Maintenance
- Repair

Following are the key modules in which integration is performed with Plant Maintenance

- Material Management
- Sales and Distribution
- Personnel Management
- Controlling
- Production Planning
- Project Systems

#### Project Systems

Project System is one of the key modules of SAP to perform project and portfolio management. It helps to manage the project life cycle starting from structuring to planning, execution, until the project completion. Project system is closely integrated with other SAP modules like logistics, material management, Sales and Distribution, Plant Maintenance, and Production planning module

As per budget, projects can be categorized in the following categories,

- External Financed Projects
- Internal Financed Projects

Following are the key steps involved in Project process flow -

- Create Templates/WBS
- Create Project
- Project Planning
- Budgeting and Release
- Project Implementation
- Project Completion

Following are the key modules in which integration is performed with Project Systems

- Finance & Controlling
- Material Management
- Sales & Distribution
- Production Planning
- Personnel Management
- Plant Maintenance

#### Pensions:-

Pension is module to be covered under FICO and HCM, we need configure at our SAP system ,We are in process of automation of retired employee pensions. We need to buy 25 blocks to buy from SAP. Where as we 36 Blocks already which we are managing the mepco regular employes.by emplementing this module we can distribut the employe pention like our salery already through SAP.We are expecting we can configure the required configuration at our SAP system by our own resources.We have to buy sap blocks which cost us approximate 25 M. Once we configure the system then we need to buy the required users blocks which is expecting by June 2021.

#### iii. Human Resource Improvement Plan

This plan covers the HR improvement activities, revamping / addition of training facilities, training of employees through external facilities, improving the working environment etc. Under this section scope that what will be done in each of the five year under of business plan is discussed. The narrative shall also be supported by the justification.

### DIIP9 - Human Resource Improvement Plan

HR DIP-MEPCO

| # Scope | FY21 FY2 | 2 FY23 | FY24 | FY25 | 5-Year Total |
|---------|----------|--------|------|------|--------------|
|         | •        |        |      |      |              |

Improving the Working Env. Of officesFurnishing the Office Buildings with new furniture andallied equipment in order to improve the working

| 2 Trainings                                             | Trainings of officers and officials to improve skills                      |
|---------------------------------------------------------|----------------------------------------------------------------------------|
| <b>3</b> Improving Health & Education facilities        | Implementation of Well fare Policies particularly educational scholarships |
| 4 Manpower Plan & Revision of<br>Organization Structure | Align org structure with business strategy                                 |

The Human Resource Improvement Plan (HRIP) broadly aims to increase the functional capacity of DISCO staff by providing the institutional model for technical and behavioral skills among the company's employees. It also aims to increase the productivity and quality of services provided both internally and externally, creating a foundation for sustainable HR operations.

Please refer table DIIP-9 for detailed mapping of HR initiatives with goals and objectives, with a summary mapping discussed below:

68 Page

Human-ware:

- Improving MEPCO's infrastructure:
  - O Starting training and capacity building initiatives
  - 0 Staffing / Recruitment

Org-ware:

- o Manpower Plan & Revision of Organization Structure
- 0 Improving office facilities/work environment
- o Conducting motivational campaigns
- o Preparation of MEPCO HR Manual

Please refer Annexure-16 for details on scope and cost.

Further more we can connect the system with biometric machansim for authentication /varification of pensioners and it can be distribute centrally llike we are doing with our regular employee salaries.Pension system will help us to control any duplication/miscalculation.

### Dash Board:-

We are live with SAP since 2018, now we feel to facalitate our management to get reports on single click. We need to configure our SAP system to activate the dash board in SAP.We need to out source the project to get it complete. We are planning it should be completed by 2022-2023. The approximate cost for the project 15 Millions.

### Upgrade SAP

We are using sap Ecc6.7 since we installed at our Mepco.SAP ECC6 series is abasolute since 2015, we need to upgrade our SAP and our data centre hardware to meet SAP HANA which is latest available release.That need complete system configurations and implementation of entire system.

This very sensitive issue that our all customization will not be upgraded so we need experties to implement the project. We need to outsource the project to some SAP implementation partner. We are expecting the total project cost around 30 Millions. We can plan this activity fiscal year 2024-25

HCM work flow This has been decided to implement HCM work flow to copup real benefits of our HCM module. We have identified 52 work flow to be implement at our current HCM.

We need to get it done by external sourse .we are in process of RFQ and analyzing the project.We are expecting it would be done during 2021-22.our estimate for the project is 3.5 Millions.

#### E-Tendering:-

MEPCO is working on E-Tendering project which would be accomplished within next financial year.

#### **FICO Integration:**

We need to configure the our billing system (CIS) with SAP.Need external resource to out source the project. The process wil help up to get online data from billing system.

### Multiyear Tariff (MYT) Petition

MEPCO has planned to prepare and submit its Multiyear Tariff Petition for the period 2021-25 in accordance with the NEPRA Tariff Guidelines-2015. The objectives of Multiyear Tariff Petition aim to increase the stability and predictability of future revenue chain of the licensee (MEPCO). It focuses on rationalized increase in the demand of electric power, expansion of facilities and expenditure on O&M (OPEX) and investment activities (CAPEX). Further the Multiyear Tariff Petition would minimize the risks of regulatory assessment by NEPRA and MEPCO would be in the better position for planning and strategic decision making.

Please refer Annexure-15 for details on scope and cost.

### Improving the Working Environment

MEPCO contains the Fleet of 1137 vehicles of different categories which are following:

| Type Of Vehicles | No Of Vehicles | Type Of Vehicles | No Of Vehicles |  |  |  |
|------------------|----------------|------------------|----------------|--|--|--|
| Cars             | 29             | Coasters         | 10             |  |  |  |
| Jeeps            | 145            | Bus              | 1              |  |  |  |
| Vans             | 32             | Cranes           | 55             |  |  |  |
| Double Cabins    | 32             | Aerial Buckets   | 9              |  |  |  |
| Single Cabin     | /71            | Eatly Lifters    | 24             |  |  |  |
| Pickups          | 471            | TOIR Litters     | 24             |  |  |  |
| Trucks           | 236            | Rikshaws         | 70             |  |  |  |
| Trailors         | 17 .           | Tractors         | 6              |  |  |  |
| Total =1137      |                |                  |                |  |  |  |

Most of vehicles have completed their useful lives; approximately 600+ vehicles are more than 25 years old. The phenomena has vital expects of increasing expense on day to day repair the budget allocated from the wear and tear for 2019-2020 financial year 50 million has been consumed whereas the total budget for the P.O.L is approximately 350 million which consumed every year before the end of financial year, the field formation concentrate on the operation duties owing to emergency and do not bother to get the vehicle repair timely. which Further deteriorate the condition of vehicle and others excepts cannot getting vehicle is the budget allocated is not according to the requirement of held and only fulfil the demand of P.O.L and the maintenance / repair is either postponed are ignored due to non-availability of funds.

The repair is carried out as per SOP devised by MEPCO but the expenditure is increasing tremendously due to old obsolete models of vehicles which consumed P.O.L at maximum being old and ancient Technology

In this context is stated that MEPCO BOD has approved amortization policy for which phase wise demand of funds has been suggested and Finance Director MEPCO is purposing budget provision for the next Financial years. Hence the proposed purchase of vehicle for MEPCO Officers is mentioned in the further budget plan of 5 years. The saving analysis of the company is also prepared by Finance Director which shows cost saving of 110 million rupees per year.

| TRANSPORTATION PLAN EXPENSE FOR NEXT FIVE YEARS |     |             |     |           |     |       |     |                |     |          |
|-------------------------------------------------|-----|-------------|-----|-----------|-----|-------|-----|----------------|-----|----------|
| Description of Items                            |     | 3/8/02/02/6 |     | 120759257 |     |       |     | 141172 9/1 ··· | 198 | 17202035 |
|                                                 | No. | Total       | No. | Total     | No. | Total | No. | Total          | No. | Total    |

#### Maternity Charges for delivery in Hospital:

- i. Rs.20,000 for normal delivery in Hospital.
- ii. Rs.50,000 in C.Section cases
- iii. Rs.5,000/- if delivery is conducted at residence of the employee

#### **Reimbursement Facility**

Reimbursement on twice the rates of CMH on referred cases. Reimbursement on treatment of chronic diseases on actual expenditure.

#### Reimbursement Limits.

- i. Where the Medical Facility Exists. Upto 01 month's running basic pay in a financial year.
- ii. Where the Medical Facility Does Not Exist.
- Upto 03 month's running basic pay in a financial year.
- iii. The chronic and life-saving emergency cases exempted from above restriction

#### Advance for Non-Fatal Accidents.

In case of non-fatal accident, the concerned Drawing & Disbursing Officer (DDO) will arrange advance payment.

### Reimbursement Limits.

Limit or reimbursement of medicine be enhanced as under:-

Where the Medical facility Exist.

Upto 01 month running basic pay of the employee.

Where the Medical Facility Does Not Exist.

- Upto 03 month running basic pay in a financial year.
- Note: There will be no restriction on reimbursement for treatment of chronic diseases as determined by the board.

MEPCO is already improving medical facilities for MEPCO employees by providing best facilities. In this connection, MEPCO has made agreement with Ch. Pervaiz Elahi Institute of Cardiology Multan for treatment of MEPCO Patients regarding Heart Diseases. The use of medicated stunts instead of ordinary stunts in Heart Surgery / Angioplasty has been allowed as per recommendation of Treating Consultant if required for MEPCO employees (Serving, Retired and Family Pensioners of MEPCO only) in relaxation of "The Pakistan Wapda medical Attendance Rules 1979.

To provide better treatment facilities, MEPCO signed a contract with Shoukat Khanum Memorial Cancer Hospital & Research Centre Lahore for treatment facilities of cancer patients of MEPCO (Serving, Retired and Family Pensioners of MEPCO only) in relaxation of "The Pakistan Wapda medical Attendance Rules 1979.

### iv. Communications Improvement Plan

ふ

This plan covers the communications improvement activities including but not limited to improving the internal communication amongst employees and external communication with customers to improve image of the company etc. Under this section scope of work is provided to be done in each of the five years under this business plan.

MEPCO Public Relations Department is doing well in promotion of Company's activities for Public awareness. Department is using modern tools of communication like Facebook, Twitter and Whatsapp for fast & effective dissemination of company's message to target audience. Publication of its monthly magazine is effective tool to deliver its activities to lower formations, Ministry and other important departments. MEPCO has revised the yardstick of Public Relations Department and after recruitment of proposed staff further activities will be started for more comprehensive and effective P.R activities.

The Communications Improvement Plan (CIP) thus, offers a holistic approach because it not only emphasizes the importance of public awareness and image building initiatives for the DISCO but also the internal communication.

This plan identified some low cost interventions that would transform the way MEPCO operate their PR department. Frequent consumer awareness campaigns and regular interaction with consumers are few of the highly recommended activities targeting educated and well-informed consumers who are bound to play their role in energy conservation and spread positive messages. In addition, MEPCO will allocate a clearly defined budget and resources for consumer awareness activities. The CIP is an optimal fusion of all such activities that would be implemented through the course of five years by MEPCO to take its communications and outreach further.

Through the initiatives indicated, the CIP aims to improve MEPCO's branding with recognition among local communities and consumers and improved understanding among the young generation regarding their role in energy conservation along with improved corporate communication and increase in the usage of email and telephonic communication amongst MEPCO's staff.

All these efforts will create a synergized effect of improving the communications function of the DISCO and making it a corporate entity at par with utilities worldwide. Therefore, based the maximum band for the buck, these projects have been chosen.

#### A. Internal Communication:

#### Mail Servers:

Before MEPCO could take the initiative to improve communication with its external stakeholder such as consumers and the community as a whole, it must ensure that it has achieved the optimum level required in the internal communication among staff. To achieve this objective, MEPCO should acquire the basis infrastructure that would help the staff to have affective communication among them. The modes of communication that are needed to be strengthened by MEPCO as an organization are electronic communication via email and, telephonic communication over the cell phones.

In order to provide instant access to the information required for the spontaneous decision making and problem solving, MEPCO employees in the officer cadre need to have in their possession, at 国家的现在分词

#### Distribution Company Integrated Investment Plan (DIIP) / Business Plan - MEPCO

least an email address to communicate within the boundaries of MEPCO and a cell phone enabling them to relay their communication outside the premises of their offices. Therefore a mail server is suggested to be deployed within the organization. Scanners will also be installed to ease the email functionality. This will be done right after the communication protocols have been set, user trainings have been imparted and procedures have been finalized; all of which would happen in the first year of Business Plan implementation. In addition, cell phones will also be provided to the officers serving the dual purpose of not only making phone calls but also checking their emails.

a la parterio

#### **Annual Employee Recognition Event:**

It is the duty of an organization to appreciate its employees because as a matter of fact, an organization is in existence only because of its employees. Therefore, MEPCO will organize an annual function to celebrate its successes and achievement in the last year as well as to recognize the employees that have given MEPCO the reasons for celebration through their dedication and hard work. This will not only motivate the employees but will consequently result in creating harmony and mutual understanding among them.

These interventions will ensure that MEPCO establish an effective internal communication setup required to run the organization and its operations, in a more efficient manner.

## B. Public Communication & Outreach Activities:

MEPCO's Public Relations (PR) Departments comprise one PR officer and two clerical staff who dedicate a good portion of their time to issuing rebuttals to inaccurate media reports. The concept of image building and consumer awareness needs improvement. Therefore this plan which actually comprises of a complete portfolio in the realm of Public Communication and Outreach, helping put forward an improved brand image of MEPCO, better customer services and better informed customers through a series of outreach campaigns.

#### 1. Mass Media Campaigns

The Public Relations and Customer Services Departments of MEPCO will design localized campaigns to target consumers on both energy conservation and the timely payments of bills. These campaigns will help MEPCO in its image promotion as a well-run and progressive power distribution company. MEPCO staff will be given an opportunity to talk to consumers through radio, TV and newspapers to educate consumers regarding the distribution business of MEPCO.

In the long run, these campaigns will result in an improved image of MEPCO as a dynamic and customer-friendly entity through external communications that will help to smoothly implement consumer awareness campaigns and will empower the PR Department to deliver assertive communications and outreach on behalf of MEPCO.

#### 2. Public Outreach & Awareness Programs

Consumer outreach activities will help build a relationship between MEPCO and its consumers. Campaigns targeted at schools and universities, and industries, traders and farmers will be planned in close coordination with the relevant departments of MEPCO.

A variety of interventions at schools and colleges will be held including energy conservation seminars, lectures on MEPCO's role as a DISCO, debating, essay writing and painting competitions. These will help in 'the image promotion of MEPCO among school- / college-going students. A

range of consumer awareness material will be disseminated to improve the knowledge of students on energy conservation and efficiency at both homes and schools.

Industries are important consumers of MEPCO therefore targeting industrialists, through seminars at the Chamber of Commerce, will spread energy conservation awareness and the effectiveness of energy audits. Speakers from MEPCO will be arranged to speak with industrialists on selected topics e.g. energy conservation, better relationships between MEPCO and industries and the need for strengthening cooperation to the mutual benefit of both.

Similarly meetings will be organized with Press Club, to gain its support to spread the message to the masses to adopt energy conservation measures and place MEPCO's conservation material in prominent locations.

Farmers, in addition to being important consumers of MEPCO, can play a significant role in the conservation of energy through the use of efficient tube-wells and legally managing their connections. Improved relationships between farmers and MEPCO are the key to discouraging theft and soliciting timely bill payments.

#### 3. Design and printing of Customer Awareness Material

MEPCO's corporate image requires steps to be taken for its improvement and to promotion as a DISCO rather than an electricity generation and supply control entity. A localized media campaign will be designed and executed to create awareness among consumers regarding MEPCO and energy conservation. Material will include news articles, brochures and leaflets, billboards, pamphlets, local cable advertisements and documentaries. A new corporate tagline (slogan) along with business cards will help introduce a uniform public face of the company at the professional level and will be proposed to MEPCO management.

As part of the overall branding campaign, MEPCO's Customer Services Centers will be branded through the strategic placement of standees, banners and other awareness material. Brochures, leaflets and handbooks will be developed for employee safety measures and workplace ethics that will help guide Customer Service Center employees. The proposed action plan includes designing content that educates consumers about MEPCO's role as a DISCO and the different energy conservation measures they can adopt.

#### 4. Student Energy Conservation Programs

Another important intervention is the energy efficiency and anti-theft campaigns consisting of mass media and Informational and Educational Communication (IEC) materials for dissemination to the public as well as internal communications. These are grassroots-level promotions that target awareness at community level or through schoolchildren and college/university students with action-oriented messages, where benefits of proposed actions are quantitative and clear to the audience. For instance, replacing an incandescent light bulb with an energy saver will help reduce consumption by 50%, resulting in money saving and increased availability of electricity.

#### 5. Radio Talk shows

Talk shows aired through radio are one of the cost effective ways to directly reach the consumers and to tame their minds by talking about the positive developments being carried out by MEPCO and showing the positive side of the picture. These talk shows also provide an opportunity to the consumers to take part in the ongoing discussions with the senior officials of MEPCO, turn attention to their complaints, or provide their feedback. MEPCO will launch two seasons of the radio talk shows on the leading FM radio channels, one series of 13 episodes will be aired for a quarter in peak summer season focusing on energy conservation, while other series will commence in peak winter season with an emphasis on the anti-theft.

#### 6. Monthly News Letter

Any progressive organization would like to update the society in general and its employees and consumers in particular, in a progressive manner, about the achievement it is making throughout the course of time. Newsletter is an effective matter to get this done. MEPCO will publish monthly newsletter that will not only contain the updates about the organization but will also include news, events, articles, consumer feedback and other topics of interest as it is being done at present.

#### **DIIP 11 - Communications Improvement Plan**

Rather than presenting the scope in a table it is narrated and explained below:

#### A. Internal Communications

For enhancing email internal communication via email, the company will deploy physical IT infrastructure consisting of one Mail Server and associated paraphernalia. In addition, scanners will be provided in all the distinguished offices of MEPCO to facilitate email communication. Further, to facilitate swift communication amongst the officers, smart phones will be designated for all the officers enabling them not only to make calls but also to check and respond to the emails on the go. Apart from investments in the communications technology, MEPCO will invest in the human aspect as well by arranging at least one Employee Recognition Event each year. It will be a formal event attended by all the employees of MEPCO in which the high-achievers will be acknowledged for their services and successes.

### **B.** External Communications

Public Outreach Office of MEPCO will be strengthened by provision of a Toyota HI ace for rapid outdoor mobility of staff for performing outreach activities in the field.

At least four mass media campaigns in a year will be arranged within the territory of MEPCO, two campaigns will be based on the theme of anti-theft while two will focus energy conservation. These will include publishing advertisement in leading local newspapers, and relaying the message using the electronic media: TV, Cable and FM Radio. In addition, billboards, pole streamers and similar mediums will also be utilized to spread the message among the consumers.

Apart from these campaigns, public outreach programs and awareness sessions will be arranged at university, community and district levels. It is anticipated that at least four sessions per year at each level will be organized to reciprocate the message.

Printed material is an effective way to penetrate within the masses therefore, consumer awareness material will be designed and printed which includes but not limited to brochures, pamphlets, leaflets, flyers etc. In addition, a newsletter will be also published each month as it is being done at present.

Please refer Annexure-17 for details on scope and cost.

#### v. Linemen Training, Tools and Equipment

1- MEPCO H.S.E department is now being operated through Manager H.S.E by creating position of Manager H.S.E and also created Nine positions of A.Ms H.S.E at each Operation Circle. Further as future plans, 4 more A.Ms and 26 Safety Inspectors positions are required to be created as one A.M and 2 Safety Inspectors in each 13 Circles of Company who will effectively

oversee the implementation of Safety S.O.Ps to eliminate accidents and injuries of MEPCO. Employees.

- 2- MEPCO & LESCO jointly prepared H.S.E Manual which is submitted to NEPRA for approval.
- 3- Conduction of job specific training at RTC and CTCs to employees of all cadres.
- 4- Conduction of H.S.E awareness training at RTC & CTCs for staff and officers.
- 5- Conduction of Safety Seminars at each Division on monthly basis.
- 6- Conduction of Safety Committee Meetings at Sub Division, Division, Circle and Regional levels on monthly basis.
- 7- Hazard identification and its removal by field formation.
- 8- Conduction of Management H.S.E walk-through / site tours.
- 9- Provision of First Aid facilities.
- 10-Conduction of PPE Parade at Sub Divisional level on monthly basis.
- 11-Provision of very good quality T&P and PPE to line staff.Nomination of Inspectors for National and International inspections of material for quality assurance.
- 12-On daily basis, SEs (OP) will provide abstract of HT line and Transformer Sub Stations complaints attended with PTW / without PTW and action taken against safety violators.
- 13-Conduction of H.S.E Audit of each Sub Division on quarterly basis by H.S.E Staff.

14-Proper implementation on permit to work system through PDC.

Currently MEPCO is working on meeting its demand for Transport, Tools and Personal Protective Equipment for Lineman and procurement of Bucket Mounted Vehicles and one educational Bucket Mounted Vehicle is reached in Regional Store.

In this business plan MEPCO has incorporated such needs in lineman safety with extensive homework and calculations. In this plan, 231 Bucket Mounted Trucks for Transport and mobility with safety of lineman, Linemen T&P and PPEs have been catered with to make MEPCO lineman safe, effective and efficient.

This plan under safety when executed will save MEPCO from huge losses due to poor quality of work and rampant accidents of experienced lineman caused in the shape of heavy financial losses and human loss and it will also improve response to complaint time resulted in improved customer services.

Please refer Annexure-18 for details on scope and cost.

## Section -VI Costs and Financing Plan

A. Capital Expenditure and additional Operating Costs for Expansion and Rehabilitation (this section also includes the total cost of DIIP):

### ii. Non-tangible Benefits

The other benefits like improvement in voltage profile, improving the overloading of the network are placed at **Annexure 8**.

## iii. Financial Analysis for the entire Transmission and Distribution Investments

• Internal financial rate of return (IFRR)of the STG investments and Distribution System Investments is placed at Annexure-19.

### iv. Sensitivity Analysis

The IFRR also contains the Sensitivity Analysis for the following scenarios are placed at Annexure-19

- Increasing costs by 7.47%, 10%, 12% and 15.02%
- Decreasing benefits by 7.47%, 10%, 12% and 15.02%
- Increasing costs and decreasing benefits by 7.47%, 10%, 12% and 15.02% each.

# Section - VIII Financial Projections for FY2021 to FY 2025

Following are provided in Annex-20

i. Profit and Loss Statement

il.

ii. Balance sheet and Cash Flow.

## Section - IX Investment Plan Implementation

#### Business Planning Organization for Preparation of Investment Plans

The stewardship responsibility of the Board of Directors (the Board) is to have an oversight role over the management of the DISCO, which is responsible for the day-to-day conduct of the business. The Board must assess and ensure systems are in place to identify and manage the risks of the Company's business with the underline objective of preserving Company's assets and steering it in a strategic direction that ensures fulfilling its objectives. The Board, through the Chief Executive Officer (CEO), sets the attitude and disposition of the Company towards achieving sets of goals and objectives, in compliance with applicable laws and regulations. Business Plan is a tool that helps a company to achieve its goals and objectives.

MEPCO has started the business planning initiative / DIIP that will entail company's goals and objectives to the initiatives that are required to meet those objectives. The integrated cross-functional plan will cover the core business (transmission and distribution system expansion and rehabilitation) and support business (improving the commercial, financial, HR and other functional improvement) initiatives to meet the stated objectives. In-order to sustain this initiative, a strategic planning organization is already established within MEPCO, who can assist the CEO of the Company to prepare, maintain, improve, monitor and get implemented the business plan.

Moreover, in businesses comparable to the scale of MEPCO, the planning restructuring of the overall organization including formation of Business Unit at the central level is a very essential step.

# Section - X

# Environmental and Social Assessment and Mitigation Plans

There will be environmental and social impacts of the implementing these projects. A detailed environmental and social assessment is required to be carried out to successfully complete this project.

# Section -IV Next Five Years Goals and Objectives

## i. Goals and Objectives Matrix

The goals are long term targets and objectives are medium term targets. The objectives defined by MEPCO are SMART i.e. Specific, Measurable, Attainable, Realistic and Timely. The target setting has been done keeping in view what can be <u>achieved optimally</u> in next five years. Table below (DIIP4) lists the goals and objectives for next five years for the company, are prepared by extensive discussions and coordination within MEPCO and the signed-off goals and objectives from initial exercise are placed at Annexure-4:

|  | Strategic<br>Goals                       | Strategic Objectives                                                               | Target                 | Measurement   | Five Year Objectives FY 2020-21 to 2024-25 |          |          |          |                                | orting           |
